ge'om, 1 gē'ūm; 2 ḡe'ūm, *a.* [S.-Afr. D.] Tilled; broken.

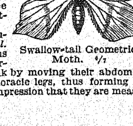
geom., *abbr.* Geometer; geometrical; geometry.

ge-om'a-lism, 1 jı-em'a-lizm; 2 ġe-ŏm'a-liṣm, *n.* *Biol.* The tendency of an organism to respond to the force of gravitation by equal lateral growth. [< GEO- + Gr. *homalos*, even.] **ge-om'a-ly‡.— ge"o-mal'ic,** *a.*

ge'o-man"cy, 1 jī'o-man"sı; 2 ġē'o-măn"çy, *n.* Divination by means of some aspect of the earth, particularly by the observation of points and lines on the earth, or on paper, or by means of the figures formed by pebbles or particles of earth thrown down at random. [< F. *géomancie*, < LL. *geomantia*, < Gr. *gē*, earth; and see -MANCY.] **ge'o-mance†; ge'o-man"ty†.— ge'o-man"cer,** *n.* One who is skilled in geomancy. **ge'o-mant†.— ge"o-man'tic,** *a.* Pertaining or relating to geomancy. **ge"o-man'ti-cal‡.— ge"o-man'ti-cal-ly,** *adv.*

ge-om'e-ter, 1 jı-em'ı-tər; 2 ġe-ŏm'e-ter, *n.* **1.** One versed or skilled in geometry; a geometrician; mathematician. **2.** A measuring-worm; geometrid. There are many varieties of geometers named either on account of their markings, or after the plant on which they feed; as, **chain-dotted geometer, chickweed-g., notch-winged g.,** etc. **3†.** A gager. [< L. *geometres*, < Gr. *geōmetrēs*, < *gē*, earth, + *metron*, measure.]

ge"o-met'ric, ge"o-met'ri-cal, 1 jī"o-met'rık, -rı-kəl; 2 ġē"o-mĕt'rie, -ri-cal, *a.* **1.** Of or pertaining to geometry; according to the rules or principles of geometry; done by geometry; as, a *geometric* surface; a *geometrical* treatise. Where the rules of geometry are used in solutions instead of those of algebra, the expression *geometric* is employed, as opposed to *algebraic*.



Who shall parcel out His intellect by *geometric* rules.
WORDSWORTH *Prelude* bk. ii, st. 6.

Of the real existence of its object, *geometrical* reasoning tells us nothing. MANSEL *Metaph., Real in Cosmol.* p. 308. [A. 1871.]

2. Forming or consisting of regular lines, curves, and angles; as, *geometrical* markings on an insect or on primitive pottery, specif., that of the Mycenæan era, which is recognizable by its rectilinear decorations in the form of bands, triangles, zigzags, etc.— **geometric pen,** a pen or scribing-tool arranged with a crank-mechanism so as to draw on a rotating disk lines similar to the lathe-work on a bank-note. **— g. plane,** in perspective, a ground-plane.— **g. probability,** local probability. See under LOCAL.— **g. radius,** the radius at the pitch-line of a gear-wheel.— **g. shadow** (*Physics*), a shadow as outlined by straight lines drawn from the source of light through the edges of the opaque body, taking no account of diffraction.— **g. spider,** an orbitelarian spider that spins an orb-shaped web, as an epeirid or garden-spider.— **g. stairs,** stairs whose steps are built into the wall at one end and left unsupported at the other.— **G. style,** a style of English architecture, the second phase of the Pointed as developed in England, intervening between the Early English and the Decorated styles. It is characterized by comparatively simple tracery in windows wider than those of the preceding style, and by greater use of wall-decoration and sculpture. Its period is in the middle of the 13th century. See plate of ARCHITECTURE.— **g. tracery,** or **g. decoration,** tracery or decoration in essentially simple or geometrical lines or curves.— **geo"-met'ri-cal-ly,** *adv.* According to geometry or its rules or principles.

ge-om"e-tri'cian, 1 jı-em"ı-trish'ən; 2 ġe-ŏm"e-trish'an, *n.* A person versed in geometry; a geometer.

When a bee makes its comb so geometrically, the geometry is not in the bee, but in the great *Geometrician* who made the bee.

Swallow-tail Geometrid Moth. 4/7

ge"o-met'ri-cize, 1 jī"o-met'rı-saiz; 2 ġē"o-mĕt'ri-çīz, *vi.* [-CIZED; -CIZ"ING.] To become geometrical; to apply geometric methods or principles.

Ge"o-met'ri-dæ, 1 jī"o-met'rı-dī; 2 ġē"o-mĕt'ri-dē, *n. pl.* *Entom.* A family of moths whose larvæ are called measuring-worms, because they walk by moving their abdominal and anal feet up to the thoracic legs, thus forming the body into a loop, giving the impression that they are measuring the space below them. **Ge-om'e-tra,** *n.* (t. g.) [< Gr. *geōmetrēs*, land-measurer, < *gē*, earth, + *metron*, measure.] — **ge-om'e-trid,** *a.* & *n.* **ge"o-me-trid'e-ous‡.— ge"o-met'ri-form",** *a.* *Entom.* Having the aspect of a geometrid moth.— **Ge-om"e-tri'na,** *n.* A superfamily of moths embracing the *Geometridæ* and allies.— **ge-om'e-trine,** *a.*

ge"o-me-trog'ra-phy, 1 jī"o-mı-trog'ra-fı; 2 ġē"o-me-trŏg'ra-fy, *n.* *Math.* The analysis of geometric operations into their simplest elements, to determine their simplicity and exactness. [< GEOMETRIC + -GRAPHY.] — **ge"o-me-tro'graph-ic,** *a.*

Ge-om"e-troi'de-a, *n.* Same as GEOMETRINA.— **ge-om'e-troid, ge-om"e-troi'de-an,** *a.* & *n.*

ge-om'e-try, 1 jı-em'ı-trı; 2 ġe-ŏm'e-try, *n.* [-TRIES, 1 -trız; 2 -triṣ, *pl.*] **1.** The branch of pure mathematics that treats of space and its relations; the science of the mutual relations of points, lines, angles, surfaces, and solids, considered as having no properties but those arising from extension and difference of situation. **2.** A text-book or treatise on this branch of mathematics.

Geometry may be classified (1) according to the method of reasoning used, as *synthetic* and *analytic*; (2) according to the subject-matter, as *plane*, *spherical*, and *solid*; (3) according to the treatment or its purpose, as *descriptive*, *projective*, and *metric*; or (4) according to the axioms with which it sets out, as *Euclidean* and *non-Euclidean*, the latter embracing *elliptic* and *hyperbolic*. See phrases below.

[< OF. *geometrie*, < L. *geometria*, < Gr. *geōmetria*, < *geōmetrēs*; see GEOMETER.]

— absolute, Bolyaian, or **Lobachefskian geometry,** hyperbolic geometry.— **analytic g.,** geometry in which position is indicated by algebraic symbols, and the reasoning conducted by analytic operations. See AXIS; COORDINATE. — **characteristic** or **geodesic g.,** geometry of points and lines on which the geodesic line takes the place of the straight line of ordinary geometry.— **circle g.,** geometry in which the circle is taken as a basis, space being considered six-dimensional and the plane three-dimensional.— **denumerative g.,** the investigation of incidences and coincidences in configurations determined by given conditions. **enumerative g.‡.— descriptive g. 1.** That application of geometry in which the relations of lines and figures in space are studied through their projections on two planes. **2.** Graphic or projective geometry.— **differential g.,** geometry in which the differential and integral calculus is applied to curves and surfaces.— **elliptic g.,** that branch of non-Euclidean geometry which assumes that every pair of parallel lines will meet if produced a certain distance.— **Euclidean g.,** geometry based on the axioms and postulates of Euclid.— **g. of an algebraic curve,** or **surface,** geometry which takes into account only those properties that belong to all curves or surfaces related birationally to the curve or surface in question.— **g. of compasses,** a geometry that postulates the use of compasses in construction but not that of a ruler.— **g. of forces,** the treatment of forces as represented graphically by vectors.— **g. of position. 1.** The theory of change of a locus's position, as determined by change in the corresponding equation: so used by Carnot. **2.** Modern projective geometry: so called because it does not deal with metrical properties.— **graphic** or **projective g.,** that which considers only those properties and relations of figures which are unchanged by projection, as collineations, tangencies, and anharmonic ratios.— **higher g.,** any geometry not elementary.— **hyperbolic g.,** that branch of non-Euclidean geometry which assumes that every pair of parallel lines gradually diverge from each other in both directions.— **kinematic g.,** geometry in which properties of curves and surfaces are treated as functions of the velocities of moving lines.— **line g.,** the geometry of Plucker, which regards the line rather than the point as the element of space.— **non-Euclidean g.,** any system of geometry developed from the assumption that the axioms of Euclid are not all true, especially those about parallel lines.— **plane g.,** that branch of geometry which reasons only about relations in a plane.— **rational g.,** geometry that does not use irrational numbers or ratios.— **Riemannian g.,** geometry in which the straight line is not regarded as infinite.— **solid g.,** or **g. of three dimensions,** that part of geometry which includes all three dimensions of space in its reasoning.— **spherical g. 1.** The geometry of figures drawn upon the surface of a sphere. **2.** [Rare.] Riemannian geometry.— **straight g.,** line geometry.— **synthetic g.,** projective or graphic geometry treated by reasoning upon figures without using analytic (algebraic) operations. **— ge-om'e-tral,** *a.* [Rare.] Geometrical.— **ge-om'e-trize,** *vi.* To study or practise geometry; investigate or proceed according to geometrical principles.

ge"o-mor-phog'e-ny, 1 jī"o-mer-fej'ı-nı; 2 ġē"o-mŏr-fŏġ'e-ny, *n.* *Geol.* The study of the origin and development of topographic features.— **ge"o-mor"pho-gen'ic,** *a.*— **ge"o-mor-phog'e-nist,** *n.* **ge'o-mor"phist‡.**

Geomorphology, or physiography, is the study of the topographical features of the earth, and of the means by which, and the manner in which, they have been produced. In this country the term physiography, or physiographical geology, is firmly established and very widely used. This is unfortunate, because the term was originally proposed and still continues to be employed in a very different sense. It would be an advantage in clearness and precision of nomenclature, if *Geomorphogeny*, which is extensively made use of in Germany, could be substituted.
WM. B. SCOTT *Introd. to Geology*, 2d ed., p. 435. [MAC. '09.]

ge"o-mor-phol'o-gy, *n.* Same as GEOMORPHOGENY.— **ge"o-mor"pho-log'i-cal,** *a.*— **ge"o-mor"phol'o-gist,** *n.* **ge'o-mor"phist‡.— ge'o-mor"phy,** *n.* The theory of the earth's form.— **ge"o-mor'phic,** *a.*— **Ge"o-my'i-dæ,** *n. pl.* *Mam.* An American family of saccomyoidean rodents having a heavy rat-like form, external cheek-pouches, and massive skull with extended squamosals and tubular tympanics; pocket-gophers or pouched rats. **Ge'o-mys,** *n.* (t. g.) — **ge-om'y-id,** *n.*— **ge-om'y-oid,** *a.* & *n.*— **Ge"o-my-i'næ,** *n. pl.* *Mam.* The *Geomyidæ* as a subfamily of *Saccomyidæ*. **— ge-om'y-ine,** *a.* & *n.*

Ge'on, 1 gī'en; 2 ḡē'ŏn, *n.* *Bib.* (Apocrypha). *Eccl.* xxiv, 27.

ge"o-nav"i-ga'tion, *n.* The science or art of navigation by dead-reckoning.

Ge-on'o-ma, 1 jı-en'o-mə; 2 ġe-ŏn'o-ma, *n.* *Bot.* **1.** A large genus of graceful tropical American palms. The fruit is a berry. **2.** Any tree of this genus.

ge-on'o-my, 1 jı-en'o-mı; 2 ġe-ŏn'o-my, *n.* *Geol.* The science of the physical laws of the structure and development of the earth. [< GEO- + Gr. *nomos*, law, < *nemō*, assign.] — **ge"o-nom'ic,** *a.*

ge-oph'a-gy, 1 jı-ef'ə-jı; 2 ġe-ŏf'a-ġy, *n.* The practise of eating clay, chalk, or infusorial or other earth.

Morbid appetite and depraved taste including: (a) *Geophagy* — dirt- or earth-eating. W. L. LINDSAY *Mind in the Lower Animals* vol. i. p. 40. [A. 1880.]

ge-oph'a-gism‡.— ge-oph'a-gist, *n.* One who eats earth; a dirt-eater.— **ge-oph'a-gous,** *a.* Earth-eating; as, *geophagous* races.

Ge"o-phap'i-dæ, *n. pl.* *Ornith.* A family of Australian ground-pigeons. **Ge'o-phaps,** *n.* (t. g.) — **ge-oph'a-pid,** *n.*— **ge-oph'a-poid,** *a.*— **Ge-oph'i-la,** *n. pl.* *Conch.* A suborder or other division of pulmoniferous gastropods with eyes at the extremities of the tentacles, including slugs and land-shells.— **ge-oph'i-lan,** *a.* & *n.*— **ge"o-phil'i-an,** *a.*— **Ge"o-phil'i-dæ,** *n. pl.* *Entom.* A family of chilopodous myriapods having very numerous subequal segments, short feet with single-jointed tarsi, and antennæ with about fourteen joints. **Ge-oph'i-lus,** *n.* (t. g.) — **ge-oph'i-lid,** *a.* & *n.* — **ge-oph'i-loid,** *a.*— **ge-oph'i-lous,** *a.* Ground-loving; of or pertaining to the *Geophila*.— **ge"o-phys'ics,** *n.* The science that treats of the external physical features of the earth; physiography; physical geography.— **ge"o-phys'i-cal,** *a.*— **ge"o-phys"i-og'no-my,** *n.* The physical conformation of the earth's surface.— **ge'o-phyte,** *n.* **1.** A plant growing in earth. **2.** A plant that buds under the ground. Compare HYDROPHYTE and EPIPHYTE.— **Ge"o-plan'i-dæ,** *n. pl.* *Helminth.* A family of monogonoporous planarians having a long flat body, a pedal disk, and a protractile campanuliform esophagus; land-planarians. **Ge"-o-pla'na,** *n.* (t. g.) — **ge"o-pla'nid,** *n.*— **ge"o-pla'noid,** *a.* — **ge"o-po'lar,** *a.* *Astron.* Of or belonging to the pole of the earth, as contrasted with that of the sun. See HELIOPOLAR.— **ge"o-po-lit'i-cal,** *a.* Pertaining to the political development of a people as influenced by their position and surroundings.— **ge"o-pon'ic,** *a.* Of, pertaining to, or of the nature of agriculture. **ge"o-pon'i-cal†.— ge"o-pon'ic†,** *n.* A tiller of the soil.— **ge"o-pon'ics,** *n.* [Rare.] The art or science of agriculture.— **ge-op'o-nist†,** *n.* A farmer. — **ge"o-ra'ma,** *n.* A hollow globe on the inside of which are representations of the earth's natural divisions, to be viewed from within.

geor'die, 1 jōr'dı; 2 ġôr'di, *n.* [Prov. Eng. & Scot.] **1.** (1) A coal-miner. (2) A sailing collier. **2.** A guinea: from the figure of St. George on it. **3.** A miners' safety-lamp invented by George Stephenson. [Dim. of *George*.]

ge"o-ret'ic, 1 jī"o-ret'ık; 2 ġē"o-rĕt'ic, *a.* Designating a crystalline, waxy acid ($C_{12}H_{22}O_4$), made from a species of German lignite. [< GEO- + Gr. *rhētic*, resin.]

george¹, 1 jōrj; 2 ġôrġ, *n.* **1.** [G-] A jeweled figure of St. George slaying the dragon, one of the insignia of Knights of the Garter. **2.** A George-noble. **3.** The neck part of a coat or vest. **4.** A large wig worn in the 18th century. **5.** *Naut.* The gorge or groove of a pulley. [< *George*, proper n., < F. *George*, < LL. *Georgius*, < Gr. *geōrgos*, farmer, < *gē*, earth, + *ergon*, work.] **— brown george** [Eng.], see BROWN.— **George'-no"ble,** *n.* A noble bearing the figure of St. George, minted in England during the reign of Henry VIII. **— lesser G.,** an oval plate of enamel, surrounded by a buckled garter, which bears a golden figure of St. George, and is worn on a breast ribbon. **little G.‡.**

St. George and the Dragon, after the Painting by Raffael in the Louvre, Paris.

George², 1 jōrj; 2 ġôrġ, *n.* **1.** A masculine personal name. **Geor'gie, Geor'die** (*dim.*). **Geor"gi-an'a** (*fem.*). Dan. G. Sw. **Ge'org,** 1 gē'erg, 2 ḡe'ōrg. F. **Georges,** 1 ʒōrʒ, 2 zhōrzh. **Geor"get',** 1 ʒōr"ʒē', 2 zhōr"zhe'; Hung. **Gyorgg,** 1 jəg, 2 ġōġ; It. **Gior'gio,** 1 jōr'jo, 2 ġôr'ġo; L. **Geor'gi-us,** 1 jōr'jı-us, 2 ġôr'ġi-ŭs; Pg. **Jor'ge,** 1 ʒōr'ʒē, 2 zhōr'zhe; Sp. **Jor'ge,** 1 hōr'hē, 2 hōr'he. **2. G. I.,** either of two kings: (1) **Lewis** (5/28 1660–6/11 1727), king of England; elector of Hanover. (2) **Christian William Ferdinand Adolphus** (12/24 1845–3/18 1913), king of Greece from 1863; assassinated at Saloniki. **3. G. II.** (1) **Augustus** (11/10 1683–10/25 1760), king of England; son of George I.; fought at Oudenarde and Dettingen. (2) (7/19 1890–), eldest son of ex-King Constantine of Greece; King of Greece, Sept. 27, 1922–24. **4. G. III., William Frederick** (6/4 1738–1/29 1820), king of England; ruled during American Revolution. **5. G. IV., Augustus Frederick** (8/12 1762–6/26 1830), king of England; son of George III. **6. G., Prince of Denmark** (4/21 1653–10/28 1708), consort of Queen Anne of England. **7. G. V.,** either of two kings: (1) (5/27 1819–6/12 1878), last king of Hanover; dethroned 1866. (2) **Frederick Ernest Albert** (6/3 1865–), king of England; son of Edward VII.; coronation 6/22 1911. **8. Henry** (9/2 1839–10/29 1897), an American economist; writer and exponent of the single-tax idea; *Progress and Poverty*. **9. Saint,** martyred A. D. 303 in Cappadocia, who became in the middle ages a legendary hero, reputed slayer of a dragon which held captive a princess; patron saint of England since the time of Edward IV. **10.** A lake in Warren and Washington counties, N. Y., 36 m. long and 1 to 4 m. wide; a scenic and summer resort. **11.** A county in Mississippi.

George-a-Green, *n.* A mythical character frequently appearing in Elizabethan literature, most familiarly as the hero of the play *George-a-Green, the Pinner of Wakefield;* ascribed to Robert Greene.

George'mas, 1 jōrj'məs; 2 ġôrġ'mas, *n.* St. George's day, [April 23.

Geor'ges-man, 1 jōr'jez-mən; 2 ġôr'ġĕṣ-man, *n.* [-MEN, *pl.*] [Local, U. S.] A schooner that fishes for cod on the George's Banks.

George'town, 1 jōrj'taun; 2 ġôrġ'town, *n.* **1.** A county in S. E. South Carolina; 827 sq. m. **2.** Its county-seat. **3.** A seaport city, capital of British Guiana. **4.** A town in Sussex county, Del. **5.** A seaport town, capital of Penang, Malay Peninsula. **6.** A suburb of Washington, D. C. **7.** A town, county-seat of Williamson county, Tex. **8.** A village in Essex county, Mass. **9.** A mining town, county-seat of Clear Creek county, Colo. **10.** A town in Scott county, Ky., seat of Georgetown College (Baptist), founded in 1829. **11.** A village in Brown county, O. **12.** Same as SAINT GEORGE, 4.

George'town Pass. A pass in California; 8,119 ft. high.

Geor'gi-a, 1 jōr'jı-ə *or* -jə; 2 ġôr'ġi-a *or* -ġa, *n.* **1.** [U. S.] A S. Atlantic State; one of the 13 original states: 59,263 sq. m.; capital, Atlanta. **2.** An ancient independent country in south-eastern Europe; a republic since 1918; capital, Tiflis. **3.** A village in Franklin county, Vt. **4. Gulf** or **Strait of,** a body of water between Vancouver Island and the mainland of British Columbia. **5. Pass,** a pass in the front range of the Rocky Mountains, near Georgetown, Colo.; 11,811 ft. high.—**Georgia bark,** same as FEVER-TREE, 2.

F. **Geor'gine',** 1 zhôr'zhēn', 2 zhôr'zhēn'. **Geor'gette',** 1 zhôr'-jet', 2 zhôr'zhēt'. G. **Ge'or-gi'na,** 1 gē'or-gī'nə, 2 gē'or-gī'nə; 1 *Glor'gia,* 1 jôr'ja, 2 gôr'ja. [Gr., peasant woman.]

Geor'gian Bay. A bay in the N. E. part of Lake Huron, Ontario; 110 by 50 m.

geor'gic, 1 jôr'jik; 2 gôr'jic. **I.** *a.* Pertaining to husbandry; relating to rural affairs. **geor'gi-cal.** **II.** *n.* A poem on husbandry.

Virgil . . . next wrote his *Georgics*, a didactic poem on agriculture. REICHTLEY *Roman Empire* pt. i, p. 18. ii. *a.* o. ca. 1841.]

[< L. *georgicus*, < Gr. *geōrgikos*, < *geōrgos*: see GEORGE.]

Geor-gi'na, 1 jor-ji'nə; 2 gôr-gī'na. *n.* See GEORGIAN.

Geor'gi-um Sī'dus, 1 jôr'ji-um sai'dus; 2 gôr'gi-ŭm sī'dŭs. The Georgian star, the name first given by the discoverer, Sir William Herschel, to the planet Uranus, in honor of George III. [NL.; see GEORGE and SIDEREAL.]

Ge'orgs-wal'de, 1 gē'örgz-väl'də; 2 gē'örgz-väl'de, *n.* A town in Bohemia.

Ge'o-rys'si-de, *n. pl. Entom.* A family of clavicorn beetles having contiguous coxæ, the anterior oval, and the prosternum membranaceous, and including a few roundish species.

Ge''o-rys'sus, *n.* (t. g.) **Ge''o-ris'si-ta.** — **ge''o-rys'sid,** *a.* & *n.* — **ge'o-rys'soid,** *a.* — **Ge''o-sce-let'i-dæ,** *n. pl. Helminth.* A family of nematoid entozoans without pseudo-hæmal canal, with one or more pairs of sperm-cases. **Ge''o-sce'lex,** *n.* (t. g.) **Ge''o-sce-let'i-dæ.** — **ge''o-scol'e-cid,** *n.* — **ge''o-scol'e-cid,** *a.* — **ge-os'co-py,** *n.* The study of the depths or of its surface material, gained by observation. — **ge''o-scop'ic,** *a.* — **ge''o-se-len'ic,** *a.* Of or pertaining to the earth and moon conjointly; as, *geoselenic* attraction. — **ge'o-sphere,** *n. Phys. Geog.* The solid earth as distinguished from air and water. — **ge''o-sta'lic,** *a.* Capable of withstanding the pressure of earth from all sides; as, a *geostatic* arch. — **ge''o-stat'ics,** *n.* That branch of rigid bodies. — **ge''o-syn'cline,** *n. Geol.* A vast downward flexure of the earth's crust. See SYNCLINAL, and compare GEANTICLINE. **ge''o-syn-cli'nal,** — **ge''o-syn'cli-nal-ly,** *adv.* — **ge''o-sta'tic,** *a.* — **ge''o-tec-ton'ic,** *a. Geol.* Relating to the structure of the rock-masses of the earth's crust and to their shape, composition, and distribution. **ge''o-tec'to-nics.** — **Ge''o-teu'this,** *n. Paleon.* A genus of fossil cuttlefish whose ink-bags are numerous in the Upper Lias of southern Europe. — **ge'o-therm,** *n.* A subterranean isotherm. — **ge''o-ther'mal,** *a.* & *n.* — **ge''o-ther'mic,** *a.* Pertaining to the earth's internal heat. — **ge''o-ther-mom'e-ter,** *n.* An instrument for measuring subterranean temperatures. — **ge''o-ther''mo-met'ric,** *a.* — **Ge-oth'y-la,** *n.* A genus of North-American wood-warblers, familiarly represented by the Maryland yellowthroat (*G. trichas*). — **ge-ot'ic,** *a.* Terrestrial. — **ge-ot'ro-pism,** *n. Plant-physiol.* The tendency or position of an organ with respect to gravity. — **ge'o-ton ic,** *a.*

ge-ot'ro-pism, 1 ji-ot'ro-pizm; 2 gē-ot'ro-pism, *n. Biol.* A tendency (*positive geotropism*) exhibited by organisms, especially growing organs, to direct the roots, to turn toward the center of the earth, as distinguished from *negative geotropism*, or *apogeotropism*, the tendency to turn away from the earth.

Knight long ago found gravitation to be the cause of *geotropism*. C. E. BESSEY *Botany* pt. i, ch. 11, p. 195. [tr. n. & co. 1881.]

[< Gr. *gē*, earth, + *tropos*, turning, < *trepō*, turn.] **ge-ot'-ro-pic,** *a.* — **ge-ot'ro-pism,** *n.*

Geph'y-re'a, 1 jef'i-ri'ə; 2 gēf'y-rē'a, *n. pl. Helminth.* A division of worms, especially a class with a nervous esophageal ring and ventral cord, no distinct segments or legs, and a terminal or dorsal anus. [< Gr. *pephyra*, bridge.] **Geph'y-re'al.** — **geph'y-re'an,** *a.* & *n.* — **ge-phyr'e-oid,** *a.*

ger-mip'a-rous, 1 jər-mip'ə-rus; 2 ġer-mĭp'a-rŭs, *a.* **1.** Germ-producing. **2.** Breeding by means of germ-cells.

germ'-lay"er, *n.* *Embryol.* One of the several differentiated layers of cells from which the embryo is shaped. After invagination has occurred, the outer layer of the gastrula cavity in the embryo is known as the ectoderm or epiblast, and the inner layer as the endoderm or hypoblast. From the former are developed later by differentiation the various sense-organs, nervous system, epidermis, teeth, hair, nails, feathers, etc., while from the latter arise the digestive canal and all its outgrowths, as lungs, liver, etc., and in vertebrates, the notochord. A number of loose migratory cells now appear, which enter the blastula cavity and are known collectively as mesenchyme, while in the higher animals a double layer of cells is formed between the ectoderm and the endoderm, called the mesoderm or mesoblast. This in the higher types, is composed of two epithelial layers, which assist in the formation of the somatopleure and the splanchnopleure, and embrace the body cavity or cœlom. It later forms the muscles, bones, vascular system, genito-urinary parts, etc.

Germ-layers.

1. Section of embryo showing the three primitive layers. 2. The middle layer has split into two, of which the inner extends around the whole ovum. 3. The two outer layers have separated from the two inner and grown in upon them so as to produce a constriction. 4. The outer layers have united on the middle line, cutting off the constricted part. This is the condition at birth. *a*, ectoderm; *b*, mesoderm; *c*, entoderm; *d*, somatopleure; *e*, splanchnopleure; *f*, body-cavity or cœlom; *g*, intestinal canal; *h*, spinal canal.

germ'-mass", **g.-nucleus,** etc. See under GERM, *n.*

ger'mo-gen, 1 jūr'mo-jen; 2 ġĕr'mo-ġĕn, *n.* *Biol.* A multinuclear mass of protoplasm giving rise to ova and not divided into separate cells. [< GERM + -GEN.]

germ'-peg", *n.* Same as GEM-PEG.

germ'-plasm", *n.* *Embryol.* The part of the cell-protoplasm that, according to Weismann, is the material basis of heredity and is transferred from one generation to another. [< GERM + Gr. *plassō*, form.] **germ'-plas"ma‡.— accessory germ-plasm,** according to Weismann, the protoplasm which is accountable for the growth of a new organism from a bud. **blastogenic germ-plasm‡; reserve germ-plasm‡.— sporogenic g.,** in the Weismann theory, the germ-plasm of a spore, as differentiated from that of an ovum.

Syn.: achieve, acquire, attain, earn, gain, obtain, procure, receive, secure, win. *Get* is a most comprehensive word. A person *gets* whatever he comes to possess or experience, whether with or without endeavor, whether by purchase, barter, or gift; he *gets* a bargain, a blow, a fail, a fever; he *gains* what he comes to by effort or striving; the swimmer *gains* the shore; a man *acquires* by continuous and long-sustained industry or diligence; as, one *acquires* a foreign language; he *earns* what he gives an equivalent of labor for, the he may not *get* it. The temptation to all dishonesty is to desire to *get* a living or a fortune without *earning* it. When one *gets* the object of his desire, he is said to *obtain* it, whether he has *gained* or *earned* it or not. In fourteen contest, with a suggestion of chance or hazard; pointedly a prize is often said to *win* a lawsuit, or to *win* in a suit at law, but in legal phrase he is said to *gain* his suit, case, or cause. In *receiving*, one is strictly passive; he may *get* an estate by his ancestor's death or by inheritance; in the latter case he is said to *receive* it. One *obtains* a thing commonly by some direct effort of his own; he *procures* it commonly by the intervention of the service of one else; he *procures* a dinner or an interview; he *secures* what has seemed uncertain or elusive when he *gets* it firmly into his possession or under his control. See ATTAIN; GAIN; LEARN; MAKE; for *get off* or *get away*, see ESCAPE; for *get to*, see ARRIVE. — Ant.: see synonyms for ABANDON; LOSE.

4. *Law.* The voluntary conveyance or transfer of property without consideration of money or of blood; also, the property so transferred.

Originally a gift comprised any form of alienation of property, but later came to mean the conveyance of an estate tail, as opposed to demise, feoffment, or lease. In modern usage it is the transfer of property without any consideration, or for a nominal consideration, and is opposed to sale. In order to complete a gift there must be intention on the part of the giver, a deed of transfer in the case of real estate or actual physical transfer in the case of personal property, and acceptance on the part of the recipient.

The English law does not consider a *gift* . . . in the light of a contract, because it is voluntary, and without consideration.
KENT *Commentaries* vol. ii. p. 437.

5. [Prov. Eng.] A white spot on the fingernail, popularly supposed to indicate a present. **6.** One of a series of educative toys or materials for play by the aid of which a child's powers of attention and observation are developed.

7. [Slang, Eng.] (1) Something that has been purloined and is afterward sold at an extremely low price. (2) Something easily gained or accomplished. **8.** [Archaic.] (1) A bribe. (2) An offering. [< AS. *gift*, < *giefan*, give.]

Syn.: benefaction, boon, bribe, donation, grant, gratuity, present. *Gift* is almost always used in the good sense, *bribe* always in the bad sense; in Scriptural language *gift* is often used for *bribe*. A *benefaction* is a charitable *gift*, generally of large amount, and viewed as conducing to value, as an endowment for a college. A *donation* is something, perhaps of great, never of trivial value, given usually on some public ground, as to a cause or to a person representing a cause, but not necessarily of value beyond the immediate present; as, a *donation* to a pastor. A *gratuity* is usually something of moderate value and is always given as to an inferior, and as if from favor, not of right; as, a *gratuity* to a waiter. *Largess* is archaic for a bountiful *gratuity*, usually to be distributed among many, as among the heralds at ancient tournaments. A *present* is a *gift* of friendship, or conciliation, and given as to an equal or a superior; no one's pride is hurt by accepting what is viewed as strictly a *present*. A *bonus* is a *gift* that has been desired or craved or perhaps asked, or something that has been given to meets some great desire. A *grant* is commonly considerable in amount and given by public authority; as, a *grant* of public lands for a college. "The king by judgment establishes the land; but he that receiveth *gifts* overthroweth it." *Prov.* xxix. 4. A *bribe* is payment for a dishonorable service under the semblance of a *gift*.—ANT.: compensation, earnings, guerdon, remuneration, wages.

gildı,] *n.* [The spelling *guild* is that found in most **guild**,] modern literature. The form *gild* formerly prevailed, and has been revived recently as the simpler form.] **1.** A corporation or association of persons engaged in kindred pursuits for mutual protection and aid, known in England from the 7th century.

The merchant gilds were the most important. Each one met in a guildhall, and its workers were classified as masters, journeymen, and apprentices. The modern friendly societies and trades-unions have analogous functions, and it has been suggested that they are a hidden form of survival in connection with the gilds. Gilds were originally local associations of the inhabitants of particular towns for promoting the common interest of all. They existed in Europe from very early times, being known in England prior to the Norman conquest. It is possible that they were a survival of the trade corporations of the Roman Empire. The earlier gilds in England were of a social-religious nature and it was not until the twelfth century that the **trade gild** appeared, growing in power and importance along with the purely religious or ecclesiastical gilds. Both types were authorized by royal charters and obtained great influence. The religious gilds, which had become very wealthy under the Plantagenet kings, were permanently abolished by Henry VIII., who vested their property and revenues in the crown. The secular gilds, the germ of the modern boroughs or municipal corporations, were originally of the members of some particular trade, banded together for mutual assistance and protection. From this they gradually grew in wealth and importance, until their power or united gilds claimed special rights and privileges from the sovereign. These exclusive rights now no longer exist in England, having been abolished by the Municipal Corporation Reform Act in 1835 and the Companies Act of 1847. The surviving corporations, such as the great London Companies, retain very little of the character of the ancient gilds, and are not called by the name.

The institution of *gilds* or trading companies was essential to municipal liberties and contemporæ eous with them. Every freeman had to be sworn of a gild, and the only entrance to a *gild* was obtained by a seven years' apprenticeship.

Gip'sy, *n.* [=SIRE, 1 -si; 2 -sĭ, *pl.*] **1.** A member of a wandering race known in Europe from 1417, and now in every part of the world. In language and origin the Gipsies are probably Indian. They speak a corrupt Sanskrit dialect, and are dark-skinned, dark-eyed, lithe, and sinewy. They are nomadic, living largely in tents, and are generally fortune-tellers, musicians, cattle-dealers, or tinkers. **2.** The language of the Gipsies. It contains about 5,000 words, is called by the Gipsies *Romanichêe* ("Gipsy tongue"), and is now classed (by Miklosich and Beames) as a modern Aryan Indian dialect. Its large percentage of Persian, Armenian, Slavonic, Roumanian, and Magyar words indicates the sojournings of the race during its wanderings westward. See ROMANY. Compare BOHEMIAN.

It is generally believed that English *Gipsy* is a mere jargon of the cant and slang of all nations; . . . but a very slight examination of the Vocabulary will show that during more than three hundred years in England the Gipsies have not adopted a single English word to what they correctly call their language. . . . Almost every word which my assistant declared to be *Gipsy* I have found either in Hindustanī or in the works of Pott, Liebich, or Paspati. Many words which appear to have been taken . . . from modern languages are in reality Indian.
CHARLES G. LELAND *English Gipsies* p. 9. (n. s. ed. 1873.)

gip'sy-moth', 1 jip'si-mŏth; 2 gĭp'sy-mŏth, *n.* A European liparid moth (*Ocneria dispar*), naturalized in eastern New England about 1869, and highly destructive to foliage. The male, measuring in wing-expanse about 1 1/2 in., is light-brown, the larger female nearly white; both are marked on the upper surface with wavy transverse lines and a dark crescent near the front of the wing. The eggs are laid in large numbers in masses in crevices of the bark of trees, on old fences, unpainted buildings, etc., and are covered with a yellowish mass of hairs shed from the female's abdomen. These hatch with the first really warm weather of the next year, and the larvæ at once crawl upward, seeking edible food. The caterpillar bristles with tufted hairs, is dark-brown finely reticulated with pale yellow, and has narrow dorsal lines and many black or red tubercles. They molt four times, and when full-fed, including evenings, which rarely recover from defoliation. In spite of vigorous preventive efforts, undertaken at great expense by the several New England States affected, the ravages of these moths upon ornamental trees, orchards, and forests have been very great, and the pest is still slowly spreading. Preventive measures include spraying and scraping the trees, cleaning ground-cover, burning bushes and refuse, and the cultivation and naturalizing of parasites destructive to the species. See COCOON.

SYN.: bestow, cede, communicate, confer, deliver, furnish, grant, impart, supply. *Give* is a term of such general import as to be a synonym for a wide variety of words. To *give* is primarily to transfer to another's possession or ownership without compensation; in this secondary sense in popular use, it is to put into another's possession by any means and on any terms whatever; a buyer may say "*Give* me the goods, and I will *give* you the money"; we speak of *giving* answers, information, etc., and often of *giving* what is not agreeable to the recipient, as blows, medicine, reproof; but when there is nothing in the context to indicate the contrary, *give* is always understood in its primary sense; as, this book was *given* me. *Give* thus becomes, like *get*, a term of such general import as to be a synonym for a wide variety of words. To *grant* is to put into one's possession in some formal way, or by authoritative act; as, Congress *grants* lands to a railroad corporation. To speak of *granting* a favor carries a claim or concession of superiority on the part of the one by whom the grant may be made; to *confer* has a similar sense; as, to *confer* a degree or an honor; we *grant* a request or petition, but do not *confer* it. To *impart* is to give of that which one still, to a greater or less degree, retains; the teacher *imparts* instruction. To *bestow* is to *give* that of which the receiver stands in special need; we *bestow* alms. *Give* is also constantly used of that which is paid as a price

gît'tern, 1 gît'ern; 2 gît'ern. **I.** *n.* To play on a gittern. **II.** *n.* [Archaic.] A musical instrument, strung with wires; a zither or cithern. [< OF. *guiterne*, < L. *cithara*; see GUITAR.]—**gît'tern-er**, *n.*

or transferred for an equivalent; as, what will you *give* for that property? *Give* is often used of things not agreeable to the recipient; as, to *give* one a blow, or a refusal.— Prep.: see in phrases as defined.— **give′=and=take″.** **I.** *a.* *Sport.* [Eng.] **1.** Characterized by alternating conditions, as a partly hilly road. **2.** Designating a handicap (plate) in horse=racing. **II.** *n.* **1.** A variety of philopena in which either of the two eaters is privileged to speak the word and claim his present only when the other has taken some object from his hand. See PHILOPENA. **2.** The custom or practise of exchanging equivalents; making mutual concessions; as, a *give=and=take* spirit of debate. **3.** Interchange of thoughts and opinions, especially of good=natured jest or banter.— **g.=away,** *n.* **1.** [Slang.] An unconscious self=betrayal. See TO GIVE AWAY, below. **2.** A kind of checkers or chess, in which the object is to force one's adversary to capture men. — **g. me** [Colloq.], grant me; commend me to; I am for; I choose; I would rather have.

I know not what course others may take; but as for me, *give me* liberty or *give me* death! PATRICK HENRY's speech in the Virginia convention, March 23, 1775, in *World's Famous Orations* vol. viii, p. 67. [F. & W. '06.]

—**to g. a good account of,** to prove (one's) ability, or success in anything; comport (oneself) creditably; win decided commendation for (oneself).— **to g. a handle,** to supply an opportunity, or offer a hold.— **to g. and take. 1.** To reciprocate; compromise; show willingness to accept what you are disposed to give. **2.** *Com.* To average profits and losses.— **to g. a spoke** (*Naut.*), to slightly turn a steering wheel, causing a trifling change in the direction of the ship's head.— **to g. audience. 1.** To grant an interview: said of one in power or official position. **2†.** To give close attention.— **to g. away. 1.** To transfer the title or ownership of by gift.

'Tis heaven alone that is *given away.*
LOWELL *Vision of Sir Launfal* pt. i, prel., st. 5.

2. [Colloq.] To betray through carelessness or stupidity; hence, to betray in any way; as, to *give away* a joke or a pal.

Miss Youghal began crying; and Strickland saw that he had hopelessly *given* himself *away*, and everything was over.
KIPLING *Plain Tales, Miss Youghal's Sais* p. 35. [L. CO.]

3. To hand over, or deliver (a bride) at a marriage. **4†.** To lose by carelessness.— **to g. back. 1.** To restore or return to the owner. **2†.** To retreat.— **to g. best** [Colloq., Austral.], to acknowledge defeat.— **to g. birth to,** to bring forth; be the productive cause of; to originate.— **to g. bridle to,** to give loose rein to; to give one's thoughts free utterance. — **to g. down,** in milking, to let down: said of a cow.— **to g. ear to,** to give attention; heed.— **to g. fire. 1.** To give command to fire. **2.** To discharge.— **to g. forth. 1.** To report; publish. **2.** To emit, as a thrush, its notes, or a boiler, its steam.— **to g. in. 1.** To yield, as something demanded. **2.** To cease opposition; acknowledge oneself vanquished. **3.** To deliver or hand in (a resignation, report, etc.) to an official. — **to g. in one's adhesion to,** to give public or formal notification of acceptance of (principles, etc.).— **to g. in to,** to yield assent to; adopt.— **to g. it to one,** to administer flogging or reproof without stint.— **to g. leg=bail,** see LEG=BAIL, under LEG.— **to give (a) loose to,** to give liberty, free play, or action to.— **to g. off,** to send forth; emit.— **to g. on** (*Stock Exchange*) [Eng.], to pay contango.— **to g. (one) a black eye** [Colloq.], to disfigure one by striking him in the eye. Figuratively, to put one at a disadvantage.— **to g. (one) his revenge,** to give (a conquered adversary) a chance to redeem himself, or even up the score by another contest. — **to g. (one) line, or rope,** to allow (one) a certain amount of freedom until it is desirable to halt him.— **to g. oneself airs,** to assume haughtiness of speech or carriage; put on airs.— **to g. oneself up. 1.** To surrender oneself, as to a court of law. **2.** To despair of oneself; abandon hope.— **to g. one's hand. 1.** To present one's hand to be clasped as a token of friendship or confidence. **2.** To wed: said of women.— **to g. (one) the lie,** to denounce (one) as a liar.— **to g. out. 1.** To send forth; emit.

They [the stars and the sun] shine or *give out* light, because they are white hot. LOCKYER *Elements of Astron.* p. 12. [A. 1881.]

2. To serve out or distribute. **3.** To report; publish.

I *gave it out* that I was going to my borough in Devonshire.
J. TOWNLEY *High Life Below Stairs* act i, sc. 1.

4. To represent or pretend to be. **5.** To cease from exertion on account of exhaustion. **6.** To fail; as, the supply of provisions *gave out*. **7.** To fail to work, act, or operate, as a machine or a part of a machine. **8.** To announce a public meeting, a church service, etc.; to read the number or the words of a chant, hymn, etc., to be sung by a choir or congregation. **9.** *Mus.* To enunciate (a theme); to play over a piece before it is sung.— **to g. over. 1.** To cease to act. **2.** To abandon (an undertaking, etc.); desist from. **3.** To make over *to;* give up (anything) *to.* **4.** [Rare.] To give up as incurable. **5.** To give oneself up to.— **to g. place to. 1.** To yield to. **2.** See under PLACE, *n.*— **to g. points. 1.** To concede handicap terms. **2.** [Colloq.] To offer information or advice.— **to g. rise to,** to cause or produce; result in.— **to g. the lie to,** to denounce as untruthful, or to show to be false.— **to g. the slip to,** to escape from.

But it is ordinary for those that have professed themselves his servants, often to *give* him *the slip* and return again to me.
BUNYAN *Works, Pilgrim's Progress* p. 115. [B. G. & CO. 1874.]

— **to g. time,** to concede further time, as for payment of a claim; give an opportunity to.— **to g. tongue,** to bark: said by huntsmen, of hounds.— **to g. up. 1.** To yield or desist from as hopeless; as, to *give up* an undertaking.

John *gave it up*, ah, many a John
Has tried and failed as he did!
TROWBRIDGE *Story of a Barefoot Boy* st. 14.

2. To surrender or abandon, as a fortress. **3.** To cede, as territory. **4.** To lose all heart; cease to strive; abandon expectation of or hope concerning; as, to *give up* an expected guest; *give up* a sick person. **5.** To divulge; make public. **6.** To relinquish; as, the sea *gave up* its dead. **7.** To addict or devote oneself to; as, to *give* himself *up* to dissipation; *given up* to the study of languages. **8.** To make personal sacrifices **9†.** To breathe out; emit; as, to *give up* one's soul. **10†.** To deliver; report.— **to g. way. 1.** To yield to force; fail; break or fall; as, the bridge *gave way*. **2.** To withdraw; as, the crowd *gave way*. **3.** To begin rowing: usually in the imperative, as a command to a boat's crew, meaning to give headway to the boat. **4.** To concede; cease objecting or contending; make way for. **5.** To lose one's self=control; to break down or become shattered: said of health, the mind, etc. **6.** *Stock Exchange.* To drop in price.— **to g. way to,** to yield to.

give, *n.* **1.** The quality of being yielding; elasticity; the process or act of giving way. **2†.** Same as GYVE, *n.*

give′a-bl(eP, 1 giv′ə-bl; 2 gĭv′a-bl, *a.* That may be given.

give′ale, 1 giv′ēl; 2 gĭv′āl, *n.* *Eng. Hist.* A yearly feast formerly held in Kent, by virtue of the terms of some testator's will and at the expense of his estate. [< GIVE + ALE.]

giv′en, giv′nP, 1 giv′n; 2 gĭv′n, *pa.* **1.** Habitually inclined; devoted; addicted; as, *given* to hospitality; *given* to joking. **2.** Admitted as a fact or a premise; stated; known; specified; as, at a *given* rate; on a *given* day. **3.** Conferred without compensation; donated. **4.** Put into effect; executed; as, *given* under my hand and seal. **5.** *Math. & Logic.* Assumed; previously determined; as, a *given* magnitude, ratio, or premise. According to Euclid, a magnitude is *given* when another equal to it can be found; a ratio is *given* when one identical with it can be found; a position is *given* when it remains constant. A magnitude whose extent is determinable by reference to known magnitudes is also termed *given*.— **given name** [U. S.], the name given at baptism; all but the family name.— **giv′en-ness,** *n.* The state of being accepted as a fact.

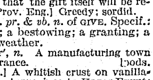
giv′en, *n.* That which is given; especially (*Metaph.*), the datum, or group of data, on which an inference may be based, or which may be made the assumption, or point of starting, for the attempt to solve a practical or scientific problem, or to answer a question in philosophy.

giv′er, 1 giv′ər; 2 gĭv′er, *n.* **1.** One who gives, in any sense. **2.** *Stock Exchange.* [Eng.] One who buys an option. Syn.: see BENEFACTOR.— **Indian giver** [Colloq., U. S.], one who gives expecting an equivalent or many times as much value in return, or that the gift itself will be returned.— **giv′er-some,** *a.* [Prov. Eng.] Greedy; sordid.

giv′ing, 1 giv′ıŋ; 2 gĭv′ing, *p. pr. & vb. n.* of GIVE. Specif.: *vb. n.* A giving way or up; a bestowing; a granting; a growing mild: said of the weather.

Gi″vors′, 1 ʒī″vōr′; 2 zhī″vōr′, *n.* A manufacturing town in the Rhône department, France. [pods.

gi′vre, 1 ʒī′vr; 2 zhĭ′vr, *n.* [F.] A whitish crust on vanilla=



Gi′zeh, 1 gī′zə; 2 gī′ze, *n.* **1.** A province in Upper Egypt; 398 sq. m. **2.** Its capital; near the Pyramids.

Gi′zo-nite, 1 gai′zo-nait *or* gai-zō′nait; 2 gī′zo-nīt *or* gī-zō′nīt, *n.* *Bib.* *1 Chron.* xi, 34. [*1 Sam.* xxvii, 8.

Giz′rites, 1 giz′raits; 2 gĭz′rīts, *n. pl.* *Bib.* (R. V., margin).

gizz, 1 giz; 2 gĭz, *n.* [Scot.] **1.** A tangled head of hair; a wig. **2.** The countenance; face; phiz.

giz′zard, 1 giz′ərd; 2 gĭz′ard, *n.* **1.** The pyloric part of the stomach when it has greatly thickened muscular walls, as in crocodiles and the great ant=eater; especially, the second or bulbous stomach of birds, in which the food is ground after being softened with gastric juice in the first or glandular stomach; the gigerium. **2.** *Entom.* The proventriculus or first stomach. **3.** A thickened muscular stomach, as in various tectibranchiates. **4.** [Colloq.] Stomach; "insides" (of a person); as, fret not thy *gizzard*. [< OF. *gezier*, F. *gésier*, < L. *gigeria*, cooked entrails of poultry.] **giz′zern‡** [Dial., Eng.]. — **giz′zard=fish″,** *n.* [Local, U. S.] The common whitefish. — **g.=shad,** *n.* A dorosomoid fish, especially *Dorosoma cepedianum* of eastern North America.— **g.=stone,** *n.* One of the smooth pebbles found in the gizzards of fowls; specif., a pebble associated with remains of fossil or semifossil birds, as the great auk.— **g.=trout,** *n.* The gillaroo.

Gizzard=shad or Mud=shad. 1/15

giz′zen, 1 giz′n; 2 gĭz′n, *vi.* [Scot.] **1.** To shrink from dryness so as to leak; as, a pail *gizzens*. **2.** To wither; shrivel. **3.** [Local, U. S.] To wrinkle the face, as with pain or distress.— **giz′zened,** *a.*

giz′zen, *a.* [Scot.] Leaky.

giz′zen, *n.* [Local, U. S.] A chuckle, as in contempt; a sneer.

Gjal′lar=bridge″, 1 yŭl′lar=brij″; 2 yäl′lär=bridġ″, *n.* *Norse Myth.* The bridge over the river Gjol. It separates the realms of the living and the dead. **Gjal′lar=brū″‡.**

Gjal′lar=horn″, 1 yŭl′lar=hōrn″; 2 yäl′lär=hōrn″, *n.* *Norse Myth.* The horn blown by the god Heimdal at Ragnarök to arouse the gods, and heard throughout the universe.

Gjol, 1 yōl; 2 yŏl, *n.* *Norse Myth.* That one of the twelve poisonous ice=cold streams flowing out of Niflheim which passed nearest the gate of Hel's dwelling. [Ice.]

G. L., *abbr.* Grand Lodge.

Gl., gl. See ABBREVIATION.

gla-bel′la, 1 glə-bel′ə; 2 gla-bĕl′a, *n.* [-LÆ, 1 -ī; 2 -ē, *pl.*] **1.** *Anat.* The smooth prominence on the forehead just above the root of the nose; the mesophryon. **2.** A craniometrical point. See CRANIOMETRY. **3.** *Crust.* The median convex lobe of the cephalic shield of a trilobite. [< L. *glaber*, smooth.] **gla-bel′lum‡.**— **gla-bel′lad,** *adv.* *Anat.* In a direction toward the glabella.— **gla-bel′lar, gla-bel′lous,** *a.*

gla′brous, 1 glē′brus; 2 glā′brŭs, *a.* Without hair or down; smooth. [< L. *glaber* (*glabr-*), without hair.] — **gla′brate,** *a.* Glabrous, or nearly or becoming so. **gla′bre†.**— **gla′bre-ate†,** *vt.* To remove the hair from; make smooth or bald. **gla′bri-ate†.**— **gla-bre′i-ty,** *n.* Freedom from hair; baldness; smoothness. **gla′bri-ty†.**— **gla-bes′cent,** *a.* Shedding hair; becoming glabrous.— **gla″bri-ros′tral,** *a.* *Ornith.* Having the mouth relatively free from bristles.

glace, 1 glēs; 2 glāç, *v.* [Scot. & Dial.] **I.** *t.* To float past or skim by; graze; shave. **II.** *i.* To glide. [< OF. *glacer*, slip, < *glace*; see GLACIER.] [also, to ice, as cakes.

gla″cé′, 1 gla″sē′; 2 glä″çe′. [F.] **I.** *vt.* [GLA″CÉD′; GLA″CÉ′ING.] To make glossy, as fruits; also, to ice, as cakes. **II.** *a.* **1.** Iced; also, frozen or cooled. **2.** Having a glossy surface or finish, as kid, silk, etc.; hence, highly polished, glossy.

gla″cé′, *n.* A thin, lustrous silk; glacé silk.

Only the beautiful young lady in Brussels point and white *glacé.* MRS. CHARLES *Winifred Bertram* p. 39. [D. M. & CO.]

gla′cia-ble†, *a.* Convertible into ice.

gla′cial, 1 glē′shəl; 2 glā′shal (XIII), *a.* **1.** *Geol.* Of, pertaining to, derived from, or caused by natural ice=masses, either as floating ice, or more commonly as glaciers or ice=sheets. **gla′cic‡.** **2.** Icy, or icily cold.

In making a New England visit in Winter was it ever your fortune to be put to sleep in the *glacial* spare=chamber?
HARRIET B. STOWE *Little Foxes* p. 98. [T. & F. 1866.]

3. Of or pertaining to the glacial epoch. **4.** *Chem.* Crystallizing or assuming an ice=like appearance at ordinary temperature: said of certain acids; as, *glacial* acetic acid. [< L. *glacialis*, < *glacies*, ice.] — **glacial boundary,** the boundary=line of the utmost extension of the lower margin of glacier land=ice in any region, often extending beyond the outer terminal moraine.— **G. epoch,** the earlier part of the Quaternary period, marked by rock=scoring and the transportation of drift by ice=agency: the ice=age. See GEOLOGY.

There are two sources of information concerning the depth attained by the ice in North America during the *Glacial period*. . . . It requires but a cursory examination to see that the highest point of Mount Desert Island, on the coast of Maine, was completely covered by the glacier, showing that at the very margin of the ocean the ice must have been considerably more than 1,500 feet deep. . . . Even Mount Washington, in New Hampshire, was either wholly enveloped by the ice=current, or if a pinnacle projected above the glacier it could have been no more than 300 or 400 feet higher. . . . Bowlders from the Laurentian axis of the continent, which stretches from Lake Superior northward to the west of Hudson Bay, have been transported westward a distance of seven hundred miles, and left upon the flanks of the Rocky Mountains at an elevation of something over four thousand feet.
G. F. WRIGHT *Ice Age in N. Am.* pp. 166–171. [A. 1889.]

— **g. erosion,** the erosion of earth and rocks produced by glacier=ice charged with detritus, and assisted by glacial streams.— **g. planing** and **polishing,** the leveling and smoothing of rock=surfaces by ice=erosion.— **g. scoring, grooving, scratches, striæ,** see ROCK=SCORING.— **g. theory** or **hypothesis,** the glacier theory. See GLACIER.— **gla′cial-ly,** *adv.* By the action of glaciers.

gla′cial-in, *n.* Same as BOROGLYCERID.

gla′cial-ism, 1 glē′shəl-izm; 2 glā′shal-ĭsm, *n.* *Geol.* The study of glacial action and history, especially with reference to the theory of a past continental glacier.

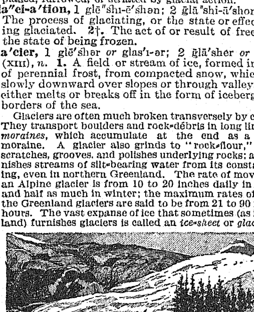
gla′cial-ist, 1 glē′shəl-ist; 2 glā′shal-ĭst, *n.* **1.** One who refers the phenomena of rock=planation and =scoring and of transported drift to the agency of ice. **2.** A specialist in glacial phenomena.

Had he [Rendu] added to his other endowments the practical skill of a land=surveyor, he would now be regarded as the prince of *glacialists.* TYNDALL *Forms of Water* p. 159. [A. 1872.]

gla′cial-ize, 1 glē′shəl-aiz; 2 glā′shal-īz, *vt.* [-IZED; -IZ″ING.] To subject to the action of ice.

gla″ci-a′ri-um, 1 glē″shı-ē′rı-um; 2 glā″shi-ā′ri-ŭm, *n.* [Rare.] An ice=floored skating=rink. [< L. *glacies*, ice.]

gla′ci-ate, 1 glē′shı-ēt; 2 glā′shi-āt, *v.* [-AT″ED; -AT″ING.] **I.** *t.* **1.** *Geol.* To overspread with glacial ice, or to produce the phenomena of planation, rock=scoring, drift, etc.



'Glacial drift' spreads over the low ground of the *glaciated* districts. A. GEIKIE *Text=Book Geol.* p. 688. [MACM. 1882.]

2. *Manuf.* To produce an ice=like effect on the surface of, as ironwork. **3†.** To convert into ice. **II.** *i.* To be changed into ice. [< L. *glaciatus*, pp. of *glacio*, < *glacies*, ice.] — **glaciated rocks** (*Geol.*), rocks planed, furrowed, or striated by glacial action.

gla″ci-a′tion, 1 glē″shı-ē′shən; 2 glā″shi-ā′shon, *n.* **1.** The process of glaciating, or the state or effects of being glaciated. **2†.** The act of or result of freezing, or the state of being frozen.

gla′cier, 1 glē′shər *or* glas′ı-ər; 2 glā′sher *or* glăç′i-er (XIII), *n.* **1.** A field or stream of ice, formed in regions of perennial frost, from compacted snow, which moves slowly downward over slopes or through valleys until it either melts or breaks off in the form of icebergs on the borders of the sea.

Glaciers are often much broken transversely by crevasses. They transport boulders and rock=débris in long lines called *moraines*, which accumulate at the end as a terminal moraine. A glacier also grinds to "rock=flour," while it scratches, grooves, and polishes underlying rocks; and it furnishes streams of silt=bearing water from its constant melting, even in northern Greenland. The rate of movement of an Alpine glacier is from 10 to 20 inches daily in summer, and half as much in winter; the maximum rates of some of the Greenland glaciers are said to be from 21 to 90 feet in 24 hours. The vast expanse of ice that sometimes (as in Greenland) furnishes glaciers is called an *ice=sheet* or *glacial sheet*.

Great Glacier of the Selkirks, British Columbia.

At the lower extremity of the *glacier* the ice is pure, blue, and transparent, but, as we ascend, it appears less compact.
AGASSIZ *Geol. Sketches* sketch viii, p. 223. [T. & F. 1866.]

2. A wine=cooler in which cracked ice is kept. [F., < *glace*, ice, < L. *glacies*, ice.] — **Alpine glacier,** a glacier occupying a mountain valley and fed by snow=fields in the higher mountains.— **cliff=gla′cier,** *n.* A small glacier occupying a depression in a mountain=side above the snow. —**continental g.,** a type of glacier covering a large portion of a continent; an ice=sheet, as the ice=cap of Greenland; specif., the ice=cap which covered the northern third of the globe at the height of the glacial epoch.— **Croll's g. theory,** a hypothesis put forward by Croll to account for the conditions postulated by the glacial theory; founded on the changes in the eccentricity of the earth's orbit, which reaches a maximum at intervals of about 150,000 years, causing a difference in the comparative length of the seasons, by which the winters last a month longer than at present. This refers to the northern hemisphere; the reverse is the case in the southern. Croll argued that the increased duration of the cold during such periods, together with the diminished length of the summer heats, would satisfactorily account for the phenomena of the glacial period.— **dead g.,** a stationary or fossil glacier.— **fossil g.,** one of the extensive layers of ice along the Siberian arctic coast, underlying the frozen soil (tundra) which has preserved it from melting since Pleistocene times, and in which have been preserved in great numbers the frozen carcasses of mammoths, woolly rhinoceroses, etc.— **gla′cier=bed″,** *n.* The hollow or channel occupied by a glacier, or denoting the site of a past glacier.— **g.=burst,** *n.* The breaking of a glacier=made ice=dam, and the resultant flood of water.— **g.=face,** *n.* The face of ice on the sea side of a tidal glacier.— **g.=grain,** *n.* **1.** The typical granular structure of glacial ice. **2.** A single grain of glacial ice.— **g.=lake,** *n.* A lake formed between the margin of a glacier and an encircling rim of hills, due to the damming of the natural drainage: a glacial lake.— **g.=milk,** *n.* The milk=white water, charged with fine white sediment, that issues from beneath glaciers.— **g.=mill,** *n.* Same as MOULIN.— **g.=mud** or **=silt,** *n.* The pulverulent material, produced by glacial erosion, that is washed out from beneath a glacier and deposited at lower levels by glacial streams.— **g.=snow,** *n.* The compacted mountain snow that is in the intermediate stage between ordinary snow and glacier=ice; névé.— **g.=table,** *n.* A tabular block of stone perched on a smaller column of ice on the surface of a glacier: a phenomenon produced by solar heat.— **g. theory** or **hypothesis,** the theory that large elevated portions of the temperate and frigid zones were covered during the early Quaternary, and perhaps during some earlier epochs, by slowly moving ice=sheets and glaciers, that transported vast masses of drift to lower latitudes, assisted by icebergs drifting along the coast.— **g.=wind,** *n.* A current of air issuing from a cavity in a glacier, due to the difference in temperature without and within.— **hanging g.,** a comparatively small glacier on an incline so steep that

the forefoot of the ice constantly breaks off and falls downward.— **malaspina g.,** any Piedmont glacier: so called from a coastal glacier, **Malaspina,** in Alaska, extending from Mt. St. Elias to the ocean, and covering about 1,500 square miles, which is typical of this class.— **piedmont g.,** that part of a glacier which debouches and spreads out at the base of a mountain, or a range which feeds its sources.— **plateau-g.,** *n.* An ice-sheet covering a lofty plateau, formed and renewed by snowfalls only: usually bordered by one or more descending valley glaciers.— **recemented g.,** a glacier formed by compacted masses of ice which have fallen from a hanging glacier on a cliff above. **regenerated g‡.**— **reconstructed g.,** a glacier formed by the compacting and freezing together of masses of snow and ice swept down by avalanches.— **tide-water g.** (*Geol.*), a glacier whose foot dips into tide-water, and which therefore produces icebergs. **tidal g.‡.**— **gla′cier-ist,** *n.* [Rare.] One possessed of special knowledge of glaciers.

gla″cière′, 1 gla″syār′; 2 glä″çyêr′, *n.* [F.] An artificial or natural cavity, in a temperate climate, in which a mass of ice remains unthawed throughout the year; an ice-glen.

gla′cier-et, 1 glē′shər-et; 2 glā′sher-ĕt, *n.* One of the ice-masses that in unusually dry seasons appear through the wasted névé at the summit of a glacier-bearing mountain: not certainly different from the glacier proper.

Gla′cier Mount. A mountain in Colorado; 14,243 ft. high.

Glacier National Park, a public park in northwestern Montana; 1,534 sq. m.; 60 small glaciers.

Gla′cier Peak. A summit in Colorado; lat. 39° 34′ N., long. 105° 52′ 18″ W.; 12,654 ft. high.

glac″i-fi-ca′tion, 1 glas″ɪ-fɪ-kē′shən; 2 glăç″i-fi-cā′shon, *n.* The action of overspreading with or freezing into ice. [< L. *glacies,* ice, + *facio,* make.]

gla′ci-o-, 1 glē′shɪ-o-; 2 glā′shi-o-. Derived from Latin *glacies,* ice: a combining form.— **gla″ci-o-a′que-ous,** *a.* Pertaining to or resulting from the combined action of ice and water.— **gla″ci-o-flu′vi-al,** *a.* Of, pertaining to, produced by, or resulting from combined glacier-action and river-action. **gla″ci-o-flu′vi-a-tile‡.**— **gla″ci-o-la-cus′trine,** *a.* Combining glacial and lacustrine conditions, as in the case of deposits made in glacial lakes.— **gla″ci-ol′o-gy,** *n.* A subdivision of geology t eating of glaciers.— **gla″ci-o-log′i-cal,** *a.*— **gla″ci-ol′o-gist,** *n.* One who specializes in glacial phenomena.— **gla″ci-o-ma-rine′,** *a.* Pertaining to or resulting from the combined action of a glacier and of the sea.— **glac″i-om′e-ter,** *n.* Any device to measure glacial movement.— **gla″ci-o-na′tant,** *a.* Pertaining to, characterizing, or resulting from floating ice.

gla′cious†, *a.* Resembling ice; icy.

gla′cis, 1 glē′sɪs *or* (*F.*) gla″sī′; 2 glā′çis *or* (*F.*) glä″çī′ (XIII), *n.* [F.] **1.** An easy slope of earth directly in front of and designed to cover a fortification in such a way that attacking troops must necessarily climb it under the concentrated fire of all the guns on the ramparts of that side of the fort. See illus. under FORTIFICATION.

2. A defensive slope on a steel war-ship to cause glancing of missiles that strike it. **gla′cis-plate″‡.**

glack, 1 glak; 2 glăk, *n.* [Scot.] An angular opening; notch; specif., a mountain ravine.

gla″çure′, 1 gla″sür′; 2 glä″çür′, *n.* [F.] A thin glazing on fine pottery.

glad, 1 glad; 2 glăd, *v.* [GLAD′DED; GLAD′DING.] **I.** *t.* [Poet.] To make happy or joyous; gladden.

When Albion's lessening shores could grieve or *glad* mine eye.
BYRON *Childe Harold* can. 3, st. 1.

II†. *i.* To be bright and joyful; be delighted. [< AS. *gladian,* < *glæd,* bright.]

glad, *a.* [GLAD′DER; GLAD′DEST.] **1.** Having a feeling of joy, gratification, or content over special circumstances or events; joyful; pleased; satisfied: frequently followed by *of, at,* or an infinitive; as, I shall be *glad of* your company; he was *glad at* the report of your success. **2.** Having an appearance of joy or brightness; gladsome; cheerful; as, a *glad* smile; *glad* springtime.

To-morrow 'll be the happiest time of all the *glad* New-year.
TENNYSON *May Queen* st. 1.

3. Suggestive of or exciting joy; as, a *glad* voice; *glad* tidings. **4.** [Prov. Eng.] Moving or operating with ease and smoothness.

The range of mind makes the *glad* writer.

glase^2, *vt.* To glaze.

Gla'ser, 1 glā'zər; 2 glā'zer, *n. Norse Myth.* A shining grove outside of Asgard, in which all the leaves are red gold; hence, gold is often called **Glaser's leaves**. **Gla'sir**.

Gla-se'ri-an, 1 gla-sē'ri-ən; 2 gla-sē'ri-an, *a.* Pertaining to or named in the genus anomiid. [< Glaser (1639–?).]

—Glaserian fissure, a slit in the temporal bone of the skull at the bottom of the articular cavity for the lower jaw.

gla'ser-ite, 1 glē'zər-īt; 2 glā'zer-ĭt, *n.* Same as APHTHITALITE.

Glas'gow, 1 glas'gō; 2 glăs'gō, *n.* **1. Elien Anderson Gholson** (?/21874–), an American novelist. **2.** A manufacturing and commercial seaport city at the head of navigation on the Clyde river, Scotland; it has a cathedral, university, and extensive shipyards. **3.** A town, county-seat of Barren County, Ky., seat of Liberty College (Baptist), founded in 1874. **4.** A city in Howard county, Mo.; seat of Pritchett College (non-sectarian), founded in 1855. **—Glasgow magistrate** [Local, Scot.], a red herring.— **G. penny**, a penny-piece, an opening in which the early moves are: 1i–1.5, 2d–1g, 3–11, 22–17, 11–16.

gla's'han, 1 glē'shən; 2 glā'shan, *n.* [Scot., N. Ir.] Same as COAGHEL, 1. [Gaelic.]

gla'sier, glas'ing. Same as GLAZIER, GLAZING.

Glas-nev'en, 1 glas-nev'ən; 2 glăs-nĕv'ĕn, *n.* A village in Dublin county, Ireland.

glass, 1 glas; 2 glăs, *vt.* **1.** To reflect as in a mirror or a mirror-like surface; mirror: often used reflexively; as, the flower *glasses* itself in the pool.

While myriad faces, like one changeless face,
With woe not love's shall *glass* thee everywhere.
E. B. BROWNING *Isobel's Child* st. 9.

2. To give a glassy or glass-like surface to; glaze. **3.** [Archaic.] To case or cover with glass. **4.** [Rare.] To furnish with spectacles or eye-glasses.

Eyes well-nigh glazed, long *glassed*, . . . explore ceaselessly some good sermon book.
THOREAU *Week on the Concord* p. 70. [R. & P. 1862.]

5. To render glassy; as, his vice *glasses* his eye. EMERSON. **6.** To dress, as leather, with a glassing-machine: often used with *out*.

glass, *n.* **1.** A fused mixture of silica, usually in the form of natural sand, and two or more alkaline bases such as soda, lime, or potash. It is generally transparent or translucent, is brittle and conveys sudden temperatures, and when heated becomes soft and ductile, finally melting. The point of fusion varies with its composition. It breaks with a conchoidal fracture, is called vitreous by mineralists, and is acted on by hydrofluoric acid, but not by ordinary solvents. Egyptian monuments show that the art of glass-making was practised 4,000 years ago, or before the Hebrew exodus. The art was common among the nations of the eastern continent, but curiously no traces of it have been observed among the earlier inhabitants of America. See list of varieties below.

VARIETIES OF GLASS, WITH EXPLANATIONS.

The principal methods of manufacture are those employed for window-glass, bottle-glass, and plate glass. In any process the first step is to fuse the ingredients in a pot or crucible. For **window-glass**, the material is blown into cylindrical form, slit, flattened, and cut to desired sizes. For **bottle-g.**, commonly termed **green g.**, the viscid melted glass is taken on the end of a tube and thrust into a mold, where it is blown into shape. For **plate g.**, the molten compound is poured out on a large iron table, rolled to the desired thickness, cooled, and subsequently polished. In all forms glass must be annealed before use. The predominating metallic oxid may give its name to the glass, as **soda g.** (called **kelp g.** when the alkaline metal is derived from kelp), **potash g.**, **lead g.**, and **lime g.**, or **half-crystal g.** Glass containing lead is called **crystal g.** or **flint g.**, and in England sometimes **heavy g.**, in distinction from **crown g.**, containing lime. Glass containing arsenic is called **arsenic g.** A milky-white opaque glass, made white by adding 20 per cent. calcium phosphate in the form of bone-ash, is called **bone g.** or **opal g.**, and when similarly colored by cryolite is called **milk g.** or **milk-stone g.**, while that white variety resembling alabaster is known as **alabaster g.** or **rice-stone g.**, and when rendered opaque, somewhat like porcelain, by exposure to a great heat, is called **devitrified g.** That made from the slag of an iron furnace is **slag g.** Mineral oxids are used to color glass, as **metz, blue, or cobalt g.**, made with cobalt oxid; **canary g.**, colored yellow with uranium oxid; and **ruby g.**, obtained by the use of copper or gold. When ornamented with colored threads it is **filigree g.**, a variety of which is **reticulated g.** One or more coatings, usually of colored glass, yield **cased, covered, coated, doubled, or flashed g.**, in distinction from **colored or pot-metal g.**, which is colored throughout while in a state of fusion. When superimposed glass is cut in relief to show the layers of colors it is **cameo-g.**, or **sculptured g.**, when resembling **onyx, onyx g.** Colored glass used decoratively, as in windows, is **stained g.**, sometimes **painted g.** when the colors are applied by means of vitrifiable pigments, or **enameled g.** when the colors result from enamel-painting. Sometimes such glass is called **mosaic g.**, from the numbers or small pieces of colored glass used to produce the design, and which are joined by strips of lead. These, when fused together, cut in accordance with a pattern, and united in one grand **millefiori g.**, commonly used for paper-weights and ornaments. When the pattern is stellate and opaque it is called **madrepore g.**, while **matted g.** is so called when made ornamental with pigments, and then fused, yielding a dull surface like ground glass. **Agate g.** is made by melting together waste bits of various colored glasses; **marbled g.** is immersed in water while hot, then reheated and expanded by blowing so as to produce a veined surface resembling marble; **halfclear g.** is partially devitrified glass; **silver g.** is colored pink in manufacture by a French process. **White g.** is a term in England for some brilliant uncolored glass containing no lead, and distinguished from *flint* or *crystal* glass. Glass containing flakes of metal, such as gold, silver, or platinum, scattered through it is **metalized g.**; when ornamented with white incrustations, producing a silvery surface, it is **argentine g.**; when the metal flakes are copper, it is **aventurine g.**; when treated so as to produce an iridescence, it is **favrile g.**, when suggesting bronze, it is **bronzed g.**; when ornamented to produce the effect of lace, or coated with a layer of either tin or silver amalgam, to produce a mirror, it is **silvered g.**; when the metal is platinum, it is **platinized g.**

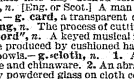
The treatment of glass in its manufacture frequently suggests its name; as, **blown g.**, when blown; **cast or plate g.**, when cast in large thick plates; **rolled g.**, an inferior variety of plate glass, rolled out instead of cast and rolled to suitable thickness; **cylinder g., broad g., sheet g., spread g., German g.**, window-glass when manufactured by the cylinder process; **compressed g.**, when tempered by being pressed in chilled molds; while in **hardened, tempered, or toughened g.** the same result is produced by toughening in a bath of oil, as described in the article in Bastic. **Cut g.** is ornamented by cutting or grinding on a wheel of stone, iron, or wood into grooves, leaving prismatic and crystal-like elevations between them; a specially beautiful and costly variety is called **diamond-cut g.**, an imitation of which a cast variety called **diamond-molded g.** is made. When the surface is roughened it is **granulated g.**, and when smooth and polished, **plate g.** or **smooth g.** Other varieties are **kinkled g.**, having the surface raised in small rounded elevations; **ondoyant g.**, with a wave-like surface, usually in different colors; **ornamental or frilled g., opalescent g., pressed g.**, produced in a mold under pressure; **spun g.**, drawn out into thin hair-like forms; and **frosted g.**, having a roughened and frost-like surface.

Some varieties of glass are named from their uses; as, **bottle-g., mirror-g., optical g.**, and **window-g.**; others from localities; as, **Bar g.**, from Alsace; **Bohemian g.**, hard and ornamented glass from Bohemia, Austria, famous for its enamel decorations and clever engravings; **Murano, Venetian or Venice g.**, the finest ornamental varieties from Murano, near Venice; **Saint Gobain g.**, a plate glass made at Saint Gobain, France.

Glass being introduced into France from Venice for the first time about the year 1625, . . . [was] soon as far in height of luxury.
T. C. GRATTAN *Heiress of Bruges* vol. i, p. 167. [H. 1831.]

2. *Chem.* Any fused substance resembling glass, with a vitreous fracture; as, *glass of antimony*, a mixture of it and borax that has been fused; *glass of cobalt* (same as smalt). **3.** *Petrol.* Igneous rock-material that has been too rapidly solidified to permit of crystallization, and possesses, therefore, the isotropic character of amorphous substance. **4.** Any article made of glass. Specif.: (1) A square or pane of window-glass. (2) A drinking-vessel; as, a wine-*glass*; a beer-*glass*. (3) A mirror or looking-glass. (4) One of various optical instruments, as a telescope, opera-glass, or lens; specif., in the plural, spectacles or eye-glasses.

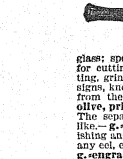
He thought that he could perceive, by means of his *glass*, that they were painting their faces, and otherwise arranging their toilets.
COOPER *Redskins* p. 204. [S. & T. 1857.]



And *glasses* with horn bows
Sat astride on his nose, with a look of wisdom supernal.
LONGFELLOW *Evangeline* pt. i, iii. st. 1.

5. An instrument in which glass forms a conspicuous part, as a thermometer or a barometer. **6.** Glasses for measuring time by the passage of sand or the like through an orifice are known as **hour-, log-, minute-, sand-, time-glasses. 6.** The contents of a glass or drinking-vessel; as, he drank a *glass* of wine.
Even the parson had his jokes And his *glass* like other folks.
WHITTIER *To my Old Schoolmaster* st. 6.

[< AS. *glæs*.]



—anaclastic glass, binocular g., etc., see ANACLASTIC, etc.— **Appert g.**, a glass of unusual strength, which is unaffected by acids, electricity, or climatic variations. **—chipped g.**, a rough sheet glass prepared for screens and partitions and made to resemble frost-covered window-panes by a coating of glue, which, under excessive heat, curls up, drawing with it chips from the glass.— **copper g.**, see ALEXANDRIA BLUE, under BLUE.— **Fichtel g.** 1. A painted enamel glass of large size for drinking purposes, first made in the Fichtel Mountains, upper Bavaria. 2. A drinking-glass of the 17th and 18th centuries, ornamented with a representation of the Ochsenkopf, one of the Fichtel peaks, under an ox's head. **—figured fulled g.**, a glass unpolished, cast on a table in which a pattern is cut which imprints itself on the glass: used for partitions,

floors, and roofs, its light-diffusing quality being remarkable. — **Franklin g.**, a spectacle-glass so divided that the upper half differs in magnifying power from the lower half. — **glass'ar'go-naut**, *n.* A pterotracheid heteropodous mollusk. — **g.-blowing**, *n.* The process of blowing viscid molten glass into any desired form. — **g.-blower**, *n.*—**g.-breaker**, *n.* [Eng. or Scot.] A man who drinks frequently; a tippler. — **g. card**, a transparent card made of gelatin. — **g.-carving**, *n.* The process of cutting or etching on glass. — **glass'-chord'e**, *n.* A musical instrument in which the tones are produced by cushioned hammers striking on glass bars or bowls. — **g.-cloth**, *n.* **1.** A linen towel for wiping glassware and chinaware. **2.** An abrasive cloth made by sifting finely powdered glass on cloth covered with glue. **3.** A fabric woven of fine-spun glass thread. — **g.-coach'**, *n.* [Eng.] A coach for hire having glazed windows. — **g.-crab**, *n.* The flat transparent larva of a pallinurid or scyllarid shrimp. — **g. culture** (*Hort.*) the cultivation of plants under glass. — **g.-cutter**, *n.* One who or that which cuts

Glass-cutter.

glass; specif., a diamond-pointed or hard steel-pointed tool for cutting glass. — **g.-cutting**, *n.* The process of cutting, grinding, and polishing glassware in ornamental designs, known in the trade as cuts, which take their names from the forms represented, as fish, **hobnail**, **olive**, **prism**, **strawberry**, and **table diamond** cuts. **2.** The separation of glass by cutting with a diamond or the like. — **g.-dust**, *n.* Powdered glass used for grinding and polishing and for making glass-paper. — **g.-eel**, *n.* A larva of any eel, especially the conger; a leptocephalus. — **g.-fish'**, *n.* — **g.-engraving**, *n.* The process of marking or decorating glass with designs, letters, etc. — **g.-etching**, *n.* The process of etching on glass, as by hydrofluoric acid. — **g.-eyed**, *a.* Having a white eye, or one resembling a glass eye; wall-eyed; zoogle-eyed. — **g.-faced**, *a.* Having a glazed face. — **g.-furnace**, *n.* A furnace for fusing together the materials

Glass-furnace.

1. Side elevation: *b*, bridge; *be*, batch-chamber; *f*, doffor; *g*, grate; *i*, inlet for fuel; *n*, neck or passage; *p*, pot; *pc*, pot-chamber; *s*, stack; *t*, valve-chamber for altering the direction of the flame when desired. 2. Ground-plan: *a*, apertures for inserting or withdrawing pots.

of which glass is made, or one for remelting glass-frit and making it ready for working. — **g.-gall**, *n.* The scum of impurities that rises to the surface of the fused ingredients from which glass is made. See ANATRON; SANDIVER. — **g.-gilding**, *n.* The process of applying to glass a layer of platinum chloride mixed with oil of turpentine and plunging the object into a gold-bath after it has been fired. — **g.-glazed**, *a. Ceram.* Highly glazed; evidencing the glassy character of the coating. — **g.-house**, *n.* **1.** A factory where glass is made. **2.** A hothouse or greenhouse, with roof and sides of glass. **3.** A photographer's room with a glass roof. — **g.-infusion**, *n.* In crystals of igneous rocks, an inclusion of glass or some hybrid substance. — **glass'mak'er**, *n.* One who makes or manufactures glass. — **glass'man**, *n.* **1.** One who manufactures or deals in glass. **2.** One who inserts window-glass; a glazier. — **g.-metal**, *n.* The ingredients used in the manufacture of glass: so called while in a state of fusion. — **g.-mold**, *n.* A hinged mold in which glass is blown or pressed into form. — **g.-mounter**, *n.* A workman who adds the ornamental parts to glassware. — **g.-nose**, *n.* A variety of anthozoid, — **g.-oyster**, *n.* A bivalve mollusk found in the warm *x* South African waters. — **g.-oven**, *n.* A long furnace with a movable train on which articles of glass pass gradually from heat to ordinary temperature. — **g.-painting**, *n.* **1.** The art of applying colors on glass, to be burned in. **2.** A mosaic made up of small fragments of glass. — **g.-painter**, *n.* — **g.-paper**, *n.* A stout paper coated with powdered glass, used like sandpaper. — **g.-polishing**, *n.* The process of polishing glass by wooden or cork wheels, or by a machine made for the purpose. — **g.-pot**, *n.* A pot or crucible for melting glass, in which are fused the ingredients from which glass is made. — **g.-press**, *n.* A machine for molding solid articles of glass, as door-knobs. — **g.-printing**, *n.* The process of printing on gelatin cards. **2.** The art of printing on glass by the transfer process. — **g.-refiner**, *n.* A proposed process for making plate glass between rollers, invented by Bessemer. — **g. rope**, *n.* The column of spiral siliceous fibers supporting a glass-sponge. — **g.-sand**, *n. Geol.* Sand of quartz, suitable for glass-manufacture and nearly free from oxid of iron and other comm on and injurious substances. — **g.-shell**, *n.* **1.** A hyaloid pteropodous mollusk. **2.** A glass-snail. — **g.-shrimp**, *n.* A larval form of a stomatopodous crustacean, as a mantis-shrimp. — **g.-silk**, very fine long flexible glass threads. — **g.-silvering**, *n.* The deposition of a thin coating of tin or silver with mercury on the back of a sheet of glass, forming a mirror. — **g. slip**, an oblong strip of glass arranged for mounting an object to be inspected in a microscope. — **g.-snail**, *n.* A minute viviparid snail having a very high transparency. — **g.-snake**, *n.* **1.** A slender snake-like and nearly limbless lizard (*Ophisaurus ventralis*) of the southern United States, having a very brittle tail; a joint-snake. **2.** An Old World snakeskin lizard (genus *Pseudopus*). — **g.-soap**, *n.* — **g.-sponge**, *n.* An oxidizing substance, as manganese dioxid, added to glass by glass-makers to neutralize the green color due to iron salts. — **g.-soldering**, *n.* The process of soldering glass by partial fusion. — **glass-swallow**. — **g.-spinning**, *n.* The process of drawing molten glass into fine threads of great flexibility; used in making glass fabrics. — **g.-sponge**, *n.* A hexactinellid sponge having a supporting skeleton of siliceous fibers resembling spun glass, as *Hyalonema sieboldi* of Japan, or Venus's flower-basket (*Euplectella aspergillum*). — **g.-stage**, a glass platform in a microscope. — **g.-staining**, *n.* The coloring of glass during manufacture. — **g.-stainer**, *n.* — **g. tear**, a Prince Rupert's drop. — **g.-tile**, a glass imitation of clay tile. — **g.-tinner**, *n.* One who applies tin-foil to glass, in the manufacture of mirrors. — **g.-tongs**, *n. pl.* Tongs for handling hot glass-ware, in manufacture. — **g. trough**, in a microscope, a trough of glass, with divisions and wedges, for confining objects which it is desired to inspect while in water. — **glass'ware'**, *n.* Articles made of glass; as, laboratory *glassware*; table *glassware*. — **g.-wave**, *n.* A sound-wave produced in a glass tube. — **g.-welding**, *n.* The welding of glass by partial fusion; glass-soldering. — **glass'wing'**, *n.* Any butterfly with glassy, transparent wings, or with wings partly transparent. — **little glasswing**, a lesperid butterfly (*Eurybyrer serna*) having a row of translucent or white spots on the fore wing. It ranges from New York to Kansas.—

glass'work', *n.* **1.** The manufacture of glass articles, sheet glass, etc. **2.** Articles produced in a glass-factory. **3.** The part of a structure that is made principally of glass. **4.** [Slang.] Cheating by cardsharpers, by means of a concealed mirror. — **g.-worker**, *n.* — **g.-working**, *n.* Glass-making. — **g.-works**, *n. sing. & pl.* A glass-factory. — **g.-yarn**, *n.* A glossy-fibrous yarn. — **gold g.**, glassware decorated with engraving on gold-foil affixed to the glass subsequently covered by a glass film; manufactured to have originated in the 3d century. — **hammered g.**, glass so treated on one side as to look like hammered metal. — **hard g.**, glass which requires great heat to make it plastic. — **jealous g.'**, glass which, while translucent, is not transparent: formerly much used in China for casement windows. — **Jena g.**, a glass of exceptionally fine quality produced in several varieties at Jena, Germany; used for scientific instruments. — **lace g.**, *n.* A variety of Venetian glass in lacelike designs. — **ladled g.**, cullet. — **lady's g.** **1.** The corn violet. **2.** Venus's looking-glass. — **lacking g.**, *n.* An arrangement of mirrors by which lights are turned to the eye. — **liquid, soluble, or water g.**, potassium or sodium silicate in which the alkali predominates, and which is used for hardening artificial stone and for rendering fabrics incombustible. — **Lorrain g.**, tinted glass, named from the painter Claude Lorrain, the coloring of whose pictures it is supposed to reproduce. By opticians the term is applied to glass, ground in a peculiar manner, covered with a polished black composition, and so mounted as to reflect a landscape which can then be portrayed from the image upon the glass. — **mast g.**, thick crown sheet glass with a pattern in relief on one side. — **Müller's g.**, a variety of opal, hyalite. — **murrine g.**, an imitation in glass of ancient drinking-cups in onyx or agate. — **Nicholson's g.**, a pair of reflecting glasses, an instrument composed of a series of glass tubes, goblets, slips, or the like, graduated to the musical scale, and played by rubbing the rims with a moistened finger or with the moistened finger. — **natural g.** (*Geol.*), a volcanic formation, due to rapid cooling of masses of fluid rock from a high temperature. — **opaque g.**, glass containing tin oxid, or containing a high percentage of lead. — **quartz g.**, glass of which quartz is one of the chief ingredients. — **Sandwich g.**, American pressed glass, first made at Sandwich, Mass., in 1825: so called from its being packed in tin boxes and sent. — **Siemen's toughened g.**, glass hardened by the Siemens process of sudden cooling. — **soft g.**, glass which becomes plastic at a low temperature. — **Stiegel g.**, glass made at Stiegelhelm, Pa., by Baron H. W. Stiegel toward the end of the 18th century; transparent or blue, white, and purple in color, singularly free from flaw, and having a peculiar impression left by the molds in which it was blown. — **tin g.**, bismuth: used by glass-makers. — **to crush a g.**, to drink a glass together. — **to drink a g.** to test making before using. — **trial glasses**, a set of concave and convex lenses of regularly graded focal lengths: for testing vision. — **uviol g.**, glass which remains ultraviolet rays. — **Venice g.**, a fine goblet or drinking-cup of the purest quality, made near Venice, so fragile that, according to tradition, the pouring of poison into one would cause its destruction.

Glass, **i** *glăs*; **2** *Glas*. — **Charter** (*or* **Act**) **of** (*1735*—), an American statesman; Secretary of Treasury, 1919–20. **2. John** (*or in* 1695–*1*), 1773). A Scottish sectary; founded *Glassites*; deposed for opposing civil authority in Presbyterian religious affairs in 1728.

glass'ar'go-naut, **g.-blowing**, **g.-carving**, etc. See under GLASS, *n.*

Glass'cock, **1** glăs'kŏk; **2** *Glas'cŏk*. A county in N. Ireland, **1** *glăs*; **2** *Glas*, Mrs. Supposed pseudonym of the author of the famous cook-book first edited in 1747. Possibly the author's real name.

glass'en, **1** *glăs'n*; **2** *Glas'n*, *a.* **1.** [Local, Eng.] To coat with or as with a glaze. **2†.** To furnish or provide with glass.

glass'er, **1** *glăs'ẽr*; **2** *Glas'ẽr*, *n.* [Obs.] A glazier.

glass'eye', **1** *glas'aĭ'*; **2** *Glas'y'*, *n.* **1.** [Local, U. S.] A pike-perch (*Stizostedion vitreum*). **2.** The Jamaica thrush (*Turdus nigrescens*). **3.** The blesbok of the eye in horses.

glass flooring, etc. See under GLASS, *n.*

glass'ful, **1** *glas'fŭl*; **2** *glas'fŭl*, *n.* [GLASS'FULS, *pl.*] As much as can be contained in a drinking- or wine-glass.

glass'fe, **1** *glas'ĭ*; **2** *glas'i*, *n.* [Scot.] A taw, or boy's marble made of colored glass.

glass'ine, **1** *glas'in*; **2** *glas'in*, *n.* A strong tissue-like transparent paper, used like sulfite pulp or treated with resin instead of tissue-paper in wrapping goods, as for sanitary protection, for book-jackets, and for envelops. See WINDOW, *n.*, **2**.

glass'ing, **1** *glas'in*; **2** *glas'ing*, *n.* The act or operation of dressing leather with a glaze or agate burnisher or other implement. — **glassing-jack**, *n.* A glass or agate burnishing-tool for dressing leather. — **g.-machine**.

Glass'ite, **1** *glas'ĭt*; **2** *Glas'it*, *n. Ch. Hist.* One of a small Christian sect, founded by John Glass, holding that faith is a mere assent to the truth of the gospel. See SANDEMANIAN (1718–71), the son-in-law of Glass, who founded the English and American branches of the sect.

glass'ite, **1** *glas'ĭt*; **2** *Glas'it*, *n.* [Local, Eng.] The coalfish.

glass'pox', **1** *glas'poks'*; **2** *glas'poks'*, *n.* Chicken-pox, hives, or varicella.

glass'wort', **1** *glas'wŭrt'*; **2** *Glas'wŭrt'*, *n.* Any one of several low saline seaside herbs of the genus *Salicornia*, of the family *Chenopodiaceæ*, with succulent, leafless, jointed stems, formerly used in glass-making; samphire. **glass'weed'**, same as **glass'wort**, *n.* — **g. joint'-grass'weed**, *n.* — **prickly glasswort**, the common saltwort (*Salsola kali*).

glass'y, **1** *glas'i*; **2** *Glas'y*, *a.* [GLASS'I-ER; GLASS'I-EST.] **1.** Composed of glass; of the nature of glass; vitreous; as, a *glassy* mass. **2.** Of the same property of glass, as transparency or clearness.

3. Having a hard, fixed, motionless appearance; as, a *glassy* stare. **4.** Very, see COLLOQ. — **glassy humor**, the vitreous humor of the eye. — **glassy sea**, as viewed by SOPPY HUMOR. — **glass'i-ly**, *adv.* So as to resemble glass in appearance or sensible effect. — **glass'i-ness**, *n.* The quality of being glassy or smooth.

Glast, *n.* Glastonbury.

Glas'ton-bur-y, **1** *glas'tŏn-bẽr-i*; **2** *glas'ton-bẽr-y*, *n.* **1.** An ancient town in Somersetshire, England; ruins of an abbey built on the site of the first Christian church in Britain, and of which St. Dunstan was abbot: the reputed burial-place of King Arthur and Queen Guinevere. **2.** A manufacturing village in Hartford county, Connecticut. **3.** A wooden chair, said of armchair modeled on one now preserved in Wells Cathedral and formerly belonging to the Abbot of Glastonbury.

glas'tun, **1** *glas'tŭn*; **2** *glas'tun*, *n.* Woad.

glas'ur-ite, **1** *glas'ur-ait*; **2** *glas'ur-it*, *n. Mineral.* A brownish-yellow hydrated iron silicate that occurs in layers in amygdaloidal cavities.

glas'ynger, *n.* Glazing; glass.

glo''bo-cu'mu-lus, 1 glō''bo-kū'mū-lus; 2 glō''bo-kū'mū-lus, *n.* Globe-like or spherical; nearly globular. **glo'bose',** **glo'bōse',** *a.* — **glo'bose-ly,** *adv.* — **glo'bose-ness,** *n.* — **glo-bos'i-ty,** *n.* The quality of being globe-shaped.

glo'bo-site, 1 glō'bo-sīt; 2 glō'bo-sīt, *n. Mineral.* A greasy yellowish hydrated fluoride and phosphate, closely related to beraunite. [< L. *globus*, ball.]

glo'bo-stel'late, 1 glō'bo-stel'ēt; 2 glō'bo-stel'āt. *Zool.* I. *a.* Having rays or points arranged in a globe-like formation, as in certain forms of sponges, etc. II. *n.* A sponge-spicule having such characteristics.

glob'u-lar, 1 glob'yu-lar; 2 glŏb'yu-lar, *a.* 1. Having the shape of a globe or of a sphere; spherical. **glo'bar.**

The typical form of the Nervecells or 'ganglion-globules' may be regarded as *globular*. W. B. CARPENTER *Principles of Mental Physiol.* bk. 1, p. 35. [< L. *globulus*, ball.]

2. Formed or composed of globules. [< L. *globulus*, dim. of *globus*, ball.] — **globular chart,** a chart made according to globular projection. See PROJECTION, 2, sailing, sailing on the arc of a great circle or by the shortest way. — **glob''u-lar-l-ty,** *n.* The state of being globular. **glob'u-lar-ness,** — **glob'u-lar-i-ty,** *adv.*

glob'u-lar-in'in, 1 glob'yu-la-rē'in; 2 glŏb'yu-la-rē'in, *n.* A resinous substance obtained from the leaves of *Globularia alypum*.

glob'u-lar'i-a, 1 glob'yu-lar'i-a; 2 glŏb'yu-lar'i-a, *n. Chem.* A compound ($C_{30}H_{50}O$) of globularin and certain acids.

Glob''u-la'ri-a, 1 glob''yu-lē'ri-a; 2 glŏb''yu-lā'ri-a, *n. Bot.* A small genus of European shrubby or herbaceous plants of the family *Globulariaceæ*, frequent in ornamental cultivation: globe-daisies. [< L. *globularis*, see GLOBULAR.]

Glob''u-la''ri-a'ce-æ, 1 glob''yu-lē''ri-ē'se-ī; 2 glŏb''yu-lā''ri-ā'se-ī, *pl. Bot.* A family of perennial herbs and subshrubs (order *Polemoniales*) natives of the Mediterranean region. These are 4 genera and about 30 species characterized by obovate leaves and globular heads of flowers. **Glob''u-la'ri-a,** (G. g.) — **glob''u-la''ri-a'ceous,** *a.*

glob'u-la-rin, 1 glob'yu-la-rin; 2 glŏb'yu-la-rin, *n.* An amorphous glucosid ($C_{34}H_{54}O_{18}$), occurring in the leaves of *Globularia alypum*.

glob'ule, 1 glob'yul; 2 glŏb'yul, *n.* **1.** A small globe, sphere, or spherical particle of matter.

These minute *globules* of magnetic iron were sparks emitted from a burning meteor. WINCHELL *Walks* p. 60. [CHAPIN, 1890.]

2. *Biol.* A small spherical part or structure, as a blood- or lymph-corpuscle, or the antheridium of a characeous plant. **3.** A very small pill: used in homeopathy.

My father had not as much pride as a homeopathist could have put into a *globule*.

BULWER-LYTTON *Caxtons* vol. i, pt. iii, p. 113. [c. 1873.]

[F., < L. *globulus*; see GLOBULAR.]

globule of Morgagni's (*Pathol.*), small spherical bodies without nuclei found within the capsule of the lens of the eye: mostly in traumatic cataract. — **glob'u-let,** *n.* A minute globule. — **glob'u-lif'er-ous,** *a.* Containing, producing, or composed of globules. — **glob'u-li-form,** *a.* [Rare.] Globuloid. — **glob''u-li-gen'ic,** *a.* Productive of blood-corpuscles. — **glob''u-lig'e-ter,** *n.* An instrument used to measure the number of red corpuscles in the blood. — **glob'u-lism,** *n. Med.* The giving of medicine in globules; homeopathic practise. — **glob'u-list,** *n.* [Eng.] One who administers or uses globules; a medical practiser: applied with derogatory meaning to homeopathists.

glob'u-li-cide, 1 glob'yu-li-sīd; 2 glŏb'yu-li-sīd, *n. Med.* Anything that destroys globules. [< GLOBULE + L. *cædo*, kill.] — **glob'u-li-cī'dal,** *a.* Having a quality destructive of blood-globules, as the blood-serum of one animal dissolving the red blood-corpuscles of another animal.

glob'u-lin, 1 glob'yu-lin; 2 glŏb'yu-lin, *n. Chem.* Any one of a class of albuminous proteid compounds, insoluble in water but soluble in dilute saline solutions, contained in both animals and plants.

The animal globulins include *fibrinogen*, *serum-globulin* or *paraglobulin*, *globin*, *myosinogen*, *crystallins*, and *vitellin*. The vegetable globulins include *planiretellin*, *planimyosin*, and *vegetable pyrenin* (see these words). — **glob'u-lin-i'form,** *a. Pathol.* The presence of globulin in the urine.

glob'u-lite, 1 glob'yu-līt; 2 glŏb'yu-līt, *n. Petrol.* A minute drop-like crystallite, the most rudimentary form. — **glob''u-lit'ic,** *a.* Of, pertaining to, or containing globulites.

glob'u-lol, 1 glob'yu-lol; 2 glŏb'yu-lŏl, *a.* Shaped like a globule.

glob'u-lose, 1 glob'yu-lōs; 2 glŏb'yu-lōs, *n. Chem.* The variety of hemibasinose produced by digesting globulin with pepsin. [*F. Med. Dict.*] — **glob'u-lo-sest.**

glob'u-lous, 1 glob'yu-lus; 2 glŏb'yu-lus, *a.* Of the shape of a small globe; globular; spherical. **glob'u-lose,** — **glob'u-lous-ness,** *n.*

glob'u-lus, 1 glob'yu-lus; 2 glŏb'yu-lus, *n.* [-LI, 1 -lī; 2 -lī, *pl.*] *Helminth.* A zoœcium or an internode of a polyzoan. [< L. *globulus*; see GLOBULAR.]

glob'u-ly'tis, 1 glob'yu-lai'tis; 2 glŏb'yu-lī'tis, *n.* The destruction or breaking up of red blood-corpuscles.

glo'bus, 1 glō'bus; 2 glō'bus, *n.* (GLO'BI, 1 -bī; 2 -bī, *pl.*) [L.] **1.** A globose body; especially, either of the rounded extremities (the **globus major**, or head, and the **globus minor**, or tail) of the epididymis. **2.** *Her.* A mound.

— **globus hystericus** [L.] (*Pathol.*), a feeling of strangulation induced as by the rising of a globular body through the abdomen and esophagus: common with women in hysterics. — **g. pallidus,** the inner portion of the nucleus lenticularis, a collection of gray matter at the base of the brain, distinguished by its lighter color.

glob'y, 1 glō'bi; 2 glō'bī, *a.* Globe-shaped; globose.

Gloces'ter, 1 glos'ter; 2 glŏs'ter, *n.* A town in Providence county, R. I.

Glo-chi'ce-ras, 1 glo-kis'or-as; 2 glo-cī'er-as, *n. Falcon.* A genus of Jurassic cephalopods with smooth-chambered shells and tapering, sinuous sipho at the aperture.

glo-chid'i-um, 1 glo-kid'i-um; 2 glo-cid'i-um, *n.* [-I-A, *pl.*] **1.** *Zool.* A larva of a unionid mussel with a bivalve embryonic shell provided with hooked processes by which it may attach itself to a fish and there pass a brief phase of its life. **2.** *Bot.* A barbed hair-like appendage on the massulæ of certain heterosporous pteridophytes by which they attach themselves to the macrospores. [< Gr. *glōchis*, arrow-point.] — **glo-chid'i-al,** *a. Conch.* Having the characteristics of a glochidium. **glo-chid'i-an,** — **glo-chid'i-ate,** *a.* Barbed, as set on with bristles. **glo-chid'i-date;** **glo-chid'e-ous;** **glo-chid'i-ous;** **gloch'i-nate,** —

glo'chis, 1 glō'kis; 2 glō'cis, *n.* [GLO'CHI-NES, 1 -kī-nēz; 2 -cī-nēz, *pl. Bot.* A barbed hair, bristle, spine, point, or the like. [< Gr. *glōchis*, point of an arrow.]

glock, 1 glok; 2 glŏk, *v.* [Scot.] 1. To swallow in huge gulps. 2. To bubble, or make a purling sound.

glock'en, 1 glok'en; 2 glŏk'en, *v.* [Scot.] To frighten; startle.

Beauty without the *glow* of the heart, lisl as a landscape from which sunlight has vanished.
BULWER-LYTTON *Harold* bk. vii, p. 160. [ı. a & s. 1867.]

4. Bodily warmth, as caused by exercise, etc.

SYN. see LIGHT.—**glow'-bee'tle,** *n.* A ntiuild beetle of the genus *Mellisethes*, as *M. æneus*, a destructive European species.—**glow'bird'*,** *n.* A glowworm. **glow'bard'*;** **glow'ba'soni.—glow'fly',** *n.* A firefly; specif., the cucujo.—**g.-light.—g.-lighting,** *n. Elec.* The illumination by means of incandescent lamps.

glowd, *pp.* Glowed. S. S.

glowd'en-ı, *pp.* of GLOW, *v.* CHAUCER *C. T.* l. 2,134.

glow'er, ı ḡlou'ər; 2 ḡlou'er, *vi.* To stare frowningly; look fierce or angry; frown; scowl. [A form of GLORE, GLARE, *v.*]—**glow'er-er,** *n.*—**glow'er-ing-ly,** *adv.*

glow'er', *n.* A fierce or threatening stare. [lamp.

glow'er-ı, ı ḡlō'er, *n. Elec.* The filament of a Nernst

glowerd, *pp.* Glowered. S. S.

glow'er-ing, ı ḡlou'er-ıng; 2 ḡlow'er'ing, *pa.* [Eng. or Scot.] **1.** Staring; empty-headed. **2.** Sour-looking; disagreeable. **3.** Dark-looking; overcast.

glow'ing, ı ḡlō'ıng; 2 ḡlō'ing, *pa.* Having or showing a glow; burning; incandescent; ruddy. SYN. see ARDENT; FAULT; HOT.—**glow'ing-ly,** *adv.* In a glowing manner.

glow'worm', ı ḡlō'wŭrm'; 2 ḡlō'wŭrm', *n.* **1.** A lampyrid beetle, as *Lampyris noctiluca* or *L. splendidula* of Europe, the female of which is wingless, somewhat worm-like, and displays from the abdomen a green light that attracts the less phosphorescent males. The larvæ are also luminous. **2.** [U. S.] The luminous larva of a firefly.

GLOWWORMS.

1. Female of *Lampyris noctiluca*. 2. Male of the same. 3. Female of *Lampyris splendidula*. 4. Male of the same. 5. Female of *Lampyris* (Italian species). 6. Male of the same. 7. Female of *Phosphænus hemipterus*. 8. Male of the same. 9. Female of *Pyrocœlia rufa*. 10. Male of the same.

glows, ı ḡlōs, 2 ḡlōz, *vi.* [Eng.] To gurgle.

Glox-in'ı-a, ı ḡloks-in'ı-ə; 2 ḡlōks-in'ı-a, *n. Bot.* **1.** A small genus of tropical American herbs of the family *Gesneraceæ*. They have opposite leaves and large bell-shaped nodding flowers of red, white, and intermediate shades. **2.** [ḡ-] A plant of this genus.

3. Any plant of the genus *Sinningia*, *pyrs splendida*; ia, *s. speciosa*, etc. [< *Glozin*, Ger. male of the same. **2.** man physician.] Female of *Lampyris noctiluca*.

gloy, ı ḡloi; 2 ḡlōy, *n.* [Scot. or Ir.] *noctiluca*.

gloze, ı ḡlōz; 2 ḡlōz, *vt. & vi.* [GLOZED; GLOZ'ING.] **1.** To palliate by specious representation; gloss over. **2.** Archaic. To flatter; wheedle. **3.** To explain by notes or glosses; interpret. [ME. *glosen*, < AS. **glōsan, glæsan*, explain < LL. *glosso*; see GLOSS2, *v.*]—**gloz'er,** *n.* **1.** A glossator. **2.** A flatterer; deceiver.—**gloz'ing,** *n.* **1.** Specious flattery. **2.** Annotation; comment.—**gloz'ing,** *pa.* Deceiving.—**gloz'ing-ly,** *adv.*

glozé, *vt. & vi.* To cause to shine; light up; gleam.

glozed, ı ḡlōzd; 2 ḡlōzd, *pa.* Glazed.

gloze, *n.* **1.** [Rare.] Specious show; gloss. **2†.** Flattery; adulation. **3†.** A gloss or comment.

G. L. M., *abbr.* Geographical last use: naval code call.

Glub-dub'drib, ı ḡlub-dub'drıb; 2 ḡlŭb-dŭb'drib, *n.* In Swift's *Gulliver's Travels*, an imaginary island peopled by magicians.

glu'ase, ı ḡlū'kās; 2 ḡlų'ēs, *n. Chem.* A ferment in blood-serum and other fluids which, dissolved in maltose, changes it to glucose. [< GLUCOSE.]

glu'cate, ı ḡlū'kāt; 2 ḡlų'cāt, *n.* Same as GLUCOHEMIA. **glu-cæ'mi-a†.**

Glu-chof', ı ḡlų-hŏf'; 2 ḡlų-hŏf', *n.* A town in Chernigof

glu'cic, ı ḡlū'sık; 2 ḡlų'cic, *a. Chem.* Of or derived from sugar. [< Gr. *glykys*, sweet.]—**glucic acid,** a colorless amorphous acid ($C_6H_{12}O_7$) formed variously, as from glucose or cane-sugar, by the action of acids.

glu'cid, ı ḡlū'sıd; 2 ḡlų'cid, *n. Chem.* Saccharin. **glu'cide.**

glu'cin, ı ḡlū'sın; 2 ḡlų'cin, *n. Chem.* **1.** A substitute for saccharin in foods for diabetics. It is the sodium salt of amido-triazine-sulfonic acid. **2.** Glucina. [< Gr. *glykys*, sweet.] **glu'cinet.**

glu-ci'num, ı ḡlū-sī'nəm; 2 ḡlų-cī'nųm, *n. Chem.* A hard silver-white metallic element. See ELEMENT. [< Gr. *glykys*, sweet.] **glu-cin'i-um†.—glu-ci'na,** *n.* Glucinum oxid. **glu'cite**(-cet, -cit)**—glu-cin'ic,** *a.* Of, pertaining to, or derived from glucinum.

glu'cite, ı ḡlū'sıt; 2 ḡlų'cit, *n. Chem.* Sorbite.

gluck, ı ḡlŭk; 2 ḡlŭk, *n.* A sound as of water poured from a bottle. [Imitative.] **gluck'-gluck'†.—gluck,** *vi.*

Gluck, ı ḡlūk; 2 ḡlųk, **1. Alma** (1886–), American soprano cantatrice; born in Bucharest. **2. Christoph Willibald, Ritter von** (1714–1787). A German musical composer: *Iphigenia in Tauris*, etc.

Glück'stadt, ı ḡlūk'shtat; 2 ḡlük'shtat, *n.* A seaport in Schleswig-Holstein province, Prussia; thrice besieged in the Thirty Years' war.

glu'co-al-bu'min, ı ḡlū'kō-al-bū'mın; 2 ḡlų'co-al-bŭ'mın, *n. Chem.* An albumin containing a relatively large amount of carbohydrate chemically combined.

glu'co-al'bu-mose, ı -al'bū-mōs; 2 -al'bŭ-mōs, *n. Chem.* A primary albumose containing the entire carbohydrate group of the original proteid molecule chemically combined.

glu'co-bi'ose, ı ḡlū'kō-bū'ōs; 2 ḡlų'co-bī'ōs, *n. Org. Chem.* A biose made up of two molecules of glucose.

glu'co-cy-a'mi-din, ı ḡlū'kō-sī-am'ı-dın; 2 ḡlų'co-cȳ-am'ı-din, *n. Chem.* A compound ($C_6H_{11}N_3O$) of the guanidin group. **glu'co-cy-am'i-dine†.**

glu'co-cy-an'idin, ı ḡlū'kō-sī-an'ı-dın; 2 ḡlų'co-cȳ-am'ın, *n. Chem.* A combination product of cyanamid and glycocoll ($C_3H_7N_3O_2$). **glu'co-cy-an'tine.**

glu'co-gen, ı ḡlū'kō-jen'e-sis, *etc.* Same as GLYCOGEN, etc.

glu'co-he'mi-a, ı ḡlū'kō-hī'mı-ə; 2 ḡlų'co-hē'mi-a, *n. Pathol.* Excessive amount of saccharine matter in the blood. [< GLUCOSE + Gr. *haima*, blood.] **glu'co-hæ'mi-a†.**

glu'co-lig'nose, ı ḡlū'kō-lig'nōs; 2 ḡlų'co-lig'nōs, *n. Chem.* A compound ($C_{36}H_{62}O_{31}$) obtained from ivory-nut with various chemicals

glu-col'y-sis, *n.* Same as GLYCOLYSIS.—**glu'co-ly'tic,** *a.*

glu'co-me'ter, ı ḡlū'kō-mē'tər; 2 ḡlų'co-mē'ter, *n.* An apparatus for ascertaining the saccharine strength of must by determining its specific gravity. [< GLUCOSE + Gr. *metron*, measure.] **gleu-com'e-ter†.**

glu-con'ic, ı ḡlū-kon'ık; 2 ḡlų-con'ic, *a. Chem.* Of, pertaining to, or derived from glucose; destroying maltonic.—**gluconic acid,** a colorless sirupy compound ($C_6H_{12}O_7$) obtained from glucose, cane-sugar, maltose, starch, soluble starch, and dextrin; chiefly by the action of fermentation with bromin or chlorin and silver oxid.

glu'co-pro'te-id, ı ḡlū'kō-prō'tē-id; 2 ḡlų'co-prō'te-id, *n. Physiol. Chem.* A compound of a proteid and a carbohydrate, such as amyloid. [< GLUCOSE + PROTEID.]

glu'co-pro'te-ose, ı ḡlū'kō-prō'tē-ōs; 2 ḡlų'co-prō'te-ōs, *n. Org. Chem.* An albumose formed from a glucoproteid.

glu'co-san'in, ı ḡlū'kō-san'ın; 2 ḡlų'co-sān'ın. *n.* A basic substance ($C_6H_{13}NO_5$). [< Gr. *glykys*, sweet, + AMIN.] **glu'co-san'ine†.**

glu'co-san, ı ḡlū'kō-san, -sān; 2 ḡlų'co-sān, -sān, *n. Org. Chem.* [< GLUCOSE.] **glu'co-se,** ı ḡlū'kō-sē, -sēz; 2 ḡlų'co-sē, -sēz, *n.* Same as GLUCOSE.

glu'co-sa'mic, ı ḡlū'kō-sā'mık; 2 ḡlų'co-sā'mic, *a. Chem.* Of, pertaining to, or containing a glucosid.

glu'co-sa'mid, ı ḡlū'kō-sā'mıd; 2 ḡlų'co-sā'mid, *n. Chem.* A crystalline substance formed by treating glucose with phenyl hydrazin and acetic acid. [< GLUCOSE + AMID.]

glu'cose, ı ḡlū'kōs; 2 ḡlų'cōs, *n.* **1.** A sugar found largely in the vegetable kingdom and in honey, also in the animal organism, as in the blood, liver, urine. It is the principal member of the group to which it gives its name (see def. 2), and is much less sweet than cane-sugar. It is made commercially by treating starch with diluted sulfuric acid, and the resulting solid product is called *grapesugar* and the sirup *glucose*.

Dextrose, Grape- or Starch-Sugar, . . . also called *Glucose*, occurs together with sucrose and levulose in many ripe fruits.
ELDER AND STORER *Inorganic Chem.* p. 179. [ı. n. & co.]

2. *Chem.* Any member of a group of sweet compounds having the common formula $C_6H_{12}O_6$, and regarded as aldehydes of the saturated alcohols ($C_6H_{14}O_6$): used also attributively. The glucose group includes grape-sugar or *dextrose*, fruit-sugar or *levulose*, *mannitose*, *galactose*, *inositc*, *sorbin*, *eucalyn*, and *dambose*. [< Gr. *glykys*, sweet.] **—glu'cose''-meal'',** *n.* A by-product of glucose used as a concentrated food for cattle.

glu'co-sic, ı ḡlū-kō'sık; 2 ḡlų-co'sic, *a.* Of, pertaining to, or forming glucose; as, a *glucosic* ferment.

glu'co-sid, ı ḡlū'kō-sid, -sid or -sēd; 2 ḡlų'co-sid, -sid **glu'co-side,**) *or* -sīd, *n. Chem.* A substance which, when decomposed by dilute acids, alkalis, or certain ferments, yields glucose or some other sugar not belonging to the class of carbohydrates. Glucosids are compound ethers, occurring (1) as the bitter principle of plants or (2) as synthetical compounds made by treating glucose with an organic acid. [< GLUCOSE.]

glu'co-si'dal, ı ḡlū'kō-sī'dal; 2 ḡlų'co-sī'dal, *a. Chem.* Of, pertaining to, or containing a glucosid.

glu'co-sid'ic, ı ḡlū'kō-sid'ık; 2 ḡlų'co-sid'ic, *a. Chem.* Of or pertaining to glucosids.

glu'co-sid''o-ly'tic, ı ḡlū'kō-sid''o-lit'ık; 2 ḡlų'co-sid''o-lī'tic, *a.* Of or pertaining to a ferment which acts upon glucosids and produces cleavage. [< GLUCOSID + Gr. *lysis*, < *lyō*, loose.]

glu'co-sin, ı ḡlū'kō-sın, -sēn *or* -sēn; 2 ḡlų'co-sin, -sēn *or* **glu'co-sine,**) -sīn, *n. Chem.* A base obtained by the action of ammonia on glucose.

glu'co-sone, ı ḡlū'kō-sōn; 2 ḡlų'co-sōn, *n. Org. Chem.* The osone ($C_6H_{10}O_5$) derived from glucose.

glu'co-su'ri-a, ı ḡlū'kō-sū'rı-ə; 2 ḡlų'co-sū'ri-a, *n. Pathol.* The condition of having glucose in the urine; diabetes mellitus. [< GLUCOSE + Gr. *ouron*, urine.] **—diœtive glucosuria** *Pathol.* Glucosuria resulting from eating considerable quantities of sugar or starch.

glu'co-su'ric, ı ḡlū'kō-sū'rık; 2 ḡlų'co-sū'ric, *a. Pathol.* Referring to or produced by glucosuria.—**glucosuric acid,** an organic acid occurring in certain alkapton urines.

glu'co-tan'noid, ı ḡlū'kō-tan'oid; 2 ḡlų'co-tan'oid, *n. Org. Chem.* A compound produced by the combination of a tannoid with a sugar.

glu'co-va-nil'lic, ı ḡlū'kō-və-nil'ık; 2 ḡlų'co-va-nil'ic, *a. Chem.* Of or pertaining to both glucose and vanillin.—**glucovanillic acid,** an acid compound obtained from coniferin by oxidizing it with permanganate of potash.

glu'co-va-nil'lin, ı ḡlū'kō-və-nil'ın; 2 ḡlų'co-va-nil'in, *n. Chem.* An aldehyde of glucovanillic acid: made by oxidizing the crystalline glucosid of coniferous wood (coniferin) with chromic acid. **glu'co-va-nil'line†.**

glu-cu'pic-ron†, *n.* Something that is bitter-sweet.

glu-cu'ron, ı ḡlū-kū'ron; 2 ḡlų-cų'ron, *n. Chem.* The anhydrid of glucuronic acid ($C_6H_8O_7$). [< Gr. *glykys*, sweet, + *ouron*, urine.] **glu-cu'ro-nate,** *n.* A salt of glucuronic acid.

glu-cu'ro-nate, ı ḡlū-kū'ro-nēt; 2 ḡlų-cų'ro-nāt, *n. Chem.*

glu'cu-ron'ic, ı ḡlū'kiu-ron'ık; 2 ḡlų'cu-ron'ic, *a. Physiol. Chem.* Pertaining to a monobasic acid ($C_6H_{10}O_7$) made from glucose or euxanthic acid. **gly''cu-ron'ic†.**

glue, ı ḡlū; 2 ḡlų (XIII), *v.* [GLUED; GLU'ING.] **I.** *t.* To stick or fasten with glue; size or stiffen with glue; fasten as with glue; as, to *glue* a piece of paper; "congealed blood that *glues* my lips," SHAKESPEARE *3 King Henry IV.* act v, sc. 2. **II.** *i.* To stick together; adhere. [< F. *gluer*, < *glu*; see GLUE, *n.*]

glue, *n.* **1.** A viscid cementing preparative preparation, usually a form of impure gelatin derived from boiling certain animal substances, as skin, bones, and cartilage, in water: sold either as thin, hard, brittle cakes, that must be melted or dissolved for use, or in liquid form ready to be applied.

Milk-sat'-water sin's the best o' sluice.
WM. *Below Paper* second series, vi, st. 11.

2. Coarse rawhide used for making glue. **3†.** Birdlime. [< F. *glu*, birdlime, < LL. *glus* (*glut-*) (cp. L. *gluten*), glue.] **glu'ı.—albumen glue,** a partly decayed glue obtained from flour in starch-making.—**casein g.,** a bookbinders' glue made by dissolving casein in a solution of borax.—**Cologne g.,** a pale, strong glue made from offal that is limed and bleached with chlorid of lime.—**Dutch g., Flanders g.,** same as COLOGNE GLUE.—**elastic g.,** a combination of glue and glycerin, used for making printers' rollers, flexible molds, etc.—**glue'-plant',** *n. Bot.* A moss-like species of red seaweed (*Gloiopeltis tenax*), used in eastern Asia for food.—**g.-pot,** *n.* **1.** A water-jacketed vessel for melting glue without permitting it to burn. **2.** (Colloq., Austral.) A mud-hole or slough in which a vehicle may become stalled.—**g.-size,** *n.* Glue dissolved in water: used in painting and other arts.—**g.-stick,** *n.* Material, such as hides and horns, from which glue is made.—**hide**

g., a glue of fine quality made from the trimmings of hides. — **in a g.,** in a viscous condition: said of soap in process of manufacture.— **isinglass g.,** a very strong, pure glue made from fish-sounds.— **liquid g.,** glue kept fluid when cold by an acid.— **marine g.,** a water-proof cement made of shellac or caoutchouc mixed with naphtha or oil of turpentine: used in ship-building.— **parchment g.,** a high grade of glue made from selected hides.— **patent g.,** a bone glue dark in color and of good quality: trade name.— **Russian g.,** a whitish glue used by carpenters.— **size g.,** a fine glue used for sizing walls.— **vegetable g.,** a combination of gum arabic with sulfate of aluminum.— **water-proof g.,** isinglass glue or fish glue dissolved in hot milk.

glu'er, 1 glū'ər; 2 glu'er, *n.* One who or that which glues.

glu'ey, 1 glū'ɪ; 2 glu'y, *a.* Of the nature of or like glue; sticky; glutinous; viscous.— **glu'ey-ness,** *n.*

glug, 1 glug; 2 glŭg, *v.* & *n.* Same as GLUCK.

Glu-ge'a, 1 glu-jī'ə; 2 glu-ğē'a, *n.* *Zool.* A genus of parasites, one species of which attacks silkworms.

Glu-ge'i-dæ, 1 glu-jī'ɪ-dī; 2 glu-ğē'i-dē, *n. pl.* *Zool.* A family of sporozoans having tiny spores, and thriving as parasitic families in cells of arthropods or fishes. **Glu-ge'a,** *n.* (t. g.)

glu'ish, 1 glū'ɪsh; 2 glu'ish, *a.* Somewhat gluey.— **glu'ish-ness,** *n.*

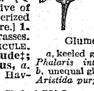
glum, 1 glum; 2 glŭm, *a.* [GLUM'MER; GLUM'MEST.] Moody and silent; frowning; sullen.

Like an Indian idol *glum* and grim.
WHITTIER *Skipper Ireson's Ride* st. 7.

[< Sw. dial. *glomma*, stare, < *glōa*, glow.] — **glum†,** *n.* A frowning apect.— **glum'ly,** *adv.* **glum'my†.— glum'ness,** *n.*

glu'ma, 1 glū'mə; 2 glu'ma, *n.* Same as GLUME.

Glu-ma'ce-æ, 1 glu-mē'sɪ-ī; 2 glu-mā'çe-ē, *n. pl.* *Bot.* Same as POALES.



glu-ma'ceous, 1 glu-mē'shus; 2 glu-mā'shŭs, *a.* *Bot.* Bearing or pertaining to glumes. [< L. *gluma*; see GLUME.]

Glu-ma'les†, *n. pl.* *Bot.* A former alliance comprising the grasses, sedges, and a few minor groups.— **glu'mal,** *a.* & *n.*

glumch, *vt.* Same as GLUNCH.

Glum-dal'clitch, 1 glum-dal'klich; 2 glŭm-dăl'clich, *n.* In Swift's *Gulliver's Travels*, a young girl, 40 feet tall, having charge of Gulliver.

glume, 1 glūm; 2 glum, *n.* *Bot.* **1.** One of the two-ranked chaff-like scales or bracts of the inflorescence of grasses, sedges, and their allies. Those that subtend one another are called **sterile** or **empty glumes,** and those that bear flowers in their axils, **flowering glumes. 2.** An inner glume; a palet or palea. [< L. *gluma*, husk, < *glubo*, deprive of bark.] — **glu'mal,** *a.* Characterized by a glume.— **glu'melle,** *n.* [Rare.] **1.** An inner glume or palet of grasses. **glu-mel'la‡. 2.** Same as LODICULE. **glu-mel'lu-la‡; glu-mel'lude‡; glu-mel'lule‡.— glu-mif'er-ous,** *a.* Bearing glumes.— **glu'mose,** *a.* Having a glume. **glu'mous‡.**

Glumes.
a, keeled glumes of *Phalaris intermedia*; *b*, unequal glumes of *Aristida purpurea*.

Glu"mi-flo'ræ, 1 glū"mɪ-flō'rī; 2 glu"mi-flō'rē, *n. pl.* *Bot.* A former group of plants embracing the *Juncaceæ*, the *Cyperaceæ*, and the *Poaceæ*. All three families have their flowers in glumes. See POALES. [< L. *gluma*, husk, + *flos*, flower.] — **glu"mi-flo'rous,** *a.*

glump, 1 glump; 2 glŭmp, *vi.* [Colloq.] **1.** To be sullen; sulk. **2.** Same as GLAUM[1].— **glump'ish,** *a.* Sullen; glum.— **glump'i-ly,** *adv.*— **glumps,** *n. pl.* [Colloq.] The dumps; sulkiness.— **glump'y,** *a.* Sullen; sulky; grumpy.

glump, *n.* [Dial.] A person who sulks; sullen fellow.

glunch, 1 glunch; 2 glŭnch. [Scot.] **I.** *vt.* To frown; look sour. **II.** *a.* Sullen and sour. **III.** *n.* A look expressive of dislike or displeasure. **glumch‡; glumsh‡.**

Glun'i-mie†, 1 glun'ɪ-mɪ; 2 glŭn'i-mi, *n.* [Scot.] A Highlander: so called by Lowlanders, often in a depreciative sense. **Glune'-a-mie†.**

glur, 1 glur; 2 glur, *n.* Same as GLORE.

glu'sid, } 1 glū'sɪd, -sɪd *or* -said; 2 glu'sid, -sid *or* -sīd, *n.*
glu'side, } Same as SACCHARIN.

glus'ter†, *n.* Same as CLUSTER.

glut, 1 glut; 2 glŭt, *v.* [GLUT'TED; GLUT'TING.] **I.** *t.* **1.** To fill or supply to excess; stuff; gorge; sate; as, to *glut* the market.

Arise, ye Goths, and *glut* your ire.
BYRON *Childe Harold* can. 4, st. 141.

2. *Mech.* To fill, wholly or in part, with extraneous matter, as a hollow machine with oil; the deposit from impure lubricants. **3.** [Archaic.] To swallow greedily or ravenously.

II. *i.* **1.** To eat gluttonously; gormandize. **2.** [Rare.] To think, gaze, etc., until satisfied; gloat on. [< OF. *glotir*, < L. *glutio*, swallow.] — **glut'ting-ly,** *adv.*

glut[1], *n.* **1.** An excessive supply or amount; a quantity more than enough; plethora; superabundance; also, a full supply.

When a year of *glut* Their stores doth over-clog.
MILTON *Psalm IV*. l. 33.

2. The condition of being glutted; act of glutting. [OF., < *glotir*; see GLUT, *v.*]

glut[2], *n.* **1.** *Naut.* (1) A becket at the middle of a square sail, near the head, to receive the bunt-jigger. (2) A choking, as by throwing the fall of a rope across the sheave of a block. (3) A piece of wood used as a fulcrum or prop. **2.** A wooden wedge used to hold open a cleft in splitting logs.

He 'uz rippin' up de bull cut, Mr. Man wuz, en he druv in his wedge and den he stuck in de *glut*.
J. C. HARRIS *Nights with Uncle Remus* p. 36. [H. M. & CO. 1890.]

3. *Brick-making.* A small brick or block to fill up a course; also, an unburned pressed brick. **4.** Fish-offal. **5.** Something used as a filler; a clog. **6.** *Mech.* The adjustable brass of a valve-rod. **7.** The entrance to the ash-pit of a kiln. **8.** A false key. **9.** [Local, Eng.] The broad-nosed eel (*Anguilla latirostris*). **10†.** That which has been stuffed down. **11†.** A glutton. **12†.** Gleet.— **glut'-piece",** *n.* See GLUT-WELD.— **g.-weld,** *n.* *Mech.* A weld formed by placing two wedge-shaped pieces of metal together and holding them fast with a triangular piece called a *glut-piece*.

glut-, 1 glūt-; 2 glut-. Derived from GLUTEN: a combining form used in some chemical terms.— **glu-tac'o-nate,** *n.* *Chem.* A salt of glutaconic acid.— **glu"ta-con'ic,** *a.* Derived from gluten and aconitin.— **glutaconic acid,** a compound ($C_5H_6O_4$) isomeric with citraconic acid.— **glu-tæ'us,** etc Same as GLUTEUS, etc.— **glu-tam'ic,** *a.* Derived from gluten and amidogen.— **glu-tam'ic,** *a.* *Chem.* Relating to an acid, HOOC.CH(NH_2)CH_2CH_2COOH, found in certain seeds and in beet-root molasses.— **glu-tam'in,** *n.* The fine crystals formed of the amid of glutamic acid. **glu-tam'ine‡.— glu"ta-min'ic,** *a.* Glutamic: incorrect form.— **glu-tan'nol,** *n.* *Chem.* A compound of plant-fibrin with tannin: an internal antiseptic.— **glu-tar'ic,** *a.* Derived from gluten and tartaric acid.— **glutaric acid,** a white crystalline compound ($C_5H_8O_4$) contained in combination in the grease of sheep-wool.— **glu'ta-zin,** *n.* *Chem.* A white crystalline compound ($C_5H_6N_2O_2$) derived from pyridin. **glu'ta-zine‡.**

glutch. I. *vt.* [Prov. Eng.] To hold back; restrain, as a sigh. **II.** *n.* The act of glutching.— **glutch'-pipe",** *n.* [Prov. Eng.] The part of the neck containing the air-passages and gullet.

glu-te'al, 1 glu-tī'əl *or* glū'tɪ-əl; 2 glu-tē'al *or* glu'te-al (XIII), *a.* Of or pertaining to the region of the rump or buttock; as, the *gluteal* fold separating the buttock from the thigh. **glu-te'ant.— gluteal aponeurosis** (*Anat.*), that part of the fascia of the thigh that is continued over the muscles of the buttock.

glu'ten, 1 glū'ten; 2 glu'tĕn, *n.* **1.** A gray, tough mass, a mixture of various albuminoids, that remains after wheat-flour has been washed in water. It gives dough its toughness, and is a nutritious element of wheat. **2.** A gluey secretion such as certain swallows and swifts secrete for nest-building. **3.** [Rare.] A sticky substance. **4†.** Fibrin. [L., glue.] — **gluten bread,** bread made from gluten flour.— **glu'ten-ca"se-in,** *n.* A dark amorphous compound contained in gluten.— **g. feed,** a mixture of gluten-meal and bran: used for feeding cattle.— **g.-fibrin,** *n.* A yellow amorphous compound contained in gluten.— **g. flour,** a flour which is high in gluten and low in starch.— **g. meal,** a food for cattle, consisting principally of maize, and produced in the manufacture of glucose and starch from that commodity.— **glu'ten-oid,** *a.* Resembling or allied to gluten.

glu'te-nin, 1 glū'tɪ-nin; 2 glu'te-nin, *n.* A proteid substance in the seeds of cereals. [W.] [< GLUTEN.]

glu"te-o-fem'o-ral, 1 glū"tɪ-o-fem'o-rəl; 2 glu"te-o-fĕm'o-ral, *a.* Of or pertaining to the buttocks and thigh.

glu"te-o-per"i-ne'al, 1 glū"tɪ-o-per"ɪ-nī'əl; 2 glu"te-o-pĕr"i-nē'al, *a.* *Anat.* Pertaining to the buttock and the perineum: said of a furrow and of a rare bundle of muscular fibers.

glu-te'us, 1 glu-tī'us; 2 glu-tē'us, *n.* [-I, 1 -ai; 2 -ī, *pl.*] One of several muscles in the region of the buttocks: in man named respectively *gluteus maximus*, *gluteus medius*, and *gluteus minimus*. See illus. under MUSCULAR SYSTEM. [< Gr. *gloutos*, rump.]

glut'-her"ring, 1 glut'-her"ɪŋ; 2 glŭt'-hĕr"ing, *n.* [U. S.] A clupeoid fish (*Clupea æstivalis*) similar to the alewife.

glu-tim'ic, 1 glu-tim'ɪk; 2 glu-tim'ic, *a.* Denoting gluten and imin in combination.— **glutimic acid,** a compound ($C_5H_7NO_3$) formed by treating a gluten (albumin) with a hot solution of barium hydroxid.

glu'tin, 1 glū'tɪn; 2 glu'tin, *n.* *Chem.* **1.** Same as GLIADIN. **2.** [Rare.] Same as GELATIN. [< GLUTEN.]

glu-tin'ic, 1 glu-tin'ɪk; 2 glu-tin'ic, *a.* Designating an organic acid derived from gluten.

glu'ti-nize, 1 glū'tɪ-naiz; 2 glu'ti-nīz, *vt.* [-NIZED; -NIZ'ING.] To make glutinous; coat with a glue-like substance. **-nise‡.**

glu'ti-noid, 1 glū'tɪ-neid; 2 glu'ti-nŏid, *n.* An albuminoid.

glu'ti-nous, 1 glū'tɪ-nus; 2 glu'ti-nŭs, *a.* **1.** Resembling glue; viscous; sticky; viscid. **2.** Covered or pervaded with sticky matter. [< F. *glutineux*, < L. *glutinosus*, < *gluten* (*glutin-*), glue.] **glu'ti-ning†; glu'ti-nose‡.** Syn.: see ADHESIVE.— **glu"ti-nos'i-ty,** *n.*— **glu'ti-nous-ly,** *adv.* — **glu'ti-nous-ness,** *n.*

glu-ti'tion, 1 glu-tish'ən; 2 glu-tish'on, *n.* [Rare.] Deglutition.

glut'man, 1 glut'mən; 2 glŭt'man, *n.* [-MEN, *pl.*] [Eng.] An extra customs officer who assists when there is a glut of work.

glu'to-form, 1 glū'to-fērm; 2 glu'to-fôrm, *n.* Glutol.

glu'toid, 1 glū'teid; 2 glu'tŏid, *n.* Hardened gelatin: used chiefly for apothecaries' capsules.

glu"to-ky'rin, 1 glū"to-kai'rɪn; 2 glu"to-kȳ'rin, *n.* *Chem.* A kyrin obtained by hydrolysis of gelatin. [< GLUTIN + Gr. *kyros*, authority.] **glu"to-ky'rine‡.**

glu'tol, 1 glū'tōl *or* -tel; 2 glu'tōl *or* -tŏl, *n.* A powdery compound of gelatin and formaldehyde employed as an antiseptic: trade name. **glu'to-form‡.**

glu'tose, 1 glū'tōs; 2 glu'tōs, *n.* Gelatose.

glut'ter, 1 glut'ər; 2 glŭt'er, *n.* [Prov. Eng.] Confused noise; commotion; bustle; splutter. [Imitative.]

glut'ton†, *vt.* & *vi.* To act the glutton; eat to excess, or cause a man or an animal to do so.

glut'ton, *a.* Gluttonous.

In Pleasure some their *glutton* souls would steep.
DRYDEN *Religio Laici* l. 33.

glut'ton, 1 glut'n; 2 glŭt'n, *n.* **1.** One who gluts himself with food and drink; a voracious eater; gormandizer. **2.** Figuratively, one who indulges in anything to excess. **3.** A musteline carnivore, the wolverene (*Gulo luscus*), especially the Old World form: formerly supposed to be excessively voracious. See illus. under WOLVERENE. **4.** Some animal likened to the wolverene; as, the South-American *glutton* or grison. **5.** [Slang.] A pugilist who endures much hard treatment before being finally overcome; as, a *glutton* for punishment. **6†.** A scoundrel; a rascally fellow. [< F. *glouton*, < L. *gluto(n-)*, glutton, < *glutio*, devour.] — **glut'ton-bird",** *n.* The giant fulmar (*Ossifraga gigantea*).— **glut'ton-ish,** *a.* [Rare.] Addicted to gluttony.— **glut'ton-ism,** *n.* The practise of gluttony.— **glut'ton-ize,** *v.* **I.** *t.* To feast voraciously on. **II.** *i.* To act the glutton; gormandize. **glut'ton-ise‡.**

glut'ton-ous, 1 glut'n-us; 2 glŭt'n-ŭs, *a.* Of, pertaining to, or characterized by gluttony; given to excess in eating; voracious; as, a *gluttonous* man.
Syn.: see GREEDY.— **-ly,** *adv.*— **-ness,** *n.*

glut'ton-y, 1 glut'n-ɪ; 2 glŭt'n-y, *n.* [-IES, 1 -ɪz; 2 -is, *pl.*] The act or habit of eating to excess; voracity or an instance of it.

From Paradise first, if I shall not lie,
Was man out chased for his *gluttony*.
CHAUCER *C. T.*, *The Sompnour's Tale* l. 208.

[< OF. *glotonie*, < *gloton*, F. *glouton*; see GLUTTON.]

glu'y†, *a.* Same as GLUEY.

gly, 1 glai; 2 glȳ, *vt.* [Prov. Eng.] To gley.

glyc-, 1 glis'-; 2 glȳc'-. From Gr. *glykys*, sweet: a combining form.— **gly'case,** *n.* Glucase.— **glyc"e-læ'um,** *n.* An ointment consisting of finely powdered almond-meal (1 part), glycerin (2 parts), and olive-oil (6 parts).— **gly-ce'mi-a,** *n.* Glucohemia. **gly-cæ'mi-a‡.— glyc'er-al,** *n.* *Chem.* Any one of a series of compounds formed from aldehydes by heating glycerin with them.— **glyc'er-ate,** *n.* A salt of glyceric acid.— **glyc"er-et'a-mate,** *n.* A tannate of glycerin.— **Gly-ce'ri-a,** *n.* A genus of grasses. See MANNA-GRASS, under MANNA.— **glyc'er-ic,** *a.* *Chem.* Of or derived from glycerin.— **glyceric acid,** a colorless, sirupy liquid compound ($C_3H_6O_4$) formed by oxidizing glycerin with nitric acid. It has both acid and alcoholic properties.— **glyc'er-id,** *n.* A compound ether in which the alcohol glycerin (glycerol) exists with a fatty acid. Most natural fats are glycerids, and synthetical glycerids can be made by the action of acids on glycerol. **glyc'er-ide‡.— Gly-cer'i-dæ,** *n. pl.* *Helminth.* A family of rapacious polychætous worms having a small head produced into an annulated conic snout with four antennæ on the apex. **Glyc'er-a,** *n.* (t. g.) — **glyc'er-id,** *n.*— **glyc'er-oid,** *a.*

glyc'er-in, } 1 glis'ər-in, -in *or* -īn; 2 glȳç'er-in, -in *or*
glyc'er-ine, } -īn, *n.* **1.** A thick, oily, nearly colorless liquid compound with a sweetish taste, employed extensively in the manufacture of confectionery, soaps, and nitroglycerin, and in medicine. Glycerin is a triatomic alcohol ($C_3H_5(OH)_3$), and is formed when natural fats are decomposed by treatment with alkalis or superheated steam.

The common base which exists in all fats and oils is, when set free, a sweet liquid called *glycerin*.
YOUMANS *Hand-Book Household Science* pt. ii, p. 109. [A. 1857.]

2. Glycerite. **3†.** Any compound containing three hydroxyl groups. [< Gr. *glykeros*, sweet, < *glykys*, sweet.] — **glycerin agar,** a combination of agar and a small percentage of glycerin: used for growing cultures, especially of tuberculosis bacilli.— **g. cement,** a cement composed of glycerin and litharge: used in electrotypy for packing joints. — **g. jelly,** a mixture of gelatin and glycerin used in making bougies.

glyc'er-i-nate, 1 glis'ər-ɪ-nēt; 2 glȳç'er-i-nāt, *vt.* [-NAT"ED; -NAT"ING.] To treat with glycerin.— **glyc"er-i-na'tion,** *n.*

glyc"er-in-ized, *a.* Treated with glycerin.— **glyc"er-i-no-phos-phor'ic,** *a.* Glycerophosphoric.— **glyc"er-i'num,** *n.* *Pharm.* Glycerol.— **glyc'er-ite,** *n.* *Med.* A medicinal preparation containing glycerin. **glyc'er-ate‡.— glyc'er-ize,** *vt.* *Chem.* To treat with glycerin; add glycerin to.— **glyc"er-i'zin,** *n.* Glycyrrhizic acid. **glyc"er-i'zine‡.**

glyc'er-o-, 1 glis'ər-o-; 2 glȳç'er-o-. Denoting glycerin: a combining form.— **glyc"er-o-deg'ras,** *n.* A mixture of glycerin with oils and fats: used to soften leather.— **glyc"er-o-for'mal,** *n.* *Chem.* Glycerin treated with formaldehyde.— **glyc"er-o-gel'a-tin,** *n.* *Chem.* A glycerin jelly used for mounting microscopical specimens.

glyc'er-ol, 1 glis'ər-ōl *or* -el; 2 glȳç'er-ōl *or* -ŏl, *n.* *Chem.* Glycerin: the chemical name.— **glyc'er-o-late,** *n.* Glycerite.

glyc'er-ole, 1 glis'ər-ōl; 2 glȳç'er-ōl, *n.* **1.** *Chem.* Glycerol. **2.** *Pharm.* Glycerite.

glyc"er-o-phos'phate, *n.* *Chem.* A salt of glycerophosphoric acid.— **glyc"er-o-phos-phor'ic,** *a.* *Chem.* Denoting an acid ($C_3H_9PO_6+H_2O$), consisting of a pale-yellow, oily, odorless liquid obtained by the action of phosphoric acid on glycerin.

glyc'er-ose, 1 glis'ər-ōs; 2 glȳç'er-ōs, *n.* *Chem.* A triose ($C_3H_6O_3$) of oxidized glycerin.

glyc'er-yl, 1 glis'ər-il; 2 glȳç'er-ȳl, *n.* *Chem.* The hypothetical triatomic radical (C_3H_5) of glycerin. **glyc'er-ule‡.— glyceryl borate,** boroglycerid.

glyc'ic, *a.* Glucic.— **glyc'id,** *n.* A mobile liquid compound ($C_3H_6O_2$) derived from certain glycerin derivatives. **glyc'ide‡.— gly-cid'ic,** *a.* Of or pertaining to glycid; as, *glycidic* acid; *glycidic* ether.— **glyc'i-dyl,** *n.* *Chem.* A bivalent radical (C_3H_4), said to exist in glycidic ethers.— **glyc'in,** *n.* *Chem.* **1.** A photographic developer ($C_6H_4OHNHCH_2COOH$). **2.** Glycocoll. **glyc'ine‡.— glycin corinth,** an azo dye used to color cotton brownish-red.

Glyc'i-ne†, 1 glis'ɪ-nī *or* gli-sai'nī; 2 glȳç'i-nē *or* gly-çī'nē, *n.* *Bot.* A genus of Old World herbs of the family *Fabaceæ*. The species are all trailing or twining except the soy-bean, *G. hispida*, which is in use in the United States as a forage-plant. See SOJA and SOY, 2. [< Gr. *glykys*, sweet.]

glyc'i-nin, *n.* *Chem.* A globulin, the principal proteid element in the soy-bean.— **glyc'i-um,** *n.* Glucinum.

gly'co-, 1 glai'ko-; 2 glȳ'co-. From Gr. *glykys*, sweet: a combining form.— **glycobacterium,** *n.* A sugar-producing micro-organism found in the intestines of dogs by Metchnikoff, and used by him to combat the production of poisonous substances in the human colon.— **gly"co-chol'ate,** *n.* *Chem.* A salt of glycocholic acid.— **gly"co-cho-le'ic,** *a.* *Chem.* Denoting an acid found in bile.— **gly"co-chol'ic,** *a.* *Chem.* Of, pertaining to, or derived from glycocoll and contained in bile.— **glycocholic acid,** a white crystalline compound ($C_{26}H_{43}NO_6$) contained in the bile as a sodium salt.— **gly"co-cho-lon'ic,** *a.* *Chem.* Designating a derivative of glycocholic acid.— **glycocholonic acid** (*Chem.*), an acid ($C_{26}H_{41}NO_5$) made by the action of hydrochloric acid on glycocholic acid.

gly'co-coll, 1 glai'ko-kel; 2 glȳ'co-cŏl, *n.* **1.** A crystalline sweetish compound ($C_2H_5NO_2$) contained in bile and formed when glycocholic acid is boiled with hydrochloric acid. **2.** An amino acid. [< GLYCO- + Gr. *kolla*, glue.] **gly'co-cin‡; gly'co-cine‡.**

gly"co-cy-am'i-din, *n.* Glucocyamidin.— **gly"co-cy-am'in,** *n.* Glucocyamin.— **gly"co-for'mal,** *n.* *Chem.* A formalin-and-glycerin mixture: when volatilized it forms a disinfectant vapor.— **gly"co-gel'a-tin,** *n.* *Chem.* A compound of glycerin and gelatin used for ointments.

gly'co-gen, 1 glai'ko-jen; 2 glȳ'co-ğĕn, *n.* **1.** A white, mealy, amorphous compound ($C_6H_{10}O_5$) contained in animal tissues, as the liver. **2.** *Bot.* Protoplasm containing this compound, found in fungi; epiplasm. [< GLYCO- + -GEN.] — **gly'co-gen-mass",** *n.* *Bot.* Same as EPIPLASM.

gly"co-gen'e-sis, 1 glai"ko-jen'ɪ-sis; 2 glȳ"co-ğĕn'e-sis, *n.* *Physiol.* The process of forming glucose or sugar in an organ, as the liver. **gly-cog'e-ny‡.** [< GLYCO- + GENESIS.] — **gly"co-gen'ic,** *a.* Relating to the formation of animal starch and its transformation into grape-sugar. **gly"co-ge-net'ic‡.— glycogenic acid,** an acid ($C_6H_{12}O_7$) said to be the same as dextronic acid.— **gly-cog'e-nous,** *a.*

gly"co-he'mi-a, *n.* Same as GLUCOHEMIA. **gly"co-hæ'mi-a‡.— gly'co-in,** *n.* *Chem.* Glycocoll. **gly'co-ine‡.**

gly'col, 1 glai'kōl *or* -kel; 2 glȳ'cōl *or* -cŏl, *n.* *Chem.* **1.** A colorless, inodorous liquid compound ($C_2H_6O_2$), having a sweetish taste, and formed by decomposing ethylene bromid. **2.** A diatomic alcohol of the fatty group having the general formula $C_nH_{2n}(OH)_2$. See ALCOHOL. [< GLYC- + *-ol* in ALCOHOL.]

gly"col-al'de-hyde, *n.* *Chem.* A sweetish compound (HO CH_2.CHO).— **gly'co-late,** *n.* *Chem.* A salt of glycolic acid. — **gly"co-leu'cyte,** *n.* *Zool.* An enlarged leucocyte, as in sipunculoid worms, for storing glycogen and other nutritive substances.— **gly-col'ic,** *a.* *Chem.* Of or derived from glycol.— **glycolic acid,** a white crystalline compound ($C_2H_4O_3$) contained in unripe grapes and in the leaves of the Virginia creeper (*Ampelopsis quinquefolia*).— **gly'co-lid,** *n.* *Chem.* A white amorphous compound ($C_2H_2O_2$) formed by dehydrating glycolic acid by dry heat. **gly'col-ide‡.— gly'co-lin,** *n.* *Chem.* A crystallizable compound found in fusel-oil.— **gly'col-late, gly-col'ic, gly'col-lid,** etc. Same as GLYCOLATE, etc.— **gly"co-lu'ric,** *a.* Hydantoic.— **gly-co-lu'ril,** *n.* *Chem.* A white crystalline compound ($C_4H_6N_4O_2$) formed by the action of hydrochloric acid on glyoxal and urea.— **gly'co-lyl,** *n.* *Chem.* A compound divalent hypothetical radical (CO.CH_2) of glycolic acid and allied compounds.— **gly"co-lyl-u're-a,** *n.* Hydantoin.— **gly-col'y-sis,** *n.* *Chem.* The decomposition of sugar, as by the action of a ferment, especially in the blood after death.— **gly"co-lyt'ic,** *a.*—

H I J K L

gly'cone, *n. Chem.* A medicinal suppository made of glycerin.

Gly-con'ic, 1 glai-kon'ik; 2 glĭ-kŏn'ĭc. **I.** *a.* Of or pertaining to Glycon, the reputed inventor of a kind of logaœdic verse consisting of a catalectic trochaic tetrapody with a dactyl in the first, second, or third place. **Gly-ca'ni-an.** **II.** *n.* [*g-*] The verse above described.

gly'co-nin, *n. Pharm.* An emulsion of egg-yolks and glycerin used as a vehicle and as an unguent.— **gly"co-nu"cle-o-pro'te-id,** *n. Org.Chem.* A nucleoprotein in which acetohydrate is an important component.— **gly"co-ine;** — **gly"co-sal,** *n. Chem.* A white crystalline powder ($C_6H_4(OH)$ $COOC_6H_4(OH)_2$), used as an antirheumatic, etc.; glycosalicylic acid.— **gly"co-se,** — **gly"cos,** etc., same as GLUCOSE, etc.— **gly"co-se-cre'to-ry,** *a. Physiol.Chem.* Causing the secretion of glycogen: applied especially to certain nerves believed to have this effect in the liver-cells.— **gly'co-sid,** *n. Chem.* A group of bodies, found in plants, which break up into sugars and some other body by the action of acids, heat, or ferments, including glucosid, one which breaks up into glucose, etc.; inosid, one which breaks up into inosite, etc. **gly'co-sid'ic,** — **gly'co-sine,** *n. Chem.* A white crystalline compound ($C_6H_{14}N_4$) derived from glycosal by the action of ammonia.— **gly"co-som'e-ter,** *n. Med.* An apparatus for ascertaining the quantity of sugar in diabetic urine.— **gly"co-su'ri-a,** *n. Pathol.* Same as GLUCOSURIA.— **gly"co-thy'mo-lin,** *n. Pharm.* An alkaline mixture of glycerin, thymol, and other ingredients, used as a detergent: trade name.

Glyc"ymer'i-dæ, [*gl-*] *n. pl. Conch.* A family of myacean bivalves, especially those having a solid shell gaping at each end, hinged with feeble cardinal teeth or toothless, and ligament external. **Glyc"ymer'is,** *n. (g.)* [< GLYCY- + Gr. *mēros,* thigh.] Same as *Arcticardia.*

glyc"y-phag'i-a, *n.* A morbid appetite for sweet substances, confectionery, etc.— **glyc"y-phil'ite,** *n.* A sweetish crystalline glucosid ($C_{21}H_{40}O_5$) obtained from the leaves of *Smilax glycyphylla.* **glyc"y-phyl'lin:— glyc"yr-re'tin,** *n. Chem.* A crystalline substance ($C_{30}H_{46}O_4$) obtained from extract of licorice-root. **glyc"yr-rhi'tin:— Glyc"yr-rhi'za,** 1 glis'i-rai'zə; 2 glĭs"y-rĭ'zə, *n.* 1. A widely distributed genus of perennial herbs of the order *Papaceæ,* with odd-pinnate leaves and blue or violet flowers. The licorice-root of commerce is from *G. glabra.* 2. [*g-*] A plant of this genus. [< Gr. *glykyrrhiza,* licorice, < *glykys,* sweet, + *rhiza,* root.]

glyc"yr-rhi'zic, 1 glis'i-rai'zik; 2 glĭs"y-rĭ'zĭc, *a. Chem.* Of or extracted from licorice.— **glycyrrhizic acid,** a yellow bitter-sweet amorphous compound ($C_{44}H_{70}O_{16}$) contained in licorice-root (*Glycyrrhiza glabra*). **glyc"yr-rhi'zin;** **glyc"yr-rhi'zinc.**

glyde, *v.* To glide.

glyde, 1 glaid; 2 glīd, *n.* [Scot.] **1.** An old horse. **2.** Figuratively, a disagreeable old fellow.

gly-ke'mi-a, *n.* Glucohemia. **gly-ke'mi-al.**

glyk, 1 glik; 2 glĭk, *n.* [Welsh.] A Welsh bow found only in place-names: as, *Glyntaf,* Wales. **glynnt; glynnet.**

Glyn-cor'wg, 1 glin-kor'ug; 2 glĭn-cŏr'ŭg, *n.* A parish and urban district in Glamorganshire, Wales.

Glyan, 1 glin; 2 glĭn, *n.* A county in S. E. Georgia; 468 sq. m.; county-seat, Brunswick.

gly-ox'al, 1 glai-oks'al; 2 glī-ŏks'ăl, *n. Chem.* A white amorphous compound ($C_2H_2O_2$) formed by slowly oxidizing acetic aldehyde with dilute nitric acid. [< *gly-* (in GLYCOL) + *ox-* (in OXALIC) + *al-* (in ALDEHYDE).] — **gly"ox-al'ic,** *a.* Derived from or pertaining to glyoxal. **gly-ox'yl'ic.**

gly-ox'a-lin, 1 glai-oks'a-lin, -lin or -lin; 2 glī-ŏks'ă-lĭn, -lĭn or -lĭn. **gly-ox'a-line,** *n. Chem.* **1.** A nucleous crystalline compound ($C_3H_4N_2$) obtained by treating glyoxal very gradually with ammonium hydroxid in slight excess at a low temperature. **2.** Any one of the series of compounds of which glyoxaline is a type.

gly-ox'yl, 1 glai-oks'il; 2 glī-ŏks'ĭl, *n. Chem.* **1.** A colorless crystalline nitrogenized compound ($C_3H_3NO_3$) formed by the action of hydroxylamin on glyoxal. **2.** One of the series of similar bodies of which that defined above is typical. [< GLYOXAL + OXIM.] **gly-ox'ime†.**

gly-ox'yl, 1 glai-oks'il; 2 glī-ŏks'ĭl, *n. Chem.* **1.** Glyoxal. **2.** The radical —CHO (—C=O—H), which is bivalent.— **glyoxyl urea** (*Chem.*), allanturic acid.

glyph, 1 glif; 2 glĭf, *n.* **1.** *Arch.* (1) A vertical cutting channel, or channels, of the Doric triglyph. Every triglyph presents two glyphs and two semiglyphs. (2) An ornamental groove, cavity, or incision. **2.** *Archeol.* A pictograph or word carved in a compact, distinct figure; a glyphic; as, the Mayan *glyphs.* [< Gr. *glyphein,* carve.] — **glyph'ic.** *a.* — **glyph'ite.** *n.* Of or pertaining to a glyph or carving; as, the *glyphic* art. **II.** *n.* A hieroglyph.

Glyph"o-cer-as, [*gl-*] *n. pl. Conch.* Same as *Peloceras.* The type genus of the family *Glyphoceratidæ* or *Gontatitidæ.*

Glyph'o-ce-rat'i-dæ, 1 glif'o-si-rat'i-di; 2 glĭf'ō-sē-răt'ĭ-dē, *n. pl. Conch.* A family of goniatitoidean cephalopods with depressed whorls, many of which are keeled, ribbed, and large saddle-lobes. [< Gr. *glyphē,* carve, + *keras(-at-),* horn.] **Glyph"o-ce-rat'i-doe†.— glyph"o-cer'a-tid,** *n.— glyph"o-cer'a-toid,* *a.*

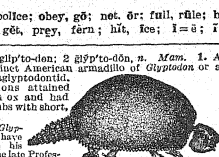
Gly-phe'a, 1 gli-fi'ə; 2 glĭ-fē'ă, *n. Paleon.* A genus of fossil crustaceans of the Jurassic and Cretaceous formations. [< *glyphē;* see *glyph.*]

glyph'o-graph, 1 glif'o-graf; 2 glĭf'ō-grăf, *n.* & *v.* To make **gly'fo-graf'r,**) (printing-plates) by glyphography.

glyph'o-graph, *n.* An engraving or impression made by glyphography.— **glyph'o-graph'ic,** *a.*

glyph-og'ra-phy,) 1 glif-og'ra-fi; 2 glĭf-ŏg'ra-fy, *n.* **glyf'-og'ra-fy,**) A process for making engravings for printing, akin to electrotypy, but differing in that the engraving is done on a copper plate covered with a wax film, the whole dusted with graphite and dipped in the electroplating-bath, the rest of the process being the same as electrotyping. [< Gr. *glyphē* (see GLYPH) + *graphein,* write.] — **glyph-o-graph'ic,** *a.*

glyp'tic, 1 glip'tik; 2 glĭp'tĭc, *a.* **1.** Of or pertaining to carving or engraving. **2.** *Mineral.* Exhibiting figures. [< Gr. *glyptikos,* < *glyptos,* carved.] — **glyptic formula,** a shorthand formula so disposed as to show the structural arrangement of the stems.— **g. period,** see MAGDALENIAN.



glyp-ti'cian, 1 glip-tish'ən; 2 glĭp-tĭsh'ăn, *n.* [Rare.] A gem-cutter; lapidary. [< Gr. *glyptē,* carved.]

glyp'tics, 1 glip'tiks; 2 glĭp'tĭcs, *n.* The art of cutting designs on precious stones, shells, ivory, hard woods, etc. — **glyp'ti'cian,** *n.*

Glyp'toc'ri-nus, 1 glip-tok'ri-nus; 2 glĭp-tŏc'rĭ-nŭs, *n. Paleon.* A genus of Lower Silurian stone-lilies or crinoids with ridged markings in the calyx. [< Gr. *glyptos,* carved, + *krinon,* lily.]

Glyp'to-dip'ter-i'ni, 1 glip'to-dip'ter-ai'nai; 2 glĭp'tō-dĭp'tĕr-ī'nī, *n. pl. Ich.* A family of ctenodipterian fishes, including *Holoptychius* and *Osteolepidæ.* [< Gr. *glyptos,* carved, + *dipteros;* see DIPTEROUS.] — **glyp'to-dip'ter-ine,** *a.* & *n.*

glyp'to-don, 1 glip'to-den; 2 glĭp'tō-dŏn, *n. Mam.* **1.** A very large extinct American armadillo of *Glyptodon* or a related genus: saytptodontid.

Skeleton of the Glyptodon (*Glyptodon reticulatus*). 1/48

The glyptodons attained the size of an ox and had very strong limbs with short, broad feet.

'Why . . . the *Glyptodon* should have failed to keep his ground is,' as the late Professor W. K. Parker remarks, 'a great mystery.' nature must have been to have built him . . . for eternity.' FLOWER and LYDEKKER *Intro. to Study of Mammals* p. 204. [ILL. 1891.]

2. [*G-*] A genus typical of *Glyptodontidæ.* [< Gr. *glyptos,* carved, + *odous* (*odont-*), tooth.]

Glyp'to-don-ti'dæ, 1 glip'to-den'ti-di; 2 glĭp'tō-dŏn'tĭ-dē, *n. pl. Mam.* An extinct American family of loricate edentates, especially those having a solid carapace formed of numerous dermal scutes, and eight molar teeth in each jaw with two deep vertical grooves on each side.— **glyp'to-dont,** *a.* & *n.*— **glyp'to-don'toid,** *n.*— **glyp'to-don'toid,** *a.* & *n.*

glyp'to-graph,) 1 glip'to-graf; 2 glĭp'tō-grăf, *n.* A de- **glyp'to-gr'f',**) sign cut on a gem or the like. [< Gr. *glyptos,* carved, + *graphō,* write.] — **glyp-tog'ra-pher,** *n.*— **glyp-to-graph'ic,** *a.*— **glyp-tog'ra-phy,** *n.* **1.** The art, process, or operation of engraving on precious stones or the like. **2.** A description of or treatise on gem-engraving; the knowledge or study of engraved gems.

Glyp-tol'o-pis, 1 glip-tol'o-pis; 2 glĭp-tŏl'ō-pĭs, *n. Paleon.* A genus of fishes of the Old Red Sandstone formation, identified with *Holoptychius.* [< Gr. *glyptos,* carved, + *lepis,* scale.]

glyp'to-lith, 1 glip'to-lith; 2 glĭp'tō-lĭth, *n. Geol.* A pebble with facets carved and polished by wind-blown sand; a pillar or bric-à-brac. [< Gr. *glyptos,* carved, + *lith(os),* a stone.]

glyp-tol'o-gy, 1 glip-tol'o-ji; 2 glĭp-tŏl'ō-gy, *n.* The art of engraving gems; the art of the lapidary. [< Gr. *glyptos,* carved, + *-LOGY.*] — **glyp'to-log'i-cal,** *a.*— **glyp-tol'o-gist,** *n.*

Glyp'to-po'mus, 1 glip'to-pō'mus; 2 glĭp'tō-pō'mŭs, *n. Paleon.* A genus of fishes of the Upper Old Red Sandstone formation found in Scotland: so named for the irregular wrinkles on their scales and external bones. [< Gr. *glyptos,* carved, + *pōma,* lid.]

Glyp'to-sau'ri-dæ, 1 glip'to-sō'ri-di; 2 glĭp'tō-sə'rĭ-dē, *n. pl. Herp.* A Tertiary family of saurians, the *Placosaurinæ.*

Glyp'to-sau'rus, 1 glip'to-sō'rus; 2 glĭp'tō-sə'rŭs, *n.* [*-saurus,* lizard.] — **glyp'to-sau'roid,** *n.*— **glyp'to-sau'roid,** *a.*

Glyp'to-scor'pi-us, 1 glip'to-skōr'pi-us; 2 glĭp'tō-scŏr'pĭ-ŭs, *n. Paleon.* A genus of fossil crustaceans of the order *Eurypterida,* found in the coal-bearing part of the Carboniferous rocks in Scotland.

glyp'to-thē'ca, 1 glip'to-thī'kə; 2 glĭp'tō-thē'că, *n.* A museum or cabinet of engraved or sculptured works.

The *Glyptothek,* the little sculpture gallery, is in itself one of the most ideal and harmonious of the works of art in Munich.

ANNA HOWITT *Art-Student in Munich* p. 146. [c. a. v. 1854.]

[< Gr. *glyptos,* carved, + *thēkē;* see THECA.] **glyp'to-thek†.**

glyp'to-the'ri-um, 1 glip'to-thī'ri-um; 2 glĭp'tō-thē'rĭ-ŭm, *n. Paleon.* A genus of glyptodonts, remains of which are found in the Lower Pleistocene formation of Texas. [< Gr. *glyptos,* carved, + *thērion,* beast.]

glyr'ter, 1 glir'tər; 2 glĭr'tĕr, *n.* Same as CLYSTER.

g. m., *abbr.* Gun metal.

gm., *abbr.* Gram.

G.·.M.·., *abbr.* Grand Master.

G. M. B., *abbr.* **1.** Grand Master of the Order of the Bath. **2.** Good merchantable brand: specif. applied to copper.

Gmel'i-na, 1 mel'i-nə or mi-lai'nə; 2 mĕl'ĭ-nă or mĭ-lī'nă, *n. Bot.* A genus of trees of the family *Verbenaceæ,* natives of tropical Asia and Australia. *G. arborea,* a large tree of the mountains of India, is valuable for its timber. *G. zhevlani* of Ceylon, is in ornamental cultivation, and its bark and roots are used medicinally by the natives. [< S. G. *Gmelin,* German botanist.]

gmel'in-ite, 1 mel'in-ait; 2 mĕl'ĭn-īt, *n. Mineral.* A vitreous, colorless, white or reddish, hydrous aluminum-calcium silicate ($H_{12}(NaCa)_2Al_2Si_4O_{24}$), crystallizing in the hexagonal system. [< C. G. *Gmelin,* of Tübingen.]

G. M. L. G., *abbr.* Grand Master of the order of the Indian Empire.

gmi'na, 1 mi'nə; 2 mī'nă, *n.* A canton or local division in Poland; equivalent to the Russian *volost.*

G. M. K. P., *abbr.* Grand Master of the Knights of St. Patrick.

G. M. M. G., *abbr.* Grand Master of the order of St. Michael and St. George.

G. M. P., *abbr.* Grand Master of the order of St. Patrick.

G. M. S. I., *abbr.* Grand Master of the order of the Star of India.

G. M. T., *abbr.* Greenwich meridian time.

Gmünd, 1 gmint; 2 gmĭnt, *n.* An ancient walled manufacturing town in Wurttemberg, Germany. **Gmünden†.**

Gna, 1 gnai; 2 gnā or gnă, *n. Norse Myth.* Frigg's messenger, whose horse, Hofvarpner, runs through both air and water. **Gnäs.**

gnash, *n.* [Rare.] A snap or bite with the teeth.

gnasht, *pp.* Gnashed. S. S.

gnat', 1 nat; 2 năt, *n.* **1.** A small nemocerous two-winged fly having long many-jointed antennæ, often plumose in the male, as a buffalo-gnat, gall-gnat, or turkey-gnat; especially, a blood-sucking culicid with aquatic larva; a mosquito. **2†.** Any small, worthless thing. CHAUCER *C.T.* ll. 5,929, 17,204. [< *AS.gnæt.*]— **blackgnat** (*Anything*), an artificial black fly with dark gray wings.— **gnat'catch'er,** *n.* **1.** A small American polioptiline sylviold bird, related to the kinglets, having a graduated tail and the wings not longer than the tail, as the blue-gray gnatcatcher (*Polioptila cærulea*) of the United States.— **gnat'flow'er,** *n.* The bee orchis (*Ophrys apifera*), a European orchid.— **gnat'hawk,** *n.* [Local, Eng.] The goatsucker.— **gnat'snap'per,** *n.* **1.** [S. Afr.] The bee-eater (*Merops apiaster*). **2†.** A gnat-eating bird: probably a beccafico. **gnat'snap'r't.** **3†.** A gaping gull.— **g.-strainer,** *n.* Figuratively, one who overestimates little things, while neglecting the greater. See Matt. xxiii. 24.— **g.-worm,** *n.* A gnat's larva; a wiggler.— **potato-scab g.,** a fly (*Epitaxus scabra*) which carries the scab disease from infected potatoes to healthy ones.

gnat, *n.* A bird, the knot (*Tringa canutus*).

gnat'catch'er, gnat'flow'er, etc. See under GNAT', *n.*

gnath-,) 1 nath-, nath'o-; 2 năth-, năth'ō-. From Greek **gnath'o-,**) *gnathos,* jaw: combining forms.— **gnath'al,** *a.* Same as GNATHIC.— **gnathal nerve,** the trigeminal nerve.— **gnathalgia,** *n.* Neuralgia of the face and jaw.— **Gnath"an-a-can'thi-dæ,** *n. pl. Ich.* An Australasian family of acanthopterygian fishes with a compressed body, velvety scales, narrow pectorals, and complete ventrals; velvet-fishes. **Gnath"an-a-can'thus,** *n. (t. g.)* — **gnath"an-a-can'thid,** *n.* — **gnath"an-a-can'thoid,** *a.* — **gnath"ary-sis,** *n. Pathol.* Fixed rigidity of the joint of the lower jaw. **gnath"an-cy-lo'sis;** — **gnath'le,** *a.* Of or pertaining to the jaw.— **gnathic index,** see table under CRANIOMETRY.— **gnath-di'lum,** *n. [L.A. pl.] Ornith.* Either ramus or prong of a lower mandible.— **gnath'i-on,** *n.* A craniometrical point. See CRANIOMETRY.— **gnathi'sm,** *n.* The classification of mankind based on measurements of the jaw. Degrees of gnathism are distinguished by means of prefixes: as, *eurygnathism,* mesognathism, orthognathism, etc.

Prognathism, with its opposite *orthognathism,* is applied by ethnologists to describe the varying degrees of projection of the upper jaw. *Eurygnathism* is the lateral projection of jawbones as characteristic of the Mongolian race.

Eneye. Brit. 11th ed., vol. xxii. p. 424.

— **gnathi'te,** *n. Zoöl.* A mouth-appendage in arthropods, as a mandible.— **gnath'i'tis,** *n. Pathol.* Inflammation of the cheek or the upper jaw.— **gnath'o-base,** *n. Zoöl.* A joint of the proximal part of the appendage of an arthropod, which serves to carry and support the gnathite.— **gnath'o-cite,** *a.*— **Gnath"ob-del'li-da,** *n. pl. Zoöl.* An order of leeches which includes the apothecary's leech and is characterized by three toothed jaws and a muscular pharynx with presence of red blood. They lay their eggs in cocoons.— **gnath'o-ceph'a-lus,** *n.* [-*l*, *pl.*] *Teral.* A monster in which the head is represented by the jaw alone.— **gnath'o-dal'ti-num,** *n.* [-*NA, pl.*] *Paleon.* A plate formed by the second pair of jaws, as in most chilognaths.— **Gnath"o-don'ti-a,** *n. pl. Paleon.* An extinct order of diapsidan reptiles, equivalent to the *Rhynocoraces* of Cope, including the *Procolophonia,* but possessing pavement-like teeth on the pterygopalatines and a large toothless beak.— **gnath'o-dont,** *a.* & *n.*— **gnath-om'e-ter,** *n. Craniom.* An instrument to measure the angles of the lower jaw.— **gnath-on'ic,** *a.* Parasitical: from *Gnatho* (Big Jaw), a character in Terence's *Eunuchus.*— **gnath-on'ic-al-ly,** *adv.*— **gnath-on'ic-al-ly†, gnath'o-nism,** *n.* A fawning attitude; flattering talk.— **gnath'o-nize†,** *vi.* To play the sycophant.— **Gnath-oph'o-ra,** *n. pl. Conch.* A section of a group of gastropods having a jaw, as in *Geophila, Palpebrinachata,* and *Pectinibranchiata.*— **gnath-oph'o-rous,** *a.*— **gnath'o-plas"ty,** *n. Surg.* The formation of a cheek by plastic surgery.— **gnath'o-pod,** *n. Zoöl.* One of the appendages of the *Gnathopoda.* **II.** *n.* **1.** One of the *Gnathopoda.* **2.** A gnathopodite.— **Gnath-op'o-da,** *n. pl.* **1.** *Crust.* The *Xiphosura.* **2.** *Zoöl.* The *arthropoda,* — **gnath'o-pod'ite,** *n.* A limb modified into a mouth-part in arthropods, as in crustaceans: foot-jaw; maxilliped.— **gnath-op'o-dous,** *a.* Gnathopod.— **gnath-os'ta-sis,** *n. Pathol.* Malocclusion.— **gnath-os'te-gite,** *n. Crust.* A plate-like ex,ansion of a middle joint of each of the outermost maxilliped, so arranged as to form a shield over the mouth-parts.— **Gnath"o-sto'ma-ta,** *n. pl. Crust.* A division of crustaceans, especially of copepods, with the jaws functionally developed, as in *Cyclopidæ,* etc.— **gnath-os'to-mate,** *a.* **I.** *Zoöl.* Having true jaws, as all vertebrates above the lampreys and hags. **II.** *n.* One of the gnathostomate vertebrates.— **gnath"o-sto'ma-tous,** *a.*— **Gnath-os'to-mi,** *n. pl. Zoöl.* A division of vertebrates with a well-defined lower jaw, including all but the myzonts and leptocardians.— **gnath'o-stome,** *n.*— **gnath-os'to-mous,** *a.*— **gnath'o-the'ca,** *n. Ornith.* The horny sheath of the lower mandible.

gnat'ling, 1 nat'lin; 2 năt'lĭng, *n.* A small gnat; a contemptible, spiteful creature. [also, to gnaw.

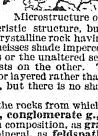
gnawd, *pp.* Gnawed. S. S.
Gneĝe-nau, 1 gnāĝ'e-nou; 2 gnī'se-nou, **August, Count Neidhardt von** (a/z/1760–a/16/1831). A Prussian marshal; at Waterloo.
gneiss, 1 nīs; 2 nīs, *n.* [C.] *Geol.* **1.** A crystalline rock, of whatever origin, having the component minerals arranged in parallel bands or layers, and with a tendency to cleave into slabs. **2.** Formerly, and more specifically, such a rock, of presumably igneous origin, and composed essentially of quartz, feldspar, and mica, with or without other minerals.

Microstructure of Gneiss.

Gneiss, as used by the earlier petrologists, implied a certain mineral composition as well as a characteristic structure, but it is now very generally used for any crystalline rock having a gneissic or banded structure. Gneisses shade imperceptibly into the massive crystalline rocks or the unaltered sediments on the one hand and into schists on the other. They differ from schists in being banded or layered rather than schistose, and in the degree of lisility, but there is no sharp line between the two.

Gneisses are named from the rocks from which they were derived, as **granitic gneiss, conglomerate g.,** etc.; from those which they resemble in composition, as **granitoid g.** and from some contained mineral, as **feldspathic, hornblendic, epidotic, or graphitic g.,** and many other varieties.

Most gneisses are metamorphic rocks, the banded or layered structure being due to rearrangement and segregation of the minerals, partly with recrystallization, while the rock was in a highly plastic condition as the result of heat and pressure. There may have been some flow of the rock material as well. Other gneisses owe their banding in part to original banding of the rock, and primary gneisses, in which the banding is a true flow structure, formed while the rock was still molten, are also known.



— augen or eye gneiss, a gneiss containing large crystals or lenticular lumps (eyes), commonly of feldspar, embedded in the finer-grained and more schistose matrix. The longer diameters of the augen are parallel to the banding of the rock, and the foliation of the finer matrix forks around them so as to increase the resemblance to eyes. — **fundamental g.,** same as FUNDAMENTAL COMPLEX. — **slaty g.** (*Mining*), gneiss of an easily cleavable kind. — **gneiss'ic,** *a.* Consisting of, containing, or relating to gneiss. **gneiss-it'ic; gneiss'y‡,** *a.* **— gneissic structure,** a gneissoid structure in some crystalline rocks, made up of bands or layers of different mineral composition. — **gneiss'oid,** *a.* Resembling gneiss. **gneiss'-ose',— gneiss-os'i-ty,** *n.* The condition or structure of typical, slightly schistose gneiss: opposed to *schistosity*.
Gne'sen, 1 gnē'zen; 2 gnē'zen, *n.* A manufacturing town in Poland.
Gne-ta'ce-æ, 1 nı-tē'sı-ē; 2 ne-tā'ce-ē, *n. pl. Bot.* A family of gymnospermous shrubs, including some trees — the jointfir family (order *Gnetales*) — with jointed stems and branches, opposite and imbricated and sometimes scaly leaves, and unisexual flowers. — **Gne-ta'ceous,** *a.*
Gne-ta'les, 1 nı-tē'lēz; 2 ne-tā'lēs, *n. pl. Bot.* A group of plants equivalent to the family Gnetaceæ.
Gne'tum, 1 nī'tum; 2 nē'tum, *n. Bot.* A small genus of trees and creeping shrubs, typical of the family *Gnetaceæ*. They have jointed, knotty branches, opposite entire evergreen leaves, and axillary or terminal catkins. [< Malay *gnemon*.]
G. gnemon, an East-Indian species, yields edible seeds.
gnib, 1 nib; 2 nib, *n.* [Scotch.] Sprightly; smart.
Gni'dus, 1 nī'dus; 2 nī'dus, *n. Bib.* (Douai).
Gni'pa-cave', 1 nī'pa-kēv'; 2 nī'pā-cēv', *n. Norse Myth.* The cavern in which the bloody-breasted dog Garm is chained and barks until he breaks loose at Ragnarok.

gnos'tı̇-cal-ness, *n.* [Humorous.] Knowingly.
Gnos'tı̇-cism, 1 nos'tı-sizm; 2 nŏs'ti-çĭsm, *n. Ch. Hist.* An eclectic system of religion and philosophy, existing from the 1st to the 6th century. It attempted in order to commend Christianity to the philosophical tenets of the age, a system of mediation between the two, by teaching that knowledge, rather than faith, was the key to salvation, and thus explaining some of the features of Platonism, Orientalism, and Dualism with Christianity. The Gnostics held that God in himself is unknowable and unapproachable, but that all existences, material and spiritual, are derived from the Deity by successive emanations, or eons. Gnosticism borrowed certain elements from the current Persian philosophy, and from the Greek doctrines connected with Neoplatonic ideas of Logos and Nous. Christ was merely a superior eon. Compare EON, 2. Among the principal systems were those of Basilides (A. D. 125–140), Valentinus (140–160), the Ophites, Carpocrates and Epiphanes, Saturninus, Cerdo, Marcion (150), and Bardesanes (151–222).

Gnosticism . . . afforded an easier way of salvation (by knowledge) than the humiliation and self-denial preached by the gospel.
F. H. FOSTER in *Concise Dict. of Religious Knowledge* p. 329.

Saturday Review quoted by SIR ROBERT *Browning* p. 50. [n. s. 1890.]

gold, 1 gōld; 2 gōld, *n.* 1. A metallic element having a characteristic yellow color, very heavy, very soft, and the most ductile and most malleable of metals: extensively used for coinage and for jewelry. See ELEMENT.

Gold is not acted on by moisture or the atmosphere, but is soluble in nitro-hydrochloric acid. It is found native sometimes in crystalline forms of the isometric system; also in quartz-veins, with pyrite, in state, in metamorphic rocks, and in sand and alluvial soil resulting from the disintegration of such rocks. Geologically it occurs in all formations from the earliest rocks to deposits now forming. It is usually found alloyed with silver and containing small quantities of copper or iron, also in association with palladium, rhodium, and bismuth. It also occurs as electrum in

combination with mercury: as sylvanite, in combination with silver and tellurium; as nagyagite, in combination with lead and tellurium; in various sulfids, as those of copper, lead, iron, etc.; in other ores and in sea-water. Alluvial gold is separated as a rule by hydraulic machinery or by some form of placer mining, while auriferous rock is crushed and concentrated and the metal is then extracted by metallurgical process. Pure gold, being too soft for ordinary use, is generally alloyed with some other metal, the principal admixtures being the so-called *white alloy*, which is made with silver and used largely in jewelry, and the standard alloy used for coinage, which contains one part of copper to nine of gold in the United States, whereas in England it is one to eleven. Compare ALLOY. It is so malleable that it has been hammered into a leaf .00009 millimeter in thickness and so ductile that it can be drawn into wire of such fineness as only to weigh a gram for a length of 166 meters. Chemically, it forms two sets of compounds; the *aurous*, those in which it is univalent, and the *auric*, those in which it is trivalent. Its symbol is *Au* (*Aurum*). The value of pure or 24-carat gold remains fixed at $20.67+ per ounce troy, and the commercial price only varies very slightly from this.

Fineness in gold is expressed in parts of the unalloyed metal per thousand, the standard fineness for market quotations in New York and Paris being 900 and in London 916.6. Compare CARAT. It is estimated that about one-fourth of the gold annually produced is employed in coinage, the remainder being used in the arts and consumed in other ways. Compare ELEMENT. It was probably the first metal known, and the original sources were in Asia and Africa. Subsequently the mines in Hungary and the Ural mountains were worked. South America and Central America, after their discovery, became important sources of gold, and since gold was discovered in California in 1848, in Alaska in 1886, in Australia in 1851, and in Africa in 1884, these places have been the chief sources.

On account of its indestructibility, *gold* was regarded by the earlier chemists as the king of metals. ELIOT AND STORER *Inorganic Chemistry* § 505, p. 282. [L. B. & CO.]

2. The metal in the form of coin; hence, wealth; riches. Gold coin has been the only full legal tender in Great Britain since 1816, and was practically made the standard in the United States in 1834, and legally by the Demonetization Act of 1873. In 1878 silver was remonetized, but gold was again made the sole standard by the Currency Law passed in 1900. It was adopted as the monometallic standard of Germany in 1873, and when the mints of France and the Latin Union were subsequently closed to the free coinage of silver, it became practically the only international money of the Western world. Gold was worth 13 1/3 times as much as silver in ancient Egypt, 10 times in Greece and Rome before the Christian era, and as low as 7 1/2 times when Cæsar returned to Rome. Since that time the relative value of gold has been more or less steadily increasing, the commercial ratio being about 30 to 1, in 1912. **3.** A coating or wash of gold; the metal or that which resembles it; gilding, or a golden-yellow color; as, a book bound in white and *gold*; autumn tinges the leaves with *gold*. **4.** An alloy containing the metal or imitating it, applied especially to those preparations used in the operation of gilding. Compare GILD, *v.*; as, white *gold*; Dutch *gold*. See phrases. **5.** Precious, pure, or genuine quality, or something possessing such quality; as, a heart of *gold*; she is pure *gold*.

If in his gifts he can faithless be,
There will be no *gold* in his love to me.
LONGFELLOW *Wayside Inn, Queen Sigrid the Haughty* st. 15.

6. *Archery.* (1) The center of the target, usually gilded; the bull's-eye. (2) Hence, a hit in the center. **7.** *Bot.* (1) A marigold; especially, the pot-marigold or common marigold (*Calendula officinalis*) and the corn-marigold (*Chrysanthemum segetum*). (2)† A heliotrope. [< AS. *gold*, < √ *ghel*, be yellow.] Syn.: see MONEY.— **Abyssinian gold. 1.** Talmi-gold. **2.** Aluminum bronze. —**alluvial g.** (*Mining*), free gold found in formations deposited by or under water.— **Burmese g.,** gold worked and treated with coloring-matter and acids to give the finished product a reddish tinge.— **burnished g.** (*Ceram.*), a bright gold finish in porcelain: obtained by burnishing.— **chased g.** (*Ceram.*), a gold finish rubbed bright in places only, to form a pattern against the dull gold ground; a favorite way of treating Sèvres porcelain.— **crown g.** [Eng.], gold eleven-twelfths fine (.916.6), the standard in England since the reign of Charles II. (1660–1685).— **dead g.,** unburnished gold.— **diamin g.,** a golden-yellow dye derived from coal-tar: used for cottons.— **duc'at-gold",** *n.* **1.** Gold of great purity and fineness. **2.** Lustrous ornamentation with gold-leaf.— **Etruscan, Roman, or colored g.,** gold that has had the luster removed by nitric acid, leaving it satiny-yellow.— **filled g.,** a substitute for solid gold, used in jewelry, consisting of some base metal, generally brass, covered with a thin layer of hard gold by mechanical means. It is much more durable than gold-plated metals.— **German g.,** gold-powder of a low grade.— **glass-brushed g.** (*Ceram.*), a half-bright finish produced by use of a brush of glass fibers: similar in appearance to *sanded gold*.— **gold'-ball",** *n.* [Local, Eng.] A buttercup.— **g.-bank,** *n.* [U. S.] A national banking association authorized to issue notes payable in gold coin.— **gold'bas"ket,** *n.* Same as GOLD-DUST, 2.— **g.-bearing,** *a.* Yielding gold; auriferous. —**g.-beaten†,** *a.* Gilded or embossed with gold.— **g.-beating,** *n.* The act or operation of making gold-leaf by hammering.— **g.-beetle,** *n.* **1.** A golden beetle. See illus. under GOLDEN. **2.** A brilliant cassidid beetle, as *Coptocycla aurichalcea*, found on the potato.— **g.-beryl,** *n.* *Mineral.* Same as CHRYSOBERYL.— **g.-bloom,** *n.* [Local, Eng.] The marigold.— **g.-boat,** *n.* A dredging-boat used in obtaining gold from river sands and other bottoms. —**g. bob,** a small golden pendant, as on a piece of jewelry.— **g.-book,** *n.* A book-like pack made of paper stitched together to hold between its leaves sheets of gold-leaf.— **g.-bound,** *a.* [Rare.] Surrounded with gold.— **g.-brick,** *vt.* [Slang, U. S.] To cheat; defraud.— **g. brick** [Colloq., U. S.], a brick or bar of base metal gilded, used by swindlers, or a brick or bar of gold for which something else is substituted in delivery to the purchaser; hence, any swindle.— **gold'bug",** *n.* [Slang, U. S.] *Politics.* **1.** An advocate of a single monetary (gold) standard. **2.** A gold-beetle.— **g.-carp,** *n.* Same as GOLDFISH.— **g.-chain,** *n.* [Local, Eng.] The stonecrop.— **gold'crest",** *n.* A kinglet or golden-crested reguline bird.— **g.-crested,** *a.*— **gold'cup",** *n.* A buttercup, as *Ranunculus bulbosus*, *R. acris*, etc.; cuckoo-bud; kingcup.— **g.-cure,** *n.* See CHLORID.— **g.-cushion,** *n.* A pad on which gold-leaf is cut.— **g.-digger,** *n.* One who mines gold or digs for it; particularly, a placer-miner. —**g.-diggings,** *n. pl.* A region where gold is found mixed with sand or gravel.— **g.-driver,** *n.* [Rare.] A gold-beater. —**g.-drop,** *n.* [Slang.] A gold coin.— **g.-dropper,** *n.* [Colloq., Eng.] A thief or confidence-man who drops and picks up a gold coin, as for the purpose of engaging a victim's attention while a confederate robs him.— **g.-dust,** *n.* **1.** Gold in very fine particles. **2.** *Bot.* A European species of *Alyssum* (*A. saxatile*) with golden-yellow flowers, used in rock-gardens and rockeries. **rock-alyssum‡.**— **g.-fern,** *n.* A fern with the lower surface of its frond covered with a fine waxy-yellow powder, as certain species of *Nothochlæna* and *Gymnopteris*; especially, several species of the latter genus: applied also to some species of the genus *Gymnogramma*.— **g.-fever,** *n.* A mania for seeking gold: applied specifically to the excitement caused by the discovery of gold in California in 1848–1849.— **g.-field,** *n.* A region where gold is found.— **g.-fields,** *n.* [California.] Any plant of the genus *Bæria*, whose members are annuals with yellow flowers.— **g.-filled,** *pa.* Denoting an extra heavy or thick plate of gold on a base metal foundation, as in watch-making. —**g.-finder,** *n.* **1.** One who finds gold; a gold-seeker. **2.** [Prov. Eng.] A scavenger.— **g.-foil,** *n.* Thin sheets of gold, beaten in the shoder, but not in the mold: used especially by dentists, and much thicker than gold-leaf.— **g.-founded,** *a.* Founded because of the discovery of gold and the resultant boom; as, a *gold-founded* city.— **g.-fringe,** *n.* A pyralid moth (*Pyralis costalis*) having a golden fringe; the clover-hay worm.— **gold'ham"mer,** *n.* A bird, the Old World yellowhammer.— **gold'head",** *n.* A bird, the pochard.— **gold'hew-en†,** *a.* Gold-hued; golden. CHAUCER *C. T.* l. 2,502.— **g.-knaps,** *n. pl.* Buttercups. **g.-knobs‡; g.-knoppes‡.**— **g. lace,** lace or braid made of linen, silk, or cotton threads or cords, covered with finer threads of gold or gilt: used chiefly for uniforms, robes of office, and trappings. Formerly it was made of gold or silver-gilt wire.— **g.-laced,** *a.* Decorated with gold lace.— **g.-leaf,** *n.* The finest leaf made from gold, chiefly used for gilding. Ordinarily its thickness varies from 1/200,000 to 1/250,000 of an inch.— **g.-mine,** *n.* **1.** A mine containing gold ore: properly distinguished from *gold-diggings*, where gold is washed from the soil. **2.** [Colloq.] Any investment yielding or furnishing great profit. **3.** [Colloq.] Anything yielding great wealth or abundance of something desired.— **g.-miner,** *n.* —**g.-mole,** *n.* A chrysochloroid insectivore of South Africa, resembling a mole in appearance and habits and having lustrous fur, varying from golden bronze to green and violet, as the Cape golden mole (*Chrysochloris capensis*).— **g.-note,** *n.* [U. S.] A national-bank note payable only in gold. —**g.-of-pleasure,** *n.* An erect annual herb (*Camelina sativa*) of the mustard family, with long lanceolate leaves, small numerous flowers, and obovoid or pear-shaped pods: naturalized from Europe; false flax.— **g. paint,** bronze paint.— **g. plate,** vessels and utensils of gold, collectively.— **g.-powder,** *n.* A powder made by pounding honey or the like and gold-leaf in a mortar and then washing with hot water until only the gold-dust remains.— **g.-proof,** *a.* Proof against bribery or temptation by money.— **g.-purple,** *n.* Same as PURPLE OF CASSIUS, under PURPLE, *n.*— **g. rain,** *n.* (*Pyrotechnics*), a shower of persistent sparks discharged from a rocket or bomb; also, the small bits of combustible used to produce the shower.— **g.-rush,** *n.* A scramble, as of prospectors, toward a gold-field.— **g.-shell,** *n.* **1.** An anomioid bivalve (*Anomia ephippium*) common on rocky coasts. **2.** In painting, a shell coated inside with a soluble layer of gold paint.— **g.-shrub,** *n.* A tropical American evergreen shrub with yellow flowers (*Palicourea speciosa*). —**g.-size,** *n.* **1.** A size or varnish on which gold-leaf is laid in burnish-gilding. **2.** A size made of chrome yellow and varnish, used in bronzing, etc.— **g.-solder,** *n.* A solder for joining articles of gold or gold alloy, made of gold 12 parts, silver 2 parts, copper 4 parts.— **g.-spangle,** *n.* [Eng.] A moth (*Plusia bractea*): so called by entomologists. See PLUSIA.— **g.-spot,** *n.* [Eng.] A noctuid moth (*Noctua festucæ*).— **g.-stick,** *n.* [Eng.] An official of the British royal household, a colonel of the Life Guards or a captain of the gentlemen-at-arms, who bears a gilt rod, the gift of his sovereign, on state occasions: applied loosely to other state attendants.— **g.-swift,** *n.* [Eng.] A hepialid moth (*Hepialus hectus*); one of the swifts.— **g.-tooling,** *n.* In bookbinding, ornamentation with gold-leaf by tooling.— **g.-wash,** *n.* A place where gold is washed: used chiefly in the plural.— **g.-washer,** *n.* **1.** One who obtains gold by washing it from sand or gravel. **2.** A cradle or other implement for washing gold from auriferous dirt.— **g.-washing,** *n.* **1.** The act, process, or operation of obtaining gold by cradling. **2.** A place where gold is so washed: chiefly in the plural.— **g.-water,** *n.* A distillation containing spirits of wine, water, spices, and powdered gold-leaf.— **g.-work,** *n.* **1.** An article made or worked in gold. **2.** The process of making articles in gold; goldsmiths' craft. **3.** In the plural, a factory or other place where gold is prepared for the market; gold-workings.— **g.-worker,** *n.* One who makes a business of obtaining or working in gold.— **g.-workings,** *n. pl.* Gold-mines; placers.— **graphic g.,** same as SYLVANITE.— **green g.,** gold alloyed with silver: distinguished from *red gold*.— **hammered g., hammered-up g.,** thin gold plates with repoussé disks, to be sewed on embroidery-work.— **jewelers' g.,** eighteen-carat gold hardened by an alloy of copper and silver (six parts), used in making jewelry.— **lined g.,** gold having a backing of inferior metal.— **Mannheim g.,** a brass alloy for cheap jewelry, made of 80 parts of copper with 20 of zinc and sometimes a trace of tin.— **mock g.,** an alloy of copper, zinc, and platinum.— **mosaic g. 1.** A copper-and-zinc alloy; ormolu varnish. **2.** Tin sulfid; aurum musivum.— **old g.,** a dull, reddish-yellow color.— **on a g. basis,** making use of or in conformity with the gold standard, applied to a coinage of a country.— **red g.,** gold alloyed with copper: distinguished from *green gold*.— **rolled g.,** a compound plate having a gold face and a back or interior of inferior metal.— **rusty g.,** a free gold, the particles of which are so coated as to prevent immediate amalgamation. It is not known what this surface coating is, but it is possibly oxid of iron.— **sanded g.** (*Ceram.*), a half-bright porcelain finish, produced by polishing with fine sand. —**to measure golds** (*Archery*), to measure the exact distance from the center of a target to the place of each arrow shot into the gold, so as to determine the best shot.— **white g.,** an alloy of about five parts of silver to one of gold.

gold'-beat"er, 1 gōld'-bīt"ər; 2 gōld'-bēt"er, *n.* **1.** One who makes gold-leaf. **2.** A carabid beetle (*Carabus auratus*).— **gold-beaters' mold,** a pack composed of several hundred gold-beaters' skins, having between them partly beaten gold-foil to be hammered out into gold-leaf.— **g.-beaters' skin,** the outer coat of the cæcum of the ox, prepared for the use of the gold-beater.

gold'-bee"tle, etc. See under GOLD.

gold'-bird", 1 gōld'-būrd"; 2 gōld'-bĩrd", *n.* [Brit. Guiana.] A South-American chatterer (*Lathria cinerea*), noted for its piercing cry; greenheart-bird.

The natives know this bird as the Pe-pe-yo from its call, and *Goldbird* from the fact that all the pork-knockers believe it is never found far from deposits of gold; while the theory that it usually utters its call from a greenheart tree accounts for its third name. [< AS. *gylden*, < *gold*, gold.] — **golden age,** see AGE.— **gold'en-ball",** *n.* [Local, Eng.] **1.** The globeflower. **2.** The snowball-tree.— **g. balls,** pawnbrokers' balls. See BALL.— **g.-banded,** *a.* Striped with gold or yellow.— **g. beetle,** a leaf-beetle (*Cetonia aurata*) of the family *Chrysomelidæ*: so called from its metallic luster.— **g. book,** an official record of the nobles of Venice under the republic.— **g. bough. 1.** The European mistletoe. **2.** *Myth.* A certain branch of a tree in Diana's grove at Nemi, plucked by Æneas before he visited Hades. —**g. buck,** a Welsh rabbit with the addition of a poached egg.— **g.-bug,** *n.* **1.** The seven-spotted ladybird. **2.** A gold-beetle.— **g.-crested,** *a.* Having a yellow crest; as, a *golden-crested* wren.— **g.-crown,** *n.* A garden-plant having yellow-rayed flower-heads. It belongs to the genus *Gorteria*, of the aster family.— **g.-crowned,** *a.* Having the crown yellow; as, the *golden-crowned* sparrow (*Zonotrichia coronata*).— **g.-cup,** *n.* [Local, Eng.] The buttercup, globeflower, or marigold.— **g. dock,** a dock (*Rumex maritimus*) growing in brackish waters along the Atlantic coast of the United States.— **g.-dust,** *n.* *Bot.* Same as GOLD-DUST, 2.— **g.-eyed,** *a.* Having eyes with a yellow or golden iris. —**g.-feather,** *n.* A yellow-leaved garden-plant (*Chrysanthemum prætaltum*) of the aster family.— **g. fleece,** see FLEECE.— **g.-fly,** *n.* Same as GOLDEN WASP.— **g. gage,** a superior variety of plum.— **g.-glow,** *n.* The tall cone-flower (*Rudbeckia laciniata*).— **g. grease** [Slang], a bribe. —**g. hawkweed,** the king-devil (*Hieracium prætaltum*), a troublesome weed introduced from Europe.— **g.-herb,** *n.* The garden-orach. See ORACH.— **g.-knob,** *n.* The marsh-marigold.— **g.-knop,** *n.* [Local, Eng.] A ladybird.— **g.-knops,** *n.* Any of several species of buttercup (*Ranunculus*). —**g.-locks,** *n.* **1.** An asteraceous plant of the West Indies (*Chænolobus virgatus*). **2.** The common polypody, whose fronds, when mature, are yellow.— **g.-maid,** *n.* [Local, Eng.] An acanthopterous fish of the family *Labridæ*.— **g. maidenhair. 1.** The hair-cap moss. **2.** The common polypody.— **g.-mantled,** *a.* Having a coat with a golden sheen: specifically applied to the glistening yellow ground-squirrel (*Callospermus chrysodeirus*) of the alpine forests of northern California.— **g. meadow-parsnip,** a low umbelliferous herb (*Zizia aurea*) of eastern N. America, having compound umbels of yellow flowers.— **g. mole,** a gold-mole. —**g.-moss,** *n.* The stonecrop.— **g. mouse-ear,** mouse-ear hawkweed.— **G. Mouth,** John Chrysostom: a translation of the name from the Greek applied to him on account of his eloquence.— **g. number** (L. *aureus numerus*), the number indicating the place of a year in a metonic cycle of 19 years, used in calculating the movable feasts, as Easter. If 1 be added to the number of the calendar year (A. D.), and the result divided by 19, the remainder will be the golden number. Where there is no remainder the number is 19. It was usually printed in gold in old calendars, hence the name.— **g. oat,** the yellow oat-grass (*Avena flavescens*). Compare OAT-GRASS.— **g. perch** [Austral.], a fresh-water percoid fish (*Ctenolates ambiguus*).— **g. pippin,** an apple, the American golden pippin. **g. robin,** the Baltimore oriole.— **g. rose,** a rose of wrought gold, blessed by the Pope on Lætare or Rose Sunday, and usually presented to some Roman Catholic sovereign as a high honor, and in recognition of particular services rendered to the papal see. It has been conferred upon cities, churches, and states, as well as individuals. The custom of giving the rose antedates the year 1050.— **g. rule,** the rule of life given in Matt. vii, 12: "Whatsoever ye would that men should do to you, do ye even so to them."— **g. samphire,** a herb (*Inula crithmoides*) of the aster family, common on European seashores.— **g. saxifrage,** a low herb (*Chrysosplenium oppositifolium*) of the saxifrage family, bearing yellow flowers.— **g. section,** see SECTION.— **g.-shower,** *n.* Same as GOLDENCHAIN.— **g. sirup,** a light-yellow sirup or molasses, made from refiners' molasses.— **g.-spoon,** *n.* A small tree (*Byrsonima cinerea*) of the malpighia family, having yellow spoon-shaped petals.— **G. Spur,** an order of merit conferred by the Pope; formerly the order of St. Sylvester.— **g.-spur,** *n.* The common daffodil.— **G. State,** California: named from its gold-mines.— **g. sulfid of antimony, or sulfuret of antimony, g. sulfur,** an orange-red antimonic sulfid, occasionally used in medicine. —**g.-swift,** *n.* [Eng.] The ghost-moth.— **g. text,** a Scripture text taken as emblematic of some particular subject or principle.— **g. thistle,** any one of several herbs of the genus *Scolymus*, of the aster family, natives of the Mediterranean region. They have yellow strap-shaped florets, but the foliage resembles that of the thistle.— **g. trefoil,** the liverwort (*Hepatica triloba*). Compare LIVERWORT and quotation.— **g. trumpeter,** the agami.— **g. wasp,** same as CUCKOO-FLY, 1.— **gold'en-wing",** *n.* **1.** A golden-winged woodpecker; a flicker. **2.** The golden-winged warbler.— **g.-withy,** *n.* The sweet-gale (*Myrica gale*).— **g.-worm,** *n.* A glowworm.— **g. wrasse,** a fish, the golden-maid.— **g.-Y,** *n.* [Eng.] A noctuid moth (*Plusia iota*).

golf, *n.* 1. A game played with clubs having wooden or metal heads by directing a small, resilient ball into a series of holes (usually nine or eighteen) placed at varying distances, sometimes of 600 yards or more, on a course, or links. The object is to hit the ball into each hole in as few strokes as possible. There are two forms of the game, *hole play* and *stroke play*, known also as *match play* and *medal play* respectively. In hole play, each hole is credited to the score of the player making it in the fewest strokes, and the player scoring the largest number of holes wins. In stroke play, all strokes made by each player in completing the round of eighteen holes are added together, and the player scoring the smallest number of strokes wins.

gom'pho-lite, 1 gom'fō-līt; 2 gŏm'fō-lit, *n. Geol.* Same as NAGELFLUH. [< Gr. *gomphos,* nail, + -LITE.]

Gom'pho-lo'bi-um, 1 gom'fō-lō'bĭ-um; 2 gŏm'fō-lō'bi-um, *n. Bot.* A genus of shrubs of the family *Papilionaceæ,* natives of Australia, with simple or compound leaves and yellow or red flowers, usually terminal; poison-bushes. There are about 24 species, many of them in ornamental cultivation. The foliage is poisonous to stock.

gom-pho'sis, 1 gom-tō'sĭs; 2 gŏm-fō'sis, *n. Anat.* An articulation or union by the firm implantation of one part in a socket situated in another, as the set or fang of teeth in the jaw or the styloid process in the temporal bone. [< Gr. *gomphōsis,* bolting together, < *gomphos,* bolt or nail.]

Gom-phre'na, 1 gom-frī'na; 2 gŏm-frē'na, *n. Bot.* A genus of annual, biennial, or perennial herbs of the family *Amaranthaceæ.* They are widely distributed in tropical regions, especially America. Some have opposite leaves, and flowers in spikes, panicles, or in globular heads. The best-known species is the globe-amaranth (*G. globosa*). [Cor. of L. *gomphræna,* amaranth.]

gom'phus, 1 gom'fus; 2 gŏm'fŭs, *n.* [GOM'PHI, 1 -fī; 2 -fi, *pl.*] *Spong.* A form of sponge-spicule. [LL., < Gr. *gomphus,* nail.]

go-mu'ti, 1 go-mū'tī; 2 go-mu'tĭ, *n.* [Malay.] *Bot.* 1. The areng. **2.** A durable black hair-like fiber obtained from the areng: valuable for cordage, etc., because it does not rot in water. **go-mu'ti-ĭ.** Compare ARENG.

gon-. See GONO-.

Gon'ae-tin'i-dæ, 1 gon'ak-tin'ĭ-dē; 2 gŏn'ăe-tin'i-dē, *n. pl. Zool.* A family of acontiarian sea-anemones, of the order *Edwardsiidæ,* with a thick layer of muscles in the body-wall and which often reproduce by longitudinal or transverse fission. **Gon'ae-tin'i-a,** *n.* (t. g.) [< Gr. *gonos,* generation, + *aktis,* ray.]

gon'ad, 1 gon'ad; 2 gŏn'ad, *n. Biol.* A mass of undifferentiated generative tissue from which the male or female essential organs, as ovary or testis, originate; a germ-gland. [< Gr. *gonē, ganos,* seed, < *gignomai,* become.]— **go-na'di-al,** *a. Biol.* Relating or referring to the gonads or sexual glands. **go-nad'ic.**

gon'a-duct, *n.* Same as GONODUCT.

go-na'gra, 1 go-nag'ra; 2 go-năg'ra, *n. Pathol.* Gout in the knee. [< Gr. *gony,* knee, + *agra,* catching.]

Go''na'tives', 1 gō'na'tĭv'; 2 gō''na'tĭv', **Les,** A seaport town on the western coast of Haiti. **Go''na-ives'.**

gon'na-kite, 1 gŏn'a-kīt; 2 gŏn'a-kit, *n.* [Afr.] An African tree (*Acacia adansonii*) yielding a durable timber; also, the *A. arabica.*

go'nal, 1 gō'nal; 2 gō'nal, *a. Ornith.* Of or pertaining to the gonys. **go-nyl'e-al.**

go-nal'gi-a, 1 go-nal'jĭ-a; 2 go-năl'gi-a, *n. Pathol.* Any painful affection of the knee. [< Gr. *gono,* knee, + *algos,* pain.]

gon'ang, 1 gon-äng'; 2 gŏn'äng'-ŭm, *n.* [Fr., < Jav.] *Zoöph.* An external receptacle protecting the dermal buds of calyptoblastic hydroids. [< GON- + Gr. *angeion,* < *angos,* vessel.]— **go-nan'gi-al,** *a.*

gon''a-pod'y-sis, 1 gon'a-pŏd'ĭ-sĭs; 2 gŏn''a-pōd'y-sis, *n.* [-SES, 1 -sēz; 2 -sēs, *pl.*] *Entom.* One of two pairs of elongated processes arising from the 8th and 9th abdominal segments of a cockroach. [< GON- + APOPHYSIS.]— **gon''a-po-phys'i-al,** *a.*

Go-na'qua, 1 go-nä'kwa; 2 go-nä'kwä, *n.* [S. Afr.] A descendant from a cross between Hottentots and Kafirs.

gon''ar-thri'tis, 1 gon'ar-thrī'tĭs *or* -thrĭ'tĭs; 2 gŏn''ăr-thri'tis *or* -thri'tis, *n. Pathol.* Inflammation of the knee-joint. [< Gr. *gony,* knee, + ARTHRITIS.]

gon''ar-thro'a-ce, 1 gon'ar-thrō'a-sē; 2 gŏn''ăr-thrō'a-çe, *n. Pathol.* White swelling of the knee; dropsy of the knee joint. [< Gr. *gony,* knee, + ARTHROCACE.]

gon''ar-throt'o-my, 1 gon'ar-thrŏt'o-mĭ; 2 gŏn''ăr-thrŏt'o-my, *n. Pathol.* Any incisive operation upon the knee-joint. [< Gr. *gony,* knee, < *arthron,* joint, + -TOMY.]

Gon'court, 1 gôn'kûrt'; *gôn cur'.* *n.* **1. Edmond Louis Antoine Huot de** (5/26/1822–7/16/1896), a French novelist, whose works deal especially with 18th-century life: collaborated with his brother Jules. **2. Jules Alfred Huot de** (12/1/1830–6/20/1870), a French novelist and miscellaneous writer; brother of Edmond.

Gond, 1 gond; 2 gŏnd, *n.* [E. Ind.] A Dravidian of the hilly country of Gondwana in India, or his language, akin to the Dravidian speech of the Deccan. See DRAVIDIAN.

Gon'dal, 1 gon'dal; 2 gŏn'dal, *n.* A native state in western British India; Kathiawar peninsula; 1,024 sq. m.

Gon'dar, 1 gon'dar; 2 gŏn'där, *n.* A manufacturing city; capital of Amhara, Abyssinia.

Gon'do-ko'ro, 1 gon'to-kō'ro; 2 gŏn'do-kō'ro, *n.* A town on the Nile river, Sudan, Africa; lat. 4° 51′ N.; has a large ivory trade; last port of the Khartoum boats.

gon'do-la, 1 gon'do-la; 2 gŏn'do-la, *n.* **1.** A long, narrow, flat-bottomed Venetian boat, with a high peak or *ferro* at one end, and propelled generally with one oar by the gondolier, who stands near the stern. Pleasure gondolas usually have a shelter amidships for passengers.

Gondola.

gon'de-ley; **gon'do-let;** **gon'do-lier'.**

He his ferry passed, then he knew that his *gondola* with its felze (little house) could also pass.

H. F. BROWN *Life on the Lagoons* p. 78. [MACM. 1894.]

2. [U. S.] A long, shallow, open freight-car for carrying coal, etc. **3.** [U. S.] A large flat-bottomed river-boat of light build.

Another source of trade was the Potomac River, which was navigable above Georgetown as far as Cumberland in long, flat-bottomed boats, sharp at both ends, called *gondolas.*

BEN: PERLEY POORE *Reminiscences* vol. i, p. 51. [M. & N. 1886.]

4. In decorative art, a carved vessel in crystal, agate, etc., as a low broad vase or bowl. **5.** An ornamental large coach, with curved bottom, and seats for eight or more occupants. **6.** A boat-shaped cabin-like car, with accommodation for passengers, fitted to the underside of an airship. [Lit., dim. of *gonda,* < Gr. *kondy,* drinking-vessel, prob. < Per. *kandā,* earthen vessel.] — **gon'do-let,** *n.* A small gondola. [of a gondola.

gon'do-lier', 1 gon'do-lēr'; 2 gŏn'do-lēr', *n.* The rower [< It. *gondoliere,* < *gondola:* see GONDOLA.]

gon''do-lier'a, 1 gon'do-lir'o; 2 gŏn'do-lēr'a, *n. Mus.* Same as BARCAROLE.

gon'do-li'no, 1 gon'do-lī'no; 2 gŏn'do-lī'no, *n.* [Venetian racing-gondola.

gon'do-li'no, 1 gon'do-lī'no; 2 gŏn'do-lī'no, *n.* [It.] A gondolier.

Gon-du'le-e, 1 gon-dū'lĭ-ē; 2 gŏn-dū'le-ē, *n. pl. Zoöph.* A section of pennatuloidean polyps having a fixed rachis, with bilateral pinnæ and no gonodactyles. [< It. *gondola*; see GONDOLA.]

— gon-du'le-an, *a.* & *n.*

Gond-wa'na, 1 gund-wā'na; 2 gŏnd-wā'na, *n.* A former province of central India. See GONDWANA.

Gond-wa'na-land, *n. Geol.* A hypothetical tract of land which is supposed to have formerly joined India to South Africa, of which the only traces now left on the surface of the sea are Madagascar and a few other islands.

gone, 1 gŏn *or* gon; 2 gŏn *or* gōn (XIII), *pa.* **1.** Passed **gone,** beyond help or hope; ruined; lost; as, a *gone* case. **2.** Marked by hunting; pursued; as, a *gone* scent. **3.** *Archery.* Beyond or wide of the mark; as, a *gone* shot. **4.** *Naut.* Carried away; parted; broken.

— a gone case or **goose** [Slang, U. S.], a person in a hopeless condition. **a gone coon** [Slang, U. S.], a person in the fox breaks covert.— **gone'-by',** *a.* Long past; bygone: also used substantively.— **gone'ness,** *n.* [Colloq.] A state of weakness, exhaustion, or faintness, as if expectanced a *goneness.*— **gon'er,** *n.* [Colloq., U. S.] One who or that which is gone beyond recovery or ruined; as, that man is a *goner.*

gon'er-ea, 1 gon'ĭ-sist; 2 gŏn'e-çĭst, *n.* A seminal vesicle. [< Gr. *gonē,* seed, + CYST.]

gon''e-o-cel'ic, 1 gon'ĭ-o-sĕl'ĭk; 2 gŏn''e-o-cĕl'ic, *a. Biol.* More like one parent than the other: said of hybrids.

Gon'er-il, 1 gon'ar-ĭl; 2 gŏn'er-il, *n.* In Shakespeare's *King Lear,* Lear's eldest daughter, a type of filial ingratitude.

gon'fa-lon, 1 gon'fa-lon; 2 gŏn'fa-lŏn, *n.* An ensign fixed to a revolving frame or a crossyard, generally with two or three streamers; originally, a banderole. **gon'fa-non†.**

In the imperial *gonfalon* is seen The Cross triumphantly outspread.

Tasso *Jerusalem Delivered* tr. by J. H. Wiffen, can. 1, st. 72.

[Cor. of *gonfanon,* < OF. *gonfanon,* < OHG. *gundfano,* < *gund,* battle, + *fano,* banner; cp. VANE.]

gon'fa-lon-ier', 1 gon'fa-lon-ir'; 2 gŏn'fa-lŏn-ēr', *n.* **1.** A gonfalon-bearer; a chief standard-bearer, as of the Church at Rome. **2.** The title of the chief magistrate of Florence, dating from 1293, and of other Italian cities. Later it became the title of a mayor or police official.

Gonfalonier . . . properly signifies Standard-bearer, but came to be the office of the highest authority.

TYLER *Univ. Hist.* vol. ii, bk. vi, p. 215. [n. d. & co. 1841.]

3. A general and constable of colors in the Turkish army. **gon''fa-lo-nier'ĭ; gon''fa-non-ier'.**

gon''fle-ment', 1 gŏn'fle-mäñ'; 2 gŏn''fle-mäñ', *n.* [F.] *Spiritualism.* The inflation of a medium's garments at a séance; term used by English spiritualists.

gong, 1 gog; 2 gŏng, *n.* **1.** *Mus.* An Oriental instrument made of an alloy of copper and tin, in the form of a round shallow disk, operated by percussion. When struck with a stick with a padded head, it produces a sonorous tone that can be heard a long distance. It is used by the Chinese in their temples, and in Western countries as a call or signal in hotels, steamboats, etc.; sometimes also in the orchestra to accentuate loud passages.

Gongs and cymbals are examples of instruments in which sounds are produced by the vibration of metal plates.

CASEY *Physics* tr. by E. Atkinson, bk. v, p. 221. [w. w. 1877.]

2. A fixed signal-bell of flat curvature, struck with a hammer that may be moved by a wire or cord. [< Malay *gông,* imit.] **gong'-gong',** *n.*

— gong'-bell'', *n.* Same as GONG, 2.— **g.-drum,** *n. Mus.* A flattened bass drum, proportioned like a tambourine.— **g.-hammer,** *n.* A hammer for striking a gong.— **g.-metal,** *n.* The alloy of copper and tin used in making gongs.— **g.-piano,** *n. Mus.* An Oriental instrument made of gongs fitted into a circular bamboo framework. The player sits inside the frame and strikes the gongs as he produces tones.— **g.-stand,** *n.* A frame from which a gong may be hung while being beaten.

gong'ga-ha, 1 gon-gon'ya; 2 gŏn-gŏn'ya, *n.* [Brax.] A Brazilian plant (*Hex gongonha*) of the holly family (*Ilicineæ*) from the leaves of which a tea resembling maté is made.

Gon'go-ra, 1 gon'go-ra; 2 gŏn'go-ra, *n.* [Brax.] Genus of tropical American, evergreen, epiphytal orchids having long, broadly lanceolate leaves, plaited, and drooping racemose flowers, yellow, purple, or white, sometimes spotted.

Gon'go-ra y Ar-go'te, 1 gŏn'go-ra ĭ ar-go'tā; 2 gŏn'go-rä ē är-gō'te, **Luis de** (?/1561–?/1627). A Spanish lyric poet.

Gon'go-rism, 1 gong'go-rĭzm; 2 gŏn'go-rĭsm, *n.* A pedantic and affected style of writing introduced by the poet Luis de Gongora in his later life.— **Gon''go-resque',** *a.* Characteristic of the Spanish poet Gongora, or of his style.

gon'gy-lus, 1 gon'jĭ-lus; 2 gŏn'gy-lŭs, *n.* [NL., < Gr. *gongylos,* round.] **1.** *Zoöl.* A spore of certain fungi. **2.** A round, hard, deciduous body connected with the reproduction of certain seaweeds. **3.** One of the granules in the shields of certain lichens. [< Gr. *gongylos,* round.]

go'ni-ac, 1 gō'nĭ-ak; 2 gō'ni-ăc, *a.* Of or pertaining to the gonion.— **gonia angle,** same as MANDIBULAR ANGLE. See under CRANIOMETRY.

Go''ni-as-ter'i-dæ, 1 gō'nĭ-as-ter'ĭ-dē; 2 gō''ni-as-ter'i-dē, *n. pl. Zoöls.* The *Asterioidea.* **Go''ni-as'ter-id,** (t. g.) Gr. *gōnia,* angle, + *astēr,* star.]— **go''ni-as'ter-id,** *a.* & *n.*— **go''ni-as'ter-oid,** *a.*

gon''ia-lite, 1 gō'nĭ-a-līt; 2 gō''ni-a-lit, *n.* A gonidioid cephalopod.

Go''ni-a-tit'i-dæ, 1 gō'nĭ-a-tĭt'ĭ-dē; 2 gō''ni-a-tit'i-dē, *n. pl. Conch.* A Paleozoic family of ammonites, especially those with the siphuncle directed backward. **Go''ni-a-tit'es,** *n.* (t. g.) [< Gr. *gōnia,* corner.]

— go''ni-a-tit'ic, *a.*— **go''ni-a-tit'id,** *n.*— **go''ni-a-tit'oid,** *a.* & *n.*— **Go''ni-a-tit'oid-e-a,** *n. pl. Conch.* The *Goniatitidæ* as a superfamily.— **go''ni-a-tit'oi-dal,** *a.* & *n.*— **go''ni-a-ti-tin'u-la,** *n.* [-LÆ, *pl.*] *Conch.* A larval stage of an ammonite when it resembles an adult goniatitid.

gon'ic, 1 gon'ĭk; 2 gŏn'ic, *a. Med.* Pertaining to generation, and especially to semen. [< Gr. *gonē,* seed.]

go'nid, 1 gō'nĭd; 2 gō'nid, *n.* Same as GONIDIUM.— **gon''ti-dan'gi-um,** *n. Bot.* A sporangium within which gonidia are produced.— **gon''ti-dif'er-ous,** *a.* Bearing gonidia.— **gon''ti-dif'ti-um,** *n. Bot.* A small gonidium.— **go-nid'i-og'e-nous,** *a. Bot.* Producing gonidia.— **go-nid'i-oid,** *a. Bot.* Resembling gonidia.— **go-nid'to-phore,** *n. Bot.* Same as CONIDIOPHORE.

gon''nid'i-al, 1 gon'ĭd-ĭ-al; 2 gŏn'id-i-al, *a. Bot.* Of, pertaining to, or bearing gonidia.— **gonidial layer,** the stratum in a lichen-thallus composed of gonidial cells.

g. cell'-al, *n. Bot.* Of or pertaining to the cells of gonidia; as, the *gonidial* grooves of a sea-anemone. [See GONIO-.]

go-nid'i-o-phyl, 1 go-nĭd'ĭ-o-fĭl; 2 go-nid'i-o-fĭl, *n. Bot.* Same as GONIDIOPHORE.— **go-nid'i-o-phyl'ic,** *a.*

go-nid'i-ose, 1 go-nĭd'ĭ-ōs; 2 go-nid'i-ōs, *n.* Having gonidia.

go-nid'i-um, 1 go-nĭd'ĭ-um; 2 go-nid'i-um, *n.* [-I-A, *pl.*] *Bot.* 1. In algæ, a name for merely unsuccessful propagative cell produced asexually. **2.** In fungi, same as CYSTIDIUM. **3.** In mosses, a cell filled with green granules. **4.** In lichens, one of the green algal cells of a thallus. [< Gr. *gonē,* see GONAD, + -IDIUM.]

gon'lel, 1 gon'yel; 2 gŏn'yel, *n.* [Scot.] A foolish, stupid **go-nim'i-um,** 1 go-nĭm'ĭ-um; 2 go-nim'i-um, *n.* [-I-A, *pl.*] *Bot.* In lichens, a bluish-green gonidium or algal cell.

Gr. *gonimos, productive, < *gignomai,* produce.]— **go-nim'ic,** *a.*— **gon'i-mous,** *a.*

gon'i-mo-blast, 1 gon'ĭ-mo-blast; 2 gŏn'i-mo-blăst, *n. Bot.* One of the spore-producing filaments springing from the carpogonium of the red algæ after fertilization and preceding the carpospores. [< Gr. *gonimos,* fruitful, + -BLAST.]

gon'i-mo-lobe, 1 gon'ĭ-mo-lōb; 2 gŏn'i-mo-lŏb, *n.* The terminal lobe of a coalocoblast.

go'nin-o-, 1 gō'nĭn-o-; 2 gō'nin-o-. From Greek *gōnia,* angle, corner: a combining form.— **go''nĭ-o-au-tot'e-cous,** *a. Bot.* In mosses, having both male and female inflorescence on the same individual. **gon''ĭ-o-au-to'ci-ous,** — **go''nĭ-o-ply-ma'ri-an,** *n.* *Paleon.* A genus of clymenias with angular lobes found in the Devonian formation.— **go''nĭ-o-cra''ni-on'e-ry,** *n.* The branch of craniometry that is concerned with the measurement of cranial angles.— **go''nĭ-o-cra'ni-a,** *n. Zoöl.* A genus of bird-lice parasitic on domesticated birds.— **Go''nĭ-o-don'tes,** *n. pl. Ich.* The *Lariviatilæ.*— **go''ni-o-don'ti,** *n.* [-TUS, *pl.*] *Paleon. Zoöl.* A genus of mollusks with branchiæ arranged in saddle fashion on the back.— **Go''nĭ-og'na-tha,** *n. pl. Zoöl.* A division of pulmonate gastropods with a jaw of several pieces obliquely joined together, as in *Orthaliciæ.*— **go''nĭ-og'na-thous,** *a.*— **go'ni-o-graph,** *n.* An instrument for describing angles.

Other words beginning with this prefix will be found in alphabetical place, either singly or in groups.

go'ni-oid, 1 gō'nĭ-oid; 2 gō'ni-oid, *a.* Angular: said of crinoidal crystals.

go''ni-om'e-ter, 1 gō''nĭ-om'ĭ-tər; 2 gō''ni-ŏm'e-ter, *n.* An instrument for measuring angles, as of the human head in craniometry or the angles between the faces of crystals.

Craniometrical goniometers are named from the parts for which designed; as, **facial goniometer, mandibular g., occipital g., parietal g.** The most simple form for

use in crystallography, the **contact-g.**, or **hand-g.**, is a graduated arc having two pointers, for direct reading by the eye. For more accurate determination a **reflecting g.** is used, measuring the angular space through which a crystal is turned to produce coincident reflections from the two surfaces enclosing the angle. The **two-circle g.**, or **theodolite-g.**, is employed to measure the angles of crystals in much the same way as the circles of latitude and longitude are used to determine places on the earth's surface. A more complex and accurate variety of this instrument has a third circle, and is known as the **three-circle g.** [< GONIO- + Gr. *metron*, measure.]

Goniometer.

Method of measuring the

go"ni-om"e-try, 1 gō"ni-om'-ĕ-trĭ; *n.* The science of angles in general; the branch of trigonometry that treats of angles.—**go"ni-o-met"ric**, *a.* Relating to goniometry.—**go"ni-o-met"ri-cal**, —**cal-ly**, *adv.*

go'ni-on, 1 gō"ni-on; 2 gō'ni-ŏn, *n.* [GO'NI-A, *pl.*] A craniometrical point. See CRANIOMETRY. [< Gr. *gônia*, corner.]

Go"ni-oph"o-lid"i-de, *n. pl. Herp.* A Jurassic family of crocodilians with biconcave vertebræ and annular scales.

Go"ni-oph'o-lis, *n.* (t. g.) **go"ni-oph'o-lĭd**, *n.*—**go"ni-o-phol'i-doid**, *a.* & *n.* **Go"ni-oph'o-ra**, *n. Paleon.* A genus of sharply angulated Silurian and Devonian mussels.—**Go"ni-o-phyl'lum**, *n. Paleon.* A genus of pyramidal Silurian *Tetracoralla*.—**go"ni-op'ter-us**, *n. Zool.* A genus of small West-Indian fishes of the family *Scorænidæ*, base-like in form.—**go'ni-o-stat**, *n.* A contrivance used in cutting diamond-facets.—**go"ni-o-thyr'i-da**, *a. Craniom.* Of or belonging to the point of union of the two halves of the lower jaw.—**go'ni-o-the'ca**, *n.* [-CÆ, *pl.*] *Bot.* Same as GONANGIUM.—**go"ni-o'tre-pous**, *a. Bot.* Four-cornered, having two corners anterior and posterior and two lateral; as, a *gonimotrepous* stem: opposed to *pleurotropous*.—**go"ni-o-zyg"o-ma'tic**, *a. Craniom.* Of or pertaining to the gonion and the zygoma.

go-ni'tis, 1 gō-nī'tĭs or -nī'tĭs; 2 gŏ-nī'tĭs or -nī'tĭs, *n. Pathol.* Inflammation of the knee-joint. [< Gr. *gony*, knee.]

gon'nardite, 1 gŏn'nar-dīt; 2 gŏn'ar-dīt, *n. Mineral.* A silky-white hydrated calcium-sodium-aluminum silicate. ($Ca.Na_2)2Al_2(SiO_3)_5.3H_2O$, that crystallizes in the orthorhombic system.

gonnet, *n.* [OBS.] A gun.

gon'o-, gon-, 1 gon'ō-, gon-; 2 gŏn'ō-, gŏn-. From Greek *gonos*, generation, seed (< *gonein*, become): combining forms used almost exclusively in biological and zoological terms to denote peculiarities of reproduction.—**gon'o-blast**, *n. Biol.* A bud or cell that will part in reproduction.—**gon'o-blas'ma**, *n. Biol.* Same as **gon'o-blast'id**, *n. Zoöph.* A gonophore.—**gon'o-blas-tid'i-um**, *n.* [-I-A, *pl.*] *Zoöph.* A blastostyle.—**gon'o-blas-tid'o-nĭ**, —**gon'o-blas-tid'i-al**, *a.*

Other words beginning with the prefix will be found in alphabetical place, either singly or in groups.

go-noc'a-ce, *n.* Same as GONOTHECACE.

gon"o-cal'y-ces, *n. pl.* [< Gr. *kalyx*, cup.] *Zoöph.* The bell of a gonophore.—**gon"o-cal'y-cine**, *a.*—**gon'o-cheme**, *n. Zoöph.* A medusiform planoblast giving origin directly to generative elements.—**gon'o-cho'ri-sm**, *n. Biol.* The separation of the sexes; the formation of male and female reproductive elements in different individuals.—**gon'o-cho-ris'mal**, *a.*—**gon"o-cho'ris**, *n.* [Rare.] An organism in which the sexes are separate and distinct.—**gon"o-coc'cus**, *n.* A micrococcus (*Micrococcus gonorrhææ*) found in gonorrhœal discharge and probably the cause of the disease. See plate of MICROBIA.—**gon'o-cœle**, *n. Zoöph.* The gastrovascular cavity.—**gon'o-cœ'lic**, **gon"o-cœ-cal**, *a.*—**gon'o-cœle**, *n.* That portion of the body-cavity of an animal in whose wall the genital products develop.—**gon'o-cyst**, *n. Helminth.* A cell in the wall of the sporocyst in the zoarium in which the embryos are developed in certain polyzoans.—**gon"o-den'dron**, *n. Zoöph.* A branched gonocalyptum or blastostyle.—**gon'o-duct**, **gon'o-coc'cal**, *a.*—**gon'o-cœle**, *n.* That portion of the body-cavity of an animal in whose wall the genital products develop.—**gon'o-cyst**, *n. Helminth.* A cell in the wall of the sporocyst in the zoarium in which the embryos are developed in certain polyzoans.—**gon"o-den'dron**, *n. Zoöph.* A branched gonocalyptum or blastostyle.—**gon'o-duct**, **gon"o-coc'cal**, *a.* Pertaining to or constituting the duct that conveys the sexual products to the exterior; a seminal duct or an oviduct. **gon'a-duct'**.—**go-nu'ci-um**, *n. Helminth.* A modified zooecium set apart for reproductive function in polyzoans.

gon'of, 1 gon'of; 2 gŏn'of, *n.* [GON-O'VIM, *pl.*] [Slang.] A pickpocket; thief. [Perhaps < Heb. *ganâbh*, thief.] **gon'oph**.

gon"o-gen'ic, *a.* [Rare.] Relating to reproduction from **Go-nol'o-bus**, 1 go-nŏl'o-bŭs; 2 gō-nŏl'o-bŭs, *n. 5. *Philos. & Ethics.* That which is held to be a proper and rational object of desire, ambition, and choice. Hence such phrases as **The Good** or **The Supreme Good** have attained a variety of meanings corresponding to the theories of the various schools of ethics regarding the nature and destiny of man as a rational being, and regarding his more fundamental relations to the Universal or to the Supreme Being, whom religion calls God. With Plato, *The Good* held the supreme position in the kingdom of the eternal Ideas; with Aristotle, *The Supreme Good* was eudæmonia, or the activities in a harmonious way of all the rational

powers; with the Epicureans, it was pleasure or happiness, either of the individual or of the group to which he belonged; with those who take the religious point of view, The Supreme Good is obedience to, and oneness with, God; with those who conceive of morality as separable from religion, it is the keeping of the moral law, or the realization of a personal or social ideal.

SYN.: see PROFIT.—**relief good**, that end of choice and action which constitutes the virtue of discretion, and happiness of man: the supreme good; summum bonum.— **external g.**, good that is outside the soul or body of the person experienced from a distinctly personal standpoint.—**g. for g.** and **all**, finally; for the last time; to close the whole business.— **to the g.**, to one's credit or in one's favor; as, your bank account is $120 *to the good*.

2. Of or pertaining to the Pointed types of medieval architecture prevalent in Europe from the full evolution of the Romanesque style until the Renaissance, or roughly from A. D. 1200 to 1500; as, a *Gothic* window. The epithet is a misnomer, as the style had no connection with the Goths, in question having no connection with the Goths. The term was originally devised and applied in deprecation by Italian Renaissance scholars. See POINTED, the correct epithet for the style.

The *Gothic* church plainly originated in a rude adaptation of the forms of the Roman basilica to the purposes of Christian worship.
EMERSON *Essays*, *History* in first series, p. 24. [u. m. & co. 1890.]

gov'ern, 1 gu'vərn; 2 ġov'ern, *n.* [< F. *gouverner*, < L. *gubernare*, < Gr. *kybernaō*, direct a ship.]

Syn. command, control, direct, manage, mold, reign over, rule, sway. *Govern* carries the idea of authoritative administration or some exercise of authority that is at once effective and orderly. *Control* is effective, but not by momentary or occasional. One *controls* what he holds or can hold at will absolutely in check; as, a skilful horseman *controls* a spirited horse; a person *controls* his temper we say to one who is excited, "*control* yourself." A person *commands* another when he has, or claims, the right to make that other do his will, with power of inflicting penalty if not obeyed; he *commands* those whom he can prevent from doing anything contrary to his will; he *governs* one whom he actually does cause to obey his will; a parent may *command* a child whom he can not *govern* or *control*. The best teachers are not greatly prone to *command*, but *govern* or *control* their pupils largely by other means; a man *commands* the location where he can shape events as he pleases; a fortress *commands* the region when no enemy can pass against its resistance. *Govern* implies the exercise of knowledge and judgment as well as power, and usually something of systematic administration. To *rule* is more absolute and autocratic than to *govern*; to *sway* is to move by quiet but effectual influences; to *manage* is not only to influence feeling and action, but to shape character; to *manage* is to secure by skilful contrivance the doing of one's will by those whom he can not directly *control*; a wise mother by gentle management *governs* her children, molds the lives of her children; to be able to *manage* servants is an important element of good housekeeping. The word *reign*, once so absolute, now simply denotes, more or less loosely, the position of sovereign in a monarchy, with or without effective power; the King of England *reigns*; the Czar of Russia formerly both *reigned* and *ruled*; he is authorized, so he suspect, comply, obey, submit, yield.

gov'ern-a-ble, 1 guv'ern-a-bl; 2 ġov'ern-a-bl, *a.* That **gun'v'ern-a-blʼ,** may be governed; controllable; obedient.

gun'v'ern-mentʼ,] the state of being governed; especially, authoritative administration of the affairs of a state or other community; control, direction, or restraint exercised over men in communities; as, just and efficient *government*.

This absurdity arises from a misconception as to the origin of this *government* and its true character. It is, Sir, the people's Constitution, the people's *government*, made for the people, made by the people, and answerable to the people. DANIEL WEBSTER *Reply to Hayne*, U. S. Senate, Jan. 26, 1830.

It is rather for us . . . that we here highly resolve, that these dead shall not have died in vain — that this nation, under God, shall have a new birth of freedom — and that *government* of the people, by the people, and for the people, shall not perish from the earth. LINCOLN in Nicolay and Hay's *Abraham Lincoln, Gettysburg Speech, Nov. 19, '63* vii, p. 201. [c. co. 1890.]

From early times there have been three classes of government: (1) by **monarchy,** in which the administration of the affairs of the state is placed in the hands of a single individual; (2) by **aristocracy,** in which the administration is entrusted to a special class of persons supposed to be particularly qualified for the work; (3) by **democracy,** in which the powers of administration are exercised by the community itself, directly or by representative institutions.

Government may be of any form — monarchical, despotic, autocratic, aristocratic, democratic, republican; it may be local, municipal, state, or national. . . . Republican *government* embraces 24.3 per cent. of the area of the habitable world, and 11.4 per cent. of the world's population. The constitutional *government* (not republican) embraces 17.2 per cent. of the area, and 18.5 per cent. of the population. Colonies or dependencies without self-government embrace 27.3 per cent. of the area and 31.4 per cent. of the population. Autocracy embraces 31.1 per cent. of the area and 38.8 per cent. of the population.

New Encyc. of Social Reform p. 557. [P. & W. '08.]

2. The form or system of administration by which a community is controlled; the organization of power for the control of a state, or other community, and its interests.

3. Any territory over which the right of sovereignty is extended; a state or community governed by an authority; as, the *government* of Turkestan, in Asia. 4. Moral, mental, or physical control or restraint; as, guidance; restraint; as, the *government* of the tongue. 5. Exercise of authority by a parent, instructor, society, or the like; direction and control, as of a family.

graft⁴, *n.* **1.** Same as GRAFTING-TOOL. **2.** Same as SPIT², *n.*

graft'ing, [*graft'i*; 2 *grāft'ing*, *n.* **1.** The act or process of inserting in a stock a branch a budding shoot from another tree or plant, so that the sap may readily flow through the inner bark of both united parts.

The part of a vigorous sprout or twig inserted is called a *scion;* that into which it is inserted is the *stock*. The important features are to connect the inner bark of the two as much as possible and exclude the air till growth begins. *Grafting* is distinguished from *budding*, which is the insertion of a single bud through an incision made in the bark.

Grafting.

The following are some of the principal methods of grafting, in all of which the scions are tongued and firmly fixed and fastened: **bark-g.** (in which a scion with a long slant is inserted as in budding), **slip-g.** (in which the stock is cut square, the bark slit and raised, the scion half sawed-cut, and the remainder sharpened and put into the slit), **splice-g.** (in which the stock and scion are both cut with long slant, and the faces brought together and secured with a string: used where stock and scion are of the same size), **split-g.** (in which the stock is cut square and split, and the scion made wedge-shaped and pressed in: used with stocks larger than the scions), **tongue-g.** (like splice-grafting, with a slit in each stop, placed to interlock: chiefly used in root-grafting), **whip-g.** (splice-grafting), **wire-g.** (like slip-grafting, with wire pins attaching the end of the scion to the stock: used on refractory stocks, as grape-vines.) **2.** *Carp.* The joining, as of two beams, end wise; scarfing. **3.** *Apiculture.* A process of exchanging eggs or young larvæ in a queen-cell for the purpose of raising queens from the eggs of a choice queen.

graid, graid'ly. [Dial., Gt. Brit.] Same as GRADE, GRADELY.

grail, 1 grēl; 2 grāl, *n.* A broad bowl or chalice; specif., the Sangreal, supposed to have been of emerald.

According to a mediæval legend, the **Holy Grail,** or *Sangreal*, was the cup used by Jesus Christ at the Last Supper, preserved by Joseph of Arimathea, who received some of Christ's blood from the Cross in Crucifixion, and finally brought it to Britain, after which it disappeared. According to another legend, the angels committed it to a body of knights, who guarded it on a mountain. It appeared to any one not pure and holy, the cup would vanish. Sir Thomas Malory embodied the *Quest of the Holy Grail*, a French romance written about 1200, in his *Morte Arthur*, produced by Caxton in 1485. Tennyson, following this version, makes Galahad the hero of the quest, who, with Perceval and Bors, was alone pure enough to catch sight of the Grail. Wagner founded his great drama *Parsifal* upon the same legend.

And down the long beam stole the *Holy Grail*
All over covered with a luminous cloud,
And none might see who bore it, and it past.
TENNYSON *The Holy Grail* st. 16.

The office of *grammar* is not to go before and decree what men shall say, but to follow after and observe what men do say.
S. RAMSEY *Eng. Lang. and Eng. Grammar* p. iv. [O. P. P. 1892.]

The older grammarians recognize as the divisions of grammar (1) the **grammar of letters** or *orthography;* (2) the **g. of sounds** — *phonetics.* (3) the **g. of words** — *etymology;* (4) the **g. of sentences** — *syntax;* (5) the **g. of verse** — *prosody.* (See these words.) The modern tendency is to include only *etymology,* the science of the *word,* and (2) *syntax,* the science of the *sentence.*

What *grammar* really deals with are all those contrivances whereby the relations of words are expressed or pointed out. Sometimes it is position, sometimes phonetic symbolization, sometimes composition; sometimes flexion, sometimes the use of auxiliaries, which enables the speaker to put his words in such a way that they shall be intelligible to another.
Encyc. Brit. 11th ed., vol. xii. p. 626.

gran'ite,] gran'ĭt; **2** grăn'ĭt, *n. Petrol.* **1.** A holocrystalline granular igneous rock, composed essentially of quartz and alkalic feldspar, with or without muscovite, biotite, or hornblende, one or several. Formerly, and more specifically, such a rock composed of quartz, two sorts of feldspar, muscovite, and biotite. **2.** In the usage of many quarrymen and stonecutters, any massive, fairly coarse-grained crystalline igneous rock.

Microstructure of Granite.

Granites commonly contain two sorts of feldspar, orthoclase, or microcline, and a plagioclase, commonly oligoclase. In pegmatites there is ordinarily but one feldspar. Various accessories, such as garnet, tourmaline, and zircon are nearly always found. According to the mineral composition, granites are known as **binary, muscovite, muscovite-biotite, biotite, biotite-hornblende,** and **hornblende granites. Aplite, tourmaline,** and **epidote granites** are rarer. Granite containing biotite, but no muscovite, is sometimes called *granitite*; that with hornblende was formerly called *syenitic granite*; granite with no mica, or a very little muscovite, is *aplite* or *hayiite*. By insensible gradations granite passes into gneiss and other metamorphic rocks, giving rise to various phases, such as **gneissoid granite,** in which there is a tendency to a parallel arrangement of the mica. **Graphic granite** is strictly a form of pegmatite in which the quartz is so arranged as to resemble Hebrew or cuneiform writing. **Porphyritic granite** and **granite porphyry** contain phenocrysts of feldspar in a fine-grained base.

It has been inferred, that the *granites* have been formed at considerable depths in the earth, and have cooled and crystallized slowly under great pressure, where the contained gases could not expand. LYELL *Manual of Geology* p. 436. [c. m. 1851.]

2. Graniteware. **3.** A water-ice in which minute particles of ice are conspicuous. [< It. *granito*, orig. pp. of *granire*, reduce to grains, < *grano*, < L. *granum*, grain.]— **binary granite.** **1.** A variety of granite consisting essentially of quartz and orthoclase, without noticeable amounts of other minerals. **2.** Granite containing both white and black micas, in addition to quartz and feldspar.— **black g.**, in quarrymen's usage, any coarse-grained dark-

colored variety of syenite or gabbro.— **concretionary g.**, orbicular granite.— **G. State**, New Hampshire, U. S., where granite is found in great quantity.— **gran'ite-ware''**, *n.* **1.** A variety of ironware coated with an enamel that resists fire and acid, and resembles granite in color. **2.** A fine, very hard pottery, resembling ironstone china. **3.** Pottery having a variegated surface resembling or suggesting the markings of granite.— **orbicular** or **spheroidal g.**, granite having an orbicular structure, with spheroidal segregations. — **prune-g.**, *n. Petrog.* An orbicular granite the dark minerals of which are aggregated in lump-like formations suggestive of prunes. **pudding-g.**, — **the G. City**, Aberdeen, Scotland.— **white g.**, same as **muscovite**, 2.

-gran'nit'ic, *a.* **1.** Of the nature of granite; made or formed of granite; as, *granitic* rock. **2.** Rigid; unyielding as granite; inflexible. **gra-nit'i-cal'i-ty**.— **gran''it-ic'o-blue**, *a.* Growing upon granite, as a lichen.— **gran''it-if'er-ous**, *a.* Granite-producing.— **gra-nit''i-fi-ca'tion**, *n.*— **gra-nit'i-form**, *a.* Like granite in form or structure.— **gra-nit'i-fy**, *n.* To form into granite.— **gran''it-ize**, *vt.* To render like granite by permeation with quartz and feldspar. **gran''it-iset**.— **gran''it-i-za'tion**, *n.*

Gran'ite, **1.** A county in western Montana; 1,543 sq. m.; county-seat, Philipsburg. **2.** A city in Madison county, Ill.

Gran'ite Falls. A city in Chippewa and Yellow Medicine counties, Minn.

gran'i-tell, 1 gran'i-tel; **2** gran'i-tĕl, *n. Geol.* Granulite.

gran'i-telle'.

Gran'ite Mount'ain. A mountain in Oregon; height, 8,990 ft.

Gran'ite Peak. A mountain in Humboldt county, N. W. Nev.; height, 8,990 ft.

gran'ite-ville, 1 gran'it-vil; **2** gran'it-vĭl, *n.* A town in Albion county, S. C.

gran'it-ite, 1 gran'it-oit; **2** gran'it-it, *n. Petrol.* Any variety of granite containing biotite, but no muscovite.

gran''it-oid, 1 gran'it-oid; **2** gran'it-oid, *a.* **1.** Resembling granite; as, *granitoid* gneiss. **2.** *Petrol.* In igneous rocks, composed of constituent grains formed during the same stage of consolidation; granular. **gran''it-oi'dal**.

-gran''it-oi'dal, *a.* Granitoid.

gran''it-o'ne, 1 gran''it-ōn; **2** gran''it-ōn', *n.* [It.] A rock consisting of feldspar and mica in which the feldspar predominates.

gra-niv'o-rous, 1 gra-niv'o-rus; **2** gra-niv'o-rŭs, *a.* Subsisting upon grain; seed-eating: said especially of birds. [< L. *granum*, grain, + *vora*, eat.]

grank, 1 grank; **2** grăngk, *n.* [Dial. Eng., or Obs.] To groan; **gran'nant**, *n.* Same as GRANDAM. **gran'am**.

Hist.* Certain tracts of land in New Hampshire, Maine, and Vermont, once belonging to Indian tribes, but allocated by patent to settlers during the 18th century, and the subject of territorial controversy in colonial days. The most famous were the New Hampshire grants, which led to the formation of the "Green Mountain Boys" under Col. Ethan Allen. **6.** *Brewing.* A temporary receptacle for wort, consisting of a horizontal cylindrical copper vessel, placed below the mash-tub. **7.** A promise, or a thing promised. [< OF. *grant*, < *granter*; see GRANT, v.]

grant'ee, SYN.: see BENEFACTION; GIFT.— **grant in aid**, *Eng. Law.* **1.** Same as AID 3, (2) and (3). **2.** A treasury grant to supplement a local assessment made and collected by the local authorities.— **potato g.**, a piece of land formerly allotted by West-Indian planters to each of their slaves.— **g. reel**, a form of reel used in silk-manufacture for winding the skein with greater economy than in ordinary reeling, by an arrangement for laying on the traverse in diamond form.

Grant', *n.* **1. Anne, of Laggan** (*née* McVicar) (⁸/₁₁1755–¹¹/₁₁1838), a Scottish writer. **2. Sir Francis** (¹/₁1803–¹⁰/₂1878), a Scottish painter; president of the Royal Academy. **3. Frederick Dent** (¹/₀1850–¹/₁1912), an American general and diplomat; a police commissioner for New York city, 1894–1896; son of Ulysses S. **4. Sir James Hope** (⁷/₂1808–⁵/₇1875), a British general; brother of Sir Francis; born in Scotland; fought in India and China; took Pekin, 1860. **5. Ulysses Simpson**, originally **Hiram Ulysses** (²⁷/₀1822–⁷/₇1885), an American general; served in the Mexican war; brevetted captain for gallantry; engaged in farming and business until 1861; operated in the West; captured Vicksburg; lieutenant-general, 1864; conducted campaigns in Virginia; received surrender of Lee; 18th President of the United States; made a tour of the world between 1877 and 1879. **6.** A county in S. central Arkansas; 640 sq. m.; county-seat, Sheridan. **7.** A county in N. E. central Indiana; 416 sq. m.; county-seat, Marion. **8.** A county in S. W. Kansas; 576 sq. m.; county-seat, Ulysses. **9.** A county in W. Kentucky; 257 sq. m.; county-seat, Williamstown. **10.** A parish in central Louisiana; 700 sq. m.; county-seat, Colfax. **11.** A county in W. Minnesota; county-seat, Elbow Lake. **12.** A county in N. Nebraska; 760 sq. m.; county-seat, Hyannis. **13.** A county in S. W. New Mexico; 9 527 sq. m.; county-seat, Silver City. **14.** A county in Oklahoma; 1,004 sq. m.; county-seat, Pond Creek. **15.** A county in E. Oregon; 4,500 sq. m.; county-seat, Canyon City. **16.** A county in N. E. South Dakota; 694 sq. m.; county-seat, Millbank. **17.** A county in E. West Virginia; 450 sq. m.; county-seat, Petersburg. **18.** A county in S. W. Wisconsin; 1,157 sq. m.; county-seat, Lancaster. **19.** A county in Washington.

Grant's. [Local.] Same as GRANTCHESTER. **2.** The Cam river, on which Cambridge, England, is situated: Anglo-Saxon name. **2.** [Local.] Cambridge University.

Grant's Pass. A city in Josephine county, Ore.

grant'-sel', 1 grant'yu-les; **2** grănt'yu-lĕs, *n.* [-LI, 1 -i; **2** -lĭ, *pl.*] A granule.

gran'u-lar, 1 gran'yu-lor; **2** grăn'yu-lar, *a.* **1.** Composed of, like, or containing grains or granules. **2.** *Geol. Specifically*, in igneous rocks, aggregated in grains of constituent minerals, all of which were formed during one definite stage of the crystallization: contrasted with *porphyritic*. **gran'u-la-ry**.— **granular gland**, see GRANULIFEROUS GLAND.— **gran'ular-ly**, *n.*— **gran'ular-ness**, *n.*

gran'u-late, 1 gran'yu-lēt; **2** grăn'yu-lāt, *v.* [-LAT''ED; LAT'ING.] *t. i.* **1.** To form into grains or small particles, as gunpowder or zinc.

If tough and hard, it [the metal] can perhaps be fused, and shaken into a powder while melted, or *granulated* by being poured into water. ENCYC. *Brit.* Article GUN-POWDER *Qualitative Chem. Analysis* pt. ii, p. 121. [v. & a. 1879.]

2. To roughen the surface by raising granules on.

ti. **1.** To become granular. **2.** *Pathol.* To develop granulation: said of a wound. [< L. *granum*, grain.]

-gran'u-lat'ing-ma-chine'', *n.* A machine for reducing a substance to the form of grains. Specif.: (1) A device for producing metal in the granular form for use as a common method the hot metal is dropped on the face of a rapidly revolving disk, which scatters it centrifugally in minute spherules. (2) Apparatus for reducing a material to cake to gunpowder.— **gran'u-la-tiv(e)**, *a.* Granulating or granulated: as, *granulative* formations.— **gran'u-la''tor**, *n.* One who granulates, or a machine for granulating.

gran'u-lat''ed, 1 gran'yu-lāt''ed; **2** grăn'yu-lāt''ĕd, *pa.* **1.** Composed of or resembling grains; as, *granulated* sugar. **2.** Covered with minute granulic elevations, or rough from the presence of little grains; as, *granulated* leather; *granulated* leaves. **3.** *Ceram.* Stippled with a brush in imitation of granules; spotted; mottled. **4.** *Bot.* Covered or covered with fleshy granulations: said of healing wounds or the cavities of ulcers.

-granulated liver, a morbid formation of connective tissue causing hardening and wasting of the organ.— **g. steel**, steel made from pig iron by a process in which the first step is the granulation of the iron.

gran'u-la-tion, 1 gran'yu-lē'shon; **2** grăn'yu-lā'shon, *n.* **1.** The act of forming into grains, or the process or state of being formed into grains; as, the *granulation* of sugar.

Some metals may be obtained in a useful state of division by *granulation*. FARADAY *Chemical Manip.* p. 174. [c. & l. 1851.]

2. A granulated surface, or one of the elevations in a granulated surface. **3.** *Pathol.* (1) The process of forming new tissue in the healing of wounds. (2) *pl.* The minute flesh-colored head-like projections appearing on the surface of open wounds during the healing process. (3) The formation of tubercles on or in an organ, as on the liver or in the lungs.— **exuberant granulations** (*Pathol.*), same as PROUD FLESH. See FLESH.— **granulation tumor**, same as GRANULOMA.

gran'ule, 1 gran'yūl; **2** grăn'yul, *n.* A small grain, particle, or pill; specif., in botany, a sporule; in anatomy, a corpuscle or the like. [< LL. *granulum*, dim. of L. *granum*, grain.— **Babes-Ernst granules**, same as BABES-ERNST BODY.— **chromatic granules**, cell-granules which readily take the usual dye-stains.— **gran'ule-ball''**, *n. Histon.* One of the spherical groups seen on the body of an insect at the chrysalis stage. They consist of corpuscles in which are tiny bits of larval material.— **g. gland**, *n.* A one-celled gland, found in some flatworms, secreting a granular substance.— **Neisser's granules**, polar granules, granular bodies stainable with basic dyes found about the nuclei of certain leucocytes in the blood: possibly artifacts. — **Nissl granules**, small bodies discovered by Nissl in the protoplasm of nerve-cells.— **solar g.** (*Astron.*), one of the many grain-shaped spots of light which cover the surface of the sun when seen through a telescope.— **gran'u-lif'erous**, *a.* Bearing granules.— **gran'u-li-form**, *a.* Made up of grains, as a mineral.

gran'u-lite, 1 gran'yu-lit; **2** grăn'yu-lit, *n.* A finely granular crystalline foliated rock composed mainly of quartz and feldspar, but generally carrying garnet. A dark, more basic variety, rich in pyroxene, is called **trap-granulite**. In France *granulite* is the term employed for muscovite granite.— **gran''u-lit'ic**, *n. Pathol.* Miliary tuberculosis.— **gran'u-lize**, *vt.* [-LIZED; -LIZ-ING.] *Pharm.* To convert (a fine powder) into larger grains or into pellets or tablets by aggregation and agglutination, such product being specifically termed *granulated*, in distinction from *granulated*. **gran'u-lize**.

gran''u-li'te, 1 gran'yu-lit'ik; **2** grăn'yu-lit'ĭc, *a. Geol.* Characterizing an acid eruptive rock in which the quartz tends to assume partially its crystallographic forms.

gran'u-lo-, 1 gran'yu-lo-; **2** grăn'yu-lo-, *combining form* from Latin *granulum*, a small grain: a combining form denoting a formation resembling grains or particles.— **gran''u-lo-ad'i-pose**, *a.* Made up of granules and fatty matter.— **gran''u-lo-cry'tal-line**, *a. Geol.* Composed of nearly equal crystalline particles. **2.** Composed of granules and crystals, as certain tissues.— **gran'u-lo'ma**, *n.* [-MA-TA, *pl.*] *Pathol.* A morbid infective growth whose tissue resembles granulations; a granulation tumor.— **granuloma tropicum**, same as **YAWS**.— **gran''u-lom'a-tous**, *a.* Of or pertaining to granuloma.— **gran''u-lo-pulp'y**, *a.* Composed of granulations and pulp, as certain tissues.

gran'u-lose, 1 gran'yu-lōs; **2** grăn'yu-lōs, *n. Chem.* That portion of starch capable of being changed into sugar by certain ferments, and of being turned blue by iodin: distinguished from *cellulose*, the other ingredient.

There are two kinds of starch in every starch granule. The great mass is made up of a more readily soluble form, the *granulose*, while the remainder . . . is distinguished as starch-cellulose.
C. E. BESSEY *Botany* § 99 [c. & co. 1880.] p. 285.]

gran'u-lous, 1 gran'yu-lus; **2** grăn'yu-lŭs, *a.* Same as GRANULAR.— **gran'u-lose'**.

Gran'ville', 1 gran'vel'; **2** grăn'vĭl', **Antoine Perrenot de** (¹/₂1517–²/₃1586). A French ecclesiastic and statesman in Spain; cardinal; viceroy of Naples.

Gran'ville, 1 gran'vil; **2** grăn'vĭl, *n.* **1. George** (1667–¹/₁1735), Viscount Lansdowne; an English dramatist and statesman; Secretary of War. **Green'ville'**; **Gren'ville'**. **2. Earl**, (²/₃1690–¹/₄1763), John Carteret; an English statesman. **3. Earl** (⁹/₁₁1815–²/₁1891), George Leveson-Gower; an English statesman; twice Foreign Secretary; President of the Council. **4.** A county in N. E. North Carolina; 504 sq. m.; county-seat, Oxford. **5.** [prob. **Gra'ville**.] **2** grā'vĭl'. A fortified seaport town in La Manche department, France. **6.** A town in Hampden county, Mass. **7.** A village in Washington county, N. Y. **8.** A village in Licking county, O.; seat of Denison University (Baptist), founded in 1831. **9.** A town in New South Wales, W. of Sydney.

gran'yle, *n.* [Obs.] Same as GRANDYLE.

gran'zas, 1 gran'zas; **2** grăn'zas, *n.* [Sp.] In California quicksilver-mining, second-grade ore obtained in small lumps.

-gran-zi'ta, *n.* Diminutive form of GRANZA.

grape, 1 grēp; **2** grāp, *n. & vt.* [Scot.] To grope.

grape[2], *vi.* To gather grapes.

In October I went *a-graping* to the river meadows.
THOREAU *Walden, Winter Animals* p. 356. [c. m. & co.]

grape, *n.* **1.** The fruit of the grape-vine, of any one of the many species of the genus *Vitis*: extensively cultivated for eating and for making wine and raisins.

Of the varieties of white *grapes* . . . the verdello, . . . generally known . . . as the gouvelo, is a hardy species and bears fruit early, and its must, which emits a delicious perfume, contains 22 per cent. of sugar. H. VIZETELLY *Facts about Port* p. 90–92. [w. l. & co. 1880.]

Fruit, leaves, and vine of the Great Colman Grape.

2. A vine or climbing or trailing shrub of any one of the many species and varieties of the genus *Vitis*, of the family *Vitaceæ*, having tendrils and small fragrant flowers, and bearing clusters of pulpy berries (grapes); grape-vine. Compare VINE.

Many of the varieties of grape grown in the United States, as the Isabella, Catawba, and Concord, have been developed from the wild northern fox-grape (*Vitis labrusca*). Others, as the muscadines, are from a different species (*V. rotundifolia*). The hundreds of Old World varieties are from *V. vinifera*. See table below.

Climate and location exert a powerful influence over the *grape* and its juice, and every land must adapt itself to the elements as they are found to exist. . . . The manner of growing and training the *grape* is different in every country, according to a difference in soil as well as climate. . . . The methods, too, of pressing the *grapes* are as diversified as the cultivation, and the subsequent care given to the wines ranges in the same ratio.
EDWARD R. EMERSON *The Story of the Vine* p. 233. [G. P. P. '02.]

3. The fruit of certain plants other than the vine. **4.** *Mil.* Grape-shot.

Two were loaded with *grape* and canister, to clear the enemy's deck. A. S. MACKENZIE *Paul Jones* vol. i, p. 188. [c. 1876.]

5. The knob or caseabel on the butt of a cannon. **6.** Same as GRAPE-DISEASE. [< OF. *grape*, < OHG. *chrapho*, hook; cp. CRAMP[2], n.] — **blue grape** (Ohio), a black grape (*Vitis bicolor*) of the eastern United States, with a bluish bloom when ripe: in Illinois known as **fall g.**, in New York as **winter g.**— **bull g.**, the riverside grape (*Vitis*

vulpina).—**bullace g.**, same as MUSCADIN.—**cat' grape**, n. A bluish-black grape (*Vitis palmata*), native in the United States. The pulp is somewhat dry and tasteless and contains but one seed.—**Darla g.** [S. Austral.], a white variety of grape resembling the grape from Almeria, Spain, and often substituted for it.—**fall g.**, same as BLUE GRAPE.—**Gippsland g.**, the name in Victoria for the native grape.—**g.-blossom bud-gnat**, an insect (*Cecidomyia johnsonii*) infesting the grape.—**grape'-hoe'er**, n. *Rhinm.* Any insect that bores in the roots or shoots of the grape, as the larvæ of the moth *Ægeria polistiformis*.—**g.-cake**, n. The refuse material of grapes remaining after pressing out the juice.—**g.-caterpillar**, n. Any caterpillar which lives on grape-leaves.—**g.-curculio**, n. The grape-weevil.—**g.-cure**, n. The system, of European origin, of curing disease by means of a diet of grapes.—**g.-disease**, n. *Vet.* 1. Malignant or chronic grease associated with the growth of a parasitic fungus and the formation of red, raw excrescences on the surface. 2. Tuberculosis of the serous membranes in cattle, giving rise to a granular condition of the surface.—**g.-eater**, n. An Australian scansorpodal bird, especially *Zanthomiza chlorura*.—**g.-fly**, n. An insect (*Drosophila ampelophila*) whose larva is bred in grapes.—**g.-fungus**, n. A naked-spored mold (*Oïdium tuckeri*) on grape-vines; vine-mildew.—**g.-hopper**, n. A cercopid bug or leafhopper (*Erythroneura vitis*), yellow variegated with scarlet, destructive to grape-leaves.—**g.-hyacinth**, n. Any plant of the genus *Muscari*, of the family *Liliaceæ*, differing from true hyacinths in having its flowers ovoid or globular and minutely 6-toothed.—**g.-leaf-blight** (*Bot.*), brown spots due to the parasitic fungus *Cercospora viticola* on grape-leaves. The brown spotting associated with *Phyllosticta labruscæ*, which is now thought to be a conidial stage of *Laestadia bidwellii*, the blackrot fungus.—**g.-louse**, n. Phylloxera.—**g.-mildew**, n. *Bot.* Any of several parasitic fungous diseases of the grape, especially the downy mildew (*Plasmopara viticola*, and *Uncinula spiralis*).—**g.-moth**, n. One of various moths destructive to the grape, as the tortricid *Eudemis botrana*, whose larva devours the fruit.—**g.-pear**, n. The shadbush (*Amelanchier botryapium*).—**g.-root**, n. 1. The root of any species of the genus *Vitis*, but especially of *O. repens*, the Oregon grape, or low Mahonia. 2. The plant itself.—**g.-root worm**, the larva of the beetle (*Fidia viticola*) which infests the grape.—**g.-rot**, n. *Bot.* 1. The widely de- Grape-louse. 4/5 structive black rot due to *Sphæria bidwellii*. 2. The brown rot due to *Plasmospora viticola*. 3. The ripe-rot due to *Glœosporium fructigenum*. 4. The bird's-eye rot, or anthracnose, due to *Sphaceloma ampelinum*. 5. The white-rot due to *Coniothyrium diplodiella*.—**g.-slug**, n. *Entom.* The larva of the grape-vine saw-fly.—**g.-stone**, n. A seed or stone of the grape.—**g.-sugar**, n. Dextrose or glucose.

Crystals of cane-sugar and glucose, candied fruit, while those of *grape-sugar* are ill-defined, needle-shaped tufts.

Tyndman *Handbook Fruit Culture*, iv, p. 218. [A. 1857.]

—**g.-tree**, n. 1. The grape-vine. 2. The sea-grape.—**g.-weevil**, n. 1. A minute weevil (*Cælodes inequalis*) which punctures and destroys green grapes. 2. A gall-making curculionid (*Bariditas texarius*).—**g.-worm**, n. The larva of a grape-moth.—**native g.** [Austral.], an evergreen climber (*Vitis hypoglauca*) with edible black grapes.—**Oregon g.**, the low mahonia; grape-root.—**Portuguese g.** [U. S.], same as SUMMER GRAPE.—**social g.-caterpillar**, a caterpillar, the larva of *Harrisina americana*, of which large colonies are found feeding on grape-leaves.—**sour grapes**, that which a person affects to despise, because it is beyond his attainment: in allusion to the fable of the fox and the grapes; also, unwelcome results, consequences: in allusion to the passage in the Biblical quotation: "The fathers have eaten *sour grapes*, and the children's teeth are set on edge." *Ezek.* xviii, 2.—**wild g.**, see CHONDRODENDRON.—**winter g.**, same as BLUE GRAPE.

grape'-fern, n. See under GRAPE, n.

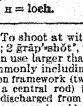
grape'flow'er, 1 grēp'flou'ẽr; 2 grāp'flow'ẽr, n. The name formerly given to the grape-hyacinth (*Muscari botryoides*).

grape'fruit', n. 1 grēp'frūt'; 2 grāp'frūt', n. The round shaddock (*Citrus decumana*), a large pale-yellow citrous fruit of tropical regions, cultivated also in the United States. It is highly prized for its refreshing somewhat acid pulp and juice. The principal varieties of grapefruit cultivated in the United States are the *Hart*, *Mammoth*, *Marsh*, *Royal*, *Triumph*, and *Walters*, all indigenous to Florida, and the *Pernambuco*, from Brazil.

Grapefruit.

grape'-fungus, **g.-hopper**, etc. See under GRAPE, n.

grape'less, 1 grēp'les; 2 grāp'les, a. Wanting the strength and flavor of grapes: made without grapes.



grape'let, 1 grēp'let; 2 grāp'let, n. A little grape.

grape'pear', **g.-root**, etc. See under GRAPE, n.

grap'er-y, 1 grēp'ẽr-i; 2 grāp'ẽr-y, n. [-ries, 1 -iz; 2 -iz, pl.] A building (commonly a glass house) or enclosure for growing grapes; a place stocked with grape-vines.

grape'shot', n. [Rare.] To shoot at with grape-shot.

grape'-shot', 1 grēp'shot'; 2 grāp'shŏt', n. A cluster of cast-iron shot, in modern use larger than those in canister-shot, commonly including nine balls arranged in an iron framework (two rings, two end plates, and a central rod) in three tiers and fitted to be discharged from a cannon. Formerly the balls were enclosed in a canvas bag so quilted in as to look like a bunch of grapes.

Charge of grape-shot.

The whiff of *grapeshot*, . . . if need be, will give quick account of it. CARLYLE *French Revolution* vol. i, p. 167. [R.]

grape'-vine', 1 grēp'-vvain'; 2 grāp'-vīn', n. 1. The vine that bears grapes. See GRAPE, 2. 2. [Slang, U. S.] A canard: current during the Civil War, and shortened from "a dispatch by grape-vine telegraph."

Just another foolish *grape-vine*. FORCHTIE WILLSON *The Old Sergeant* ch. 7.

3. *Wrestling.* The twining of a limb, as an arm or leg, around that of an opponent.—**grape-vine aphis** (*Entom.*), a plant-louse (*Siphonophora viticola*) found in and native of America, which infests the sprouting grape vines.—**g.-vine apple-gall**, a globular, greenish-tinted gall produced on the stems of grape-vines by the larva of a fly (*Cecidomyia vitis-pomum*).—**g.-vine bark-louse.** *Entom.* 1. A coccid bug (*Aspidiotus vitis*) of S. A disapplescale (*Aspidiotus uvæ*).—**g.-vine filbert-gall** (*Entom.*), one of a bunch of woolly greenish-colored galls occurring on grape-vine stems and resembling those caused by a curculionidan larva.—**g.-vine flea-beetle**, a steel-blue species (*Haltica chalybea*) destroying the buds and foliage of the grape.—**g.-vine grass**, the vine-like species of *Panicum*.—**g.-vine leaf-hopper**, same as GRAPE-HOPPER.—**g.-vine thrips**, same as GRAPE-HOPPER.—**g.-vine twist** [U. S.], a complicated figure in dancing resembling grape-vine.

Grape'vine Peak. A mountain in California; 8,528 ft. high.

grape'wee'vil, etc. See under GRAPE, n.

grape'wort', 1 grēp'wŭrt'; 2 grāp'wŭrt', n. 1. The baneberry (*Actæa rubra*). 2. The bryony.

graph, rt. [Rare.] To trace in graphs or grams; indicate by means of a graph; express graphically.

graph, rt. [Colloq.] To affix with a graph; manifold.

graph[1], } 1 graf; 2 gräf, n. 1. A diagram indicating any
graf[2], } sort of relationship by means of a system of dots and lines: used in chemistry, and sometimes in logic and algebra. 2. *Kinematics.* That point in a link-motion whose path is a curve. 3. *Math.* A curve, as symbolizing an equation or function on the principles of coordinate geometry. [< Gr. *graphein*, write. < *graphō*, write.]

-graph, } A suffix denoting a writer or one engaged in a
-grafe, } visible or kindred form of writing, *photograph*.

graph'ic, } 1 graf'ik, -i-kal; 2 gräf'ic, -i-cal, a. 1. Of or
graf'ic, } pertaining to the art of writing, or of in-
graph'i-cal, } dicating by letters or written signs; as, there are other *graphic* systems besides an alphabet.

It [the Chinese alphabet] was in its origin a hieroglyphic system, each word having its own *graphic* representative. MAX MÜLLER *Chips* vol. v, p. 15. [A. 1874.]

2. Describing with pictorial effect; clearly, vividly, and accurately expressed; portraying with vividness; as, a *graphic* account. 3. Written; recorded by means of letters or inscriptions; composed of or containing written or engraved letters, characters, or lines; as, the *graphical* remains of antiquity. 4. Illustrating or conveying ideas by diagrams or representing natural substances, as *graphic* granite. [< L. *graphicus*, < Gr. *graphikos*, < *graphō*, write.] SYN.: descriptive, forcible, illustrative, pictorial, picturesque, realistic, striking; dull, flat, monotonous, prosy, stupid, uninteresting.—**graphical method**, any method of representing the relations between or among quantities by systems of lines, areas, or curves, their differences in length or direction or size appealing to the eye, as in the use of lines of varying length to indicate the changing circulation of a newspaper, or as in the curved isothermal lines of a weather-map.—**graphical statics**, a method of exhibiting the strength of structures by diagrams made to scale.—**graphic arts**, painting, drawing, engraving, and other arts which make the use of lines or strokes on a surface, as opposed to music, sculpture, etc.—**graphic fabric** (*Petrol.*), the peculiar habit of some fragmental rocks in which angular quartz in which the quartz is so intercrystallized in parallel orientation with some other mineral, commonly a potash feldspar, that it resembles Hebrew or cuneiform writing.—**graphic formula** (*Chem.*), see under FORMULA.—**graphic tellurium** (*Mineral.*), same as SYLVANITE.—**graph'i-cal-ly**, **graph'ic-ly**, adv.—**graph'ic-ness**, n. See -NESS.

graph'ics, 1 graf'iks; 2 gräf'ics, n. The science or art of drawing, particularly of mechanical drawing, or of drawing by mathematical rules.

graph'i-o-log'y, 1 graf'i-ol'ō-gy; 2 gräf'i-ŏl'ō-gy, n. The science or art of writing or delineating, or a treatise on that art. [< Gr. *graphē*, writing, + -OLOGY.] —**graph'i-o-log'i-cal**, a.—**graph'i-ol'o-gist**, n.

graph'ite[1], 1 graf'it; 2 gräf'it, n. *Mineral.* A metallic, iron-black to dark steel-gray, sectile, flexible variety of carbon, crystallizing in the hexagonal system. It is used extensively in the arts, furnishes the *lead* of lead-pencils, is employed as a lubricant for machinery, for commutator brushes in dynamos, as an element of certain battery compounds, etc.

Native *Graphite* is found in the oldest rock formations, and of especially good quality at Altai, in Siberia. It occurs too in considerable quantities at many places in the United States. VON ROSENBUSCH *Nan. Chem.* tr. by R. F. Smith p. 151. [A. a. c. 1889.]

graph'ite[2], 1 graf'it; 2 gräf'it, n. [< Gr. *graphō*, write, + -*ite*.] **Acheson graphite**, a graphite produced artificially in an electric

furnace by the conversion of coke or other amorphous carbon from the non-graphitic to the graphitic state: used extensively for electrical and electrochemical purposes: a trade name.—**artificial g.**, an allotropic form of carbon produced by artificial means.

graph'ite, *n.* Same as GRAPHITO: an Anglicized form, little used.

gra-phit'ic, *1* gra-fit'ik; *2* gra-fit'ic, *a.* Of, pertaining to, or derived from graphite.—**graphitic acid**, same as MELLITIC ACID.—**g. carbon**, a variety of carbon contained in iron and steel, which is regarded as graphite.

graph'i-tize, *1* graf'i-tīz; *2* graf'i-tīz, *vt.* [-TIZED; -TIZ'ING.]

1. To coat with graphite. 2. To convert into graphite by a heating process.—**graph'i-ti-za'tion**, *n.*

graph'i-toid, *1* graf'i-toid; *2* graf'i-toid. **I.** *a.* Resembling graphite or black lead. **graph'i-toi'dal.** **II.** *n. Mineral.* A variety of carbon resembling graphite. [< GRAPHITE¹ + -OID.]

graph'i-um, *1* graf'i-um; *2* graf'i-ūm, *n.* [GRAPH'I-A, *pl.*] [L.] A stylus; a pencil.

graph'i-ure, *1* graf'i-yūr; *2* graf'i-yur, *n.* A dormouse (genus *Graphiurus*) with short, cylindrical, terminally tufted tail. [< Gr. *graphion*, pencil, + *oura*, tail.]

graph'o-, **graph-**. *1* graf'o-, graf-; *2* graf'o-, graf-. From Gr. *graphē*, writing (< *graphō*, write): combining forms.

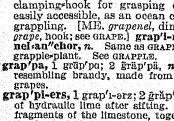
graph'o-kin'es-thet'ic, *an. Psychol.* Referring to the muscular and other allied sensations aroused in writing.—**Graph'o-lith'ic**, *n. pl. Entom.* A family of moths specialized by a fringe of long hairs on the basal part of the cubitus of the rear wing, including about two-thirds of the tortricid species: the best known is the codling-moth, the larva of which is the common apple-worm (*Carpocapsa pomonella*).—**graph'o-lith'o-graph**, *n.*—**graph'o-lith'oid**, *a.*—**graph'o-lite**, *n.* A variety of slate suitable for writing on.

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

graph-ol'o-gy, *1* graf-ol'o-ji; *2* graf-ol'o-gy, *n.* **1.** The science of estimating character or of determining personality by studying the handwriting. **2.** *Math.* The system of notation employed in connection with graphs. [< GRAPHO- + -OLOGY.]—**graph'o-log'i-cal**, *a.* Of or pertaining to graphology.—**graph'o-log'i-cal-ly**, *adv.*—**graph'o-lo'gist**, *n.* One who is versed in graphology or who practises the examination of handwriting; as, *graphologist* experts.—**graph-ol'o-gist**, *n.*

graph'o-ma'ni-a, *n.* A morbid or insane impulse to keep writing or compulsion, usually accompanied by a wholly suggested impression of the value of what is written or of its originality.—**graph'o-ma'ni-ac**, *n.* One who has graphomania.—**graph-om'e-ter**, *n.* A semicircular instrument used by surveyors in measuring angles.—**graph'o-met'ric**, *a.* **1.** Pertaining to graphometres. **2.** Connected with or ascertained by a graphometer. **graph'o-met'ri-cal**, *a.*—**graph'o-met'ri-cal-ly**, *adv.*—**graph-om'e-try**, *n.* The science of such of those properties that involve length, breadth, etc., as are not altered by linear transformation or projection: a branch of geometry.—**graph'o-mo'tor**, *a.* Pertaining to or having influence upon the movements required in writing.

graph'on, *1* graf'on; *2* graf'on, *n. Chem.* Graphitic carbon: so called by Brodie.



graph'o-nym, *n.* [Rare.] *Biol.* A technical name based upon some engraved representation.—**graph'o-phone**, *n.* An instrument for recording and reproducing sounds, through the medium of the undulating of a disk, cylinder, or tape. See PHONOGRAPH. **graph'a-phone** [Protected trade-marked name.]—**graph'o-phon'ic**, *a.*—**graph'o-scope**, *n.* An instrument magnifying-glass with holder for a picture and a sliding adjustment.—**graph'o-spasm**, *n. Pathol.* Writers' cramp. See CRAMP.—**graph'o-stat'ic**, *a.* Relating to or characterized by graphostatics.—**graph'o-stat'i-cal**, *a.*—**graph'o-stat'ics**, *n.* The process or practise of solving statical problems by graphic means.—**graph'o-type**, *n. Engraving.* A copper plate produced in photo-engraving, or the print made from a plate of this kind.—**graph'o-type**, *n.* **1.** A process for producing engravings. See under ENGRAVING. **2.** An electrically operated machine that casts and sets type as guided by a paper tape.—**graph'o-typ'ic**, *a.*

-graphy, *suffix.* Description; writing; used in such words as *geography*, *biography*, *topography*, and in many a name a descriptive science. [< L. *-graphia*, < Gr. *-graphia*, writing, < *graphō*, write.]

graph'ium, *1* graf'i-um; *2* graf'i-um. A graupling from corrugated iron.

grap'nel, *1* grap'nel; *2* grap'nel, *vt.* To seize with a grapnel.

grap'nel, *n.* **1.** A mechanical device for grappling, consisting of several hooks or claws on one stem. **grap'nel-hook'**; **grap'e-nel'**.

A Cable-grapnel.

The *grapnels* were triced up to the yard-arms, ready for falling on the enemy's decks, to secure her in case she should cut her cable. —A. MACKENZIE *Paul Jones* vol. i. p. 59. [n. 1878.]

2. A boat's anchor having more than two flukes.

grap'plin; grap'plinc'. See illus. under ANCHOR.

The last stone was raised from the bottom, and the line led directly toward the *grapnel*, which . . . was dropped above the suction of the current.

COOPER *Deerslayer* p. 73. [L. BROS. & CO. 1845.]

3. A heavy tongs used for handling large logs, stones, etc. **4.** Any mechanical device or fixture for clamping-hook for grasping or lifting an article not easily accessible, as an ocean cable; any instrument for grappling. [MID. *grapenel*, dim. of *grapin*, dim. of *grape*, hook: see GRAPE.] **grap'nel; grap'nail.**—**grap'nel-an'chor**, *n.* Same as GRAPNEL, 2.—**g.-plant**, *n.* The grapple-plant. See GRAPPLE.

grap'pa, *1* grap'pa; *2* grap'pä, *n.* [It.] A distilled liquor resembling brandy, made from the skins and stems of grapes.

grap'pers, *1* grap'i-ərz; *2* grap'i-ẹrs, *n. pl.* The residue of hydraulic lime after sifting. It consists of unburned fragments of the limestone, together with the overburned portions which will not slack.

grap'ple, *1* grap'l; *2* grap'l, *n.* [GRAP'PLED; GRAP'PLING.] **I.** *t.* To take hold of; seize, grasp, or make fast, either with the hands or with a mechanical device; as, they *grappled* the enemy's ship.

TABLE OF IMPORTANT GRASSES.

The following table contains the more correct popular and botanical names of the common grasses of all countries. Fuller treatment being given in vocabulary place to the principal varieties cited; as, *Andropogon*, *fescue*, *grama-grass*, *Panicum*, etc. As it happens in many cases that there are several variant names for the same grass, or that, owing to popular misconception, in different localities a vernacular name is made to apply to different grasses, superior figures have been added after such names both in the table and in the appended list to indicate such variants.

See CONSTELLATION. **3.** [Eng.] A spade used in making drains.

Graving-dock at Victoria, British Columbia.

grav"i-per-sep'tiv(es), 1 grav"i-pər-sep'tiv; 2 grăv"i-pĕr-sĕp'tiv, *a.* Aware of the attraction of gravity: used to characterize the sense of vertically in animals. [Geotropic.

grav"i-sen'si-tiv(es), 1 grav"i-sen'si-tiv; 2 grăv"i-sĕn'si-tiv, *a.*

grav'i-stat'ic, 1 grav'i-stat'ik; 2 grăv'i-stăt'ie, *a.* Due to gravity; said of certain forms of congestion.

gra'vi-ta, 1 grē'vi-tə; 2 ĝrā'vi-tä, *adv.* [It.] *Mus.* With dignity; majestically; properly, *con gravità.*

grav'i-tant, 1 grav'i-tənt; 2 grăv'i-tant, *a.* Acting as the force of gravity does; attractive, as opposed to *repulsive:* said of forces.

grav'i-tate, 1 grav'i-tēt; 2 grăv'i-tāt, *v.* [-TAT"ED; -TAT"ING.] **I.** *t.* To effect the movement of (substances) by gravitation; specif., in mining, to cause (the heavier element in a pan of gravel) to sink to the bottom by means of shaking. **II.** *i.* **1.** To tend toward each other or toward a common body by virtue of gravitation; be acted on by the force of gravitation; as, the earth *gravitates* toward the sun.

Even when we take such a fundamental law of nature as 'All substances *gravitate*,' we must mean by substance, material substance. JEVONS *Principles of Sci.* bk. i, p. 43. [MACM. 1879.]

2. Hence, to have a strong or determining bent toward anything; be naturally attracted; as, population *gravitates* to the towns.—**grav'i-ta'tor,** *n.*

grav"i-ta'tion, 1 grav'i-tē'shən; 2 grăv"i-tā'shon, *n.* **1.** The force with which all bodies attract each other; the tendency of every particle of matter in the universe toward every other particle; also, the law that expresses the action of this force. See phrase below. **2.** The act of gravitating, or its effect; as, the *gravitation* of one suspended bullet toward another as seen measured by delicate instruments. **3.** Hence, mental or moral tendency or movement toward some particular object.

There is a natural *gravitation* of souls, which attracts them to mighty personalities. TRENCH *Hulsean Lectures* p. 150. [W. J. W. 1866.]

4. *Philol.* The tendency of a strong sound to absorb a weaker one. **5.** *Chem.*—**attraction of gravitation,** same as GRAVITATION, 1.—**grav"i-ta'tion-hat"ter-y,** *n.* A gravity-battery. See BATTERY.—**g. measure,** the measure of force by units of weight, inexact because varying with locality.—**terrestrial g.,** the tendency of bodies toward the center of the earth; gravity.

grav"i-ta'tion-al, *a.* Of or pertaining to gravitation.

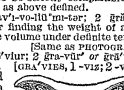
The solar repulsion is from 12 to 15 times as great as the *gravitational* attraction. C. A. YOUNG *Elements of Astron.* p. 271. [G. & CO. 1890.]

—**grav'i-ta'tion-al-ly,** *adv.*—**grav'i-ta-tiv(es),** *a.* Causing to gravitate or tend toward a center.

grav'i-ty, 1 grav'i-ti; 2 ĝrăv'i-ty, *n.* [-TIES, 1 -tiz; 2 -tiz, *pl.*] **1.** *Physics & Astron.* (1) The accelerating tendency of bodies toward the center of the earth, being equal to the earth's attraction minus the centrifugal force arising from the rotation of the earth on its axis; weight; equal to about 32,16 feet per second; symbol, *g.* (2) More widely, the tendency toward the center of any heavenly body. (3) Loosely, gravitation, especially near the surface of a heavenly body. **2.** The quality of being charged with or involving great interests; importance; seriousness; enormity; as, the *gravity* of the crisis was manifest.

There is a certain *gravity* in the position of one who is . . . very near the undiscovered. HOLMES *Over the Teacups* p. 246. [H. M. & CO. 1891.]

3. Sobriety, seriousness, or dignity of demeanor or character; dignified reserve; sedateness; as, the *gravity* of a judge.



A man of his place, *gravity*, and learning. SHAKESPEARE *Merry Wives* act iii, sc. 1.

4. *Acoustics.* Lowness of pitch. **5.** Something of grave import; a serious subject. **6†.** Influential character; moral weight. **7†.** A form of address; as, Your *Gravity.* [< F. *gravité*, < L. *gravita(t)-s*, < *gravis*, heavy.]

—**grav'i-ty-bat'ter-y,** *n.* See BATTERY.—**g.-correction,** *n.* An allowance in a mercury-barometer reading, when not made at the standard position of sea-level at lat. 45°: due to the fact that elsewhere the weight of the mercury differs from what it would be at such position.—**g.-fault,** *n. Geol.* Same as NORMAL FAULT, under FAULT.—**g.-meter,** *n.* Same as GRAVIMETER.—**g.-railroad,** *n.* A railroad in which the cars descend by their own weight; an inclined railroad.—**g.-return,** *a. Mech.* Returning to position by reason of the force of gravity: characterizing parts of mechanism which, displaced by force, such as the explosion of a charge of powder, gravitate to their proper places, as a disappearing gun-carriage.—**g.-stuffing,** *n.* A solution used to separate the different mineral constituents of ores according to their specific gravities, as the solution of mercuric iodid in potassium iodid, having a maximum specific gravity of 3.1.—**g.-valve,** *n. Mach.* A valve closed by force of gravity.—**g.-yard,** *n. Railroad.* A switching-area with tracks constructed to utilize the force of gravity as an aid to the shifting of cars.—**specific g.,** the ratio of the weight of a body to that of an equal volume of some standard substance, water in the case of solids and liquids, air in the case of gases: numerically equal to the density.—**specific-g. bottle** or **flask** (*Physics*), an instrument for determining the density or specific gravity of a liquid by the weight thereof required to fill it, as compared with a known weight of a standard liquid, such as water, which it contains under stated conditions of temperature and pressure.—**standard g.,** the force of gravity at some standard latitude and at the level of the sea: generally at the latitude whose sine is $1 \div \sqrt{2}$, sometimes at 45°. The force of gravity at the earth's surface increases northward or southward from the equator, because of the centrifugal effect of the earth's rotation, and diminishes with increasing elevation above sea-level, owing to the greater distance from the center of attraction. Physical measurements depending upon the attraction of gravitation, to be strictly comparable, must be reduced to the standard as above defined.

The line of philosophical development along which all Europe has moved is said to have had its origin in early Greece, because her thinkers were the first to separate the scientific, poetic-religious and mythical way of explaining the universe and man's experience and the way which employs reason in the investigation, scientifically, of the ultimate basis of knowledge and reality. While all schools of philosophy flourished to a greater or less extent among the Greeks, as they have in India, Greek philosophy bore very distinguishing characteristics, especially a greater regard for beauty of form in thought and in expression, and great freedom on the one hand from the conventional, and on the other from the superstitious and the unreasonable. Without taking the divisions too strictly, three great periods may be distinguished in Greek philosophy: (1) the pre-Socratic period; (2) the period of Socrates, Plato, and Aristotle; and (3) the post-Aristotelian philosophy, during which stoicism, epicureanism, skepticism, and eclecticism developed, and led the way — especially the last-named — to the dawn of Christian philosophy. — **G. letters,** the characters of the Greek alphabet, which are said to have been first made into a form suitable for writing by Cadmus, and which made late dating from the fifteenth century. — **G. rose,** the flower campion.

Greek, *n.* 1. One of the people of ancient Greece, which included, besides the peninsula of Greece proper, all Hellas, i. e., all islands, coasts, and settlements where Greek was spoken, whether Asiatic, African, or European.

The early inhabitants are believed to have consisted of members of several independent tribes which invaded the country at different periods. Among the first of these were the Achæans, who, on the decline of the Cretan kingdoms, overran the Peloponnesus between 1200 and 1000 B. C., causing the Achæans to migrate to the shores of the Corinthian Gulf, on the north part of which they settled. The Dorians, Thucydides tells us, were the last of the migrations, which colonizing was done by the displaced tribes, and about the seventh century the natural growth of the population had reached a point which extended Greek civilization to Africa, Sicily, and Magna Græcia, or southern Italy. The period of the extension of power of Greece commences with the first Olympiad, 776 B. C., and terminates as the Hellenic period. It was succeeded in the fourth century B. C. by the Hellenistic period. After many centuries of progress in civilization, Greece finally became a Roman province, under the name of Achaia, in 146 B. C.

In the historic period, the people of this race called themselves by the name Hellenes, and their language Hellenic. We call them *Greeks*, from the Latin name Græci.

GOODWIN *Greek Grammar* intro., p. 1. [c. & co. 1887.]

The names Hellas, Hellenes, by which the *Greeks* called their country and their race, and which are still employed by the modern *Greeks*, originally designated a small district in Phthiotis in Thessaly and its inhabitants, who gained the name from the lands south of the Cambunian mountains. The name Hellenes was not universally applied to the Greek race until the post-Homeric period. *Encyc. Brit.* 9th ed., vol. xii, p. 625.

(2) One of the modern Greek race, descended, with admixture, from the ancient. 2. The language of ancient or that of modern Greece.

Ancient Greek is a member of the Aryan (Indo-European) family, closely related to the Italic dialects, Latin, Oscan, etc. The variety of forms which it has preserved from the parent language, and the great power to form new words, render it the most flexible and beautiful language of the family. The use of a pitch accent and the number of its vowel sounds imparted euphony to the spoken tongue without detracting from its vigor. The **G. alphabet,** which is the parent of all modern European alphabets, was derived from that of the Phœnicians, and appears in inscriptions as early as 900 B. C. It at first consisted of twenty-two characters, but in its final form, the Ionic alphabet, which superseded all others about 400 B. C., had twenty-four. Greek, as originally spoken, comprised a number of dialects, which may be broadly classified under four main types — **Attic, Ionic, Doric,** and **Eolic.** Of these **Attic** was the most cultivated, and is commonly taken by grammarians as the standard, the other dialects being considered as variants. It was the literary tongue of many philosophers, and dramatists, and has been immortalized by Æschylus, Sophocles, Euripides, Plato, Thucydides, and Demosthenes. It differs principally from the Ionic, to which it is closely related, in a marked tendency to the contraction of vowels and in the retention of *a* in certain positions. The conquests of Alexander, 330 B. C., which spread the Greek language over a very wide area, led to the adoption of Attic as the tongue of the whole Greek world, which caused the development of the Hellenistic speech or "common" dialect, a modified Attic colored by the native idioms of the people who spoke it. This is the language employed by Polybius, Plutarch, and Lucian, and the Greek of the Septuagint and of the New Testament affords a good example of it. This form prevailed as the written language until about A. D. 800, when it was gradually superseded by the spoken tongue, which had undergone many changes, thus laying the foundation of **modern G. Ionic,** the language spoken along the Asiatic coast and in many of the Ægean Islands, showed a marked aversion to contractions, and admitted successive vowel sounds. It is generally divided into **Old Ionic,** or **Epic,** the language of the Homeric poems, which was probably never spoken at any one time, and **New Ionic,** the language spoken in the Ionian cities. The latter, which displays a preference for *ē* instead of *ea* or *ou*, and a dislike of aspirates, is the language of Hippocrates, Herodotus, and the early logographers. **Doric,** the tongue spoken in the Peloponnesus, Magna Græcia, Sicily, Crete, and certain of the Ægean Islands and Asiatic colonies, was characterized by the retention of *ā* where Attic prefers *ē*, and in general by deliberation and emphasis rather than ornamental forms. It is the language of Pindar, Alcman, and Theocritus (600–250 B. C.). **Eolic,** the dialect of Æolis (N. Asia Minor), together with those of Thessaly and Bœotia, is remarkable for the instability of its vowel sounds, combined with a preference for *i* and *u* sounds, and its subjection to initial aspiration and consonants. The poems of Sappho and Alcæus (600 B. C.) were written in this dialect, as well as several of the idyls of Theocritus. Greek was a living language all through the Byzantine period, and at the fall of Constantinople, in 1453, many scholars emigrated to Italy and elsewhere, and brought about the revival of learning. See RENAISSANCE. **Modern Greek** has lost the pitch accent, for which an additional stress accent like that of modern English, the vowel sounds have become much contracted by etacism, and many of the old inflectional forms have disappeared. It is by no means allied to the ancient tongue as written by Xenophon and Plutarch. A movement is now on foot to restore the original purity of the language, which would make it very differing from. **Neo-Hellenic,** the literary revival, and **Romaic,** the popular or common speech.

The sound scholar would ever think of deriving any *Greek* or Latin word from Sanskrit. Sanskrit is not the mother of *Greek* and Latin, as Latin is of French and Italian. Sanskrit, *Greek*, and Latin are sisters. M. MÜLLER *Science of Language* second series, lect. ix, p. 226. [s. 1875.]

It is moderately infectious, being caused by the *Bacillus influenzæ* of Pfeiffer. It has been recognized as a specific catarrhal disease since early in the 14th century (1323).

In President Jackson's day his opponents called the disease Jackson's itch,' and Tyler's opponents called it the 'Tyler *grippe*.' *La grippe* is only one of the figurative terms used by the French to describe the influenza. Others are 'petite peste,' 'petit courier,' 'grenade,' 'follette,' 'coquette' and 'la générale.' '*La grippe*' secured general acceptance from its graphic suggestiveness. The Germans have various descriptive names for the grip, such as 'blitz-catarrh' (lightning catarrh), 'schafshusten' (sheep cough), 'hundeinfluenz' (dog-influenza), 'modefieber' (fashionable fever). The Russians call it Chinese catarrh; the Germans often call it the Russian post, the Italians name it the German disease, the French call it the Italian fever and the Spanish catarrh. The Italians invented the term influenza in the seventeenth century and attributed the disease to the influence of certain planets.

ground'-plate", g.-rat, g.-seat, etc. See under GROUND, *n.*

ground'sel, 1 ground'sel; 2 ground'sĕl, *n.* A common weed (*Senecio vulgaris*) of the aster family, from Europe, with alternate pinnatifid amplexicaul leaves, and heads of yellow tubular flowers blooming all summer; also, any of the genus or plants collectively, of the tribe *Senecio*. [Also *groundswell*, < AS. *grundswelge*, for *gundeswilge*, < *gund*, pus, + *swelgan*, swallow.] **ground'sel-bird, ground'sel-bird'some,** *n.* A tufted perennial herb (*Senecio balsamitæ*) with slender stems, oblong radical leaves, and yellow flower-heads: common across the continent from Canada to North Carolina.—**ground'sel-tree",** *n.* A maritime shrub (*Baccharis halimifolia*) of the aster family, of the Atlantic United States, every part covered with the appearance of white dust. It is sometimes cultivated for its large panicles of white or yellow flowers.

Groundsel.

ground'sel, *n.* Same as GROUNDSILL.

ground'-shark", etc. See under GROUND, *n.*

ground'sill", 1 ground'sil'; 2 ground'sĭl', *n.* The lowest horizontal timber in the framing of a house, etc. **ground'-sel; ground'sil‡; ground'syl‡; groun'soyle†.**

ground'-sloth", g.-stulce, etc. See under GROUND, *n.*

ground'-swell", 1 ground'-swel"; 2 ground'-swĕl", *n.* A broad deep swell or heaving of the seas, supposed to be due to a distant storm or an earthquake; used also figuratively for rolling country, or any unusual uprising, as of people.

A heavy *ground-swell* was rolling up at our feet.
I. I. HAYES *Arctic Boat Journey* p. 95. [s. v. 1860.]

ground'-tie", g.-wasp, etc. See under GROUND, *n.*

ground'ways", 1 ground'wēz'; 2 ground'wāz', *n. pl.* The foundation of stone or wood under the blocks on which a ship is built.

ground'work", 1 ground'wûrk"; 2 ground'wŭrk', *n.* **1.** That which furnishes a foundation or support of anything; hence, a fundamental or essential part; basis; first principle.

History could not teach by examples, it could have no practical value, unless the *groundwork* of character were in all ages the same. E. H. CHAPIN *Characters in the Gospel* ch. 1, p. 9. [REV. 1852.]

2. *Civ. Engin.* (1) Preparation of the ground to receive work. (2) The foundation work of a structure. 3. *Paint.* The first coat of color following the priming. SYN.: see FOUNDATION.

ground'y, 1 ground'i; 2 ground'y, *a.* Full of dregs, or grounds; muddied.

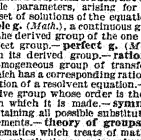
group, 1 grūp; 2 grup, *v.* I. *t.* To gather or form into a group or groups, as for order, convenience, or artistic effect; arrange; classify; as, to *group* persons for a photograph; to *group* arguments or illustrations.

Wordsworth's poems will never produce their due effect until . . . they are *grouped* more naturally. MATTHEW ARNOLD *Essays in Criticism* second series, p. 138. [MACM. 1888.]

II. *i.* To take shape as a group; fall into a group: used especially in artistic relations, the trees in a picture *group* naturally. [< F. *grouper*, < *groupe*; see GROUP, *n.*] SYN.: see ARRANGE.—**grouped columns** (*Arch.*), a group of columns having only one pedestal; a clustered column.—**group'age,** *n.* A system or scheme of grouping; arrangement in groups.—**group'ist,** *n.*

group, *n.* **1.** A number of persons or things existing or brought together with or without intercreation, orderly form, or arrangement; an assemblage; a cluster; as, a *group* of cottages; a *group* of facts.

The noblest mountain *group* in all the Alps,—the Dom and its attendant peaks, the Matterhorn and the Weisshorn.
TYNDALL *Forms of Water* p. 137. [A. 1872.]



2. *Art.* An assemblage of figures or objects in painting or sculpture, forming a pleasing combination. 3. *Biol.* An assemblage or division of organisms with certain common characteristics. It has no determinate rank or significance in classification, and may include a number of species, or of genera, families, etc. 4. *Geol.* A stratigraphic subdivision of various rank, as: (1) In general usage, and rather loosely, the unit of stratigraphic classification, a subdivision of a series. (2) In the usage of the United States Geological Survey, a name given to beds formerly regarded as a single formation, but afterward subdivided into several formations in consequence of more detailed knowledge. (3) In the scheme adopted by the International Geological Congress, a stratigraphic division of highest rank, corresponding to *era*, the chronological division of highest rank.

In the usage of the United States Geological Survey, *group*, like *formation*, is a name given to a cartographic rather than a strictly stratigraphic subdivision, and a group in one area may be the equivalent of a formation in another area. Like *formation*, a *group* has a well-defined lithologic unity, but it may even, in some areas, represent a whole system. When strictly used as defined above under (1), *group* and *age* are synonymous, but the term is loosely used by many authors for various divisions ranging in rank from that of formation or assize. The sense defined under (3) is rapidly coming into general use, and has been adopted in most of the recent text-books. It embraces (1) a series of rocks usually named from typical localities, sometimes from lithological or paleontological characters.

The most commonly recognized groups in sense (3) are as follows: **Archeozoic group, Proterozoic g., Paleozoic g., Mesozoic g.,** and **Cenozoic g.** The first two were formerly combined in a group known as called the **Azoic.** Still later **Agnotozoic g.** was proposed for what is now called **Proterozoic g.** A few authorities formerly separated the recent epoch from the rest of the Cenozoic and called it the **Psychozoic group,** but this is now rarely done. Most authorities combine the Mesozoic and Cenozoic into one group, the **Neozoic g.** See GEOLOGY.

5. *Entom.* A geographical division of insects, according to Kirby, who recognized three: (1) dominant, (2) predominant, (3) subdominant. Insects of the dominant group are found in temperate and tropic zones; of the predominant group from the hetherlands of the temperate to the tropic zones; while the subdominant group includes those which do not range into the tropics, and those which are found in the temperate intervales between 40° and 50° north and not beyond the latter point. **6.** *Math.* A set of operations possessing the property that the product or combination of any two of them, or the square of any one, is likewise one of the operations of the set or collection, from which it follows that the combination of any number of them is so equivalent. 7. *Chem.* A number of connected atoms constituting a part of a molecule; as, the hydroxyl *group* (OH) or radical. 8. *Mus.* (1) A series of successive tones in a melody, especially when sung to one syllable. (2) In an orchestra, a class of similar instruments. **9.** In Fourcrisan, a division of a figure. [< F. *groupe*, < It. *groppo*, a heap.] SYN.: see ASSEMBLY; COLLECTION; FLOCK.—**Abelian group** (*Math.*), one in which all substitutions follow the commutative law.—**alternate group** (*Math.*), that of all substitutions made by an even transposition of elements.—**complete g.** (*Math.*), one in which no self-conjugate operations are found, aside from those which consist of the contragredient isomorphism.—**congruence g.** (*Math.*), a finite continuous group of one-to-one transformations, containing the identical transformation.—**cyclic g.** (*Math.*), a transitive group.—**derived g.** (*Math.*), a self-conjugate subgroup generated by the combinants of the infinitesimal generating operations of any given continuous group, and of the number of those linearly independent is less than the whole number of operations.—**discontinuous g.** (*Math.*), a group, no one of the operators of which is connected with the identication. A group may be properly or improperly *discontinuous.*—**group'break"er,** *n.* *Elec.* A device for simultaneously cutting off the power from a group of electrical circuits.—**g.-flashing,** *n.* The flashing of a light in groups, as two, three, or four flashes followed by a dark interval: used in lighthouse signals. —**g.-mind,** *n.* *Social Psychol.* The mental attitude or belief common to any set of people closely associated.—**g. of a function** (*Math.*), the group of substitutions on the variables of the function which leave its value unaltered.—**g. of an equation** (*Math.*), a transitive substitution group, of the same degree as the irreducible equation, that changes every function of the roots except those expressible rationally through the coefficients.—**g. of substitution** (*Math.*), a set of substitutions in which the product of any two is a member of the set.—**g.-rate,** *n.* *Railroad.* A rate applying to shipments from a given district.—**g.-spring,** *n.* A car-spring composed of several spiral springs in a nest. The nests are usually joined by equalizers and the springs designated as *line-group* or *four-group springs.*—**group system** (*Forestry*), see METHOD.—**g.-unit,** *n.* *Sociol.* The combined wish or decision of any group, socially considered.—**icosahedral g.** (*Math.*), a group of 60 even permutations of 5 elements, corresponding to the different rotations by which a regular icosahedron may be carried out of itself and back again.—**imprimitive g.** (*Math.*), a group of elements that may be divided into equal sets such that every substitution interchanges two of them or interchanges the elements of a set among themselves.—**improperly discontinuous g.** (*Math.*), a group whose substitutions are generally finite, but infinitesimal in special cases.—**infinite g.** (*Math.*), a group consisting of an infinite number of functions of different variables.—**integrable g.** (*Math.*), a continuous group from which a series, each the derived group of the one preceding it, ends finally with the identical operation.—**Kleinian g.** (*Math.*), a certain group of linear substitutions.—**Mendeleeff g.** (*Chem.*), one of the groups of elements in the periodic system. **Mendeljeev g.:.**—**monodromy g.** (*Math.*), a set of transformations in a linear equation or system of such, not depending on arbitrary variable parameters, arising for one particular fundamental set of solutions of the equation or system.—**non-integrable g.** (*Math.*), a continuous group from which a series, each the derived group of the one preceding it, ends with a perfect group, not necessarily the one which coincides with its derived group.—**rationality g.** (*Math.*), a linear homogeneous group of transformations every operation of which has a corresponding linear transformation of the solution of a resolvent equation.—**regular g.** (*Math.*), a transitive group whose order is the same as that of the letter on which it is made.—**symmetric g.** (*Math.*), a group containing all possible substitutions on a given number of elements.—**theory of groups** (*Math.*), that branch of mathematics which treats of mathematical groups of operations, substitutions, or transformations.—**group'let,** *n.* A little group.—**group'wise,** *a.* *Sociol.* Considering a group as a unit.

group'er, 1 grūp'ur; 2 grup'ẽr, *n.* **1.** A serranoid food-fish of *Epinephelus, Mycteroperca,* or a related genus, of warm seas. The red **grouper** (*E. morio*), brown flushed with red below, and the **yellow-finned g.** (*E. venenosa*) are found on the South Atlantic coast of the United States.

Grouper. 1/3

2. [California.] A rockfish or scorpænoid. **3.** [Local, U. S.] The tripletail. [Cor. of F'g. *garupa*, crupper.] —**black grouper.** 1. Same as JEWFISH, 1 (4). 2. A serranid (*Mycteroperca bonaci*), of the Caribbean and neighboring seas.—**man'grove-grouper,** *n.* *Zool.* A large serranid (*Mycteroperca bonlengeri*) of the Gulf of California.—**Nassau g.,** a serranid (*Epinephelus striatus*), known also as the *hamlet.*—**potato g.,** *n.* Same as JEWFISH, 1 (4).

group'ing, 1 grūp'iŋ; 2 grup'ĭng, *n.* The arranging and relating of separate buildings or of parts of a composite building so as to produce a definite artistic effect; the system upon which such an arrangement is effected.

Gua-dix', } gwa-dēks'; 2 gwa-dīks', *n.* A city in Granada province, Spain.

guath'ol, } gwa-ċh'ōl *or* -ol; 2 gwă-ċh'ŏl *or* -ŏl, *n.* An oily fluid resembling guaiacol in properties and congealing at a low temperature. [< GUAIACUM + ETHER + -OL.]

gu'ba, } gū'bə; 2 gū'ba, *n.* [Cornish.] *Mining.* An exhausted or abandoned lead.

Gua'gua, } gwā'gwa; 2 gwā'gwă, *n.* A town in Pampanga, Luzon, P. I.

Gua-han', } gwa-hān'; 2 gwă-hăn', *n.* Guam Island.

guai'ac, } gwai'ak; 2 gwī'ăc (XIII), *n.* Guaiacum wood or resin. — **guai'ac, gui'ac, ċ. — guai'a-cal,** *n.* [Rare.] Cotonoaldehyde. — **guai'a-ċen,** *n. Chem.* Triglucaldehyde (C_6H_8O), obtained by distillation of the wood or resin of the guaiacum-tree; a colorless, oily compound that smells like bitter almonds. — **guai'ac-o'ċin,** *n. Chem.* Monacetate of pyrocatechin, used in medicine as a stimulant. — **guai-ac'o-le,** *n. Chem.* Of, pertaining to, or extracted from guaiacum. — **guaiacic acid,** a white crystalline compound ($C_7H_8O_3$) contained in guaiacum resin.

guai'a-ċin'le, } gwai'ə-sin'lə; 2 gwī'a-ċin'le, *a. Chem.* Pertaining to an acid derived from guaiacum; as, *guaiacinic* acid ($C_7H_6O_3$). See GUAIACUM.

guai'a-col, } gwai'ə-kōl; 2 gwī'a-cŏl'le, *n. Chem.* A colorless fluid compound ($C_7H_8O_2$) obtained by distilling guaiacum and found in wood-tar creosote; the methyl ether of pyrocatechin. See GUAIACUM + -OL.] **gui'a-col;** — **guaiacol carbonate** (*Chem.*), same as DUOTAL. — **g. cinnamate,** same as STYRACOL. — **guai'a-col'ate,** *n. Chem.* Salt of guaiacol.

guai'a-con'le, } gwai'ə-kon'lə; 2 gwī'a-cŏn'le, *a. Chem.* Derived from the resin of guaiacum. — **guaiaconic acid,** a brown levorotatory compound ($C_{21}H_{26}O_{10}$), obtained from guaiacum resin.

Guai'a-cum, } gwai'ə-kəm; 2 gwī'a-cŭm (XII), *n.* **1.** A genus of tropical American trees or shrubs of the family *Zygophyllaceæ* with opposite pinnate leaves, blue or purple flowers, and very hard, durable wood. *G. officinale* being the lignum-vitæ of commerce. 2. [c-] The wood of any tree of this genus. 3. [c-] A greenish, resinous oleoresin obtained from *G. officinale,* and used in medicine as an alterative and stimulant. It is a combination of three acids, guaiaconic, guaiacic, and guaiaretic, all three resinifiable, and tiglic aldehyde. A similar oleoresin is yielded by other species of *Guaiacum.* **guai'a-ċin.;** [< Sp. *guayaco* (of Arawak. origin).]

guai'a-mar, } gwai'ə-mär; 2 gwī'a-măr, *n. Chem.* A bitter, white, crystalline powder ($OCH_3.C_6H_3.OC_2H_5O$), obtained by the action of guaiacol on anhydrous glycerin. [< GUAIACOL + L. *amarus,* bitter.]

guai-ap'er-ol, } gwai-ap'or-ol *or* -ōl; 2 gwī-ăp'er-ol *or* -ŏl, *n. Chem.* A colorless crystalline addition product (C_6H_3NH, $[OCH_3][OC_2H_5]$) of guaiacol and quinoline used in the treatment of phthisis.

guai'a-quin, } gwai'ə-kwin; 2 gwī'a-kwin, *n. Chem.* An acrid yellowish powder consisting of sulfonate of guaiacol and quinin.

guai'a-quin-ol, } gwai'ə-kwin-ōl *or* -ol; 2 gwī'a-kwin-ŏl *or* -ol, *n. Chem.* A yellow hygroscopic crystalline substance consisting of salts of guaiacol, quinin, and bromin.

guai'a-san-ol, } gwai'ə-san-ōl *or* -ol; 2 gwī'a-san-ŏl *or* -ol, *n. Chem.* A white crystalline powder, the hydrochlorid of diethylglycocoll guaiacol; used as guaiacol. [< GUAIACUM + L. *sanus,* sound, + -OL.]

guai'ene, } gwai'in; 2 gwī'ēn, *n. Chem.* A hydrocarbon product ($C_{13}H_{12}$) formed by heating lignum-vitæ resin with powdered zinc.

Gual'i-a, } gwal'yi-ə; 2 gwăl'yi-a, *n.* A river in Colombia and Venezuela, uniting with the Cassiquiare river to form the Rio Negro.

gual'ol, } gwal'ōl *or* -ol; 2 gwăl'ŏl *or* -ŏl, *n. Chem.* Same as GUAIACOL. [< GUAIACUM + -OL.]

gua-ji'ca, } gwa-hī'kə; 2 gwā-hī'ca, *n.* [Sp. Am.] A poecilioid fish (*Pœcilia vivinata*) of Cuba; one of the killifishes.

gua'lo, } gwā'lō; 2 gwā'lo, *n.* A white clay or pipe-clay used in decorating pottery by the Pueblo Indians. [Tehua.]

Gua'la-li'ri, } gwā'lə-lē'ri; 2 gwā'lă-lī'ri, *n.* A peak in the Bolivian Andes on the Chilean boundary, between the Chilean province of Tacna and the Bolivian province of Oruro; 21,960 ft. high. **Gua'la-tel'ri.**

Gua-lil'las, } gwa-lil'yəs; 2 gwa-lĭl'yăs, *n.* A pass in the Andes, connecting Chile and Peru, 14,750 ft. high.

Gual'ter, Gual-ter-i-o, **Gual-te'rus, Gual'te'ro,** *n.* See WALTER.

Guam, } gwām; 2 gwăm, *n.* The largest island of the Ladrone group, Pacific ocean; about 200 sq. m.; capital, Agaña; ceded to the United States by Spain in 1898. **Gua-han'.**

gua-ma', } gwa-mā'; 2 gwa-mă', *n.* A tree of the family *Mimosaceæ,* used in the coffee-plantations of Colombia, Venezuela, and the West Indies to supply shade. It has pale flowers and bears a sweet pulpy fruit in a bean-like pod. **gua-mo'.** [Cuban Sp.]

gua-ma'ċho, } gwa-mā'ċho; 2 gwā-mă'cho, *n.* A gum-producing South-American tree of the cactus family (*Pereskia guamacho*), which grows about 12 feet high. It is used for hedges. [Native name.]

guan, } gwān; 2 gwăn, *n.* [S. Am.] An American penelopine bird, related to the curassows, with a long tail and only a narrow strip of feathers on the throat. The chacalaca or Texan guan reaches the United States. See illus. under CHACALACA.

gua'na', 1 gwā'na; 2 gwä'na, *n.* 1. An Iguana. 2. A New Zealand lizard-like nocturnal reptile; the tuatera (*Sphenodon punctatum*). **gua'no'**. [For IGUANA.] [OBS.]

gua'na', *n.* Cloth made from the fiber of the lagetta or lace-bark tree. [W. Ind.] The lace-like inner bark of a tall tree (*Lagetta lintearia*), the Jamaica mezereon. This bark, known commercially as *Cuba bast*, is used in making cordage and in plaiting women's hats.

Gua'na-ba-co'a, 1 gwä'na-ba-kō'a; 2 gwä'nä-bä-cō'ä, *n.* A district and coast town in Habana province, Cuba.

gua'na-ba'no, 1 gwä'na-bō'no; 2 gwä'nä-bä'no, *n.* [Sp.] Same as SOUR-SOP.

gua'na-caz'tli, 1 gwä'na-käs'tlē; 2 gwä'nä-cäs'tlī, *n.* [Mex.] A tall mimosaceous tree (*Enterolobium cyclocarpum*) of tropical America, remarkable for its curiously shaped pods. They resemble a human ear in shape, contain a thick insipid pulp, and are used to feed cattle. The wood is used in making boats and water-troughs and also in house-construction.

gua-na'co, 1 gwa-nä'kō; 2 gwä-nä'cō, *n.* [S. Am.] An American cameloid ruminant (*Auchenia huanaco*) ranging from the Andes of Ecuador and Peru to southern Patagonia. It is light-brown, passing into white below.

Guanaco. 1/10

Gua'na-ha'ni, 1 gwä'na-hä'nē; 2 gwä'nä-hä'nī, *n.* See CAT ISLAND.

gua'na-jua'tite, 1 gwä'na-hwä'tīt; 2 gwä'na-hwä.tīt, *n. Mineral.* A bluish-gray bismuth selenid (Bi$_2$Se$_3$), crystallizing in the orthorhombic system. [< *Guanajuato*, Mexico.]

Gua'na-jua'to, 1 gwä'na-hwä'tō; 2 gwä'nä-hwä'tō, *n.* 1. An inland state of Mexico; 10,050 sq. m. 2. Its capital; elevation 6,507 ft. **Gua'na-xua'to**.

gua'nase, 1 gwä'nās; 2 gwä'näs, *n. Chem.* An autolytic enzym capable of transforming guanin into xanthin.

gua'na-zole, 1 gwä'na-zōl; 2 gwä'na-zōl, *n. Chem.* A colorless crystalline trizin ($C_7H_5N_3$). [< GUANIN + AZOTE + -OL.]

Guan'che, 1 gwän'chē; 2 gwän'che, *n.* One of the ancient people of the Canary Islands, now extinct, belonging to the Libyan group of the Hamitic stock: used also attributively. **Guan'cho**.

gua'ne-id, 1 gwā'ne-id; 2 gwā'ne-id, *n. Chem.* Any derivative of guanidin. [GENISARO. **gua'ne-idēn**.

guan'ey, 1 gwan'ē; 2 gwä'nē, *n.* [S. Am.] Same as **gua'nin**, } 1 gwā'nin, -nin *or* -nīn; 2 gwā'nin, -nin *or* **gua'nine**, } -nīn, *n. Chem.* A white amorphous compound ($C_5H_5N_5O$) contained in Peruvian coast and other guanos. **gua'ni-din, gua'ni-dine,** *n.* A crystalline compound (CH_5N_3) formed by the oxidation of guanin.—**gua"ni-do-pro"pi-on'ic,** *a.* Designating either of two isomeric compounds resulting from the union of guanidin and propionic acid. Alacreatinin is an anhydrid of the β-modification.—**gua'ni-min,** *n.* A substance resulting from the action of heat on the guanidin salt of a fatty acid.

gua'no, 1 gwā'no; 2 gwä'no, *vt.* To apply guano to (soil); fertilize with guano. **gua'nize**.

gua'no', *n.* 1. The accumulated excrement of sea-birds, found in the dry climate of the Peruvian coast and elsewhere, varying in fertilizing elements, but commonly rich in phosphoric acid and nitrogen, some varieties also having potash in considerable quantity. As a fertilizer it is commonly used for corn and other crops to gain quick results. 2. A manufactured nitrogenous fertilizer; also, any decomposing animal remains used as a fertilizer and readily absorbed by the soil; as, *fish-guano*. See PHOSPHATE-DEPOSIT. 3. A marine bird which produces guano.

Guano.—as a manure was first brought into notice by Inca Garcilaso de Vega, a Spaniard who in 1723 wrote on Peru. . . . Its earliest appearance in England was in 1840.
A. W. Crews in *The Field* [London] Nov. 15, 1879.

[< Peru. *huanu*, dung.] — **gua'no-horn"**, *n. Agric.* A tubular instrument for distributing guano or similar fertilizer over plowed areas.—**g.-lime**, *n.* A preparation for mixing fish-scrap with mineral phosphates and sulfuric acid.—**g.-pit'er-ous**, *a.* Furnishing guano.—**gua'no-thi'o-ty**, *n.* Referring to sulfury guano in Peruvian guano.

gua'no', *n.* A West-Indian tree of the mallow family; the corkwood.

gua'no', *n.* Same as GUANA', 2.

gua'no-line, 1 gwā'no-lin; 2 gwä'no-līn, *n. Chem.* A colorless crystalline ester, formed by the action of ethylchlorcarbonate on guanidin. [< GUANO + -OL.] **gua'no-lene'**.

gua-noʻti-tite, 1 gwa-nov'ti-tīt; 2 gwä-nōv'ti-tīt, *n. Mineral.* A silky yellowish-white hydrated ammonium-potassium sulfate that occurs in the form of crystalline deposits filling the dry clefts of guano found in guano. [< GUANO + LL. *ovulum*; see OVULUM.]

Guan-ta'na-mo, 1 gwan-tä'na-mō; 2 gwän-tä'nä-mō, *n.* A district and city about 30 m. N. of the bay of the same name, Santiago de Cuba province, Cuba; landing-place of the United States marines in the Spanish-American war, June 10, 1898, and of the army for the reduction of Santiago, June 22–23, 1898. States,** any one of the United States of America bordering on the Gulf of Mexico. **Gulf Stream,** a vast ocean current issuing out of the Gulf of Mexico. It flows northward between the Bahamas and the coast of Florida, spreading out after passing near Hatteras till it reaches the longitude of Newfoundland. Here it loses its identity and becomes merged in an eastern current which flows toward the bay of Biscay, where a portion of it flows northward and crosses the mouth of the English Channel. It loses in temperature and velocity, while gaining in width, after passing Hatteras. The depth to which its influence is felt varies during the course; thus, in lat. 44° N., and long. 48° W., the warm water is 50 fathoms deep; in lat. 59° N., long. 9° W., warm water has been found to a depth of 767 fathoms. On many charts the name Gulf Stream is restricted to the concentrated current issuing from the Gulf of Mexico between Cuba and Florida.

But for the heat which the *Gulf Stream* brings to the realm of the North Atlantic, Great Britain would be as sterile as Labrador, and Scandinavia would be uninhabitable, while it contributes to the temperate air of the regions of the Arctic Circle more than those comes to that region by direct influx from the sun. LIEUT. JOHN C. SOLBY, U. S. N. *U. S. Pilot Chart of North Atlantic Ocean, March, 1911.* [GOV. PTG. OFF.]

The common opinion of oceanographers is that the *Gulf Stream* can be no longer identified in the sea after it has reached latitude 40 at longitude 60, a point due east from Atlantic City but 600 miles off shore. From that point it is lost in the general circulation of the warmer water of the sea which follows the American coast and thence crosses the North Atlantic to provide a warm and humid climate for the western shores of Europe. The influence of the *Gulf Stream* upon our Atlantic coast, at least north of Hatteras, is not.

gum'me-lin, *n.* Same as DEXTRIN. [= GUMMELIN.] **gum'-gum'mer**, 1 gum'er; 2 gŭm'er, *n.* **1.** A machine or tool for gulleting saws. **2.** A person who gums saws.

Gum'mers-bach, 1 gum'ers-bŭh; 2 gŭm'ers-bäh, *n.* A city in Rhine province, Prussia.

gum'mic, 1 gum'ik; 2 gŭm'ic, *a.* Of, pertaining to, or derived from gum.—**gummic acid.** **1.** Same as ARABIN. **2.** A compound ($C_6H_{10}O_6$) formed in the oxidation of glucose by Fehling's solution: now believed to be impure turronic acid.

Gum'midge, 1 gum'ij; 2 gŭm'idj, **Mrs.** In Dickens's *David Copperfield*, a querulous old woman to whom Mr. Peggotty gives a home in his boat-house.

gum'mi-ness, 1 gum'i-nĕs; 2 gŭm'i-nĕs, *n.* **1.** The condition or quality of being gummy; viscousness. **2.** An accumulation of gummy matter.

gum'ming, 1 gum'ing; 2 gŭm'ing, *n.* **1.** The act of applying gum or fastening with gum; specif., the application of gum water to a lithographic stone. **2.** A disease, marked by a discharge of gum, which affects trees bearing stone-fruit. **3.** Gulleting, as of saws.

gum'mite, 1 gum'it; 2 gŭm'it, *n. Mineral.* A gum-like, greasy, reddish-yellow to hyacinth-red, feebly translucent, hydrous silico-uranate ($H_{12}PbCaBa_2U_8SiO_{40}$. [< L. *gummi*: see GUM, *n.*]

gum'mle, 1 gum'i; 2 gŭm'i, *v.* [Scot.] To make muddy figuratively, to perplex; confuse; bewilder. **gum'let.**

gum'mose, 1 gum'ōs; 2 gŭm'ōs, *a.* Gummatous. [< L. *gumma*, tumor.] [the hydrolysis of mucin.

gum'mose, *n. Chem.* An unfermentable sugar: product of

gum-no'sis, 1 gu-nō'sis; 2 gŭ-nō'sis, *n. Bot.* The excessive change of tissue into gum in the tissues of certain plants, as in cherry-gum. [< L. *gummi*; see GUM, *n.*]

gum'ny, 1 gum'i; 2 gŭm'y, *a.* [GUM'MI-ER; GUM'MI-EST.] **1.** Of the nature of gum; like gum; *specif.*, a *gummy* exudation. **2.** Covered or filled with gum or viscous matter; clogged with gum; sticky; as, *gummy* leaves and bark. **3.** *Pathol.* Gummatous. **4.** [Slang.] Swollen; puffy.—**gum'mi-ness.** Syn.: see GLUTINOUS.

gum'my', *n.* [Tas.-nania.] A galeoid shark (*Galeus* or *Mustelus antarcticus*). [Beaded, stupid person; idiot.

gum'my, *n.* [GUMS, 1 -z; 2 -s, pl.] [Slang, U. S.] A thicksighted person; a simpleton. [< Ice. *gumpr*, rump.] **—gump'head',** *n.* [Local, U. S.] A stupid, dotfish, or headstrong man or beast.

gum'phon, 1 gum'fon; 2 gŭm'fon, *n.* [Irish.] A mourning-banderole or -banner placed over a tomb or carried in a funeral procession. Compare GONFALON. [< OHG. *gund*, battle, + *fano*, banner.] Also **gum'phom.**

gum'plan, 1 gum'plan; 2 gŭm'plan, *n.* [Scot.] A fit of ill temper or sulks.

gum'ple, 1 gum'pl; 2 gŭm'pl, *vt.* [Scot.] To become sulky or ill-humored.—**gum'ple-foist"ed,** *a.* [Scot.] Disagreeable; surly.

gump'tion, 1 gump'shon; 2 gŭmp'shon, *n.* **1.** [Colloq.] Ready perception and discrimination; quick discernment and adoption of the elements of practical success; acuteness; common sense.

> Jean . . . had managed herself throughout with a degree of prudence and *gumption* for which she deserved her years.

> CARLYLE in Froude's *Thomas Carlyle* vol. i, p. 351. [a. 1832.]

2. *Paint.* (1) The art of preparing colors. (2) The turpentine, linseed oil, varnish, driers, etc., used to which the excellence of their work is attributed. (3) A variety of meglip. [< GAUM', < AS. *gŷman*, = Goth. *gaumjan*, perceive, observe.] **gum'tion.**—**gump'tion-less,** *a.*

gump'tious, 1 gump'shus; 2 gŭmp'shus, *a.* [Colloq.] Having gumption.

gum'-rash", gum'-stĭck, *etc.* See under GUM', *n.*

gums, 1 gumz; 2 gŭmz, *n.* [Colloq., U. S.] Indiarubber shoes.

Gum'ti, 1 gum'ti; 2 gŭm'ti, *n* A river of the United Provinces of Agra and Oudh, British India; length, 500 m. to the Ganges river.

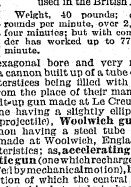
gum'-tree", 1 gum'-trĭ"; 2 gŭm'-trē", *n.* Any one of various trees of the United States and Australia. (1) [U. S.] (a) **The black or sour gum-tree or yellow g.,** the *sylvatica*) of the family *Nyssaceæ*, a handsome tree of the Southern States, with bluish-black ovoid fruit, leaves bright-crimson in autumn, and soft, firm, close-grained wood. (b) **The sweet g.** (*Liquidambar styraciflua*), of the family *Hamamelidaceæ*, a large tree of the Atlantic States, readily recognizable by its star-like, 5-lobed, fragrant leaves and globular fruit, a compact ball of capsules suspended by a slender pedicel. (2) [Australia.] Any one of various species of *Eucalyptus*, as the **slaty g.**, so called from the color of its bark.—**up a gum-tree** [Slang], in an awkward or difficult position.

Gü-müsh' Kha-ná', 1 gü-müsh' ka-nä"; 2 gü-müsh' kä-nä". A town in Trebizond vilayet, Asia Minor. **Gü-müsh's Ke-bech',** *n.*

gum'wa"ter, *n.* See under GUM', *n.*

gun', 1 gun; 2 gŭn, *vt.* [GUNNED, GUND; GUN'NING.] [U. S.] To shoot with a gun, especially small game; hunt with a fowling-piece: chiefly used in the present participle; as, to go *gunning* for partridges.

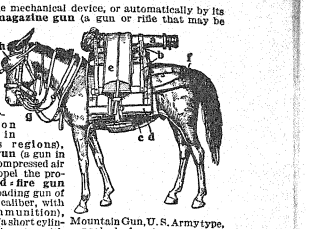
gun', *vt. Logging.* To aim (a tree) when felling it.



gun', *n.* **1.** A metal tube for firing projectiles by the force of gunpowder or other explosives, together with its stock, carriage, and other attachments. When mounted on a carriage it is specifically called a *cannon* (but the term gun is then often restored); when on a stock and requiring the use of both hands to hold and aim it, it is variously distinguished as a *rifle*, *musket*, *carbine*, or *fowling-piece*. In military usage a gun is a piece of ordnance, and all portable firearms are called, collectively, *small arms*.

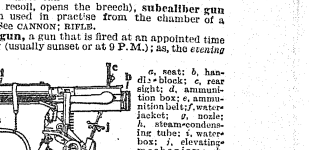
2. Specif., a shotgun, as distinguished from a rifle; also, any portable firearm.

> *Guns* are only worse all round, as rifles would be too dangerous with so many Caffirs about. *The Field* [London] June 30, 1883, p. 902.



3. One of various other devices for discharging missiles through a tube; as, an *air-gun*; *blow-gun*: in this sense usually in composition. **4.** The discharge of a gun; report of a gun, as in firing salutes. **5.** [W. U. S.] A pistol or revolver; as, he drew his *gun* and covered the fellow. **6.** A device consisting of two parallel cast-iron plates which can be fixed at different distances apart, for gaging the width of panes of plate glass in the course of manufacture. **7.** [Thieves' Slang.] A thief; pickpocket. **8.** That which requires charging. Hence: (1) [Humorous.] A pipe. (2) A tankard or flagon. **9.** (1) An artillery-man. (2) *pl.* [Colloq.] The members of a shooting party. [Perhaps < OF. *mangonel*, < LL. *mangonellus*, mangonel, dim. of *mangonum*, < Gr. *manganon*, a warrengine for throwing stones.]

Guns are named (1) from their makers: as, **Ames gun** (a rifled gun, muzzle-loading, formed of hollow disks welded over an iron bar, the whole mass being then bored and finished), **Armstrong gun** (a wrought-iron cannon, usually breech-loading, having an iron-hooped steel inner tube), **Bofors gun** (a Swedish automatic gun with a breech-mechanism), **Bormann gun** (a muzzle-loading gun having a great vogue among the Confederate troops in the American Civil War), **brown segmental wire gun** (a cannon made of a mandrel, many segmental jacket, and outside with wire), **Canet gun** (one with an improved method of mounting and of protection by turrets, giving great initial velocity, flatness of trajectory, and consequent accuracy and penetrative energy), **Colt automatic gun** (one in which the gases resulting from the explosion of one shell operate a lever which affects the apparatus for ejecting and reloading and causes the firing of the next shell automatically), **Crozier wire-wound gun** (one in which the tube is wound round with steel wire), **Dahlgren gun** (smooth-bored, of heavy caliber: used by the United States navy during the Civil War), **Ehrhardt gun** (a rapid-fire machine gun having flexible connection with its carriage to take the recoil), **Elswick gun** (a breech-loader built up of wrought-iron reenforce with a series of thin washers forced on by hydrostatic pressure), **Fraser gun** (same as WOOLWICH GUN), **Gardner gun** (a form of machine gun turn shed with barrels which are alternately loaded and fired by a crank), **Gathmann gun** (short, of large bore, designed for hurling a Gathmann torpedo or gunecotton shell), **Gatling gun** (a machine gun with parallel barrels about an upright axis, each having its own lock: loaded and discharged, sometimes at the rate of 1,000 shots per minute, by turning a crank), **Gruson gun** (a light breech-loading, rapid-delivered cannon, with fixed ammunition; or a revolving cannon firing explosive shells, having five barrels grouped around a common axis and rotated in front of a solid breech-block which has an opening to receive and hold a solid wrought-iron reenforce with a series of thin washers forced on by hydrostatic pressure), **Fraser gun** (same as WOOLWICH GUN), **Gardner gun** (a form of machine gun turn shed with barrels which are alternately loaded and fired by a crank), **Gathmann gun** (short, of large bore, designed for hurling a Gathmann torpedo or gunecotton shell), **Gatling gun** (a machine gun with parallel barrels about an upright axis, each having its own lock: loaded and discharged, sometimes at the rate of 1,000 shots per minute, by turning a crank), **Gruson gun** (a light breech-loading, rapid-delivered cannon, with fixed ammunition; or a revolving cannon firing explosive shells, having five barrels grouped around a common axis and rotated in front of a solid breech-block which has an opening to receive and hold a solid wrought-iron reenforce with a series of thin washers forced on by hydrostatic pressure), **Krupp gun** (a cannon of ingot steel made at Essen, Prussia), **Maxim gun** (see MAXIM), **Nordenfelt gun** (a machine-gun, with from 2 to 12 barrels, which may be fired singly or in volleys), **Paixhan gun** (a howitzer for projecting shells horizontally), **Palliser gun** (a smooth-bore, muzzle-loading gun, which can be turned into a rifle by the insertion of a rifled tube in the barrel), **Remington gun** (a rifled small arm having a rotating breech-block), **Rodman gun** (a cast-iron muzzle-loading cannon, much like a Rodman gun, with from 2 to 12 breeches, each of which may be fired singly or in volleys), **Paixhan gun** (a howitzer for projecting shells horizontally), **Palliser gun** (a smooth-bore, muzzle-loading gun, which can be turned into a rifle by the insertion of a rifled tube in the barrel), **Remington gun** (a rifled small arm having a rotating breech-block), **Rodman gun** (a cast-iron muzzle-loading cannon, much like a Sims-Dudley pneumatic gun (a powder pneumatic three-tube gun for projecting explosives), **Vickers-Maxim mountain gun** (a breech-loading, mountable gun of medium power, de-



Vickers-Maxim Rapid-fire Gun, as used in the British Army.

livering projectiles of 12 pounds each in weight, at the rate of 10 rounds per minute), **Whitworth gun** (a gun built up of a tube overlaid with square wire, the interstices being filled with solder or its equivalent); (2) from the place of their manufacture; as, **Creusot gun** (a built-up gun made at Creusot, France), **Lancaster gun** (one having a slightly elliptical twisted bore and a conoid projectile), **Woolwich gun** (a British muzzle-loading cannon having a steel inner tube, with wrought-iron coils, made at Woolwich, England); (3) from their special characteristics; as, **accelerating gun** (see ACCELERATING), **automatic gun** (one in which the recoil by which cartridges are fed by mechanical motion), **built-up gun** (one in the construction of which the central tube is reenforced by a covering of steel jackets and wire hoops), **centrifugal gun** (a gun firing small projectiles from a grooved disk by so-called centrifugal force), **converted gun** (a gun in which the breech-loading arrangement has been put in to supersede the muzzle-loading form), **directing gun** (any gun in a battery upon which tests are made to guide in the handling of the others), **disappearing gun** (a gun on a disappearing gun-carriage; see illus.), **dismountable gun** (a gun whose tone readily dismounted for transportation for use in the country), **double-barreled gun** (a shotgun or rifle having two parallel barrels mounted on the same stock), **hammer gun** (one with uncovered hammer), **hooped gun** (a built-up gun), **life-line gun** (a gun somewhat like a carbine, from which a lifeline can be fired to the upper part of a burning structure), **machine-gun** (a breech-loading mounted gun of one or many barrels, loaded and fired by means of some mechanical device, or automatically by its own recoil), **magazine gun** (a gun or rifle that may be discharged several times without reloading; a repeating gun), **mountain gun** (one of light caliber, designed for easy transportation, as on mule back in mountainous regions), **pneumatic gun** (a gun in which gas or compressed air is used to propel the projectile), **rapid-fire gun** (any breech-loading gun of 1½ to 8-in. caliber, with metallic ammunition), **sample gun** (a short cylinder of equal diameter with a given cannon and cast from the same material, used for testing tensile strength, etc.; not a regular gun), **semi-automatic gun** (a small-caliber cannon which, in recoil, opens the breech), **subcaliber gun** (a small gun used in practice from the chamber of a larger one). See CANNON; RIFLE.

—**evening gun,** a gun that is fired at an appointed time in the evening (usually sunset or at 9 P.M.); as, the *evening gun* from a fort or a flag-ship.—**great gun.** **1.** A cannon. **2.** [Colloq.] A person of note or importance.—**great guns!** an ejaculation expressing surprise, wonder, etc.—**gun'a"ding,** *n.* A projecting cover for gunpockets.—**gun-barrel,** *n.* The tube of a gun.—**gun-bed,** *n.* The platform on the deck on which a gun-mount is secured.—**gun-breech,** *n. Ordnance.* The rear end of a cannon from the front slope back to the rear face, exclusive of the breech-mechanism. In this metal are formed the seat for the breech-mechanism, the powder-chamber, and the slopes connecting the latter with the rifled portion of the bore.—**gun-brig,** *n.* A brig carrying an armament. no longer in use.—**gun-bright,** *n.* [Eng.] The common scouring-rush (*Equisetum hyemale*), at one time used in polishing guns.—**gun-captain,** *n.* The captain of a gun's crew. In the United States navy, he is a petty officer, appointed by the ship's commanding officer, and does not necessarily have rank when he is actively engaged.—**gun-case,** *n.* **1.** A case or covering for a gun. **2.** [Colloq., Eng.] The ornamental tippet sometimes worn by a judge.—**gun-chamber,** *n.* **1.** A portable mortar of small dimensions, suitable for firing salutes; formerly, a movable chamber with a pederero-like handle. **2.** That part of the barrel of a gun which is enlarged to receive the charge. **3.** A receptacle for a cartridge in the cylinder of a breech-loading gun or revolver.—**gun-circle,** *n.* A circular track of metal or one on an arc of a circle on which a pivot gun is made to revolve.—**gun-deck,** *n.* **1.** A covered deck carrying the principal battery of a vessel of war. In old-fashioned ships of the line there were, as a rule, two gun-decks. The upper of the two was called the *main-deck*; the other, the *lower gun-deck*. There was sometimes a third, known as the *middle gun-deck*. **2.** The uncovering deck next below the quarter-deck of a modern vessel of war.—**gun-fire,** *n. Mil.* **1.** The time at which a morning, evening, or other gun is regularly fired. **2.** The discharge of guns, collectively; gunshot.—**gun-flint,** *n.* A piece of flint fitted to the hammer of a flint-lock musket.—**gun-gear,** *n.* The gear belonging to a gun.—**gun-harpoon,** *n.* A bomb-lance or harpoon for a harpoon-gun.—**gun-iron,** *n.* **1.** A superior description of wrought-iron into cannons. **2.** A gun-harpoon.—**gun-layer,** *n. Eng. Ordnance.* A gun-pointer.—**gun-less,** *a.* Lacking or unfurnished with guns.—**gun-lift,** *n.* A hydraulic machine for raising and lowering heavy cannon.—**gun-lock,** *n.* The mechanism of a gun by which the hammer or needle is given and the charge exploded. In modern guns, as a rule, the parts causing the ignition, which are termed the *action*, do not constitute a separate mechanism. See FLINT-LOCK; MATCHLOCK; PERCUSSION-LOCK; WHEEL-LOCK.—**gun'maker,** *n.* A gunsmith.—**gun'man,** *n.* A man armed with a gun; especially (U. S.), one of an unruly class given to free use of firearms. **2.** A gunsmith.—**gun-metal,** *n.* **1.** Gun-iron; certain kinds of brass, or a bronze used for making guns. **2.** An alloy, as of copper 9 parts, tin 1 part, formerly much used for small-e cannon, and still used for other purposes.—**gun-money,** *n.* Coin made of metals such as iron or silver, or an alloy, treated with sulfur or some other substance in order to imitate the dark color of lusterless copper-alloy coinage. It was issued in Ireland by James II., and in Canada in various forms, etc.—**gun-mount,** *n.* A same as GUN-CARRIAGE.—**gun-paper,** *n.* A cellulose compound used as an absorbent foundation for the preparation of a form of guncotton.—**gun-pendulum,** *n.* A ballistic pendulum. See BALLISTIC.—**gun-pit,** *n.* The pit in which a cast gun is molded or a built-up gun put together.—**gun-play,** *n.* [Slang, U. S.] The use of revolvers in a quarrel.—**gun-pointer,** *n. Ordnance.* A man detailed to train a gun upon a point to be aimed at and to fire the charge.—**gun-port,** *n.* A porthole.—**gun-reach,** *n.* The reach or range of a gun; gunshot.—**gun-room,** *n. Naut.* A room at the after part of a lower gun-deck for the accommodation of junior officers.

Disappearing Gun in Firing Position.

gun-runner, *n.* [Colloq.] One who practises gun-running.—**gun-running,** *n.* The act of supplying foreigners with ammunition and firearms contrary to law.—**gun-searcher,** *n.* An instrument for examining a cannon for internal honeycombing.—**gun-seen,** *n.* A military device, like a huge fan, with iron or steel frame, used by the Japanese as a signal apparatus, and also as a defensive weapon.—**gun-shield,** *n. Ordnance.* A shield, as of steel, used to protect gun and gunners from the enemy's fire.—**gun-shot,** *n.* **1.** *a.* Made by the shot of a gun; as, a *gunshot* wound. **b.** *Mil.* The length of the point-blank range of a cannon-shot; hence, the range or reach of any gun.

You are not yet out of the *gunshot* of the devil.
BUNYAN *Works, Pilgrim's Progress* pt. i. p. 121. [ed. c. 1850]

2. *Her.* A rounded sable. [Obs.] **3.** Shot or projectiles collectively.—**gun-shy,** *a.* Fearful of the sight or report of a gun, as a dog or a horse.—**gun-slinger,** *n.*—**gun-sight,** *n.* The rear or range-finding sight of a gun.—**gun-slide,** *n. Ordnance.* The chassis on which a gun slides in recoiling when fired.—**gun-sling,** *n.* **1.** *Ordnance.* A sling-tackle by which to disengage or handle a heavy gun. **2.** A strap or sling by which a rifle or shotgun may be slung from a saddle or over a man's back.—**guns'man,** *n.* [Rare.] Same as GUNMAN, 1.—**gun'smith,** *n.* **1.** One who makes or repairs firearms. **2.** [Slang.] A thief. [Mil.]—**gun'smith'er-y,** *n.*—**gun-spaniel,** *n.* A spaniel trained to assist sportsmen when shooting game.—**gun'ster,** *n.* **1.** [Rare.] A gunner. **2†.** An empty boaster; one who exaggerates in order to cause amusement.—**gun-stick,** *n.* A ramrod.—**gun-stock,** *n.* The wooden part of a gun to which the lock and the barrel are attached.—**gun-stocker,** *n.* One of our gunstockers.—**gun-stocking,** *n.* The process of fitting stocks to gun-barrels.—**gun's'tone**†, *n.* **1.** A stone used as a projectile in a cannon. **2.** A gunlock.—**gun-tackle,** *n.*—**gun-wad,** *n.* A wad for a gun, tightly fitting its bore, over the charge of powder, particularly, a disk of pasteboard, compressed felt, or similar material.—**gun-work,** *n.* **1.** Labor expended in the service or manufacture of cannon. **2.** Calculations or other work relating to ordnance.—**lake guns,** phenomena at Seneca Lake, N. Y.; see BARMAL.—**Malabar gun,** a cannon made of iron hoops and staves.—**Napoleon gun,** a bronze 12-pounder field-cannon, brought into use about 1856 by Napoleon III.—**paradox gun** [Rare], a shotgun or rifle with barrel for either ball-cartridge or shot.—**smooth gun,** a breech-loading rifle with a fixed chamber closed by a breech-block turning about a horizontal axis 90° to the bore, and above the barrel's axis and in the rear.—**son of a gun** [Slang], a rogue; rascal: a humorous epithet of frequent and familiar application; perhaps originally *son of a gunner.*—**sunset gun,** same as EVENING GUN.—**thirtieth-year gun,** the new model Japanese infantry rifle: so called from its adoption in the thirtieth year of Mutsuhito's reign.—**to lay a gun** (*Artil. & Nav.*), to point or aim it.—**tray-gun,** a contrivance like an ordinary gun but capable of adjustments which enable the gunmaker to build from this a gun to fit his customer.

gun, 2 gun; 2 gŭn, *n.* A native district ruler in Mongolia.

These Mongol *guns*, ruling over each of the shoons or counties, which compose the eleven Kalmuks, are under feudal obligations to the Chinese Emperor.
L. BATES *Russian Road to China*, p. 257. [ɪs. & ʌ. '10.]

gun-, *abbr.* Gunnery.

gu'na, 1 gū'na; 2 gu'na, *n.* **1.** *Sans. Gram.* The lengthening under the accent of i, ī, and u, ū, to ē and ō, and of ṛ and ṝ to ar, by prefixing a, ā to ē and ō, and a to ar.—**gu'ṇa-u-ṇa,** etc. **2.** Some similar change in other languages; as, in English, *wife* = wolf, < AS. *wif*; *house* = haus, < AS. *hūs.*

The first lengthening of *i* and *u* by progression is called *guna* (masculine strength), a term of grammatical art.
F. A. MARCH *Anglo-Saxon Grammar* pt. i, § 38, p. 27. [ɪs. 1870.]

The so-called *guṇa*, in which the modification of the vowel is entirely occasioned by the following *a*.

Gu'na, 1 gū'na; 2 gu'na, *n.* A mountain; 50 m. E. of Lake Tsana, Abyssinia; 11,400 ft.

gun'-a'pron, *n.* See under GUN, *n.*

gu'nar-chy, *n.* Same as GYNARCHY.

gun'shar'rel, etc. See under GUN, *n.*

gun'ta'ŭ', 1 gun'ta'ŭ'; 2 gun'ta'ŭ', *n.* **1.** A war-ship of a small class and light draft carrying heavy guns; a man-of-war next in size below a cruiser. **2.** Formerly, a small vessel with sails and sweeps, and having one gun. **3.** [Local, U. S.] A self-dumping box car used in coal-mines.

gun'-car'riage, 1 gun'-kar'ij; 2 gŭn'-car'aj, *n.* A carriage upon which a cannon is mounted and moved. Gun-carriages are of different types, depending upon the purpose for which they are intended. See compounds below.

—counterpoise gun-carriage, a gun-carriage having a counterpoise acted upon by the recoil, which pushes the gun into firing position.—**disappearing gun-carriage,** a gun-mount so arranged that with the recoil after the firing, the gun descends to a low level where it may be reloaded behind a parapet. When reloaded, it is returned to its original position through the energy stored up in it by means of compressed air or by a counterweight. See illus. under GUN, *n.*—**Buffington-Crozier disappearing gun-carriage,** a type of gun-carriage, used by the United States coast artillery, in which the recoiling mechanism consists of a counterweight moving with restricted motion between vertical guides and on lines approximately at right angles to each other.—**hydraulic-recoil gun-carriage,** one in which, after firing, the recoil of the gun is checked and the system gradually brought to rest by the resistance of a liquid in the recoil-cylinders attached to the chassis or gun-mount, passing through holes or graduated apertures from one side of the piston-head or -heads to the other.—**hydro-pneumatic gun-carriage,** a type of gun-carriage used on some heavy guns in Europe, in which the recoil-cylinders are furnished with a liquid, as in the hydraulic type, the motive power for the return to the firing position being compressed air.

gun'-case, etc. See under GUN, *n.*

gun'cot'ton, 1 gun'kot'n; 2 gŭn'cŏt'n, *n.* A highly explosive compound prepared by the action of nitric and sulfuric acids upon cotton or some other form of cellulose. Military guncotton is a mixture of the most highly nitrated cellulose nitrates. It is nearly insoluble in a mixture of ether and alcohol, is highly inflammable, burns quietly, unless in a compression, and leaves little or no ash. It is largely used in naval and military mines and torpedoes.

Mr. Abel . . . finds the explosive power of *guncotton* to be more than fifty times that of gunpowder of equal weight. [J. H. APPLETON *Beginner's Handbook of Chem.*, p. 130. [CRAMP. 1888.]

When quite dry *guncotton* is easily detonated by a blow on an anvil. . . . If dry and warm it is much more sensitive to percussion or friction. . . . *Guncotton* containing more than 15°/₀ of water is uninflammable. . . . Generally speaking, the lower the nitrogen contents of a guncotton, . . . the higher the percentage of matters soluble in a mixture of ether and alcohol.
Encyc. Brit., 11th ed., vol. xii. p. 721.

—soluble guncotton, a mixture composed of cellulose nitrates which are nitrated to a less degree than those occurring in military guncotton. It is soluble in a mixture of alcohol and ether and is used in the manufacture of collodion, celluloid, etc.

gun'da, 1 gŭn'da; 2 gŭn'da, *n.* [Anglo-Ind.] Four of anything, especially four in reckoning of small money.

gun'-deck', *n.* See under GUN, *n.*

gun'de-low, 1 gun'di-lō; 2 gŭn'de-lō, *n.* [New Eng.] A flat-bottomed or unkeeled boat, a barge, or lighter for transporting goods. [Cor. of GONDOLA.] **gun'da-low'.**

gun'di, 1 gun'di; 2 gŭn'di, *n.* [Ar.] A rat (*Ctenodactylus vaumanni*) about the size of a meadow-mouse; one of the rodent-rats.

gun'dle, 1 gun'di; 2 gŭn'di, *a.* [Scot.] Greedy.

gun'die, *n.* [Scot.] The sea-scorpion (*Cottus scorpio*).

Gun-duk', 1 gun-dŭk'; 2 gun-dŭk', *n.* A river in Nepal and Bengal, India; length, 400 m. to the Ganges river at Patna.

Gun'duk', 1 gun'dŭk; 2 gun'dŭk', *n.* (1024+7/1108). A Norman prelate and builder who built the Tower of London and rebuilt Rochester cathedral.

gun'pow'der, 1 gun'pou'der; 2 gŭn'pow'der, *n.* An explosive mixture of niter, charcoal, and sulfur, which is black or brown in color according to whether the charcoal is completely "burned" or "under-burned."

The ingredients are pulverized separately, and after being moistened with water, intimately mixed in a wheel-mill or incorporating-mill. The mixed materials are broken up and then subjected to great pressure in a hydraulic press, forming a solid cake; this is broken into fragments, and the grains are separated by sieves. They are sometimes glazed with graphite. The finest grains, which burn quickly, are used for small arms; the largest, for cannon and mortars. **Black gunpowder** usually consists of potassium nitrate 75°/₀; charcoal 15°/₀; sulfur 10°/₀. **Brown prismatic g.,** known as cocoa, contains under-burned charcoal 16°/₀ and but 2.5°/₀ of sulfur. This grain is a European development of the one invented by Capt. (afterward U. S. A.) **Progressive g.** is one in which the grains have varying density. This feature was introduced into powder-making by Prof. Boreman of New York, but was developed in Europe. **Smokeless g.** is a powder used as a propellant in guns which makes very little smoke when exploded. The two types in use are colloidal nitrated cellulose powders, adopted by France, the United States, Russia, and Japan, and a colloidized mixture of cellulose nitrates and nitroglycerin, adopted by England, Germany, and Italy. The powders are granulated while plastic by squirting the mass into rods, cords, or threads, or cutting them into flakes or strips. **Sporting smokeless g.** is granulated into spheres by whirling the plastic mass in water. The first military smokeless powder of the class now in use was invented by Vieille, in France, in 1886. The first successful smokeless sporting powder was invented by Schultze in 1865. This was a superficially hardened soft-grained powder. The modern powder, which is hardened throughout the grain, was invented by von Ebeden in 1891. Gunpowder was used by the Chinese for making fireworks as early as the 7th century. The secret of its manufacture was carried by Arab traders to Bagdad, where its adaptability for war was discovered. The army of Genghis Khan first used it in cannon in China in 1234, and the Chinese thus learned its military use. Western knowledge of it may have come from the Arabs, notwithstanding its alleged invention by Roger Bacon and Schwartz, a German monk. See EXPLOSIVE.

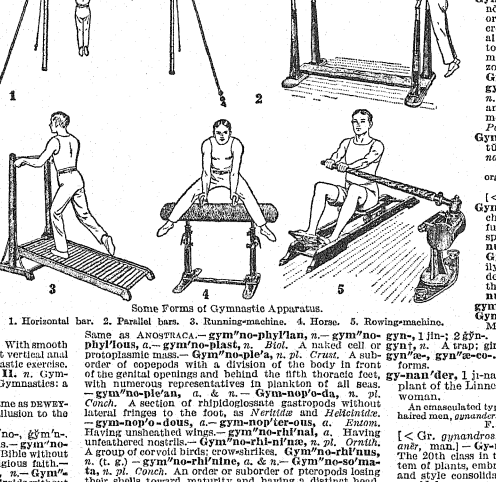
Mam.* A sub-family of erinaceoid insectivores with a well-developed tail and without spines, as in the hairy. **Gym-nu'ra,** *n.* (t. g.) — **gym-nu'rine,** *a.* & *n.*

gymp, 1 gimp; 2 ǧymp, *n.* Same as GIMP.

Gym'pie, 1 gim'pi; 2 ǧym'pi, *n.* A town in North Queensland, Australia.

gyn-, 1 jĭn-; 2 ǧĭn-. See GYNO-.

gyn†, *n.* A trap; gin.



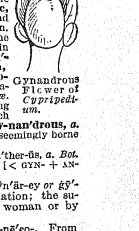
gyn'æ-ce-o-, **gyn'æ-ce-o-.** Same as GYNE-, GYNECO-: combining forms.

gy-nan'der, 1 ji-nan'dẽr; 2 ǧy-nän'dẽr, *n.* **1.** *Bot.* A plant of the Linnean class *Gynandria*. **2.** A masculine woman.

An emasculated type, product of short-haired women and long-haired men, *gynanders* and androgynes.

J. J. SYLVESTER *Fraser's Magazine for Harvests* p. 208. [s. 1888.]

[< Gr. *gynandros*, of doubtful sex, < *gynē*, woman, + *anēr*, man.] — **Gy-nan'dri-a†,** *n. pl. Bot.* The 20th class in the Linnean artificial system of plants, containing those with stamens and style consolidated, as in orchids. — **gy-nan'dri-an,** *a.* — **gy-nan'drism,** *n.* Same as HERMAPHRODITISM. — **gy-nan'drous†.** — **gy-nan'dro-ate,** *a. Sociol.* Under the rule of both man and woman; governed by both men and women. — **gy-nan'dro-ous,** *a.* — **gy-nan'dro-side** male and the other female, as certain insects. **gy-nan'dro-mor'phĭc†.** — **gy-nan'dro-morph,** *n.* — **gy-nan'dro-mor'phism, gy-nan'dro-mor'phy,** *n.* — **gy-nan'dro-phore,** *n* A gynophore bearing the stamens and pistil, as in certain *Capparidaceæ*. — **gy-nan'dro-spo'rous,** *a.* — **gy-nan'dry,** *n.* A certain dicecious fresh-water algæ, of which the female plants produce androspores. — **gy-nan'drous,** *a. Bot.* Having the stamens united with or seemingly borne upon the pistil.



Some Forms of Gymnastic Apparatus.

1. Horizontal bar. 2. Parallel bars. 3. Running-machine. 4. Horse. 5. Rowing-machine.

Gymnosperm.

1. Young fruit of the ginkgo, with naked ovules. 2. Scale from the *Pinus sylvestris*, bearing two ovules at its base.

Gynandrous Flower of *Cypripedium*.

gyn'ar-chy, 1 jĭn'ẽr-kĭ *or* jąi'nąr-kĭ; 2 ǧyn'ĭr-ey *or* ǧy'-när-ey, *n.* Female authority or domination; the supremacy of women; government by a woman or by women. [< GYN- + Greek *archē*, rule.]

gyn'æ-, 1 jĭn'i-, ji-nī'ko-; 2 ǧyn'e-, ǧy-nē'co-. From **gyn'æ-ce-o-,**] Greek *gynē* (gen. *gynaikos*), woman, female: combining forms. — **gyn'æ-can'drous,** *a. Bot.* Having both pistillate and staminate flowers, as the spikelets of some sedges.

Other words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

KEY 1: dīsle; ū = out; ōil; ĭū = feud; chin; go; jet; ŋ = sing; so; ship; thin, this; agure; F. boñ, dūne; ʁ = loch. †, obsolete; ‡, variant.

gyn"ĕ-ce'um, 1 ji-n'i-[or joi'n-]i'um; 2 ġŷn'e-[or ġŷ'ne-]e'um, *n.* [<Gr. *gynē*, a woman.] **1.** The part of a Greek house reserved for the women, usually the rear.

He was kept in the *gynæceum*, or women's apartments, and rarely or never saw his father.—FARRAR *Seekers after God, Seneca* p. 10. [MACM.]

2. In ancient Rome, the emperor's seraglio; more especially, the place where the imperial garments were manufactured. **3.** Same as GYNŒCIUM. [<L. *gynæcium*, <Gr. *gynaikeiōn*, < *gynē* (*gynaik-*), female, Def. 3, <Gr. *gynē*, female, + *oikos*, house.] **gyn"ĕ-ce'an,** *a.*

gy-nan'dri-an, *a.* Pertaining to women or to female disorders; feminine. **gy-ne'cic,— gyn"ec-ics'is,** *n.* Sexual selection as determined by the choice of the female.— **gyn"ĕ-ce-cen'tric,** *a. Sociol.* Having its center in or organization issuing from woman.— **gyn"ĕ-ce-co-ce'nic,** *a.* [Rare.] Holding women in common.— **gyn"ĕ-coc'ra-cy,** *n.* The domination of women; female supremacy. **gyn"ĕ-oc'ra-cy†; gy-noc'ra-cy†.**

Among the Nairs of Malabar the institutions all incline to a *gynocracy*, each woman having several husbands, and property passing through the female line in preference to the male.
RAWLINSON *Herodotus* vol. iii, bk. iv, p. 19. [A. 1885.]

— gy-noc'ra-ral, *a.* **1.** A woman who rules. **2.** One who upholds the sovereignty of women.— **gyn"ĕ-co-cra'lic,** *a.* **gyn"ĕ-co-cra'ti-cal;— gyn"ĕ-col'a-cry,** *n.* Same as GYNOLATRY.

gyn"ĕ-col'o-gist, 1 jin'i-[or joi'n-]kol'o-jist; 2 ġŷn'e-[or ġŷ'ne-]kol'o-ġist, *n. Med.* One skilled in gynecology and the treatment of diseases of women.

gyn"ĕ-col'o-gy, 1 jin'i-[or joi'n-]kol'o-ji; 2 ġŷn'e-[or ġŷ'ne-]kol'o-ġy, *n.* The science that treats of the functions and diseases peculiar to women. [<GYNECO- + -LOGY.] **— gyn"ĕ-co-log'i-cal,** *a.*

gyn"ĕ-co-ma'ni-a, *n. Pathol.* Same as SATYRIASIS.— **gyn"ĕ-co-mas'ty,** *n.* An abnormal condition of a man's breasts under which they temporarily fulfil the functions and present the appearance of a woman's. **gyn"ĕ-co-mas'tism.— gyn"ĕ-co-ter'ic,** *a.* Having the characteristics, shape, or appearance of a female.— **gy-ne"co-ni'tis,** *n.* **1.** Same as GYNŒCIUM. **2.** The place reserved in the early church, and now in the Greek church, for the use of women: often a gallery.— **gyn"ĕ-cop'a-thy,** *n. Med.* Diseases of women collectively.— **gy-ne"co-phone,** *n.* A cavity or canal in the body of some male animals, as certain worms of the genus *Bilharzia*, in which the female is retained.— **gy-ne"co-phor'ic,** *a.* **gyn"ĕ-ceoph'o-ral†.— gyn"ĕ-coph'o-rous,** *a.* Bearing the female.— **gyn"ĕ-ce'ric,** *a.* Relating to or characteristic of the dominion of women.

gy'nee, 1 jiī'ni; 2 ġŷ'nē, *n.* [Hind.] A cow, usually about three feet in the withers, bred in Bengal.

gyn"e-o'l a-ter, *n.* A worshiper of women.— **gyn"e-ol'a-try,** *n.* Woman-worship; excessive homage paid to women.— **gyn"e-o-path'ic,** *a. Med.* Pertaining to the diseases peculiar to women.— **gyn"e-phō'bi-a,** *n. Med.* Fear of women's society.— **gy-ner'ho-py,** *n. Biol.* A condition in which greater variance from the type of previous generations of any species is exhibited by the females than by the males.— **gyn"e-thur'si-a,** *n.* The offering of women in sacrifice.— **gyn'e-type,** *n. Zool.* A female individual used as the type of species.

gyn'ĕt'ics, 1 jin'i-et'ikz or jin'ĕt'ikz; 2 ġŷn'i-[or ġŷ'ni-]et'ikz, *n. Med.* Applied gynecology. [< GYN- + Gr. *tiktikos*, < *tiaomai*, heal.]

gyn'ics, 1 jin'ikz or ji-i'nĕks; 2 ġŷn'ĭks or ġŷ'nĕks, *n.* Science and literature dealing with woman.

gyn'o-, gyn-, 1 jin'o-, jin-; 2 ġŷn'o-, ġŷn-. From Greek *gynē*, a woman: combining forms, meaning usually 'pistil' or 'ovary.'— **gyn'o-bā'sic,** *a.* **gyn"o-ba'seous.— gynobasic style,** a style adhering by its base to a carpophore, as in a geranium.— **gyn"o-car'di-ac,** *Chem.* A salt of gynocardic acid.— **gyn"o-car'dic,** *a.* Noting an acid which forms about one-eighth part of the oil of the chaulmoogra. See CHAULMOOGRA.— **gyn"o-car'di-um,** *Chem.* The bitter glucoside of the seeds of *Gynocardia odorata*.— **gy-noc'ra-cy,** *n.* See GYNOCRACY.— **gyn'o-di-ce'cious,** *a. Bot.* Having flowers on separate plants, some of the plants bearing only pistils, but none male only. Compare ANDRODIŒCIOUS; DIŒCIOUS.— **gyn"o-di-ce'cious-ly,** *adv.*— **gyn"o-di-ce'cism,** *n. Bot.* The condition of being gynodiœcious.— **gyn"o-ec'ium,** *n. Bot.* The aggregate of the female parts of a flower; the pistil or pistils taken as a unit. Compare ANDROECIUM. **gy-nœ'ce-um†; gyn-œ'ce-um†; gyn"ĕ-ge-ne'tic,** *a.* Producing or generating nothing but females.— **gyn"o-mo-noe'cious,** *a. Bot.* Having flowers upon the same plant, some of which are perfect and some female only. **gyn"o-mo-noe'cism,** *n.*— **gy-noph'a-ge,** *n.* A man-eater.— **gyn"o-phil'an,** *a.* [Rare.] Fond of women.— **gyn'o-phore,** *n.* **1.** *Bot.* A stalk (stipe) formed by an internode of the receptacle, as in the gynandrous flower of (*Cleome pungens*) and some cruciferæ. **2.** *Zoöph.* The branch of a gonoblastidium that bears female sun-cups.— **gyn'o-phor'ic,** *a.* Of or belonging to a gynophore.— **gyn'o-phŏ'rum,** *n. Biol.* The protoplasm which is supposed to distinguish the female from the male cells.— **gyn'o-spore,** *n.* Same as MACROGAMETE.— **gyn"o-ste'gi-um,** *n. Bot.* Same as PERIANTH.— **gyn"o-ste'mi-um,** *n. Bot.* The columnar mass formed by the union of the style and filaments in the flowers of orchil in the genus *Roccella*.— **gyn"o-style,** *n. Zoöl.* A female blastostyle of a siphonophore.

Gynophore (*g*) of Caper-bush (*Capparis spinosa*).

-gynous, *suffix.* Employed in combination to denote female or woman; as, philogynous, *q.v.* In botany, distinguishing the location, nature, and number of the pistils, when regarded as the female organs of plants; as *polygynous*, *acrogynous*, etc. [<Gr. *gynē*, woman.]

Gyon-gyös', 1 ġyön'-ġyĕsh'; 2 ġyön-ġyösh', *n.* A town in Heves county, Hungary.

gyp, 1 jip; 2 ġŷp, *n.* [Slang.] To swindle; to cheat.

gyp's, 1 jip; 2 ġŷp, *n.* [Cant.] A college servant at Cambridge University, England. **2.** [Slang.] A swindler. **3.** A bitch: said especially of a female puppy. [Said to be spotive, <Gr. *gypē*, vulture, but prob. Celtic.] **— gyp's-room',** *n.* [Cant.] A room for the use of a gyp or college servant at Cambridge University, England.— to give one **gyp** [Colloq., Eng.], to make one smart (for anything done).

Gyp², 1 ġip; 2 zhŷp, *n.* A pen-name of Comtesse de Martel, a French writer and caricaturist.

gy-pon', *n.* Same as PUPON, etc.

Gyp'sey, gyp'se-ry, gyp'sy-ry, etc. See GIPSY, etc.

gyp'site, 1 jip'sait; 2 ġŷp'sīt, *n.* Earthy gypsum.

Gyp-soph'i-la, 1 jip-sof'i-la; 2 ġŷp-sŏf'i-la, *n. Bot.* **1.** A large Old World genus of stenaceous herbs with wiry stems and a profusion of small flowers. **2.** [*g-*] A plant of this genus.

Gyp-sor'nis, 1 jip-sōr'nis; 2 ġŷp-sōr'nis, *n.* The Eocene gypsum-birds; an extinct rail-like genus found in the gypsum deposits of Montmartre, France. [<GYPSUM + Gr. *ornis*, bird.]

gyp'sum, *n.* To treat with gypsum, as land.

gyp'sum, 1 jip'sum; 2 ġŷp'sŭm, *n.* **1.** *Mineral.* A massive, foliated, or granular, pearly, white, red, yellow, blue, or black, transparent to opaque, hydrous calcium sulfate ($CaSO_4 + 2H_2O$), crystallizing in the monoclinic system. It is used as a dressing for soils and sometimes in brewing, to burnt stone soft water.

Gypsum . . . when 'boiled' to expel water . . . is Plaster of Paris.
SIR W. JAMESON *Text Crypt. Zeol.* p. 115. [o. d. c. 1824.]

[< F. *gypse*, < L. *gypsum*, < Gr. *gypsos*, chalk; prob. of Eastern origin.] **gypse†; gypst†; gypset.— gyp'se-ous,** *a.* Having the properties of or containing gypsum. **gyp'sine†; gyp'soust.— gyp-sif'er-ous,** *a.* Yielding or containing gypsum.— **gyp-sog'ra-phy,** *n.* The art of engraving on gypsum or on plaster casts.— **gyp'so-plast,** *n.* A plaster-of-Paris cast.

Gyp'sy, gyp'sĭ-fy, gyp'sy-dom, etc. See GIPSY, etc.

Gyp'tian†, *n.* Gheber. See under GIPSY.

gyr'a, 1 jai'ra; 2 ġŷ'ra, *n.* [L.] The richly embroidered border of a robe; a medieval and ecclesiastical term.

gyr'a-can'thus, 1 jir'e-kan'thus; 2 ġŷr'a-can'thŭs, *n. Paleon.* A genus of *Acanthopomachi*, having round spines. They belong to the Carboniferous and Devonian ages.

gy'ral, 1 jai'ral; 2 ġŷ'ral, *a.* **1.** Having a circular, wheeling, revolving, or whirling motion. **2.** *Anat.* Of or pertaining to the gyri or convolutions of the brain. **gy'ral-ly,** *adv.* In a gyral manner.

gyrate, 1 jai'reit; 2 ġŷ'rĕt, *vi.* [GYRAT-ING; GYRAT-ING.] To turn on an axis of rotation; rotate; to rotate: wheel; revolve, especially in a spiral or helix, as a cyclone.

That patriarchal bird who was woolen smallmade *gyrates* on the church spire.—HOLMES *Church Print Works, Yankee Gypsies* in vol.ii, p. 313. [o. a. c. 1872.]

[< L. *gyratus*, pp. of *gyro*, < *gyrus*; see GYRE.]

gyrate, *a.* Circular; winding; convoluted. **2.** *Bot.* Same as CIRCINATE. **3.** *Zoöl.* = *gyrated*; see GYRATE, *v.*]

— gy'rant, *a.* Whirling; turning in a circle; gyrating.

A wound in *gyrant* orbits smooth and white.
E. B. BROWNING *Drama of Exile, Song of Miriam Strer* st. 2.

— gy'ra-to-ry, *a.* Having a circular and rotary motion.

gy'ra-tion, 1 jai-ri'shan; 2 ġŷ-ra'shŏn, *n.* **1.** The act of turning, as a body on its axis of rotation, while simultaneously whirling about an axis of revolution; also, any wheeling, rotating, or whirling.

Gyroscope Car (Brennan Monorail).

To make little gyrations in the air of his stool.
DICKENS *Bleak House* vol. i. p. 405. [o. a. t. 1862.]

2. *Conch.* A whorl of a spiral shell. [< LL. *gyratiō(n-)*, < L. *gyro*; see GYRATE, *v.*] **— center of gyration,** see CENTER. **— radius of gyration,** *Dynamics*, the distance of center of gyration from the axis of rotation.— **gy-ra'tion-al,** *a.* Of or pertaining to gyration.

gyra'tor, 1 jai-rei'tor *or* -tor; 2 ġŷ-rā'tor, *n.* One who or that which gyrates.

gyre, 1 jair; 2 ġŷr, *n.* [Archaic.] **1.** *i. q.* GYRUS. **2.** A circle; a ring; a gyration. **3.** (1) A whirling; a gyration. **4.** A spiral or round form. [< L. *gyrus*, < Gr. *gyros*, circle.] **— gyre'-carle',** *n.* [Scot.] A ghost; sprite; ogre.

gyre:— g-carline, *n.* [Scot.] A witch; hag. **g-carlingy.— Gyr'e-can-cep'ha-lia,** 1 jir'en-sef'a-li; 2 ġŷr'ĕn-cĕf'a-la, *n. pl. Mam.* A division of placentals having a large cerebrum with many well-defined gyri and sulci, as apes, carnivores, and ungulates. [< *gyro*, gyre, circle, + *en*, in, + *kephalē*, head.] **— gyr'en-ceph'a-late, gyr'en-ceph'a-lous,** *a.*

gyr'fal'con, 1 jer-fô'k'n; 2 ġŷr'fô'kŏn, *n. pl. Entom.* A family of adephagous beetles having the metasternum without antecoxal piece and extending backward in a triangular process, and very active among water-beetles. **Gyr'i'nus,** *n.* (t. g.) [< *gyro*, *gyrinus*, tadpole, < *gyros*, round.] **— gyr'i-nid,** *a.* & *n.*— **gyr'i-noid,** *a.*

gyr'o-, 1 jai'ro-; 2 ġŷ'ro-. From Greek *gyros*, round, a circle: combining form.— **gyr'o-car',** *n.* [Colloq.] A gyroscope car.— **gy-roc'er-a-cone,** *n. Pale.* A mantilloidean cephalopod shell, akin to the gyroceras.— **gy-roc'er-a'tite,** *n. pl. Conch.* A Paleozoic family of mantilloidean cephalopods with noncontiguous whorls. **Gy-roc'er-as,** *n.* (t. g.)— **gy-roc'er-oid,** *a.* Having the whorls not contiguous; gyroceratoid.— **gyr'o-ce-ra'toid,** *a.* Of or pertaining to the Gyroceratoidea.— **gyr'o-ce-ra'toi-dea,** *n. pl. Zoöl.* A family of ciliate infusorians, whose cilia are localized. They have a body which is rounded at the anterior extremity and developed into a peculiar ciliated like projection at the posterior extremity.— **Gyr"o-co-tyl'i-dæ,** *n. pl. Zool.* A family of leaf-shaped tapeworms, characterized by the possession of a ventral sucker. The body may also be stretched out of or drawn into the canal from which it grows. **Gyr"o-co-tyl'y-le,** *n.* (t. g.)— **gyr"o-dac-tyl'i-dæ,** *n. pl. Helminth.* A family of polystomean trematode worms with large adhesive hooks and terminal caudal disk, mostly parasitic on fishes.— **gyr"o-dac'ty-lid,** *a.*— **gyr"o-dac'ty-loid,** *a.*— **Gyr"o-dac'ty-lus,** *n. Helminth.* **1.** A genus typical of *Gyrodactylidæ*. **2.** [*g-*] [-LI, *pl.*] A trematode of this genus, as *G. elegans*, found on the pike, stickleback, etc.— **Gyr'o-dus,** *n. Paleon.* An extinct genus of the *Pycnodontidæ*, having rounded teeth and thick bodies.— **gy-rog'o-nite,** *n. Paleon.* A petrified sporangium or seed-vessel of the cryptogamic genus *Chara*.— **gy'ro-graph,** *n.* A mechanical contrivance for the registration of revolutions, as of a wheel.— **gy"ro-graph'ic-al,** *a. Chem.* Referring to or designating the acid in the lichens of the genus *Gyrophora* and kindred species.

Other words beginning with this prefix will be found in alphabetical place, either singly or in groups.

gy-roi'dal, 1 jai-roi'dal; 2 ġŷ-roi'dal, *a.* **1.** *Crystal.* Denoting non-symmetrical forms in which the planes appear to be twisted with reference to each other. **2.** *Optics.* Turning the plane of polarization of light. [< Gr. *gyroeidēs*, < *gyros*, round; and see -OID.] **— -ly,** *adv.*

gy-roi'e-plis, *n. Paleon.* A Triassic genus of the *Ganoidei*, whose scales are irregularly stamped with curved folds.— **gyr'o-lite,** *n. Mineral.* A concretionary, white, hydrous calcium silicate ($H_2Ca\,Si_2O_5$).— **gyr'o-lith,** *n.* The petrified pericarp of a characerous plant.— **gy-ro'ma,** *n.* [-MA-TA, *pl.*] **1.** A circular movement; a gyration. **2.** *Bot.* The ring surrounding the spore-cases in polypodiaceous ferns; also, the button-like shield in lichens of the genus *Gyrophora*.— **gyr'o-man'cy,** *n.* Divination from observation of the fall of a person made dizzy by constant turning within a circle.— **gy'ro-mele,** *n. Surg.* A revolving probe, tipped with a sponge and used for swabbing the stomach.— **gy'rom'e-ter,** *n.* A device for indicating speed of rotation.

gy'ron, 1 jai'ron; 2 ġŷ'rŏn, *n. Her.* A charge formed by two straight lines starting in an acute angle at the fesspoint. [< F. *giron*, < Gr. *gyros*, circle.] **— gy'ron-nét'ty,** *a. Her.* Ornamented at the top with points, as a castle or tower.— **gy'ron-ny,** *a. Her.* Covered with gyrons, or divided so as to form several gyrons.— **gy'ron-wise,** *adv.*

Gyronny of eight.

Gyroph'o-ra, *n. Bot.* A genus of Arctic lichens.— **gyr"o-phor'ic,** *a.* — **gyr'o-pig'eon,** *n.* A contrivance, resembling a pigeon, flung upward by a spring from the arm, to mark in shooting-matches.— **gy'ro-plane,** *n.* A combination of the gyroscope and the Campbell aeroplane, in which the weight is sustained in the air and by gyrating planes.— **gy"ro-pso-ri'a-sis,** *n.* New England. *Pathol.* Psoriasis in the form of circular patches.

Arms of Gyroscope.

gy'ro-scope, 1 jai'ro-skōp; 2 ġŷ'ro-skŏp, *n.* An instrument for illustrating the laws of rotation, consisting essentially of a heavy solid rotating wheel, the axis of which is free to turn in any direction and may be acted on by couples of forces.

In the common *gyroscope*, or *gyroscopic top*, the wheel revolves rapidly on a horizontal axis, which can then be supported by one end, as if devoid of gravity. The gyroscope was probably invented during the latter part of the eighteenth century. Its properties depend upon the fact that when a body is rotating about its principal axis of inertia of greatest or least moment, the direction of the axis will remain the same unless influenced by an extraneous force. This principle was used by Foucault in 1852 to show the rotation of the earth. It has also been used to produce equilibrium or retain a uniform direction in monorail cars, aeroplanes, gyroscope cars, and the steering-gear of torpedoes. By the action of a sufficient extraneous force, a gyroscope can be made to assume a compound motion, as in the two rotary motions of an ordinary top toward the end of its spin. [< GYRO- + -SCOPE.] **— gyroscope car,** a monorail car which is kept balanced by means of gyroscopes driven at high speed in opposite directions, sometimes shifting in vacuo. The mechanical principle involved is that of the spinning-top. See MONORAIL.— **gy'ro-scop'ic,** *a.* Pertaining to or like the gyroscope or its action.

Gyroscope.

gy'rose, 1 jai'ros; 2 ġŷ'rōs, *a. Bot.* Folded and waved, or marked by wavy lines.

Gyro-sta'chys, 1 jai'ro-stei'kis *or* -stak'is; 2 ġŷ'ro-stā'kys *or* -stăc'ys, *n. Bot.* A genus of terrestrial orchids with tuberous or fibrous roots, slender, scapelike stems, bearing at the summit a raceme of small, nodding, greenish or greenish white or cream-colored flowers. The genus includes about 80 species, of which 10 are in the United States. See LADY'S-TRESSES. [< GYRO- + Gr. *stachys*, ear of grain.]

gy'ro-stat, 1 jai'ro-stat; 2 ġŷ'ro-stăt, *n.* A modification of the gyroscope, used to illustrate the dynamics of rotating rigid bodies.

On this instrument Maxwell is founded the dynamical explanation of the precession of the equinoxes, and some of the seemingly marvellous performance of gyroscopes and *gyrostats*.
THOMSON AND TAIT *Nat. Phil.* vol. i. p. 257. [o. a. c. 1871.]

[< GYRO- + Gr. *statikos*; see STATIC.] **— gy"ro-stat'ic,** *a.* Pertaining to the gyrostat or to the law that a rapidly rotating body tends to keep the same plane of rotation.— **gy'ro-stat'i-cal-ly,** *adv.*— **gy"ro-stat'ics,** *n.* The laws governing the rotation of solid bodies.

Gy'ro-the'ca, 1 jai'ro-thi'ka; 2 ġŷ'ro-thē'ca, *n. Bot.* A monotypic genus of herbs of the family *Hæmodoraceæ*. See REDROOT. 1. [< GYRO- + Gr. *thēkē*, case.]

gyr'ous, 1 jai'rus; 2 ġŷr'ŭs, *a.* [Rare.] Characterized by gyres; gyrating.

gy"ro-va'gi, 1 jai'ro-vei'jai; 2 ġŷ'ro-vā'ġī, *n. pl.* Vagabond monks of the early days of Christianity. [< GYRO- + L. *vagus*, wandering.] **gy'ro-va'gous,** *a.*

gy'rus, 1 jai'rus, 2 ġŷ'rŭs, *n.* [GY'RI, 1 -rai; 2 -rī, *pl.*] [L.] *Anat.* A rounded serpentine ridge between two grooves or sulci; especially, one of the convolutions of the cortex of the brain. The gyri or convolutions are usually named from their relative position, their shape, or their character, as, **frontal** or **Broca's gyrus, g. subcallosus** (extending from the callosum over the corpus callosum), **dentate g., lingual g., postcentral g., g. fornicatus** or **g. cinguli** (arching over the corpus callosum), **g. hippocampi** (the hippocampus major), etc. The posterior names are also applied to the cerebral gyri of lower animals.

gyte, 1 gait; 2 ġīt, *a.* [Scot.] Excited; crazy; distracted.

gyte, *n.* [Scot.] **1.** A child. **2.** A contemptuous or playful name. **3.** A pupil in the High School of Edinburgh during his first year.

gyte'ri, *n.* A town; gite.

gy'trash, 1 jai'trash; 2 ġŷ'trăsh, *n.* [Prov. Eng.] An apparition: ghost.

Gyu'ia, 1 jyu'ie; 2 ġyu'ĭa, *n.* A town in Békés county, Hungary.

gyve, 1 jaiv; 2 ġīv, *vt.* To bind with fetters; shackle.

Those iron fetters wherewith he was *gyv'd*.
SPENSER *Faerie Queene* bk. v, can. 4. st. 38.

gyve, *n.* A fetter or shackle used for confining the limbs of prisoners: employed usually for the feet, but sometimes for the wrists: commonly used in the plural.

And Eugene Aram walk'd between, with *gyves* upon his wrist.
HOOD *Eugene Aram* st. 36.

[Of Celt. origin; cp. W. *gefyn*, fetter.] SYN.: see FETTER.

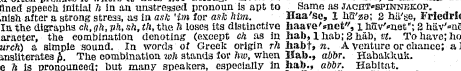
Hh Black Letter.

Hh Script.



H, h, 1 āch; 2 āch, *n.* [AITCHES, H's, or *Hs*, 1 āch'ez; 2 āch'ēz, *pl.*] **1.** A letter: the eighth in the English, Latin, and Romanic alphabets. Its sound is technically called a 'glottal fricative,' being produced by the friction of the speech-current against the vocal cords as they tighten in preparation for the utterance of a vowel, or loosen after a vowel has been uttered. The modern name ach is not a good name, since it does not contain the sound. On the analogy of *c* (sē), *g* (jī), and *p* (vī), *h* might well have been called hī. Its German name is hā.

On account of the early loss of initial *h* in popular Latin, the sound is virtually non-existent in French, Italian, and Spanish. In a few English words of Latin origin, as *heir, honor, hour*, it is still written, as in French, but not pronounced. The rule that initial *h* was to be pronounced in Anglo-Saxon words, but not pronounced in French words, made difficulty for the unlearned even in the Middle English period. This difficulty still survives in so called cockney speech, which quite regularly drops the *h* where it should be heard and often prefixes it where it does not belong. Even in refined speech initial *h* in an unstressed pronoun is apt to vanish after a strong stress, as in *ask 'im* for *ask him*.

In the digraphs *ch, ph, rh, sh, th*, the *h* loses its distinctive character, the combination denoting (except *ch* as in *church*) a simple sound. In words of Greek origin *rh* transliterates *ῥ*. The combination *wh* stands for *hw*, when the *h* is pronounced; but many speakers, especially in England, make no distinction between *white* and *wight*.

H averages 2.34 per cent. of the sounds as they are found on the pages of our literature. WORDS *Oriental and Linguistic Studies* second series, p. 274. [s. 1874.]

The history of the characters is represented as follows:

Hiero-glyphic Sieve. Egyptian Hieratic. Phœni-cian. Early Greek. Ro-man. English Script.

Capital H is from L. Gr. H, < early Gr. 𐌇, < Phœnician 𐤇, < Egyptian hieratic 𓉔, < hieroglyph 𓉔. In Greek, H came to be used for HĒ = ē, i. e., long *e*, called *ēta* (4th cent. B. C.), and the breathing was denoted by ⸉ (4th cent. B. C.), > ʽ, > ῾ (9th cent. A. D.). The hieroglyph represents a sieve, the Phœnician a fence, the Anglo-Saxon rune is called *hægel*, hail; the Latin name is *ha*, > Folk-Latin *acca*, > F. *ache*, > Eng. *ache, aitch*, āch. hab'be-as cor'pus, 1 hā'bi-as kôr'pus; 2 hä'bē-äs kôr'pŭs. *Law.* A writ having for its object to bring a person before a court (or specif., at times, [erudite]) in a full *habeas corpus ad subjiciendum*) commanding a person having another in custody to produce the body of the person detained, with the day and cause of his caption and detention, and to do, submit to, and receive whatever the judge or court shall consider in that behalf. The right to the original writ was established in England in 1679 by the statute 31 Car II. c. 2, and several forms of it are in use. This is the process commonly writ in the law; and, having for many centuries been employed to remove illegal restraint upon personal liberty, no matter by what power imposed, it is often called the great writ of liberty. BOUVIER *Law Dict.* vol. I, p. 917. [B. & CO. 1897.]

The Constitution of the United States provides that "the privilege of the writ of habeas corpus shall not be suspended, unless when, in case of rebellion or invasion, the public safety may require it." **habeasi.**

Habeas corpus proceedings were then resorted to, and failed in virtue of the President's orders to the military in charge of the prisoners.

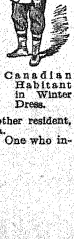
hab'it, *n.* **1.** A regular and fixed mode of action, whether physical or mental; also, the condition which causes a tendency to continue such a mode; as, *habit* rules us all. **2.** A particular condition, or course of action, physical or mental, induced by such a tendency; as, a *habit* of holding the head on one side; a *habit* of inattention.

Habit . . . is literally a way of being held, or of holding one's self. Thus defined, it must denote a permanent state of rest which has been reached as the result of action or growth, or a permanent form of activity, or of readiness or facility for any kind of activity. Dorsey *Human Intellect* pt. ii, p. 204. [s. 1890.]

3. Habitual manner of living, appearance, or temperament; established custom; as, a thoughtful *habit* of mind, a devout *habit* of body. **4.** *Psychol.* That characteristic set of the psychophysical mechanism which results from the facilitation of certain reactions, and the inhibition of other inconsistent or opposed reactions, under conditions dependent upon the previous growth and activities of this mechanism. In this sense of the word there are many habits as there are possible groupings of the reactions.

The phenomena of *habit* in living beings are due to the plasticity of the organic matter, by which their tissues are composed. Wm. James *Prin. of Psychol.* vol. i, p. 105. [s. *n.* & co. 1890.]



5. Specif., in botany, geology, and mineralogy, a characteristic mode of growth or physical appearance.

A species of plant that has been transformed from one soil or climate to another, frequently undergoes what botanists call 'a change of *habit*'—a change which, without affecting its specific characters, is yet conspicuous.
Spencer *Biology* vol. i, pt. ii, p. 245. [a. 1872.]

6. (1) An outer garment or garments; dress; garb; costume, especially one usually worn or that is prescribed or considered suitable for a special class, avocation, use, or occasion, as a woman's dress for horseback-riding, or the distinctive garment of a religious order.

Those who stood nearest over against me seemed to be persons of distinction, as I supposed from their *habit.*
Swift *Works, Travels,* vol. iii, p. 105. [w. p. n. 1871.]

(2) A piece of linen attached to a woman's collar and designed to hold it in place. **7.** *R. C. Ch.* A robe for the dead; a shroud. **8.** *R. C. Theol.* A permanent quality owing to which the subject is well or ill disposed. Habits may be inborn, infused, or acquired: the first are innate, the second supernaturally granted, the third obtained by the repetition of acts. **9.** *Forestry.* Same as STUMP. **10†.** Intimate acquaintance; familiarity. **11†.** Demeanor; bearing. [F., < L. *habitus,* pp. of *habeo,* have.] Syn.: custom, fashion, habitude, practise, routine, rule, system, usage, use, wont. *Custom* is the uniform doing of the same act in the same circumstance for a definite reason; *routine* is the doing of customary acts in a regular and uniform sequence and is more mechanical than *custom.* It is the *custom* of tradesmen to open at a certain hour, and to follow a regular *routine* of business until closing-time. *Habit* always includes an involuntary tendency, natural or acquired, greatly strengthened by frequent repetition of the act, and may be unpremeditable, or even unconscious. *Habitude* is habitual relation or association. *Custom* is chiefly used of the action of many; *habit* of the action of one; we speak of the *customs* of society, the *habits* of an individual. *Fashion* is the generally recognized *custom* in the smaller matters, especially in dress. A *rule* is prescribed either by some external authority or by one's own will; as, it is the *rule* of the house; or, I make it my invariable *rule. System* is the coordination of many acts or things into a unity, and more and better than *rule. Use* and *usage* denote the manner of using something; we speak of one person's *use* of language, but of the *usage* of many: a *use* or *usage* is almost always a *habit. Practise* is the active doing or something in a systematic way; we do not speak of the *practise,* but of the *habit* of going to sleep; we speak of a tradesman's *custom,* a lawyer's or a physician's *practise.* Educationally, *practise* is the voluntary and persistent attempt to make skill a *habit; as, practise* in penmanship. *Wont* is blind and instinctive *habit* like that which attaches an animal to a locality: the word is now almost wholly poetic. Compare synonyms for DRESS; MANNER.—**dyvour's habit** *(Scots Law),* a costume obligatory upon a bankrupt unless he could prove his insolvency to be in no measure culpable.—**hab'it-cloth'ʹ,** *n.* A woolen fabric from which riding-habits are made.—**h.-maker,** *n.* One who makes habits, especially riding-habits.—**h. of body,** 1. Roman. Black Letter. Script.

H, h, 1 ēch; 2 ēch, *n.* [ATTCHES, H's, or *Hs*, 1 ēch'ez; 2 ech'ĕz, *pl.*] **I.** A letter: the eighth in the English, Latin, and Romanic alphabets. Its sound is technically called a "glottal fricative," being produced by the friction of the speech-current against the vocal cords as they tighten in preparation for the utterance of a vowel, or loosen after a vowel has been uttered. The modern name ech is not a good name, since it does not contain the sound. On the analogy of *c* (sē), *g* (jē), and *v* (vī), *h* might well have been called hī. Its German name is hā.

On account of the early loss of initial *h* in popular Latin, the sound is virtually non-existent in French, Italian, and Spanish. In a few English words of Latin origin, as *heir, honor, hour*, it is still written, as in French, but not pronounced. The rule that initial *h* was to be pronounced in Anglo-Saxon words, but not pronounced in French words, made difficulty for the unlearned even in the Middle English period. This difficulty still survives in so called cockney speech, which quite regularly drops the *h* where it should be heard and often prefixes it where it does not belong. Even in refined speech initial *h* in an unstressed pronoun is apt to vanish after a strong stress, as in *ask 'im for ask him.*

In the digraphs *ch, gh, ph, th, sh,* the *h* loses its distinctive character, the combination denoting (except *ch* as in *church*) a simple sound. In words of Greek origin *rh* transliterates *ῥ*. The combination *wh* stands for *hw*, when the *w* is pronounced: but many speakers, especially in England, make no distinction between *white* and *wight*.

If averages 2.24 per cent. of the sounds as they are found on the pages of our literature. — *Harvard Oriental and Linguistic Studies* second series, p. 374. [S. 1874.]

The history of the characters is represented as follows:

Hiero-glyphic Sieve. | Egyptian Hieratic. | Phœni-cian. | Early Greek. | Ro-man. | English Script.

Capital H is from L. Gr. H, < early Gr. 𐌇, < Phœnician 𐤇, < Egyptian hieratic 𓉔, < hieroglyph 𓉔. In Greek, H came to be used for HĒ = ē, i. e., long *e*, called *ēta* (4th cent. B. C.), and the breathing was denoted by ⳾ (4th cent. B. C.), > ⊦, > ι (9th cent. A. D.). The hieroglyph represents a sieve, the Phœnician a fence, the Anglo-Saxon rune is called *hægl* hail; the Latin name is *ha*, > Folk-Latin *acca*, > F. *ache*, > Eng. *ache, aitch*, ēch. hab'it, *n.* **1.** A regular and fixed mode of action, whether physical or mental; also, the condition which causes a tendency to continue such a mode; as, *habit* rules us all. **2.** A particular condition, or course of action, physical or mental, induced by such a tendency; as, a *habit* of holding the head on one side; a *habit* of inattention.

Habit . . . is literally a way of being held, or of holding one's self. Thus defined, it must denote a permanent state of rest which has been reached as the result of action or growth, or a permanent form of activity, or of readiness or facility for any kind of activity. Powell *Human Intellect* pt. ii, p. 294. [n. 1890.]

3. Theol.* A permanent quality owing to which the subject is well or ill disposed. Habits may be inborn, infused, or acquired: the first are innate, the second supernaturally granted, the third obtained by the repetition of acts. **9.** *Forestry.* Same as STATUS. **10†.** Intimate acquaintance; familiarity. **11†.** Demeanor; bearing. [F., < L. *habitus,* pp. of *habeo,* have.] Syn.: custom, fashion, habitude, practise, routine, rule, system, usage, wont. *Custom* is the uniform doing of the same act in the same circumstance for a definite reason; *routine* is the doing of customary acts in a regular and uniform sequence and is more mechanical than *custom.* It is the *custom* of tradesmen to open at a uniform hour, and to follow a regular *routine* of business until closing-time. *Habit* always includes an involuntary tendency, natural or acquired, greatly simplifying the performance and definition of the act, and may be uncontrollable, or even unconscious. *Habitude* is habitual relation or association. *Custom* is chiefly used of the action of one person or of a few; we speak of the *customs* of society, the *habits* of an individual. *Fashion* is the generally recognized *custom* in the smaller matters, especially in dress. *Usage* is the doing of something by some external authority or by one's own will; as, it is the *rule* of the house; or, I make it my invariable *rule. System* is the coordination of many acts or things into a unity, and is more and better than *routine. Use* and *wont* denote the manner of using something; we speak of one person's *use* of language, but of the *usage* of many; a *use* or *usage* is almost always a *habit. Practise* is the doing of something in a systematic way; we do not speak of the *practise,* but of the *habit* of going to sleep; we speak of a tradesman's *custom,* a lawyer's or a physician's *practice.* Educationally, *practise* is the voluntary and persistent attempt to make skill a *habit; as, practise* in penmanship. *Wont* is blind and instinctive *habit* like that which attaches an animal to a locality: the word is now almost wholly poetic. Ha-cu'pha, ? ha-kŭ'fə; 2 ha-cŭ'fa, *n.* *Bib.* (Douai).

had, *rt.* [Scot.] To hold.

had, ? had; 2 hăd, *imp.* of HAVE, *v.*: used as an auxiliary in forming the pluperfect.

Have is used improperly in such expressions as "*Had I have* known it." *Had*, used elliptically for *if I had*, itself carries the contingency, and the word *have* is quite unnecessary. "*Had I known* this," *Had he done* that," are conditional clauses, each complete in itself. Improper confusion of possibilities: **Had better, had rather,** are forms which have been disputed by certain grammatical critics, from the days of Samuel Johnson. Such critics insisting upon the substitution of *would* or *should*, but these expressions are thoroughly established as English idioms, having the almost universal popular and literary sanction of centuries. (See note under HAVE, *v.*) "I *would rather* not go" is undoubtedly correct when the purpose is to emphasize the element of choice or will in the matter; but in all ordinary cases "I *had rather* not go" has the merit of being idiomatic and easily and universally understood.

I *had rather* be a doorkeeper in the house of my God than to dwell in the tents of wickedness. *Ps.* lxxxiv, 10

If for "You *had better* stay at home" we substitute "You *should better* stay at home," an entirely different meaning is expressed, the idea of expediency giving place to that of obligation.

Would rather may always be substituted for *had rather*. *Might rather* would not have the same meaning. *Would* and *should* do not go well with *better*. In one instance one is impossible. "I can better afford," because *can* is especially associated with *effort*. In other instances, *had* has the sanction, the idiomatic force, nor the precise meaning of *had better*.

Ha'des, ? hē'dēz; 2 hā'dēs, *n.* *Bib.* In the Greek New Testament and Revised Version, the condition or abode of the souls of the dead; Sheol; sometimes, hell or the infernal regions.

Hades is used in the New Testament of the abode of all the departed, being the Greek equivalent of the Hebrew term *Sheol*, the unseen spirit-world. It was inserted at a late period into the Apostles' Creed as a translation of *inferna*, which first appears in the Creed of Aquileia, about A. D. 390. Some render it *hell*, which is not etymologically correct. Some editions of the Creed have it *place of departed spirits*, and some leave it untranslated. *Bib. Matt.* ix, 23.

The good are in the Paradise of *Hades*, or in Abraham's Bosom, and the bad are in *Hades*, or the Tartarus of *Hades*.

2. *Gr. Myth.* (1) One of the sons of Kronos and Rhea; brother of Zeus and Poseidon. He was king of the underworld, which he left only once, when he stole Persephone, who became his wife. In primitive Greece he was a benignant god who watched over the harvest and agriculture, hence his name Pluto, the Wealth-giver, whose emblem was the cornucopia. In later times he was king of the dead, and was usually represented as a bearded man seated on a throne, clad in a himation, and holding in his hands a scepter and a patera. He was the owner of a helmet which rendered him invisible. (2) The underworld itself: the abode of the dead; a dark kingdom guarded by the many-headed dog Cerberus, and surrounded by the river Styx, over which the ferryman Charon conducted the souls of the just and unjust whose bodies had been buried with due rites. It was divided into two parts, Elysium (abode of the just) and Tartarus (abode of the wicked), and through its gloom flowed the Cocytus (river of wailing), the Pyriphlegethon (river of fire), and the Lethe (river of forgetfulness).

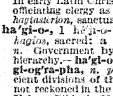
Hague, 1 hēg; 2 hăg, The. A city, the court capital of the Netherlands; capital of S. Holland province. [D., meadow.]

The Hague tribunal, a permanent international arbitration court established in The Hague by the International Peace Conference: a panel of persons willing to serve as arbitrators and composed of not more than four delegates appointed by each state. In any international dispute which may become a subtribunal or commission is chosen by the powers immediately concerned, or on their failure to agree upon this subtribunal, each power chooses two arbitrators who then choose an umpire or they designate this latter choice either to a third power or to two powers selected by them.



The *Hague Tribunal*, officially, The Permanent Court of Arbitration, was established under the Act of July 29, 1899, signed and subsequently ratified on the part of 24 Powers. Under Protocol of June 14, 1904, 14 more Powers, and two minor Powers, the number of Powers represented in the Court has been largely increased. The purpose is to facilitate arbitration for international disputes which it has been impossible to settle by diplomacy. *The Statesman's Year-Book* 1912. p. 1341.

hal-lu'ci-na'tion, 1 ha-lū'si-nē'shən; 2 hă-lū'si-nā'shən, *n.* 1. *Psychol.* & *Pathol.* An apparent perception (presentation of sense) with no corresponding external object, as the sights seen and sounds heard by one in delirium tremens or hypnosis.

A *hallucination* differs from an *illusion* or a *fantasm* in that the illusion has some foundation in external reality, and the fantasm is chiefly a creation of imagination rather than a distortion of sense. When *hallucinations* become so persistently impressed on the mind as to induce absolute belief in their reality as facts, and the subject sees in conformity with such belief, the mental condition comes within the scope of *delusion*, which is moral unsoundness of mind. A *collective* hallucination is one which affects several persons alike. Various hallucinatory perceptions, as those of smell, etc., are symptoms of oncoming brain-disease. When an unreal object is perceived as real, the hallucination is said to be *positive*; it is *negative* when it consists in a failure to see what is really present. Altho the distinction, on the ground of the objective character of the stimulus, between an *illusion* and a *hallucination*, holds fairly well, it is only relative at best.

Illusion and *hallucination* shade one into the other much too gradually for us to draw any sharp line of demarcation between them. JAMES SULLY *Illusions* p. 111 (L. 1881.)

2. An impression not founded on fact; a mistaken notion; a delusion.

Ham'i-tal, 1 ham'ı-tal; 2 hăm'i-tăl, *n.* *Bib.* (R. V., margin).

Ham'ite¹, 1 ham'ait; 2 hăm'īt, *n.* **1.** A descendant of Ham, second son of Noah. **2.** One belonging to the Hamitic stock; a Chamite. **3.** A member of the Caucasian race which from earliest days inhabited northeast Africa and the Canary Islands.

Believed by some authorities to be connected with the Semites, the Hamites were among the first races of mankind to become highly civilized. They include among others: (1) The early Egyptians, represented in modern Egypt by the Copts, or native Christians, and the fellaheen, or Moslem peasant class. (2) The original inhabitants of the elevated districts of Abyssinia. (3) Somalis, Gallas in Abyssinia, and the Danakils. See AFRICAN. They have mixed extensively with the negro races, but still retain their light complexion and, in many cases, are exceptionally well developed physically. The earliest known writing is to be found in the Egyptian inscriptions which were made by members of the Hamite stock.

4. A negro: from a popular belief that all negro peoples are descendants of Ham.— **Ham'i-tism,** *n.* The condition of being a Hamite.

ha'mite², 1 hē'mait; 2 hā'mīt, *n.* A fossil hamitoid cephalopod. [< L. *hamus*, hook.]

Ha-mit'ic, 1 hə-mit'ık; 2 ha-mĭt'ic, *a.* Of or pertaining to Ham, Noah's second son (*Gen.* x), or to any or all peoples supposed to be his descendants, or to their language. The Hamitic language is divided into three parts: *Egyptian*, *Ethiopic* or *Cushitic*, and *Libyan* or *Berber*. Of these three varieties, all of which are partly monosyllabic and have no apparent grammatical system, the ancient Egyptian is the most important. It is the only Hamitic tongue which has records and is believed to have been the first written language. It is extinct, and was followed by the Coptic, now only kept alive in the liturgy of the Coptic Church. *Egyptian* was limited to the district around the valley of the Nile. The *Ethiopic* language, used in the districts along the Red Sea, north and south of Abyssinia, comprises various Agao dialects. The *Libyan* or *Berber* division used in the coast district of northern Africa includes various dialects, such as the Kabyle, the Shilha, and the Tuareg. A resemblance appears between the Hamitic and Semitic languages, but the relationship has not been fully established. See LANGUAGE.— **Hamitic stock,** the African linguistic stock of the Mediterranean or Eurafrican race, closely allied to the Semitic stock. It embraces three groups: (1) the *Egyptian*, including old Egyptian and Coptic; (2) the *Libyan*, including Libyan, Berber, Kabyle, Tuareg, and Guanche, and (3) the *Ethiopian*, including Somali, Galla, Beja, Danakil, and Agoa. See AFRICAN.

[< HAP¹.]

To be loved and chosen by a good man is the best and sweetest thing which can *happen* to a woman.

LOUISA M. ALCOTT *Little Women* p. 112. [n. BROS. 1888.]

SYN.: bechance, befall, betide, chance, come to pass, fall, fall out, occur, supervene, take place. A thing is said to *happen* when no design is manifest, or none especially thought of; it is said to *chance* when it appears to be the result of accident. (Compare synonyms for ACCIDENT.) An incident *happens* or occurs: something external or actual *happens* to one; a thought or fancy *occurs* to him. *Befall* and *betide* are transitive; *happen* is intransitive; something *befalls* or *betides* a person or *happens* to him. *Betide* is especially used for anticipated evil, the thought of as waiting and coming at its appointed time; as, woe *betide* him! One event *supervenes* upon another event, one disease upon another, etc. (“Transpire,” in the sense of *happen*, is not authorized by good usage: a thing that has *happened* is properly said to *transpire* when it becomes known.) — Prep.: an event happens *to* a person; a person happens *on* or *upon* a fact, discovery, etc.

—to happen in [Colloq.], to make a chance social call.

—to h. in with [Colloq.], to meet by chance. **—to h. to** *happened in with* congenial companions.— **to h. on**, to come across by chance; light upon. [*happen* he'd a laughed.

hap'pi-ly, 1 hap'i-li; 2 hăp'ĭ-lĭ, *adv.* **1.** In a happy or delightful way or manner; felicitously or gracefully. **2.** With good fortune; fortunately. **3.** Haply.

hap'pi-ness, 1 hap'i-nes; 2 hăp'ĭ-nĕs, *n.* **1.** The state or quality of being happy. Specif.: (1) The pleasurable experience that springs from possession of good, the gratification of the desires, or relief from pain or evil; enjoyment; as, one's *happiness* depends on oneself.

There is no *happiness* in having or in getting, but only in giving. DAUSOUS *Gradus ad Parn.* p. 30. [T. & co. 1850.]

(2) A condition in which pleasure predominates over pain or evil; a continued experience of pleasures and joys; as, *happiness* follows obedience to law.

2. A state of being, more or less permanent, in which a large measure or the full complement of satisfaction, especially of the higher intellectual and moral kinds, is experienced; a state of felicity; blessedness; as, the *happiness* of heaven.

In this use of the word, happiness is a subjective condition resulting, in moral agents, not from the possession of something, as commonly supposed, but from the free, full, unimpeded use of the powers in unselfish service. It is looked upon by one great school of ethics as furnishing the supreme good and end. The word is used, however, in various senses, as for sensual pleasure (*hedonism*), sensuous enjoyment (*epicureanism*), rational satisfaction (*rational eudemonism*), the pleasures of an approving conscience (*enthusiasm*), spiritual blessedness (*Paleyism*), etc. See GOOD.

By *happiness* is meant the complement of all the pleasures of which we are susceptible.

HAMILTON *Metaphysics* p. 14. [G. & s. 1859.]

3. Good fortune; luck; prosperity. **4.** Unstudied grace, as of manner or action; felicitousness.

SYN.: blessedness, bliss, content, delight, enjoyment, felicity, gladness, joy, pleasure, rejoicing, satisfaction, triumph. *Comfort* may be almost wholly negative, being found in security or relief from that which pains or annoys; there is *comfort* by a warm fireside on a wintry night; the sympathy of a true friend affords *comfort* in sorrow. *Enjoyment* is more positive, always implying something to be definitely and consciously delighted in; a sick person finds *comfort* in relief from pain, while he may be far from a state of *enjoyment*. *Pleasure* is still more vivid, being an arousing of the faculties to an intensely delightful activity. *Gratification* is more tranquil than *pleasure*, being the agreeable consciousness of having all our faculties demand or crave; when a worthy *pleasure* is enjoyed, worthy *satisfaction* remains. As referring to a mental state, *gratification* is used to denote a mild form of *happiness* resulting from some incident not of very great importance; *satisfaction* should properly express a *happiness* deeper, more complete, and more abiding; but as intellect or sensibilities of a low order may find *satisfaction* in that which is very poor or unworthy, the word has come to be feeble and tame in ordinary use. *Happiness* is more positive than *comfort*, *enjoyment*, or *satisfaction*, more serene and rational than *pleasure*; *pleasure* is of necessity transient; *happiness* is abiding, and may be eternal: thus, we speak of *pleasures*, but the plural of *happiness* is scarcely used. *Happiness*, in the full sense, is mental or spiritual or both, and in view of resulting or from some worthy *gratification* or *satisfaction*; we may speak of a brute as experiencing *comfort* or *pleasure*, but scarcely as in possession of *happiness*; we speak of vicious *pleasure*, *delight*, or *joy*, but not of vicious *happiness*. *Felicity* is a colder and more formal term than *happiness*. *Gladness* is *happiness* that overflows, sometimes finding itself in song, voice, manner, and action. *Joy* is more intense than *happiness*, deeper than *gladness*, to which it is akin, and more enduring than *pleasure*. *Rejoicing* is *happiness* or *joy* that finds utterance in words, song, festivity, etc. *Delight* is vivid, overflowing *happiness* of a somewhat transient kind; *ecstasy* is a state of extreme or extravagant *delight* so that the one affected by it seems almost beside himself with *joy*; *rapture* is closely allied to *ecstasy*, but is more serene, exalted, and enduring. *Triumph* is the *joy* resulting from victory, success, achievement. *Blessedness* is at once the state and the sense of being divinely blessed; as, the *blessedness* of the righteous. *Bliss* is ecstatic, perfected *happiness*; as, the *bliss* of heaven. See COMFORT.— ANTONYMS: see those for GRIEF.

hap'py†, *vt.* To make happy.

hap'py, 1 hap'i; 2 hăp'ĭ, *a.* [HAP'PI-ER; HAP'PI-EST.] **1.** Free from pain or present trouble or evil, and experiencing delight or satisfaction from the possession and use of good; enjoying pleasure or realizing good; joyous; blessed; satisfied, as, to be *happy* in one's heart, a *happy* family. **2.** Yielding or marked by happiness; containing or bringing joy or blessedness; as, *happy* moments;

a *happy* sixth. **3.** Indicating or marked by good fortune; lucky; favorable; propitious; as, a *happy* omen.

The *happy* result was but the sudden plucking of the fruit which had slowly ripened.

BANCROFT *Miscellaneous Oration, Nov 20, 1854* p. 515. [n. 1855.]

4. Possessing or characterized by ready felicity, as of speech or action; dexterously or fortunately successful; opportune; felicitous; as, he was *happy* at repartee.

Hoodoo, who often used the same phrase, called Egypt 'the gift of the Nile.' P. V. N. MYERS *Anc. Hist.* p. 15. (e. a. co. 1888.)

5. [Slang.] Drunk enough to be merry. [< HAP¹, *n.*].

SYN.: blessed, blissful, blithe, blithesome, cheerful, cheering, delighted, delightful, delightsome, fortunate, glad, joliy, joyful, joyous, lucky, merry, mirthful, pleased, prosperous, rejoiced, rejoicing, successful. *Happy* originally refers to something that comes "by good hap," a chance that brings prosperity, benefit, or success.

And grasps the skirts of *happy* chance.

TENNYSON *In Memoriam* lxiii, st. 2.

In this sense *happy* is closely allied to *fortunate* and *lucky*. (See FORTUNATE.) *Happy* has, however, so far diverged from this original sense as to apply to advantages where chance is not recognized, or is even excluded by direct reference to the divine will, when it becomes almost equivalent to *blessed*.

Behold, *happy* is the man whom God correcteth. *Job* v. 17.

Happy is also applied to the ready dexterity or skill by which favorable results (usually in minor matters) are secured; as, he has a *happy* wit; *happy* at retort. (See CLEVER.) In its most frequent present use, *happy* is applied to the state of one enjoying happiness, or to that by which happiness is expressed; as, a *happy* heart; a *happy* face; hearty laughter; *happy* converse. (Compare synonyms for HAPPINESS.) *Cheerful* applies to the possession or expression of a moderate and tranquil happiness. A *cheery* word spontaneously gives cheer to others. *Debonair* in its more distinctly planned to cheer and encourage. *Gay* applies to an effusive and superficial happiness (often not really worthy of that name) perhaps resulting largely from abundant animal spirits; we speak of *gay* revelers or a *gay* horse. A *buoyant* spirit is, as it were, borne up by joy and hope. A *sunny* disposition has a constant tranquil brightness that irradiates all who come within its influence. Compare CAUTIOUS; CHEERFUL; FORTUNATE.—ANT.: see synonymsfor SAD.

—Prop.: a happy event *for* him; happy *as* a reply; happy *in* his home, *with* friends, *among* his children; happy *at* the discovery, *over* his success.

No one can go *harmless* for doing an evil act, because another has done it before him.
COOPER *Deerslayer* ch. 11, p. 192. [s. BROS. & co. 1845.]

— **harm'less-ly**, *adv.*— **harm'less-ness**, *n.*

Har-mo'di-as, 1 hȧr-mō'di-ȧs; 2 hȧr-mō'di-ȧs, *n.* (—514 B.C.) An Athenian youth who conspired against and killed Hipparchus; executed. See ARISTOGITON. **Har-mo'di-ost**.

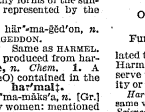
har'mol, 1 hȧr'mōl *or* -mel; 2 hȧr'mōl *or* -mȯl, *n. Chem.* A compound formed by the action of hydrochloric acid on harmin.— **har-mol'ic**, *a.* Designating an acid ($C_{12}H_{10}N_2O_3$) formed by the action of potassium hydroxid on harmol.

Har'mon, 1 hȧr'mon, 2 hȧr'mon, *n. Bib.* (R. V.). *Amos* iv, 3.

Harmon', *n.* A county in Oklahoma.

har-mo'ni-a, 1 hȧr-mō'ni-ȧ; 2 hȧr-mō'ni-ȧ, *n. Anat.* A suture formed by the apposition of two borders which are regular or nearly so. [< Gr. *harmonia*; see HARMONY.]

Har-mo'ni-a, *n.* [Gr.] *Myth.* The personification of universal harmony, daughter of Ares and Aphrodite, wife of Cadmus; typifying by her birth from love and strife the arising of order from chaotic attraction and repulsion, and by her union with the alcentor of the alphabet the civilizing of a rude people by art and letters.



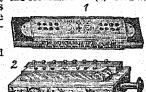
har-mo'ni-al, 1 hȧr-mō'ni-ȧl; 2 hȧr-mō'ni-ȧl, *a.* **1.** Characterized by harmony or agreement; harmonious. **2.** Same as HARMONIC, *a.*, 4.

har-mon'ic, 1 har-men'ik; 2 hȧr-mȯn'ic, *a.* **1.** Producing or pertaining to musical or other harmony; correspondent; concordant; consonant; harmonious.

His [Wm. Morris's] *harmonic* turn is shown in the arrangement of them all under the signs of the zodiac. We have one classical and one mediæval legend for each month of the year.
E. C. STEDMAN *Victorian Poets* p. 375. [o. & co. 1876.]

2. *Anat.* Pertaining to or forming a harmonia; as, a *harmonic* suture. **3.** *Acoustics.* Attendant upon or accessory to a primary tone; as, a *harmonic* note. **4.** *Math.* Derived from or originally suggested by the numerical relations between the vibrations of the musical harmonics or overtones of the same fundamental tone; applied in a great number of cases where the origin of the word is almost lost sight of; as, *harmonic* functions; the *harmonic* analysis. See phrases. **5.** *Cranium.* Having the conformation of the skull and face approximately of the mesal type, as a narrow face with a delicate orthognathic skull, or a broad face with a brachycephalic skull: opposed to *disharmonic*. [< L. *harmonicus*, < Gr. *harmonikos*; *harmonia*; see HARMONY.]— **center of the harmonic mean**, a point P so situated among points A, B, C, etc., on a line, that, when measures are made from a point of reference O on the line, the distance OP is the harmonic mean of OA, OB, OC, etc.— **harmonic pencil**, a pencil of four planes projecting harmonic points from an axis not in the same plane with their bearer.— **harmonic ratio** (*Elec.*), an alternating current whose values, graphically represented, constitute a harmonic or sine curve.— **harmonic curve** (*Math.*), a curve whose ordinates are a simple harmonic function of their abscissas; a sine curve.— **harmonic division** of a line AB (produced) by two points X and Y, such that AX : BX :: AY : BY. The line is said to be divided *harmonically*.— **mean, harmonic**, a quantity whose reciprocal is the arithmetical mean of the reciprocals of other quantities.— **harmonic mode** (*Mus.*), that form of the minor mode or scale having a minor sixth and a major seventh. **harmonic sequence**.— **harmonic section**, a division by the foot of a perpendicular let fall on the diameter of a circle from a particle moving with uniform velocity in that circle; a method to which the phenomena of stationary points approximates when it turns a crank uniformly. Called *simple harmonic motion*, as distinguished from the resultant of two or more such motions.— **harmonic series**, a series of reciprocals of numbers in arithmetical progression, as $^1/_{13}, ^1/_{9}, ^1/_{5}$, etc.— **harmonic proportion**, the relation between three consecutive terms of a harmonic series.— **harmonic triangle** (*Philol.*), that phonetic principle in the Turkish-Scythian languages by which a light or palatal vowel (*e, i, ö, ü*) in a root is followed by a light one in the various endings, and a heavy vowel (*a, o, u*) in the root is followed by a heavy one in the ending; as, *el-mak, see-mek*. WHITNEY *Life and Growth of Lang.* Compare UMLAUT.

har-mon'ic, *n.* *Acoustics.* An attendant or secondary tone, produced by the vibration in aliquot parts of the same body or string which gives, by its complete simultaneous vibration, the primary or fundamental tone; an overtone. In a piano the vibration is so regulated that higher harmonics than the seventh are not present. Harmonics may easily be detected by a practised ear. They serve to modify tones and give them their distinctive quality or timbre.



Harmonics generally coexist with the fundamental sound in the same vibrating body. MARY SOMERVILLE *Connection of the Phys. Sciences* § 17, p. 136. [o. 1853.]

2. A note on a stringed instrument produced by lightly stopping a string so as to dampen the fundamental tone and bring out one of the overtones naturally to it. *pl.* [Rare.] The department of acoustics that treats of musical sounds. **4.** *pl. Wireless Teleg.* Attendant or secondary vibrations in an antenna. **5.** *Meth.* One of a class of functions which are the successive terms of a development of a nearly spherical mass due to its attraction; as, solid *harmonics*; spherical *harmonics*; zonal *harmonics*.— **electrical harmonics**, cyclical variations of current in, or voltage in, a circuit, having frequencies that are integral multiples of the frequency impressed upon the circuit by the generator. In long transmission lines, with high generator frequency, surges, accompanied by high currents or voltages, may result from the presence of harmonics. Harmonic frequencies bear to the generator frequency the relation to harmonic sequence due to a fundamental in sound.— **perturbed harmonic** (*Acoustics*), an overtone that does not harmonize with the fundamental, owing to disturbing action or the frequency of vibration.— **solid zonal h.** (*Math.*), in spherical coordinates, a particular solution of Laplace's equation, represented by the formula $rᵐP_m(\cos\theta)$.— **spherical h.** (*Math.*), any homogeneous function, V, of x, y, z, that satisfies the equation $\frac{d^2V}{dx^2} + \frac{d^2V}{dy^2} + \frac{d^2V}{dz^2} = 0$.— **surface zonal h.** (*Math.*), the coefficient of z^m in developing $(1-2z\cos\theta + z^2)^{-\frac{1}{2}}$ in ris-ing powers of z, represented by the formula $P_m(x)$ or $P_m(\cos\theta)$.— **tesseral harmonics** (*Math.*), special cases of the spherical harmonic, represented by the formulas

$$\cos n\,\phi\,\sin^n\theta\,\frac{d^nP_m(\mu)}{d\mu^n} \text{ and}$$

$$\sin n\,\phi\,\sin^n\theta\,\frac{d^nP_m(\mu)}{d\mu^n}$$

Harmonica.

har-mon'i-ca, *n.* [HARMONI-KAS; 2 hȧr-mȯn'i-ca, *n.* Any one of several musical instruments: (1) A set of musical glasses. See GLASS. (2) A series of oblong pieces of glass or metal, played by striking with a small mallet. (3) A reed-instrument played by the breath; a mouth-organ. **har-mon'i-con**‡. (4) A mixture organ-stop. [Fem. of L. *harmonicus*; see HARMONIC.] — **flute harmonica**, one having a mouthpiece at the end instead of openings at the side.— **Sonnzee's h.**, a safety-device for mines, which indicates the presence of firedamp by a mineral cone given out from a glass lamp-chimney in which, in pure air, the flame burns silently.

har-mon'i-cal, 1 hȧr-mon'i-kȧl; 2 hȧr-mȯn'i-cal, *a.* **1.** Harmonic. **2.** *Gr. Mus.* Same as ENHARMONIC, 3.

har-mon'i-cal, *n. Acoustics.* A species of harmonium determined and tuned to give a musical scale, which produces 24 overtones of the tone of 66 vibrations per second and 16 overtones of the tone of 132 vibrations per second.— **harmonical-har'p**, *n.* A device attached to a harmonical by means of which the first sixteen harmonics of C, exclusive of the seventh and fourteenth, can be sounded simultaneously. The two excluded harmonics can be included, if desired.

har-mon'i-cal-ly, 1 hȧr-mon'i-kȧl-i; 2 hȧr-mȯn'i-cal-y, *adv.* **1.** In a harmonic manner; harmoniously; specif., in music, in a manner suitable to harmony as distinguished from rhythm or melody.

The mind, as some suppose *harmonically* composed, is roused up at the tunes of music.
BURTON *Anat. Melancholy* p. 335. [z. w. s. 1857.]

2. *Acoustics.* In or by harmonics or overtones. **3.** *Meth.* In a harmonic relation; by harmonic division. See HARMONIC, *a.*— **harmonically conjugate points** (*Math.*), two points which divide a given line harmonically.

har-mon'i-chord, 1 hȧr-mon'i-kōrd: 2 hȧr-mȯn'i-cȯrd, *n.* A stringed instrument with a keyboard, producing tones similar to those of a violin by the friction of rosined wheels or small revolving cylinders. Sometimes called *piano-violin*.

har-mon'i-ci, 1 hȧr-mon'i-sai, *n. pl. Anc. Mus.* Theorizers who located rules of harmony upon the effects perceived by the ear.

har-mon'i-cism, 1 hȧr-mon'i-sizm; 2 hȧr-mȯn'i-cism, *n.* The condition of being harmonically proportioned; [C].

har-mon'i-con, 1 hȧr-mon'i-kon; 2 hȧr-mȯn'i-cȯn, *n.* [-CA, *pl.*] **1.** An orchestrion. **2.** An acoustical apparatus in which a flame of hydrogen burning in a glass tube emits a musical tone. **3.** Same as *harmonicon*; harmonicon; harmonicon, neut. of *harmonikos*; see HARMONIC.]— **chemical harmonicon**, a musical instrument consisting of tubes of different sizes, in which tones are produced by the burning of gas; a flame-organ; pyrophone.

har-mo'ni-ous, 1 hȧr-mō'ni-us; 2 hȧr-mō'ni-ȯs, *a.* **1.** Concordant in sound; possessing harmony; musical. Distant church-bells make *harmonious* music with the little singing-birds near at hand.
ELIZABETH C. GASKELL *Ruth* p. 37. [H. M. & co. 1858.]

2. Free from discord; agreeing in thought or expression; peaceable; as, a *harmonious* church or family. **3.** Having parts proportioned to each other or relations adapted to each other; symmetrical; congruous.

It may not inaccurately be said to be the *harmonious* plan of the universe that its two grand elements of mind and matter should be accurately adjusted to each other.
EVERETT *Orations and Speeches* p. 350. [o. & co. 1836.]

[< L. *harmonia*; see HARMONY.] Syn.: see ACCORDANT.— **har-mo'ni-ous-ly**, *adv.*— **har-mo'ni-ous-ness**, *n.*

har-mon'i-phon, 1 hȧr-mon'i-fon; 2 hȧr-mȯn'i-fȯn, *n.* A musical instrument, now obsolete, played with a keyboard, in which the sounds are produced by reeds set in a tube and vibrating under pressure from the breath. [< Gr. *harmonia* (see HARMONY) + *phōnē*, sound.]

har''mo-ni-sa'tion, etc. See HARMONIZATION, etc.

har'mo-nist, 1 hȧr'mo-nist; 2 hȧr'mo-nist, *n.* **1.** A master of the principles of musical harmony.

The awkwardness of this progression is so obvious that *Harmonists* agree in condemning it.
CUMMINGS *How to Observe Harmony* p. 24. [ar. & w.]

2. A student or expounder of the science of harmony of different writings, as of the Christian Gospels. **3.** [H-] *Ch. Hist.* A member of the communistic, second adventist, celibate society established at Harmony, Pa., in 1803, by George Rapp of Wurtemberg; a Rappite; Economite. **H'r'mo-nite†**. **4.** *pl.* Same as HARMONICI. **5.** [Rare.] A harmonizer.

The intelligence which produces or controls human actions and occurrences, is often represented by the Mystics under the name and notion of the supreme *harmonist*.
COLERIDGE *Works*, Harper's ed. vol. ii, p. 121. [n. 1858.]

— **har''mo-nis'tic, a.** Pertaining or relating to harmony, specifically to the work of literary harmonists.

har-mo'ni-um, 1 hȧr-mō'ni-um; 2 hȧr-mō'ni-ūm, *n.* A reed-organ, especially one in which the air is compressed in the bellows and driven by foot through the reeds; the original form, still made, and used by many who prefer its harsher tone to the softer tone of the more modern American organ, which uses suction. [< Gr. *harmonion*, neut. of *harmonios*, harmonious, < *harmonia*; see HARMONY.] **har-mo'ne-ant**.

har'mo-nize, 1 hȧr'mo-nīz; 2 hȧr'mo-nīz, *v.* [-NIZED; **har''mo-nis'ing**.] *vt.* **1.** To bring to a state of agreement or harmony; set in order or proportion; reconcile; as, to *harmonize* hostile parties, conflicting interests, or contradictory reports.

Electricity now *harmonizes* a vast series of partial laws and facts between which it was a truly difficult task to discover any resemblance.
W. S. JEVONS *Logic* p. 268. [MACM. 1878.]

2. To arrange in musical harmony; set accompanying parts to; as, to *harmonize* a melody.

II. *i.* **1.** To agree in character or activity; accord in meaning or impression; be in fit order or proportion; as, their pasts do not *harmonize* with their relative *harmonize*. **2.** To be in musical harmony; as, the voices and instruments *harmonize*. **3.** To be in peace, as a household. Syn.: see ACCOMMODATE; ACCORD; AGREE; COMPORT.— **har''mo-ni-sa'tion** or **-sa'tion**, *n.* The act or process or state of being harmonized; a bringing or being brought into harmony.— **har'mo-niz'er** or **-nis'er**, *n.*

har-mon'o-gram, 1 hȧr-mon'o-gram; 2 hȧr-mȯn'o-gram, *n.* A figure or set of figures drawn with a harmonograph.

har-mon'o-graph, 1 har-mon'o-graf; 2 hȧr-mȯn'o-grȧf, *n.* An instrument or apparatus that registers the resultant of two simple harmonic motions in different planes at different angles. It is often operated by means of pendulums.

har''mo-non'e-ter, 1 hȧr''mo-nen'i-tar; 2 hȧr''mo-nȯn'e-ter, *n.* An instrument for measuring the harmonic relations of sounds, consisting of a string stretched over movable bridges. [< HARMONY + -METER.]

har'mo-ny, 1 hȧr'mo-ni; 2 hȧr'mo-ny, *n.* [-NIES, 1 -niz; 2 -nis, *pl.*] **1.** (1) The quality of being pleasing to the ear: said especially of the agreement of musical sounds; as, the *harmony* of cultivated voices.

In Milton . . . the *harmony* of the verse is but the echo of the inward music which the thoughts of the poet breathe.
NEWMAN *Essays Crit. and Hist.* vol. i, p. 26. [z. & co. 1890.]

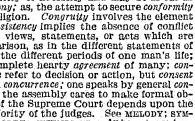
(2) An arrangement of musical parts with a theme; as, a *harmony* correct; composed. (3) The science that treats of such arrangement; as, a master of *harmony*. See MUSIC; COUNTERPOINT.

With the growth of the contrapuntal art may be traced the development of choral *harmony* with its divisions.

H. G. B. HUNT *Concise Hist. Music* p. 152. (s. 1890.)

2. Accord in feeling, manner, or action; as, the *harmony* of a loving family; *harmony* of different voices.

Be in *harmony* with the mind of Christ, have the idea He had, be one with Him, and you shall understand the machinery of this world. ROBERTSON *Sermons* 2d ser. 273. (s. 1870.)



3. Completeness and perfection resulting from diversity in unity; agreement in relation; orderliness; in art, a normal state of completeness in the relations of things to each other: an essential in form as an element of beauty; as, the *harmonies* of nature; the *harmony* of a plan well thought out; the *harmony* of a ship's lines. **4.** A literary work to display the agreement of different books, as histories; as, a *harmony* of the Gospels. **5.** *Rhet.* The absolute property of style that has to do with the sounds of words as expressions of thought. *Harmony* is distinguished (1) from *euphony*, which regards sounds only as sounds, and (2) from *suggestive properties*, which regard the terms presented to the mind.

Harmony, in the wider sense, includes Harmony proper, Rhythm and Melody. DAY *Art of Discourse* p. 256. (s. 1867.)

4. *Astron.* A false subtone. [< F. *harmonie*, < L. *harmonia*, < Gr. *harmonia*, music, a joining, < *ἁρ-ω*, join.]

SYN.: accord, accordance, agreement, amity, concord, concurrence, conformity, consonance, consent, consistency, consonance, symmetry unanimity, uniformity, union, unison, unity. When tones, thoughts, or feelings, individually different, combine to form a consistent and pleasing whole, there is *harmony*. *Harmony* is deeper and more essential than *agreement*; we may have a superficial, forced, or patched-up *agreement*, but never a superficial, forced, or patched-up *harmony*. *Concord* implies more volition than *accord*; as, their views were found to be in perfect *accord*; or, by conference *concord* was secured; we do not secure *accord*, but discover it. We may speak of being in *accord* with a person on one point, but *harmony* is wider in range. *Conformity* is submission to authority or necessity and may be as far as possible from *harmony*; as, the attempt to secure *conformity* to an established religion. *Congruity* involves the element of suitableness; *consistency* implies the absence of conflict or contradiction in views, statements, or acts which are brought into comparison, as in the different statements of the same person or the different periods of one man's life; *unanimity* is the complete hearty *agreement* of many; *consent* and *concurrence* refer to decision or action, but *consent* is more passive than *concurrence*; one speaks by general *consent* when no one in the assembly cares to make formal objection; a decision of the Supreme Court depends upon the *concurrence* of a majority of the judges. See MELODY; SYMMETRY. Compare AGREE; FRIENDSHIP. — ANT.: antagonism, conflict, controversy, difference, disagreement, discord, disproportion, dissension, disunion, hostility, incongruity, inconsistency, opposition, schism, separation, variance.

—diffused harmony, harmony in which the notes of the chordsare at wide intervals from each other: opposed to **close harmony**, in which they are as near each other as possible. Called also **open** or **spread harmony**. **—dominant harmony**, (*a*) in music, (*b*) a dominant chord (see under CHORD): (*c*) generally those chords for which the dominant acts as a bass or which are associated with it as a basis of reference. **—economic harmonies**, social advantages and correspondences produced by the natural work of economic laws and forces. — essential harmony, a chord dependent of passing-tones. **— eternal h.**, the kingdom of heaven. **— extended h.**, dispersed harmony. **— figured h.**, harmony in which suspensions, passing-notes, etc., are used frequently, or foreign tones often occur. **— h. of the spheres**, same as MUSIC OF THE SPHERES. **— natural h.** (*Mus.*), the harmony of the common chord or triads, with no modulations and no derived chords.

Dispersed Harmony.

har'most,) hăr'mōst; 2 hăr'mōst, *n. Ant.* A governor
hart,) of a city subject to the Persians; a provincial governor. [< Gr. *harmostēs*, governor, < *harmozō*, set in order.]

har'mome, 1 hăr'mō-tēm; 2 hăr'mo-tōm, *n. Mineral.* A vitreous, white, passing into gray, yellow, red, or brown, hydrous silicate of the zeolite family ($H_{12}(BaK_2)Al_8Si_8O_{40}$), crystallizing in the monoclinic system, and forming characteristic cross-shaped twins. [< Gr. *harmos*, joint, + *temnō*, cut.] — **lime harmotome**, same as PHILLIPSITE.

harn, 1 härn; 2 härn, *n.* [Scot.] A very coarse linen.

har'nack, 1 hăr'nāk; 2 hăr'nak, *n.* (1851—). A German Protestant ecclesiastical historian and theologian; *History of Dogma*, *Essence of Christianity*, etc.

Har'ns-ber-ry, 1 hăr'nz-bĕr-i, *n. Bib.* (Doual).

har'nels†, *n.* Harness; armor; furniture.

har'nelse†, *vt. & vi.* To harness; dress.

Har'ns-pher, 1 hăr'nz-fĕr; 2 hăr'ne-fer *or* hăr'nəfĕr, *n. Bib. 1 Chron.* vi, 36.

har'ness, 1 hăr'nes; 2 hăr'nĕs, *vt.* **1.** To put the harness or pulling-gear on; attach by means of harness, as a horse or other draft-animal; as, dogs *harnessed* to a sledge; hence, to make ready for use; to urge to, or give (oneself) to, work. [Archaic.] To dress in or equip with armor as for war, as a man or horse.

The Philistines . . . *harnessed* their chariots. J. H. INGRAHAM *Throne of David* letter v. p. 148. (s. 1855. 1839.)

3. To fasten, as a whale, by a toggle-iron and tow-rope. **4†.** To furnish for defense; equip. [< OF. *harnascher*, < *harnas*; see HARNESS, *n.*] — **har'ness-er**, *n.*

har'ness, *n.* **1.** The equipment put upon a draft-animal, as a horse, dog, or goat, in order to attach it for work to a wheeled vehicle or a heavy implement or weight: in the case of a horse consisting of collar, traces, harnessesaddle, belly-band, head-stall, etc., the various parts being grouped under head-*harness*, breast-*harness*, and body-*harness*. **2.** Originally, the defensive armor of a soldier or of his horse, often including also his weapons.

HORSTIUS in his *harness*. Halting upon one knee.
MACAULAY *Horatius* st. 66.

3. Any arrangement or framework of straps, cords, etc., as for lifting or performing some mechanical operation; as, a loom-*harness*, an apparatus comprising the heddles which shift the sets of warp-threads alternately; a gymnast's lifting-*harness*. **4.** The fastenings of a great bell to its support, with the attached gear for ringing it. **5.** Figuratively, equipment for any business, or for the business of life; also, the requirements and regulations of business; as, to be in *harness*. — *Syn.* 1. *harness*. **6.** A ship's furniture. [< OF. *harnas*, < Br. *harnez*, armor, < *houarn*, iron.] SYN.: see CABLE. — **Bannister harness** (*Textile*), a harness for weaving broad designs in fine reeds on a little Jacquard loom. — **bod'y's har'ness**, *n.* A piece of a horse's harness including the belly-bands, breeching, crupper, and saddle. — **Cape h.** [S. Afr.], a harness limited to a breast-collar, neck-yoke, straps, and breeching, used in the Cape province. — **centered tie-h.** (*Weaving*), a means of using small patterns and large reeds; to get the greatest amount of effect in a Jacquard loom by using 2 ends, 3 ends, or more, to a dent. — **coupé h.**, a heavy single harness used for coupé carriages. — **double equal plain-tie h.**, a process of weaving plain fabrics with 2 harnesses and 2 reeds; a modification of the weaving of comber-boards. — **double-scale h.**, a loom-harness for weaving wide patterns by using small Jacquard cards. — **harness-room**, *n.* An apartment in a Jacquard loom-harness, for guiding the cords. — **h.-cask**, *n.* A cask on the deck of a vessel to receive the daily supply of salt meat. — **h.-hand**, *n.* A harness-maker. — **h.-hitch**, *n.* See illus. under KNOT. — **h.-hook**, *n.* **1.** A hook on which to hang harness. **2.** A check-rein hook on a gig-saddle. — **h.-maker**, *n.* — **h.-making**, *n.* — **h.-mares**, *n. pl.* Physical peculiarities produced by one's occupation, as the callousing of a composition's forefinger. — **h.-pad**, *n.* A soft pad beneath a harness-saddle to keep it from galling the animal. — **h.-pad-lock**, *n.* A padlock for fastening the straps and rings, used on the finer kinds of harness. — **h.-room**, *n.* — **h.-saddle**, *n.* The part of a draft-harness that rests across the animal's back, to which the breech is attached, and where are put the rein-terrets and check-line hook. — **h.-shaft**, *n.* A device for holding and guiding the heddles in a loom. — **h.-slip**, *n.* (*Weaving*) That part of the heddle-eye which regulates the crossing of the warp-thread. — **h.-snap**, *n.* A snap-hook suitable for use on draft-harness. — **h.-tub**, *n.* A harness-cask. — **head-h.**, *n.* **1.** The harness for a horse's head, which includes the bridle, lines, and check-rein. **2.** A padded helmet of leather, with earflaps and other attachments, designed to protect the head in athletics, football, horseback-riding, etc. — *Syn.* 1. *Wearing*. A loom which combines a Jacquard and heddles, both of which move independently the acting on the same threads.

Har'ness, Wil'liam (1/11/1778–21/5/1859). An Anglican divine; writer; editor of Shakespeare.

har'nessed,) 1 hăr'nest; 2 hăr'nĕst, *a.* Marked as if with
har'nest,) harness; as, a harnessed antelope, any of several African tragelaphine antelopes with striped markings, especially those of the genus *Tragelaphus*, including *T. scriptus* (the small guib) and *T. spekei* (the nakong). The females are redder in color than the males and are horniess. — **h. moth**, a tiger-moth (*Arctia phalerata*).

har'ne-ss-er, 1 hăr'ne-ər; 2 hăr'nĕs-er, *n.* [-ERS, 1 -ərz; 2 -ĕr, *pl.*] One who makes, sells, or repairs harness.

Har'ney, 1 hăr'ni; 2 hăr'ny, *n.* **1. William Selby** (?/1800–8/1859), a United States general in the Mexican, Indian, and Civil wars. **2.** A county in S. E. Oregon; 9,893 sq. m.; county-seat, Burns. Elevation, 4,150 ft.

Har'ney Lake. A lake in Harney county, Ore.; length, 10 m.; 2 m. high.

Har'ney Peak. A mountain in the Black Hills, S. Dak.; 7,216 ft. high.

harn'pan, 1 härn'pan; 2 härn'pan, *n.* [Old Eng. & Scot.] The brain-pan; skull.—**harns**, *n. pl.* Brains.

harn'ser, 1 härn'ser; 2 härn'ser, *n.* A heron. See HERONSEW.

harn'seyt.

ha'ro', 1 hā'rō'; 2 hā'ro', *interj.* [Channel Isls.] *Law.* A protest against injustice, preliminary to a court action.

Executors on oyer may sometimes not be a very peculiar exclamatory appeal called '*Ha! Ha!*' repeated thrice.

Channel Is., xxiii. 2d ed., 339. [M.]

Ha'rod, 1 hā'rŏd; 2 hā'rŏd, *n. Bib. Judges* vii, 1. [Heb., trembling.]

Ha'ro'dī, 1 ha-rō'dī; 2 ha-rō'di, *n. Bib.*

Ha'ro'dīte, 1 hā'rō-dīt; 2 hā'rō-dīt, *n. Bib. 2 Sam.* xxiii, 25.

Ha-ro'eh, 1 ha-rō'ē; 2 ha-rō'e, *n. Bib. 1 Chron.* ii, 52.

Har'old, 1 hăr'ŏld; 2 hăr'old, *n.* **1.** A masculine personal name. **2. Harold Fair-hair**, 1 hăr'ŏld fā'hār; 2 hăr'old fe'hār (*n.* 1140), a king of Norway; killed at Stamford Bridge. **3. Harfager** (— –9362), first historical king of Norway. [Teut., warrior strength.]

Har'o'mah, 1 ha-rō'mä; 2 ha-rō'mäh, *n. Bib.* (Doual).

Há'rom-szék, 1 hä'rōm-sāk; 2 hä'rōm-sĕk, *n.* A county in Transylvania, Roumania; 1,373 sq. m.

Ha'ro'peth, 1 ha-rō'pĕth; 2 ha-rō'peth, *n. Bib. 1 Chron.* xi, 27.

Ha-ro'seth, 1 ha-rō'sĕth; 2 ha-rō'sĕth, *n. Bib.* (Doual).

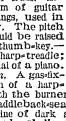
2. To play on or as on the harp. **3.** To pick, as on harpstrings. [< AS. *hearpian*, < *hearpe*, harp.] — **to harp on one string**, same as HARP, *vi.*, **1.**



harp, *n.* **1.** A stringed instrument of great antiquity, played with the fingers and both thumbs, and, whether of Egyptian, Persian, Celtic, or medieval origin, remarkable for its graceful lines and for its rich ornamentation. The **Egyptian harps** were large, richly ornamented, and had no front pillar, the **Assyrian harps** being similar, but having the sounding-board a square cut, the lower angle being utilized merely for the attachment of the strings. The **Gaelic harp** had a perpendicular body and curved front pillar which the neck, known as the *harmonic curve*, descended slightly to meet. The **Welsh h.**, while having a perpendicular body, is larger than the **Irish**, and has a longer front pillar. The first pedal mechanism was evolved by a Bavarian named Hochbrucker in 1720, thus making possible the production of the harp by raising each string one half-tone with the foot, thus leaving the hands free. The **modern orchestral double-action h.** is the result of the labors of Sebastian Erard, who introduced it in 1801. This instrument is tuned in C♭, but by taking the seven pedals in succession for the half-tone transposition, it can be played in C♭, D♭, Ab, E♭, Bb, F, and C♯, while by the next action of the pedals the rise of the whole tone is completed. The **Erard h.** is triangular in shape with a large hollow back to serve as the sounding-board, a perpendicular pillar, and a curved neck.

Jubal . . . was the father of all such as handle the *harp* and organ. *Gen.* iv, 21.
